Sampson Low, Marston & Company's Works

OF USE TO ALL INTERESTED IN THE NAVY

MODERN SHIPS OF WAR

By Sir EDWARD J. REED, M.P., late Chief Constructor of the British Navy, and EDWARD SIMPSON, Rear-Admiral U.S.N.; late President U.S. Naval Advisory Board.

With Supplementary Chapters and Notes by J. D. JERROLD KELLEY, Lieutenant U.S.N.
Illustrated with over 100 Engravings of the principal Battle Ships of England, France, United States, Italy, Germany, &c. Second Edition. Royal 8vo. cloth, 10s. 6d.

THE INFLUENCE OF SEA POWER UPON HISTORY, 1660-1783. By

Captain A. T. MAHAN, U.S. Navy. Third Edition, Demy 8vo cloth, gilt top, 18s.
"The author's matter is as absorbing as it is lengthy, and the whole budget of important facts which he has herein collected are set forth in a style both graceful and succinct. It may be confidently asserted that by everyone possessing in any degree a taste for the incidents and conditions of nautical warfare, the 540 pages of this book will be read with the greatest appreciation."—*Admiralty Gazette*.

The Physical Geography of the Sea and its Meteorology. By M. F.

MAURY, LL.D. Twentieth Edition. With New and Complete Index. Illustrated with numerous Charts and Diagrams. Crown 8vo, cloth, 6s.
The Physical Geography of the Sea is a new department of human knowledge. It has resulted from that beautiful and admirable system of physical research in which all the maritime nations have agreed to unite, and for the furtherance of which bureaux have been established, especially in Holland, England, France, and the United States.

Companion Work to "The Cruise of the 'Challenger.'"

Three Cruises of the "Blake." By ALEXANDER AGASSIZ, Director of the

Museum of Comparative Zoology at Cambridge, Mass. 2 vols., royal 8vo, fully illustrated, 42s.
The *Times* says:—"Professor Agassiz has to sustain the burden of a great and honoured name. Hitherto he has been little known beyond the select circles of science, where, however, he has gained for himself a reputation worthy of the name he bears. Solid evidence of the good work Professor Agassiz has been doing is now before the public. . . . It is impossible to speak too highly of the results of the three cruises with which Professor Agassiz deals."

The Cruise of H.M.S. "Challenger." By W. J. J. SPRY, R.N., F.R.G.S.;

voyages over many seas, scenes in many lands, with portraits, map, and numerous illustrations. New Edition, thoroughly revised, crown 8vo, 7s. 6d.

WORKS BY JULES VERNE.

In uniform 8vo. volumes, over 100 illustrations. Cloth, 7s. 6d. each; gilt edges, 9s. each.

- I. Exploration of the World.
- II. Great Navigators of the 18th Century.
- III. Great Explorers of the 19th Century.

SEA STORIES

By W. CLARK RUSSELL.

New and Cheaper Edition, in uniform crown 8vo. volumes, half-leather, gilt top, 3s. 6d. each.

An Ocean Free Lance.

The Frozen Pirate.

A Sea Queen.

The Lady Maud.

My Watch Below.

Jack's Courtship.

A Strange Voyage.

"That richly gifted chronicler of the great waters, Mr. W. Clark Russell, whose knowledge, imagination, and graphic power, each being excellent of its kind, unite in a marine style which has no modern parallel."—*Daily Telegraph*.

London: SAMPSON LOW, MARSTON & Company, Limited,
St. Dunstan's House, Fetter Lane, Fleet Street, E.C.

PREFACE.

THE Exhibition is divided into four Main Sections, viz. :—

ARTS, NAVIGATION, MODELS, AND ORDNANCE,

and these with their several Sub-Divisions are located in a series of Galleries, with each of which has been associated the name of some distinguished character in Naval History, viz. :—

The Franklin Gallery, containing the interesting and pathetic relics of the several Arctic Expeditions.

„ Nelson	„	}	„	probably the most interesting and valuable
„ Blake	„	}	„	collection of Art treasures and Relics ever
„ Benbow	„			brought together.
„ Howe	„	„	„	the “Miscellaneous Sub-Division” of the
				Exhibition.

„ Cook	„	„	the Exhibits relating to :—
			(a) The several branches of the Science of Navigation.
			(b) Boat Lowering and Life Saving.

„ Seppings	„	„	Models of Marine Engines, and a complete history of Naval Architecture, ocularly demonstrated, from the time of the “Great Harry” to the present day.
------------	---	---	---

„ St. Vincent Gallery	{	devoted to Naval Ordnance, Torpedoes, Diving Apparatus, Electrical Appliances for Naval purposes, materials used in Ship and Engine Construction, Armour Plates, &c.
„ Camperdown „		

In addition to the above there is a special gallery, which has been designated “The Armstrong” gallery, and which is entirely occupied by the wonderful exhibits of the great Elswick Firm (Sir Wm. Armstrong & Co.), and a series of smaller structures (Kiosks) are ranged about the grounds, containing the separate exhibits of the larger Shipbuilding and other Firms.

Throughout the Exhibition, endeavor has been made to so arrange the exhibits in chronological order as to at once convey to the visitor an idea of the gradual progress and development in all branches of Naval and Maritime matters ; and while the carrying out of such an arrangement does not readily lend itself to a *strict* classification for catalogue purposes, inasmuch as “Loan” and “Trade” exhibits, &c., cannot be kept distinct (in Sections) the one from

the other, it is believed that it will prove none the less interesting on that account.

In the compilation of this Catalogue the convenience of the visitor has always been kept in view, and while it purports to be a faithful record of the whole of the objects in the Exhibition, it has been arranged so as to serve the double purpose of Guide and Catalogue, in order that with this book as his *vade mecum* the visitor may be "personally conducted" so to speak from entrance to exit. Should the visitor desire to proceed at once to any particular Gallery or Section he will be directed thereto on consulting the Key on page xli.

Apart from the mere usefulness of the book as a Catalogue of the Exhibits, it is hoped that it may prove of interest in other directions. A series of articles has been written, which will be found preceding the principal sections (corresponding to the sections of the Exhibition) into which the book is divided, treating more fully of the particular subjects contained in those sections. To the Catalogue of the Arts Galleries has also been added a synopsis of the arrangement of Portraits, Battle Pictures, and Figure Subjects relating to prominent periods of British Naval History, as also a chronological list of the services of the Royal Navy, from the year 1512 to the present date, and brief biographical notices of the Officers whose portraits are exhibited, and notes on the battles depicted.

In the hurry and difficulties which are inseparable from the production of the first edition of this Catalogue, it is probable that errors may have crept in and been overlooked; it is believed however that these are not numerous or important, and in the meantime any intimation of corrections necessary to be made in future editions would be gladly received by

THE EDITOR.

Gordon House, Chelsea.

May, 1871.

GENERAL REGULATIONS.

1. The Exhibition will be opened about 1st May, and will remain open from 11 a.m. to 11 p.m. daily until about the end of October, 1891, excepting Sundays and any two Wednesdays which may be specially reserved.

2. The Exhibition will, as far as possible, be arranged in Sections, as follows :—

No. 1.

ARTS.—Oil Paintings, Water Colour Drawings, Engravings and Sketches, Naval Relics and Trophies, Manuscripts, &c.

No. 2.

NAVIGATION.—Hydrography { Chronometers.
Charts.

Compasses.	Marine Meteorology.
Arctic Section.	Sounding Machines.
Side and Masthead Lights	Patent Logs and
Flags.	Machines to Assist in Navigation.
Lighthouses and Beacons.	

No. 3.

MODELS.—Models of Ships and Boats and all Boat Lowering Apparatus and Marine Engines, Life Saving Apparatus, Steering Appliances, Engine Room Telegraphs, Signalling (electric or otherwise), Appliances for Extinguishing Fire, Electric Light Machinery, Steam Capstans and Windlasses, Air Compressing Machinery, Distillers and Evaporators, Materials used in Ship and Engine Construction, Machine Tools in Ship Yard and Engine Factories, Armour Plating, Miscellaneous.

No. 4.

ORDNANCE.—

- (1.) Working Models (full size) of a Barbette in present use in the Navy. Turret and Broadside Mountings.
- (2.) Torpedo Mountings, Boats, &c.
- (3.) Specimens or Models of every Gun (including Rapid Firing and Machine), Torpedo, Rifle, Pistol, &c., with their Ammunition and Stores, Method of Construction, &c., in use, or which have been used in the Naval Service.
- (4.) Specimens or Models of the System of Submarine Mining, Counter-mining, &c., in use in Naval Service.
- (5.) Illustrations of the various Systems of Diving.
- (6.) Illustrations of the application of Electricity to Naval Purposes, viz., Lighting, Gun Firing, Torpedo Discharging, &c., &c.
- (7.) Illustration (by models or otherwise) of Defence Against Torpedo and Gun Attack.

3. Outside the above Sections, all Applications for Space for Exhibits which are connected with maritime life will receive due consideration from the Committee.

4. Fulminates, explosives, and all dangerous substances are absolutely forbidden, and must be represented by models or dummies. Spirits, oils, essences, corrosives, and generally all substances which might spoil other articles or cause inconvenience can only be received in suitable vessels of small size.

5. The Executive Committee reserve the right of selling and publishing catalogues, guide books, handbills, printed matter, &c.

6. A duplicate copy of the List of Exhibits must be sent to the Hon. Sec. with the advice of the goods, to enable an extract to be made for the Catalogue.

7. No show cases or goods are to exceed the height of 10 feet. This rule is not intended to prevent the erection of special trophies, but designs thereof drawn to scale must, previous to their erection, be submitted to the Executive Committee. No partitions may be erected between the stands without permission, nor anything put up to shut out the sight of adjoining stands or to impede the general view throughout the Building.

8. Exhibits intended for sale must be clearly marked as to price, but cannot be removed until the close of the Exhibition.

9. All packages containing Exhibits must be marked R. N. E. together with the number of the Section for which they are intended, the space allotment number, and name and address of sender, and must reach the Exhibition not later than Saturday, April 4th. Space not occupied 7 days prior to the opening of the Exhibition will be otherwise allotted, and all payments made in respect thereof absolutely forfeited.

All Exhibits must have labels attached to them shewing the name of Exhibitor, and space allotment number.

To ensure uniformity these labels will be supplied on application to the Executive Committee.

10. All goods must be removed from the Exhibition Buildings and Grounds within 14 days after closing day, of which due notice will be given, or they will be liable to be removed and stored at the expense of the Exhibitor.

11. The right to amend, alter, add to, or expunge any of the regulations is reserved by the Executive Committee; and all who become Exhibitors shall be deemed to have signified, by so doing, their acceptance of, and agreement with, the whole of these regulations and such others as may from time to time be framed.

12. No Exhibit is to be sent in until its acceptance has been notified by the Executive Committee.

13. Application for Wall or Floor space, stating amount required, should be sent in by Monday, December 1st, 1890. The Executive Committee reserve full powers to accept or reject applications, and also to allot a portion only of the space applied for.

Where allotment of space is made, the charges must be paid at once, Cheques to be made payable to "Hon. Treasurer, Royal Naval Exhibition," and crossed "London and South-Western Bank, Limited."

14. All Exhibits will be briefly described in the Catalogue without charge.

15. Exhibitors will pay all expenses of conveying, delivering, arranging, fixing and removing their Exhibits, and also the cost of erection of all pictures, screens and counters, according to regulations. The flooring must not be cut without the permission of the Executive Committee. All show boards must have gold or white lettering on Navy-blue cloth. Exhibitors must personally or by a representative superintend the reception, unpacking, installation; and after the closing of the Exhibition, the removal of their goods. Exhibitors' representatives and workmen must comply with all orders issued by the General Manager.

Cases must be unpacked immediately on arrival, and empties removed from the Exhibition by and at the expense of the Exhibitor.

16. No Exhibitor will be allowed to transfer any allotment or portion thereof; or to allow any other than his own duly admitted Exhibits therein, except by the permission of the Executive Committee.

The Executive Committee reserve the right of doing whatever may be considered necessary at the expense of the Exhibitor, should any regulation be neglected.

17. The Executive Committee will not be responsible for the loss of, damage to, or safety of any exhibit, empty cases, tools, or other property of an Exhibitor or other person.

Exhibitors will effect their own insurance, or it may be effected at the Exhibitor's request and expense by the Executive Committee.

18. No article exhibited may be photographed, copied, drawn, or reproduced in any way without the permission of the Executive Committee.

19. Exhibitors will be required to keep their stands clean and in good order, and will be permitted to employ attendants for this purpose and to explain their exhibits. Such persons may receive orders for goods, but shall not solicit them to the annoyance of other Exhibitors, or the Public.

20. No article which has not been clearly described in the application form will be allowed in the Exhibition without the permission, in writing, of the General Manager; and the Executive Committee reserve the right to refuse or remove from the Exhibition; at any time, any article which may be deemed unsuitable or objectionable without assigning a reason, and, if necessary, to return any money for space, which shall exonerate them from any claim whatsoever on the part of the Exhibitor of the articles so refused or removed.

21. The charge for space will be five shillings per square foot, with a minimum charge of £2. Special arrangements will be made with all Exhibitors requiring large spaces.

22. The Executive Committee reserve to themselves power to modify or remit these charges under exceptional circumstances.

23. Except in such cases as may be specially agreed in writing, between the Executive Committee and the Exhibitor, the Executive Committee will not be responsible for loss or damage occurring from any cause whatsoever to any exhibit, or other property belonging to any Exhibitor or any other person.

COMPLIMENTARY LIST.

THE Executive Committee are indebted to the following Firms and Individuals for the loan and supply of articles used in the decoration and fitting up of the Exhibition Buildings, Offices, &c., as notified against their respective names :—

- | | |
|--|---|

W. H. Preece, Esq.

Lieut.-Colonel Charles H. Scafe, R.M.L.I.

A. J. R. Trendell, Esq., C.M.G.

W. H. White, Esq., C.B., F.R.S.

Admiral Sir G. O. Willes, K.C.B.

ARTS COMMITTEE.

Duties:—To attend to the Collection of Pictures, Relics, Manuscripts, Loan Collections, Naval Trophies, &c.

Chairman:—ADMIRAL SIR E. INGLEFIELD, K.C.B., F.R.S.

Vice-Chairman:—REAR-ADMIRAL W. R. KENNEDY.

Hon. Secretary:—MAJOR L. EDYE, R.M.L.I.

Members:—

F. Baden-Powell, Esq.
Lord Brassey, K.C.B.
Sir Oswald Brierley.
Captain Montagu Burrows, R.N.
W. Laird Clowes, Esq.
Major L. Edey, R.M.L.I.
Sir John Gilbert.
Admiral H.S.H. Prince Victor of Hohenlohe,
G.C.B.

Captain Lake, R.N.
G. T. Lambert, Esq.
Professor Laughton.
Sir Frederick Leighton, Bart., P.R.A.
Earl of Northesk.
Commander C. N. Robinson, R.N.
George Scharf, Esq., C.B.
P. H. Pridham Wippell, Esq.

ENTERTAINMENTS COMMITTEE.

Duties:—Out-door Amusements, Drills Aloft and Below, Music, Assaults-at-Arms, Sports, Aquatics, &c.

Chairman:—REAR-ADMIRAL N. BOWDEN-SMITH.

Vice-Chairman:—REAR-ADMIRAL W. R. KENNEDY.

Hon. Secretary:—CAPTAIN JEPHSON, R.N.

Members:—

E. Ashmead Bartlett, Esq., M.P.
Captain F. G. D. Bedford, R.N., C.B., A.D.C.
Commander W. H. Blount, R.N.
Lieutenant James Caulfield, R.N.
Captain Collins, R.N.
Rear-Admiral P. H. Colomb.
Commander Crawford Conybeare, R.N.
Rear-Admiral R. P. Dennistoun.
Augustus Harris, Esq.

Captain R. H. Harris, R.N.
Captain Atwell P. M. Lake, R.N.
Captain W. F. McIlwaine, R.M.L.I.
Rear-Admiral R. C. Mayne, C.B., M.P.
J. S. Moore, Esq., R.N.
Commander W. L. Morrison, R.N.
Captain E. B. Pusey, R.N.
John Rice, Esq., R.N.
Commander P. Scott, R.N.

FINANCE COMMITTEE.

Duties:—Banking Arrangements, Apportionment of Funds, Appointment of Paid Officials, Contracts or Agreements involving Finance.

Chairman:—SIR G. H. CHUBB.

Hon. Secretary:—CAPTAIN JEPHSON, R.N.

Members:—

R. D. Awdry, Esq.
W. E. Ball, Esq., LL.D.
Sir E. Birkbeck, Bart., M.P.
E. H. Carbutt, Esq.

A. B. Forwood, Esq., M.P.
Major W. M. Mackenzie.
Rear-Admiral R. C. Mayne, C.B., M.P.
Lieut.-Col. Charles H. Scafe, R.M.L.I.

MODELS, &c., COMMITTEE.

Duties:—To attend to and arrange Collection of Models, Engineering, Marine Electricity, Naval History.

Chairman:—ADMIRAL SIR T. BRANDRETH, K.C.B.

Vice-Chairman:—SIR N. BARNABY, K.C.B.

Secretary:—MR. G. R. DUNELL.

Members:—

H. O. Arnold-Forster, Esq.
Admiral H. Boys.
Lord Brassey, K.C.B.
Rear-Admiral P. H. Colomb.
Bryce Douglas, Esq.
James Dunn, Esq.
Rear-Admiral Francis Durrant, C.M.G., R.N.
A. J. Durston, Esq., R.N.
W. Eames, Esq.
F. Elgar, Esq., LL.D.
R. E. Froude, Esq., F.R.S.
Sir Edward J. Harland, Bart., M.P.
Rear-Admiral J. O. Hopkins.
R. Humphrys, Esq.

Captain E. F. Jeffreys, R.N.
C. McL. McHardy, Esq.
M. McIntyre, Esq., R.N.
F. H. Miller, Esq.
Rear-Admiral G. D. Morant.
David Robb, Esq., R.N.
H. Sandham, Esq.
Richard Sennett, Esq.
Sir Wm. Thomson, F.R.S.
John I. Thornycroft, Esq.
Captain F. S. Vander-Meulen, R.N.
W. H. White, Esq., C.B., F.R.S.
A. F. Yarrow, Esq.

NAVIGATION COMMITTEE.

Duties:—Hydrography, Compasses, Nautical Instruments, Arctic Sleighs, &c.,
Lighthouses, Beacons, Sounding Signals.

Chairman:—REAR-ADMIRAL P. H. COLOMB.

Vice-Chairman:—CAPTAIN C. A. WHITE.

Hon. Secretary:—CAPTAIN WASHINGTON, R.N.

Members:—

Captain Angove, R.N.R.
Lieutenant C. W. Baillie, R.N.
Captain L. A. Beaumont, R.N.
Sir James Douglas (Engineer of Trinity Board).
Commander G. Le C. Egerton, R.N.
W. J. A. Grant, Esq.
Commander R. Halpin, R.N.R.
Captain J. P. Maclear, R.N.
Captain A. H. Markham, R.N., A.D.C.
Clements R. Markham, Esq., C.B.
Captain W. W. May, R.N.
Captain Mayes, R.N.
Admiral Sir F. L. McClintock, F.R.S.
M. McIntyre (Inspector Machinery, R.N.)

Rear-Admiral Sir Geo. Nares, K.C.B., F.R.S.
Staff-Commander Wm. Pearce, R.N.
Captain Pender, R.N.
Admiral Sir A. Phillimore, K.C.B.
Admiral Sir G. H. Richards, K.C.B., F.R.S.
R. H. Scott, Esq., F.R.S.
Rear-Admiral H. F. Stephenson, R.N., C.B.
Captain Sutton, R.N.
Sir Wm. Thomson.
Captain H. Toynbee, F.R.A.S.
Captain G. B. Vyvyan, R.N.R.
Sir Sydney Webb, K.C.M.G.
Captain Wharton, R.N., F.R.S.
Sir Allen W. Young, C.B.

ORDNANCE COMMITTEE.

Duties:—Guns and Warlike Stores, Torpedoes, Submarine, Mining, Explosives.

Chairman:—REAR-ADMIRAL H. F. CLEVELAND.

Vice-Chairman:—ADMIRAL H. BOYS.

Hon. Secretary:—LIEUTENANT E. P. BECHERVAISE, R.N.

Members:—

Sir Frederick A. Abel, C.B., F.R.S.
Dr. W. Anderson.
Rear-Admiral G. Stanley Bosanquet.
R. J. Butler, Esq.
Earl Cairns.
E. H. Carbutt, Esq.
Captain H. J. Carr, R.N.
Colonel J. F. Crease, R.M.A., C.B.
Rear-Admiral C. E. Domville, R.N.
Captain J. Durnford, R.N., D.S.O.
Rear-Admiral J. A. Fisher, C.B.
Captain H. H. Grenfell, R.N.

Captain E. F. Jeffreys, R.N.
Vivian B. Lewes, Esq.
Commander E. W. Lloyd, R.N.
Lieutenant G. R. Maltby, R.N.
General Noble, R.A. (Waltham Abbey).
Captain H. L. Pearson, R.N.
Rear-Admiral Morgan Singer
Vice-Admiral T. Le H. Ward, C.B.
Vice-Admiral Hon. W. J. Ward.
Lieutenant Wells, R.N.
Captain S. M. Eardley-Wilmot, R.N.
Commander F. C. Younghusband.

REFRESHMENTS COMMITTEE.

Chairman:—H. F. R. YORKE, ESQ.

Hon. Secretary:—CAPTAIN JEPHSON, R.N.

Members:—

R. D. Awdry, Esq.
E. Ashmead Bartlett, Esq., M.P.
Major Malet, R.A.

Fleet-Paymaster J. S. Moore, R.N.
Commander F. Pitt, R.N.
John Rice, Esq., R.N.

WORKS AND BUILDINGS COMMITTEE.

Duties:—Custody of Buildings and Grounds, Erection of Buildings and all Structures,
Laying-out of Grounds, Allocation of Space, Precautions against Fire.

Chairman:—ADMIRAL SIR G. O. WILLES, K.C.B.

Vice-Chairman:—ADMIRAL SIR J. CORBETT, K.C.B.

Hon. Secretary:—CAPTAIN JEPHSON, R.N.

Members:—

John Aird, Esq., M.P.
R. D. Awdry, Esq.
E. Ashmead Bartlett, Esq., M.P.
Rear-Admiral Lindesay Brine.
E. H. Carbutt, Esq.
Captain Sir J. Colomb, R.M.A., K.C.M.G., M.P.
J. F. Creswick, Esq.
Admiral Sir E. Inglesfield, K.C.B., F.R.S.

Rear-Admiral W. R. Kennedy.
C. McL. McHardy, Esq.
Major Pilkington, R.E.
W. H. Preece, Esq.
Captain Pusey, R.N.
Lieutenant-Colonel Scafe, R.M.L.I.
Captain Eyre M. Shaw, C.B.

In addition to the Standing Committees above, the following Special Committees were also appointed to deal with the special subjects noted against each

SPECIAL COMMITTEES.

Arts (General Purposes).

Rear-Admiral W. R. Kennedy.
Professor Laughton.
W. Laird Clowes, Esq.
Commander Robinson, C.N., R.N.
F. Baden-Powell, Esq.

Electric Lighting.

W. H. Preece, Esq. (Chairman).

WEEKLY OUTPUT EXCEEDS 2,000 TONS.

The Engineer.

ESTABLISHED 1856.

PUBLISHED WEEKLY. PRICE 6d., by post 6½d.

In addition to matters of Engineering and Scientific interest generally, "The Engineer" devotes especial attention to Naval matters, Naval Architecture and Armament, and Marine Engineering, both British and Foreign. As instances, the following War Ships have recently been illustrated and described:—

BRITISH.

H.M.S. *Australia* (Belted Cruiser), 7th Dec., 1888.
H.M.S. *Victoria* (1st Class Battle Ship), 15th Feb., 1889.
H.M.S. *Edinburgh* (1st Class Battle Ship), 5th April, 1889.
H.M.S. *Benbow* (1st Class Battle Ship), 7th June, 1889.
H.M.S. *Inflexible* (1st Class Battle Ship), 2nd Aug., 1889.

H.M.S. *Collingwood* (1st Class Battle Ship), 4th Oct., 1889.
H.M.S. *Imperieuse* (Armoured Cruiser), 31st Jan., 1890.
H.M.S. *Trafalgar* (1st Class Battle Ship), 25th April, 1890.
H.M.S. *Medusa* (2nd Class Protected Cruiser), 4th July, 1890.

FOREIGN.

Piemonte, 26th April, 1889.
Italia, 9th Aug., 1889.
Goito and Duilio, 6th Sept., 1889.

Vesuvio, 15th Nov., 1889.
Friedrich der Grosse, 17th Jan., 1890.
25 de Mayo, 28th Nov., 1890.

Nearly all the above illustrations are double page supplements, which can still be had. "The Engineer" contains probably the most complete and accurate history of all armour plate trials which have ever taken place both in this country and abroad. These descriptions are fully illustrated chiefly from photographs and sketches made on the spot.

Amongst the more recent and important of these trials, the following may be cited:—

ARMOUR PLATE TRIALS.

Swedish Trials of Schneider's Steel Armour, 1st Feb., 1889.
Compound and Steel Plates, and effects of Projectiles, 12th July, 1889.
Dutch Competitive Trials of Armour Plates, 22nd Nov., 1889.
Artillery Experiments at Buckau and Tangerhuett, 3rd and 10th Oct., 1890. (Reprinted in pamphlet form, 1s. 3d., post free.)
Annapolis Competitive Armour Trials, 17th Oct., 1890.
St. Petersburg Competitive Trials, 21st Nov., 1890.
Russian Armour Competition, 9th Jan., 1891.
Trial of Cammell Plates for the Argentine Government, 13th Feb., 1891.

ARTILLERY, &c.

All improvements in Ordnance, and their means of protection, Small Arms, Torpedoes, &c., are fully illustrated and described.

ELECTRIC LIGHTING.

A considerable section of this Journal is devoted to illustrated descriptions of installations opened for this purpose.

RATES OF SUBSCRIPTION.

Foreign Subscriptions for Thin Paper Copies will, until further notice, be received at the rates given below:—Foreign Subscribers paying in advance at the published rates will receive "The Engineer" weekly and post free. Subscriptions sent by Post Office Order must be accompanied by letter of advice to the Publisher. Thick Paper Copies may be had, if preferred, at increased rates.

Remittance by Post Office Order.—Australia, Belgium, Brazil, British Columbia, British Guiana, Canada, Cape of Good Hope, Denmark, Hawaiian Islands, Egypt, France, Germany, Gibraltar, Italy, Malta, Natal, Netherlands, Mauritius, New Brunswick, Newfoundland, New South Wales, New Zealand, Portugal, Roumania, Switzerland, Tasmania, Turkey, United States, West Coast of Africa, West Indies, Cyprus, £1 16s. China, Japan, India, £2 os. 6d.

Remittance by Bill on London.—Austria, Buenos Ayres and Algeria, Greece, Ionian Islands, Norway, Panama, Peru, Russia, Spain, Sweden, Chili, £1 16s.; Borneo, Ceylon, Java, and Singapore, £2 os. 6d.; Manilla, Sandwich Isles, £2 5s.

For the convenience of Officers on Foreign Service it may be stated that under a subscription at the rate of £2 5s. od. per annum "The Engineer" can be forwarded to any part of the world, and will not be liable to further charge for re-direction from any country in the Postal Union to another so placed. In the case of Naval Officers abroad, "The Engineer" is forwarded to the addresses of Ships as furnished to the Post Office by the Admiralty, and, if re-directed, no further charge is made.

OFFICE OF "THE ENGINEER," 163, STRAND, LONDON, W.C.

INTRODUCTION.

THE possibility of holding an Exhibition illustrative of the history development and progress of the Navy was first discussed in the autumn of 1890, and, as an essential preliminary, H.R.H. the Duke of Edinburgh undertook to ascertain the wishes of H.R.H. the Prince of Wales on the subject.

His Royal Highness not only signified his approval of the project, but accepted the Presidency of the Council, and promised to support the movement by every means in his power, a promise which has been fulfilled in the most ample and literal sense.

In presiding over a meeting held on the 5th February, 1891, at the Royal United Service Institution, of the Council and others associated with the proposed Exhibition, His Royal Highness again expressed his cordial approval of the undertaking, and remarked that, in his opinion, it was the bounden duty of every Englishman to do his utmost to increase the popularity of the Navy, an object which he considered the proposed Exhibition was well calculated to fulfil.

Her Majesty the Queen and the Duke of Edinburgh also gave powerful and practical proof of their sympathy with the movement, not only by their patronage but by placing at the disposal of the Arts Committee many objects of great interest and value, and in this their example has been emulated by the Prince of Wales; the Duke of Edinburgh, moreover, in his capacity as Naval Commander-in-Chief at Plymouth, has not only assisted in the work of the Central Committee, but has organised a local movement, of which the results can be best judged by an inspection of the Exhibition itself.

The project having thus assumed a practicable shape a Committee was formed under the presidency of Admiral Sir William Dowell, K.C.B., with Admiral Sir W. Houston Stewart, G.C.B., as Vice-Chairman. H.R.H. the Duke of Edinburgh was present at the first meeting of the General Committee, which was held at the Admiralty on the 16th September, 1890.

The object of the Exhibition having been defined, the most important question which presented itself for immediate settlement was that of a suitable site. The relative merits of several were

fully discussed, and it was at length decided to accept an offer made by the Commissioners of Chelsea Hospital of the site about to be vacated by the Military Exhibition.

A special feature of the proposed Exhibition, in connection with the outdoor entertainments, being the evolutions of Blue-jackets and Naval drills and exercises, requiring considerable scope, arrangements were made to acquire an additional tract of land; the Naval Exhibition, therefore, occupies a space nearly eight acres in extent larger than its predecessor.

Notwithstanding the additional accommodation thus afforded there has been no difficulty in obtaining a sufficient number of exhibits; on the contrary, it has been necessary to subject the offers that have been made to a drastic course of weeding and many objects which might legitimately have claimed a place in such an Exhibition have been unavoidably excluded, in order to afford room for others of still greater or more general interest.

It was, at the outset, decided that the Exhibition should be restricted to purely national objects. The exigencies of space, apart from other considerations, rendered it imperative to exclude foreign exhibits. It was also decided that any surplus funds arising from the Exhibition should be placed in the hands of Trustees to form the nucleus of a Benevolent Fund for the benefit of the widows and relatives of persons whose deaths are attributable to the Naval Service.

Negotiations were entered into which resulted in the acquirement for the purposes of the Naval Exhibition of the buildings specially erected in 1890 for the use of the Royal Military Exhibition; these were for the most part well adapted to the purpose, but, as will be seen by those familiar with the site, it has been necessary to re-arrange and in several instances to supplement them.

A guarantee fund was formed, which met with ready support; the Exhibition was registered under the title of "The Royal Naval Exhibition, 1891" and Sub-Committees were formed to deal with the various heads into which such an undertaking naturally divided itself.

The formation of a Local Committee at Devonport under the presidency of H.R.H. The Duke of Edinburgh has already been referred to. Similar organizations were effected at Portsmouth and Sheerness by the Naval Commanders-in-Chief, Admiral Sir J. E. Commerell, V.C., K.C.B. and Vice-Admiral Curme respectively. It is difficult to speak too highly of the work performed by these Committees; not only were the duties and

responsibilities of the Central Committee thereby sensibly diminished, but the local interest evolved resulted in the production of many objects of great historical interest which might otherwise have easily escaped discovery.

The Committee desire to record the great obligations they have been placed under by Sir Albert Rollit, M.P., who has acted as Honorary Solicitor and also to express their gratitude to Messrs. Ogden, Palmer, and Langton for their services as Honorary Accountants ; to Mr. Follett Pennell, the Honorary Auditor ; and to the London and South Western Bank, for the facilities afforded them in financial matters.

The ancient British name of Britain, "Clas Merdin," the "sea defended green spot," shows the importance attached, even at that early date, to our insular position and, as a natural sequence, to our "first line of defence."

The earliest British ships were probably coracles constructed of twigs covered with ox hides, capable of containing three or four people and, in summer, of passing over to Ireland or across the Channel.

There are but few pictorial representations of British or Norman vessels before the 11th Century, but, so far as can be ascertained, the ships of the Saxon period were nothing but large undecked boats, never exceeding 50 tons burthen, and capable of carrying from 50 to 60 men. The poop and stern were elevated, they had one mast only, and were steered by paddles fixed to the quarter, the modern rudder not having been generally adopted until the end of the 13th Century ; when not in use they were drawn up on shore.

The necessity of repelling the attacks of the East Anglians and Northumbrians induced Alfred to build "long ships," which had the merit of being swifter, steadier and higher than those previously in use.

The reign of Alfred forms a landmark in Naval History, as he was the first English sovereign who commanded the fleet in battle, and may therefore be described as the first admiral. After his death the Navy fell into great decay but his great grandson, Edgar, is said, on doubtful authority, to have claimed the title of "King of the Seas ;" but, however this may be, he may legitimately be considered to have originated the idea of "annual manœuvres" which thus leap at once to a respectable antiquity ; his practice was

every year to divide his fleet into two divisions, and circumnavigate the coast to prevent the incursions of pirates and "to train his people to war."

Canute owed his crown to the Navy, having been chosen king by the fleet ; probably a unique instance of such a power being exercised by the Navy.

Originally, no doubt, the ships, such as they were, were used indiscriminately for war or commerce, but from an ordinance of Ethelred (978—1016), it appears that at that time there were already two distinct kinds of ships, those used for war being considered the property of the king. They were fitted out and manned by cities and towns according to an established rate, aided by a special tax or a grant from the king's revenue, *e.g.*, if the king sent ships to sea twenty shillings were collected from every burgess of Lewes for the wages of the crews, and when the king went on an expedition twenty of the burgesses of the City of Oxford had to attend him or pay a fine of £20. By degrees the commercial duties of the fleet became subordinated to the military, but even after the institution of "king's ships" as a distinct and permanent force it was occasionally the practice to hire them out for commercial purposes in time of peace, and as late as the time of Henry VII. we find this convenient method of reducing the Navy Estimates resorted to.

The part played by the Navy in the attempt to repel the invasion of William the Norman is somewhat obscure ; it is known that during the months in which the flotilla intended for the conveyance of the invaders was being collected, Harold kept the seas with a considerable fleet, but that before the actual crossing took place he was compelled to disband the whole or a considerable part on account of want of supplies. This fleet was largely composed of vessels furnished by the Cinque Ports under their charters, and it is possible that the ships belonging to Romney were retained in commission and that they did good service, for it is somewhat grimly recorded that the first thing William did after his victory was to march to Romney, where "he took what vengeance he would for the slaughter of his men."

Until the early part of the fourteenth century the "king's ships" were a mere skeleton force which required to be largely supplemented in time of war ; the chief source of Naval strength lay in the ships which the Cinque Ports were bound by their charters to furnish. These towns—Hastings, Sandwich, Dover, Romney and Hythe—to which Winchelsea and Rye, officially known as "the two ancient towns" were added soon after the Conquest—furnished,

in all, 57 ships, the complements of which, according to the Port Domesday Book, were a "rector" or master, a "constable" or boatswain, 21 men and a boy.

For upwards of a century the history of the Cinque Ports is practically the history of the British Navy, so much so that the ships furnished by that confederation are frequently styled in the old records "the Royal Navy of the Cinque Ports."

According to the representations in the Bayeux Tapestry and other records, the ships of the eleventh, twelfth and thirteenth centuries were partially decked vessels of about 20 tons burthen, rigged with one mast and one large sail; they were considerably curved at bow and stern, and when employed as fighting ships were fitted with "castles" (hence "forecastle") at either end; there was a smaller "castle," corresponding to the modern "top," on the top of the mast; the ships were fitted with strong bows to enable them to ram the enemy, a favourite manœuvre; as to arms, each sailor was required to provide himself with two spears, one of them sufficiently long to reach from one vessel to another, and these he was directed to be careful not to lose in throwing; his other offensive weapons were scythes fixed to long poles, axes, slings fitted to stalls, barbed darts, stones for heaving and a bow; his defensive armour consisted of a thick breastplate of linen and a steel cap.

The confederation of the "Cinque Ports" was at the height of its power during the reigns of John, Henry III., and Edward I.; but as the greed of colonisation awoke, the sphere of Naval operations enlarged; commerce opened out in all directions, and the Ports gradually lost their exclusive privileges. They still bore their share, and an important one, in the great victory of Sluys; but the conclusion of the reign of Edward III. saw their decay already far advanced. Those who would investigate further the causes of this decay will find them discussed at length in Professor M. Burrows's recent "History of the Cinque Ports." Gradually, under the fostering care of Henry V., Edward IV., and the 7th and 8th Henrys, a permanent and extensive King's Navy was formed, and the functions of the Cinque Ports subsided into the duty of transporting Royal personages across the Channel.

Victories such as that of Sluys, although won at sea, were not Naval victories in the modern sense of the term—they were won after hand to hand fights between soldiers embarked for the occasion, led by officers who fought on sea or land indifferently, as occasion required.

The foundations of the present system of a body of officers and men trained exclusively for the service of the Royal Navy, were laid by Henry VIII., who created the Navy Office and the Trinity House, and the dockyards at Portsmouth, Deptford and Woolwich, but the *personnel* of the Royal Navy was not regulated on its present lines until the time of the Stuarts, the first regulations for the examination for the rank of Lieutenant having been established in 1677.

The exigencies of space render it impossible to do more than glance at the vicissitudes which the Navy has undergone since the reign of Henry VIII., the weakness to which it was reduced under the rule of Edward VI. and Queen Mary, the efforts made by Queen Elizabeth to restore it to an adequate strength, efforts which were in no small degree assisted by the confidence inspired by the brilliant exploits of Drake in his laudable endeavours to "sing the King of Spain's beard," and which bore their fruit in the marvellous defeat of the Armada ; the degradation and decay into which it fell during the reign of Charles II. when Pepys reported that the naval administration was a prodigy "of wastefulness, corruption, ignorance, and indolence, that no estimate could be trusted, that no contract was performed, that no check was enforced." From such a picture we gladly turn to the record of the heroic courage of Sir Richard Grenville, the victories of Blake, Benbow, Howe, Rodney, St. Vincent, Boscawen, Duncan, Hawke and Nelson ; the adventurous voyages of Cabot, Frobisher, Raleigh, Drake, Anson, Cook, Byron and Franklin ; the brilliant exploits of Cochrane and Sir Sidney Smith and the constructive genius of Pett and Seppings.

Nor is any record necessary beyond the recital of their names, "by their fruits ye shall know them."

It is not too much to say that never before has such a collection of mute but glorious witnesses to England's Naval Supremacy been gathered together, and in gazing at them it will be well to bear in mind the words of Sir Walter Raleigh :—"England is a and which can never be conquered whilst the kings thereof keep the dominion of the sea."

THE SECRETARY, York House, Regent Street, S.W.

Telegraphic Address—"SUPPLIES, LONDON."

"It is on the Navy under the Good Providence of God, that our Wealth, Prosperity, and Peace Depend,"

These words have been inscribed above the Main Entrance to the Exhibition Buildings, and have been adopted as the motto in connection with the Exhibition. The sentence itself has been adapted from the preamble to the Naval Discipline Act (29 & 30 Vict. Cap. CIX.) better known as "The Articles of War," and it would be difficult to frame anything more appropriate to the Exhibition itself, or more in accordance with the glorious traditions and history of that great Service which has called the Exhibition into existence.

THE TROPHY

Facing the main entrance has been erected from a design by Mr. Spanton, of H.M.S. "Britannia."

The idea is to show on one side ancient, and on the other modern, weapons of war, &c., as used on board ship, while the figure of Britannia connects the past with the present.

The statue was modelled by Mr. W. C. May for the Armada Memorial at Plymouth, and the cast has been kindly lent by him, together with the bas-reliefs on the pedestal.

The arms, &c., have been arranged by Mr. Rice of the Ordnance Wharf, Portsmouth, by whom also the pillars in front of the Trophy have been decorated.

BRITISH SEA COMMERCE AND NAVAL RESPONSIBILITIES.

The attention of the visitor, on entering, is drawn to the two diagrams on the wall on his right, which have been prepared by Captain Sir John Colomb, R.M.A., K.C.M.G., M.P.

1. Showing British Sea Commerce and Naval Expenditure.

(a) At date of Trafalgar (1805).

(b) At the Accession of Queen Victoria (1837).

(c) At the present time (1891).

2. Showing present Sea Commerce and Naval Expenditure of Foreign Countries and Greater Britain.

On the left of **THE TROPHY** is the

FRANKLIN GALLERY

which is devoted to the

ARCTIC SUB-DIVISION OF THE NAVIGATION SECTION.

In this Sub-Division is shown a complete collection of interesting relics from the ill-fated expedition under Sir John Franklin, which have been kindly lent by the Lords Commissioners of the Admiralty, the Council of the Royal United Service Institution, and various Private Individuals.

- 1 **The Polar Spirit.** This Work of Art in Sculpture is an ideal representation, life size, of the Spirit of Arctic Research. The figure holds in her hand a compass, the guiding principle of all Navigation.
Lent by F. Junck.

FRANKLIN RELICS.

- 2 **Franklin Relics obtained by the Expeditions under Captain Austin, R. N., C. B., and under Captain William Penny. 1850-'51.**

From Beechey Island—Pole, with a rudely-made Iron Rake, probably intended to rake up something from under water.

A Bottle. These were the first traces of the Missing Expedition :—An Anvil Block, scraps of Leather and Wood, a piece of Copper, Salt Meat Bones ; part of a Hat, from which gun wads had been cut ; fragments of Clothing, Carpet, Towelling, Flannel, and Canvas.

- 3 **Obtained by the Expedition under Captain Sir Edward Belcher, R. N., C. B. 1852-'54.**

From about Beechey Island—Fragments of Glass, broken Bottles, pieces of Wood, pieces of Charred Wood, Leather, Cork, Tobacco Pipe, Carpet, Bones, and a Percussion Cap.

- 4 **Obtained by the Expeditions under Captain Collinson, R. N., C. B., and under Dr. John Rae. 1852-'54.**

Glass with silver top, from a Dressing Case obtained by Dr. Rae from the Esquimaux near Repulse Bay.

The Eye-rim of a Telescope. A Gimlet.

An Iron Implement, purchased by Captain Collinson from the natives of Cambridge Bay.

A piece of Cast Steel, maker's name "R. Thomas," converted into an implement for scraping and dressing skins by the Esquimaux.

Blade of a Knife, converted into a Snow Knife ; a Fuzee Box ; part of a ship's cutlass.
Dr. Rae.

- 5 **A Glass Case containing Relics brought home by Dr. Rae in the year 1854.**

Eight portions of Silver Watches (cases). 3 Knives complete and 1 Blade. 1 Ice Scraper. 1 piece of a Flannel Shirt. 13 large Silver Forks. 1 Ebony Box. 4 portions of a Gold Watch. 4 plain Brass

5—continued.

Buttons. 1 Appendage of a Gold Chain. 1 Medal with Crown (the Order of Hanover). 1 Student's Manual (379). 1 piece of Gold Chain. 3 Gilt Buttons. 1-part of a Chronometer. 2 Silver Pencil Cases. 5 large Silver Spoons. 1 small Silver Fork. 1 small Telescope. 1 lid of Compass Box. 1 small Brass Lid. 1 Wheel of a Watch. 1 Compass Box. 5 small Silver Spoons. 1 Handle of a Knife (Hickey). 2 Tin Cases. 1 piece of Gold Lace, with strip of Reindeer skin attached thereto. 1 Medallion, with Sir John Franklin's name on it. 1 portion of a Sheath Knife.

There are also in this Case a Silver Watch formerly belonging to Captain Crozier, of H.M.S. "Terror;" and a Steel Pen and Case used by Sir John Ross in writing his Polar Expedition Journal.

6 Obtained by the Canoe Expedition under Messrs. Anderson & Stewart at the mouth of the Great Fish River, in 1855.

Part of a tripod stand, for a magnetic instrument or Theodolite, with the ring for confining its legs.

Boats' rudder irons, thimble of a boat's sails, and a hook for ditto. Iron hinges and part of copper ditto.

Pieces of mahogany, oak, elm, and pine which had formed part of a boat of the missing expedition; found below the rapids, a cold chisel, a tomahawk, and small pieces of rope and bunting.

Relics brought to England in the "Fox" and deposited in the Museum of The United Service Institution by the Admiralty.

7 Relics brought from the boat found in lat. 69° 08' 43" N., long. 99° 24' 42" W., upon the West Coast of King William Island, May 30, 1859:—

Two double-barrelled guns, one barrel in each is loaded. Found standing up against the side in the after part of the boat.

A small Prayer Book; cover of a small book of "Family Prayers;" "Christian Melodies," an inscription within the cover to "G. G." (Graham Gore?); "Vicar of Wakefield;" a small Bible, interlined in many places, and with numerous references written in the margin; a New Testament in the French language.

Two table knives with white handles—one is marked "W. R.;" a gimlet; an awl; two iron stanchions, 9 in. long, for supporting a weather cloth, which was round the boat.

Twenty-six pieces of silver plate—11 spoons, 11 forks, and 4 teaspoons; 3 pieces of thin elmboard (tingles) for repairing the boat, and measuring 11 in. by 6 in., and 3-10ths inch thick.

Piece of canvas:—Bristles for shoemaker's use, bullets, short clay pipe, roll of waxed twine, a wooden button, small piece of a port-fire, two charges of shot tied up in the finger of a kid glove, fragment of a seaman's blue serge frock. Covers of a small Testament and Prayer Book, part of a grass cigar-case, fragment of a silk handkerchief, thread-case, piece of scented soap, three shot charges in kid glove fingers, a belted bullet, a piece of silk pocket handkerchief. Two pairs of goggles, made of stout leather and wire gauze, instead of glass; a sail-maker's palm, two small brass pocket compasses, a snooding line rolled up on a piece of leather, a needle and thread case, a bayonet scabbard altered into a sheath for a knife, tin water bottle for the pocket, two shot pouches (full of shot).

7—*continued.*

Three spring hooks of sword belts, a gold lace band, a piece of thin gold twist or cord, a pair of leather goggles with crape, instead of glass, a small green crape veil.

Two small packets of blank cartridge in green paper, part of a cherry-stick pipe stem, piece of a port-fire, a few copper nails, a leather boot-lace, a seaman's clasp-knife, two small glass-stoppered bottles (full), three glasses of spectacles, part of a broken pair of silver spectacles, German-silver pencil case, a pair of silver (?) forceps, such as a naturalist might use for holding or seizing small insects, &c. ; a small pair of scissors rolled up in blank paper, and to which adheres a printed Government paper, such as an officer's warrant or appointment ; a spring hook of a sword belt, a brass charger for holding two charges of shot.

A small bead purse, a piece of red sealing-wax, stopper of a pocket flask, German-silver top and ring, brass matchbox, one of the glasses of a telescope, a small tin cylinder, probably made to hold lucifer matches ; a linen bag of percussion caps of three sizes, a very large and old-fashioned kind, stamped "Smith's patent ;" a cap with a flange similar to the old musket caps used by Government, but smaller ; and ordinary sporting caps of the smallest size.

Five watches.

A pair of blue glass spectacles, or goggles, with steel frame, and wire gauze encircling the glasses, in a tin case.

A pemmican tin, painted lead colour, and marked "E." (Erebus) in black. From its size it must have contained 20 lb. or 22 lb.

Two yellow glass beads, a glass seal with symbol of Freemasonry.

A 4-in. block, strapped, with copper hook and thimble, probably for the boat's sheet.

8 Relics found about Ross Cairn, on Point Victory, May and June, 1859.

A 6-inch dip circle by Robinson, marked I 22. A case of medicines, consisting of 25 small bottles, canister of pills, ointment, plaster, oiled silk, &c. A 2-foot rule, two joints of the cleaning rod of a gun, and two small copper spindles, probably for dog-vanes of boats. The circular brass plate broken out of a wooden gun-case, and engraved "C. H. Osmer, R.N." The field glass and German silver top of a 2-foot telescope, a coffee canister, a piece of a brass curtain rod. The record tin and the record, dated 25th of April, 1848. A 6-inch double frame sextant, on which the owner's name is engraved, "Frederick Hornby, R.N."

9 Found in a small cairn on the south side of Back Bay :—

A tin record case and record.

10 Relics obtained at the Northern Cairn, near Cape Felix, May, 1859 :—

Fragments of a boat's ensign, metal lid of a powder-case, two eye pieces of sextant tubes, brass button ; worsted glove, colours red, white, and blue ; bung-stave of a marine's water keg or bottle, brass ornaments to a marine's shako ; brass screw for screwing down lid, also a copper hinge of the lid of powder-case ; a few patent wire cartridges containing large shot ; part of a pair of steel spectacles, glass being replaced by wood, having a narrow slit in it ; two small rib bones, probably out of salt pork ; six or eight packets of needles ; small flannel cartridge containing an ounce of damaged powder ; a small, roughly made copper

10—*continued.*

apparatus for cooking ; some brimstone matches. Piece of white paper folded up found in the North Cairn, two pike heads, narrow strip of white paper, found under one of the tent places ; their tent places were within a few yards of the cairn.

From beside a small cairn, about three miles north of Point Victory, an empty tea or coffee canister.

11 Relics obtained from the Boothian Esquimaux, near the Magnetic Pole, in March and April, 1859 :—

Seven knives made by the natives out of materials obtained from the last expedition, one knife without a handle, one spear-head and staff (the latter has broken off), two files ; a large spoon or scoop, the handle of pine or bone, the bowl of musk-ox horn ; six silver spoons and forks, the property of Sir John Franklin, Lieutenants H. D. Vescomte and Fairholme, A. M'Donald, Assistant-Surgeon, and Lieutenant E. Couch (supposed from the initial letter T and crest, a lion's head) ; a small portion of a gold watch-chain, a broken piece of ornamental work apparently silver gilt, a few small naval and other metal buttons, a silver medal obtained by Mr. M'Donald as a prize for superior attainments at a medical examination in Edinburgh, April, 1838 ; some bows and arrows, in which wood, iron, or copper has been used in the construction—of no other interest.

12 Relics obtained from the Esquimaux near Cape Norton, upon the East Coast of King William Island, in May, 1859 :—

Two tablespoons ; upon one is scratched "W. W.," on the other "W. G.;" these bear the Franklin crest ; two table forks, one bearing the Franklin crest, the other is also crested, probably Captain Crozier's ; silversmith's name is "I. West" ; two teaspoons, one engraved "A. M. D." (A. M'Donald), the other bears the Fairholme crest and motto ; handle of a dessert knife, into which had been inserted a razor (since broken off) by Millikin, Strand.

Found lying about a skeleton, 9 miles eastward of Cape Herschel, 26th May, 1859 :—Black silk neckerchief ; fragments of a double-breasted blue cloth waistcoat, with covered silk buttons, and edged with braid ; a scrap of a coloured cotton shirt, silk covered buttons of blue cloth great-coat, a small clothes brush, a horn pocket-comb, a leathern pocket-book, which fell to pieces when thawed and dried ; it contained 9 or 10 letters, a few leaves apparently blank.

From beside an Esquimaux stone-mark, on the east side of Montreal Island :—Part of a preserved meat tin, painted red ; part of the rim of some strong copper case or vessel ; pieces of iron hoop, two pieces of flat iron, an iron hook bolt, a piece of sheet copper.

13 Contents of Boat's Medicine Chest :—

One bottle labelled as zinzib. R. pulv., full ; ditto, spirit. rect., empty ; ditto, mur. hydrarg., seven-eighths full ; ditto, ol. caryophyll., one-fifth full ; ditto, ipec. P. co., full ; ditto, ol. menth. pip., empty ; ditto, liq. ammon. fort., three-quarters full ; ditto, ol. olive, full ; ditto, tinct. opii. camph., three-quarters full ; ditto, vin. sem. colch., full ; ditto, quarter full ; ditto, calomel, full (broken) ; ditto, hydrarg. nit. oxyd., full ; ditto, pulv. gregor., full (broken) ; ditto, magnes. carb., full ; ditto, camphor, full ; two bottles tinct. tolut., each quarter full ; one bottle ipec. R. pulv., full ; ditto, jalap R. pulv., full ; ditto, scammon. pulv., full ; ditto, quinine bisulph., empty ; ditto (not labelled), tinct

13—continued.

opii., three-quarters full; one box (apparently) purgative pills, full; ditto, ointment, shrunk; ditto, emp. adhesiv., full, one probang, one pen wrapped up in lint, one lead pencil, one pewter syringe, two small tubes (test) wrapped up in lint, one farthing, bandages, oil silk, lint, thread.

13^A Franklin Search Map of the Arctic Shores explored.**14 Together in a Glass Case are the Relics found by Lieutenant Schwatka, of the United States Army, in his Arctic Expedition of 1880.**

Pickaxe from Irving Bay. Ship's Axe found by a Native Chache in Wall Bay. Iron Yard Ring or Hoop found on Adelaide Peninsula. Top of a Boat's Mast from the "Eskinas" at Starvation Bay. Tompion of a Gun from the "Eskinas" at Starvation Bay. Man Harness found in Irving Bay. Wooden Canteen (marked G. W.) found at Wall Bay. Tube of a Marine Glass from Irving Bay. Piece of a Brass Pipe found at Irving Bay. Brush, marked H. Wilks, from Irving Bay. Piece of a Telescope made over by the Natives on Hayes River. Tin Box from Irving. Tin Flask found in a Chache at Wall Bay. Surgeon's Tourniquet found at Irving Bay. Bowl of a Tea Spoon found at Netchilips on Adelaide Peninsula. Stove Door found at Cape Maria Louisa. Copy of Record deposited by Sir Leopold McClintock in 1859, at Irving Bay. Medal in a grave near Starvation Cove. Drag Rope from Erebus Bay. Handkerchief from the boat place in Erebus Bay. Piece of Copper Sheathing found in Erebus Bay. Wooden Toggles found in Erebus Bay. Small Articles found at Cape Felix. Bullets in Native Chache on Wall Bay. Scissors found at Cape Felix. Shot and other articles found at Irving Bay. Uniform Button from Cape Felix. Wire Gauze Snow Goggles from Fishing line from Erebus Bay. Shot found at Cape Felix. Various graves east of Refeffe River. Buckles from a grave at Erebus Bay. Articles found at Erebus and Irving Bay.

15 Also the following not in the Case. Stem of a Boat from Erebus Bay. Sledge Runners obtained from Netchettik Eskimos on Adelaide Peninsula, taken by them from the boat place on "Erebus" Bay, shortly after being seen by Sir Leopold McClintock.

Found at Wall Bay—Three Tins marked "Goldner's Patent." Small Vinegar Keg. Tin Flask. Square Tin Cans. One Tin Canteen. Tins. Round Tin Cans. Wooden Canteen, and Tin Cover.

Found at Irving Bay—Tin Cover. Stove and Kettle. Cooking Stoves and Kettles.

Found at Cape Felix—Top of Potato Can.

Found at Cape Maria Louisa—Copper.

16 Taken out of his Grave in King William's Island, in 1880, by Lieut. Schwatka, U.S.A.

Silver Medal awarded to John Irving at the Royal Naval College, Portsmouth, 1830. He sailed in the Franklin Expedition as a Lieutenant in 1845.

Fish Hooks, made from Ship's Copper, Adelaide Peninsula. Top of a Seal Spear, also from Ship's Copper, obtained from the Natives on Hayes River, Adelaide Peninsula. Common Brimstone Matches.

Two Snow Shovels made by the Natives on Hayes River, Adelaide Peninsula, from wood obtained from the last Expedition.

- 17 **A Gold Clasp** obtained by Dr. Rae.
Found by Captain M'Clintock in the Boat.—Cover of a book of family prayers. Fork and spoon with Franklin crest. Bullet taken out of one of the guns. Hook of a sword belt.
- 18 **Franklin's Bible**, with an inscription, and pair of his gloves used on his first land expedition, also a portion of his Journal (from the Hudson's Bay Territory). Photographs of Officers of "Erebus" and "Terror."
Lent by Miss M. F. Gell, Buxted Rectory.
- 19 **Sir J. Franklin's Walking Stick**, from York Factory.
Lent by Captain A. H. Markham.
- 19A **Sir J. Franklin's Nelson's Memorial Ring.**
Lent by Mrs. F. L. Franklin of Grantham.
- 20 **Two Spoons** belonging to Captain Crozier, brought home in the "Fox."
Lent by Mrs. Loftie, 3A, Sheffield Terrace.
- 21 **Franklin Relics** (about 50) obtained by Captain C. F. Hall, chiefly from the natives of Pelly Bay.
- 21A **Arrow and Knife**, of materials from the lost ships.
- 21B **A Franklin Record and Case** from Back Bay, brought home in the "Fox."
Lent by Miss Cracroft.
- 22 **Record** (Sir J. Franklin's Expedition), brought home by Sir L. M'Clintock, with cylinder attached.
- 23 **Model—Steam-ship "Fox."**
Lent by R.U.S. Institution.
- 24 **Model of H.M.S. "Terror."**

ARCTIC EQUIPMENTS.

- 116 **Articles used in the Expedition of 1875-76.**

1 Twelve-man Sleigh, with 20 ft. Ice Boat; complete. 2 Eight-man Sleighs; complete. 1 Five-man Sleigh; complete. 1 Ladder Sleigh. 8 Drag Belts. 1 Eight-man Tent; complete. 1 pair of Winter Boots. 1 Travelling Knapsack. 1 Cooking Apparatus for eight men. 1 Cooking Apparatus for five men, with two lamps. 2 Ladles. Snow Knives. 1 Pickaxe. 1 Duffle Sleeping Bag. 1 Ice Saw and Triangle; complete. 1 small Hack Sledge. 1 Snow Sleigh. 1 Crow's Nest. Travelling Boots. 1 Cylinder for Records. 1 Harpoon Gun. 1 Ice Spear. 1 Ice Axe. 1 Ice Chisel. 1 Ice Anchor. 1 Ice Claw. Ice Blasting Cylinders. *Lent by the Lords Commissioners of the Admiralty.*

- 117 **Five-man Sledge used in the "Fox" (1857-59) in the recovery of Franklin Relics.** *Lent by Admiral Sir L. M'Clintock, K.C.B.*
 118 **Whaleboat completely fitted.** *Lent by D. Bruce, Esq., of Dundee.*
 119 **Sealskin Dress supplied to Arctic Search Expedition.**

Lent by G. F. A. Brown, Esq.

- 120 **Information distributed by a Balloon. H.M.S. "Assistance," lat. 77° N.** *Lent by the Royal United Service Institution.*

- 121 **Arctic Balloon for distributing Information.**

A Balloon with silk netting and fuze ropes, with 80 or 100 messages attached (only two of the original messages shown), as used by the Sir John Franklin's Search Expedition in 1852-53. Invented by George Shepherd, C.E.

The special feature of this exhibit consists of its being (apart from a relic of the past) a clever invention as a means of conveying communications across vast tracts of snow when any other means would fail. *Lent by Mr. Shepherd.*

RECORDS AND NEWSPAPERS, ETC.

- 122 **Play Bills, &c., written or printed on board Arctic Ships.**
 123 **Cylinder marked H.M. Ships "Hecla" and "Fury," Port Bowen, June 1825, containing paper left in 1851 by Captain Kennedy.**
 124 **Cylinder and Record left by Parry at Bushnan Cove in 1820, brought home by M'Clintock in 1851.**

- 125 Speaking Trumpet of Capt. Jas. Cook, R.N.
Lent from Haslar Museum.
- 126 Large Esquimaux Sledge, entirely of bone, brought home by Sir Ed. Parry. *Lent by the Curator of Albert Memorial Museum, Exeter.*
- 127 Tablet marked "Observatory," 1824-25, used by Parry at Port Bowen. *Lent by the Royal United Service Institution.*
- 128 Piece of Parry's Cart, from Melville Island; abandoned 1820, brought home 1851. *Lent by Mrs. Parry, of West Malling.*
- 129 Silk Play Bill, printed during an Arctic Voyage.
Lent by G. W. F. Francis, Esq.
- 130 The only remaining fragment of the "Breadalbane"—a sheet of her copper. *Lent by Admiral Sir E. Ingfield, K.C.B.*
- 131 Arctic Programme, framed.
Lent by J. C. Holding, Esq., Newbury.
- 132 Numbers of "The North Georgian Gazette" (1820), "Arctic Miscellanies" (1850-51), "Illustrated Arctic News" (1850-51).
- 133 Play Bills and Songs printed on board (1850-51).
- 134 Two Tins of Preserved Provisions from Fury Beach—landed there in 1825—brought home in the "Fox" in 1859.
- 135 Polar Almanack, printed on board H.M.S. "Enterprise."
- 136 The "Last Letters" of Captain Fitz-James, R.N.
Lent by Admiral Sir L. M'Clintock, K.C.B.

SLEDGE FLAGS.

NELSON GALLERY,

running parallel with which on the south side, are the

BLAKE AND BENBOW GALLERIES,

and in these three galleries is located the

ARTS SECTION.

THE Insignia and Relics of the CINQUE PORTS represent the earliest naval fighting force of the English nation of which we have any certain knowledge. The fleet of 57 ships which, in return for valuable franchises, the Cinque Ports undertook to provide was liable to military service for 15 days, whenever the King should call it out. For any extension of the time of service the King paid at a fixed rate. Each ship was required to carry a crew of 21 men and a boy; each had a "rector" or master, as well as a "constable," or boatswain. Thus their whole force consisted of 1,368 officers and men, to which the King appears to have added on occasion a contingent of troops. The form of these "ships" is ascertained from the Cinque Port Seals, some of which are exhibited. They seem in the earliest times to have varied from 20 to 60 tons burden, and were little more than large boats, partially decked, and rigged with one stout mast and one large square sail. From the fore-castle, after-castle, and top-castle, the archers and cross-bowmen discharged their missiles.

To this fleet the Kings of England for some ages intrusted the guardianship of the English Channel; it conveyed the King when he crossed the sea; and it fought his battles. It was led by the Earl of Salisbury in 1213 to victory at Damme, and won the decisive battle of Dover Straits under Hubert de Burgh in 1217. It was unfairly matched against the whole of the French naval forces by King Henry III., and formed the advanced guard of Earl Simon de Montfort in the Barons' War. King Edward I. employed it in the Conquest of Wales and Scotland; and in 1293 it destroyed the French fleet in a pitched battle at St. Mahé. Even as late as the reign of King Edward III., when the Kings own ships began to be of some importance, the fleet of the Cinque Ports formed a chief part of the force led by the King at Sluys, at the Siege of Calais, and at the battle of Lespagnols-sur-Mer. At the end of his reign, and during that of King Richard II., the French revenged

themselves by burning the Cinque Port towns. This disaster, and still more the unceasing silting-up of the harbours, caused the gradual decay of the Confederation. Their last service of importance was performed against the Spanish Armada.

The names of the confederated ports chartered by Edward the Confessor are Hastings, Sandwich, Dover, Romney, and Hythe; King Henry II. added Winchelsea and Rye. Thus they are officially addressed as "The Five Cinque Ports and Two Ancient Towns." Soon afterwards they began to enrol other towns as "Members" of the Confederation, 8 of them being Corporate, and 24 Non-Corporate, towns. Seaford, Pevensey, Fordwich, Deal, Folkestone, Faversham, Lydd, and Tenterden form the first group: Ramsgate, Walmer, Margate, and Brightlingsea alone of the second group, survive as places of any importance.

The military character of the Confederation grew out of the organisation of the Kentish Coast-men for the Herring Fishery. For many centuries they held the guardianship of Yarmouth Fair, regulated by the King from time to time, and only relinquished in 1663. Their oldest institutions were connected with this office.

Amongst their numerous franchises none was more cherished than their "Honours at Court," recited in the earliest charter now surviving, that of 1278. At Coronations the Barons of the Cinque Ports—a title which dates from the Norman reigns and is still in use—bore on the points of silvered spears a silken canopy, with a bell at each corner, over the King and Queen. At the feast which followed the Barons sat at the next table to the King on his right hand. It was as a Royal Navy that they had the precedence of every one else in Court Honours. This "custom" was "ancient" when King Richard the First was crowned, and has been regularly observed. The Cinque Ports still enjoy exceptional privileges, and at the last census included within their "liberties" a population of 174,279.

But though the Cinque Ports were thus, from a very early period, the nucleus of the Navy of England, every ship and every seafaring man in the country was subject to be "arrested" for the King's service; and the Lord Admiral's first duty on being appointed was to make himself acquainted with the number and names of available ships and men. In case of a general armament, many towns, besides the Cinque Ports, added their quota to the fleet; and prominent among these, in the time of Edward III., were London, Bristol, Yarmouth, Southampton, Portsmouth, Poole, Dartmouth, Plymouth, Looe, and Fowey. Poole and Dartmouth obtained a special notoriety as haunts of privateers, scarcely distinguishable from pirates. Dartmouth was the home of Chaucer's typical sailor, who "certainly was a good felawe," although

"Of nyce conscience took he no keep.

If that he foughte and hadde the heigher hand,

By water he sente hem hoom to every land;"

a reference to the ordinary way of disposing of prisoners; and of Poole, it was said:—

“If Poole was a fish-pool, and the men of Poole fish,
There’d be a pool for the devil, and fish for his dish.”

In addition, however, to the force thus supplied by the maritime towns, there was always a certain varying contingent of King’s ships, the establishment of which dated back as far as the days of Ethelred, or Alfred, or even earlier; but was placed on a more distinct and permanent footing under Henry VIII. by the institution of the Trinity House at Deptford, and of the Board long known as the Navy Board. This was composed of the “Principal Officers of the Navy”—the Treasurer, Comptroller, Surveyor, and Clerk of the Acts—who, under the Lord Admiral, were responsible for the administration of the “Navy Royal,” which, from the increase in the size of ships, rendered necessary by the use of cannon, became of continually greater importance in the measure of the country’s naval strength. Out of the very numerous fleet assembled to oppose the “Invincible” Armada in 1588, the stress of the fighting fell almost entirely on the Queen’s ships; comparatively few of the others being able to match themselves against the Spaniards’ huge galleons.

This brilliant and glorious war gave a new impulse to the “Navy Royal:” the country seemed to have learned that in it lay its true power and most effective defence; and many new ships of a large size, were added to it. But the financial difficulties of James I. and Charles I., and the troubles of the Civil War prevented its being maintained at an adequate strength; and when the war with Holland broke out in 1652, the number of State’s ships was very far below the nation’s requirements. A great many merchant-ships were therefore hired for the public service; and as it was found that, under the more stringent conditions of a purely naval war, there was some difficulty in regulating the conduct and discipline of their commanders, provision was made that in all cases the officers of such ships must be appointed and commissioned by the State.

The Navy List thus began to assume a degree of permanence; and during the succeeding Dutch wars, the code of discipline and organization took the form which it has since maintained. At the same time, the advantage of the larger and more powerful ships of the State, proved repeatedly in several of the battles with the Dutch, gave an impulse to the development of naval architecture; and after the Revolution, the number of merchant ships hired into the service was absolutely small, and the size of them inconsiderable; they were seldom available except as cruisers or scouts.

At this time, too, it was finally recognized that ships of small size were out of place in a general action; the idea of fighting in line had been gradually developed, more especially in the actions between the combined English and French fleets and the Dutch in 1673, and the combined Dutch and Spanish

fleets and the French in 1676. It had thus come about that the strength of fleets was no longer counted in gross, as during the first and second Dutch wars, but by the number of "ships fit to lie in a line," an expression of 1690, which, by 1692, had settled down into "ships of the line of battle."

This "line of battle," or "line ahead, close to the wind," was established as the only fighting formation, and was so recognised by all the Maritime Powers. It was formulated in a code of Fighting Instructions, which forbade any departure from the prescribed order; and though experience showed that by adhering to it no definite advantage was to be gained, without a great superiority of numbers, and though Sir George Byng at Cape Passaro, in 1718, and Sir Edward Hawke in Quiberon Bay, in 1759, showed how much was to be gained by a judicious violation of the rule, it continued in force till Sir George Rodney, by an accidental but distinct breach of it, in 1782, inflicted a decisive defeat on the French fleet off Dominica, and did away with the pedantry of prescribed formations and pre-ordered manœuvres. Then came the era of Howe, St. Vincent, Duncan, and Nelson, who, no longer bound by the fetters of routine, gave free scope to their genius, and emblazoned on our history the glorious names of Ushant, St. Vincent, Camperdown, the Nile, Copenhagen, and Trafalgar—a continuous succession of brilliant victories, to which naval history offers no parallel.

It would, however, be a grave mistake to suppose that during all these years, the work of our Navy is adequately described in the catalogue of its glories. It has, indeed, sufficed, on the comparatively rare days of battle, to withstand or crush the enemy's fleets or ships; and to win for itself undying renown; but it has also sufficed, on every day of war, to maintain our coasts inviolate, to sweep the enemy's commerce from the seas, and to protect our own. It has often been said that, notwithstanding our great naval strength, our commercial losses were still very great. It is true; but in estimating those losses the gains must also be reckoned. Our losses were great because our commerce was great; because in time of war we had the practical monopoly of the commerce of the world; because our mercantile shipping grew and developed in war, at the expense of our enemies; and the losses we sustained, though great in absolute numbers or value, were trivial in comparison with the whole number and the sum total from which they were taken.

But this, the all-important, the abiding work of our Navy, the ceaseless and grinding pressure which it has exercised on our enemies, the security of our shores, the increase of our commerce, the driving of hostile flags from the sea, cannot be adequately represented by the art to which our galleries are dedicated. The painter can indeed show the portraits of our heroes, or the representation—in fact or fancy—of some of their achievements. He can show "the blue flag bearing down on the white," and can give some idea of "the hawk-like swoop" in Quiberon Bay; he can show the slow advance

and terrible onslaught of the Victory or the Royal Sovereign at Trafalgar; he can show how

“ Brave Broke, he waved his sword,
Crying—‘ Shannons, let us board ! ’ ”

or, coming down to our own days, he can show the meaning of the signal “ Well done, Condor ! ” ; but nothing here can show the security, the peace, the wealth which has sprung, in only a less degree, from the every-day actions of every-day men, whose names were scarcely known beyond the walls of the Admiralty, but who were, none the less, the units which made up the grand whole of England’s Navy, “ the wall and fence of the kingdom.”

So far as circumstances have permitted, the portraits and battle pieces in the two larger galleries, Blake and Nelson, have been arranged in chronological order, and thus present a fairly complete view of the war services of the Navy, from the time of Henry VIII. The same idea has ruled in the arrangement of the water colours and engravings in the Benbow gallery ; where will also be found many humorous representations of the social life of the Navy.

The Committee desire to convey their warmest thanks to all who have so cordially and liberally responded to their appeal, and have enabled them to bring together a collection of pictures and relics of naval interest, such as has never been equalled.

The numbers commence in the North-East end of the Blake Gallery, and continue from left to right to the East Entrance, then passing into the Nelson Gallery are continued on the South and North Walls respectively, and terminate on the screens commencing from the East end.

The Works are Catalogued under the names given to them by the contributors.

The Arts Committee accept no responsibility as to their authenticity.

Synopsis of arrangement of Portraits, Battle-Pieces, Figure-Subjects, &c., with relation to prominent periods of British Naval History.

FIRST PERIOD	From the beginning of the sixteenth century to the commencement of the Civil War in 1642.	<i>Battle of Brest, 1513.</i> Sir Edward Howard. <i>Battle at Spithead, 1545.</i> Lord Lisle. <i>Armada, 1588.</i> Howard, Drake, Hawkins, Frobisher, &c. <i>Cádiz, 1596.</i> Essex, &c.

NOBILITY OF LIFE.

"WHO BEST CAN SUFFER, BEST CAN DO."—MILTON.
The Victorian Reign is unparalleled in the History
of Great Empires for its Purity, Goodness,
and Greatness!!

ABOVE ALL!!!

FEARLESS DEVOTION TO DUTY AND UNFLINCHING
TRUTHFULNESS!

THE QUEEN'S PRIZE!

The conditions laid down by the QUEEN for the
Prize given by HER MAJESTY to the
Marine boys are these:—

Cheerful Submission to Superiors; Self-respect and
Independence of Character; Kindness and Pro-
tection to the Weak; Readiness to Forgive
Offence; a Desire to Conciliate the Differences
of others; and, above all, Fearless Devotion to
Duty and Unflinching Truthfulness.

"Such principles, if evoked and carried into
action, would produce an almost perfect moral
character IN EVERY CONDITION OF LIFE."
—SMILES.

SHAKESPEARE AND DUTY.

"Come the corners of the world in arms,
And we shall shock them; nought shall make us rue,
IF ENGLAND TO HERSELF DO REST BUT
TRUE."

THE PIVOT OF DUTY—*Sterling Honesty
of Purpose; without it Life is a Sham!*

What Higher Duty can man attain, than Conquest over Human Pain?

IN THE BATTLE OF THIS LIFE ENO'S "FRUIT SALT" is an imperative hygienic
need or necessary adjunct. It keeps the blood pure, prevents fever, and cures acute inflammatory diseases, and
removes the injurious effects of stimulants, narcotics such as alcohol, tobacco, tea, coffee, by natural means; thus
restores the nervous system to its normal condition, by preventing the great danger of poisoned blood and over-
cerebral activity, sleeplessness, irritability, worry, &c.

SUPERIOR TO ALL OTHER SALINES.—"Dear Sir,—Having taken your 'FRUIT SALT'
many years, I think it right to tell you that I consider it a most invaluable medicine, and far superior to all other
saline mixtures. I am never without a bottle of it in the house. It possesses three most desirable qualities—
pleasant to the taste, promptly efficacious, and leaves no unpleasant after effects."—A DEVONSHIRE LADY.
—Jan. 25, 1889.

HOW KANDAHAR WAS WON.

"During the Afghan War we were before Kandahar, and had been reconnoitring the enemy's position with
Colonel M——'s splendid cavalry regiment, when, to our merriment, the colonel produced a bottle of ENO'S
'FRUIT SALT.' 'Take,' he said, 'an old soldier's advice; so, to please him, we did. We emptied the bottle.
And Colonel M—— gave another bottle to P——'s men. We certainly slept soundly that night, and awoko
fresh as paint. Two days afterwards, the colonel said at mess, 'You fellows laughed at me about ENO'S "FRUIT
SALT," but it was mainly through that stuff I gave you, you did such splendid deeds that day. 'Personally,'
said the colonel, 'I never felt better, and so do the officers of my regiment, and we were ready to encounter
half a dozen Ayobhs.' After that the colonel was always called 'Old Eno.'—From "MESS STORIES"
by PROTEUS, pp. 126, 127, published by Messrs. Simpkin, Marshall, & Co., Stationers Hall Court, 1889.

**THE SECRET OF SUCCESS.—STERLING HONESTY OF PURPOSE; WITH-
OUT IT LIFE IS A SHAM!**—"A new invention is brought before the public, and commands success.
A score of abominable imitations are immediately introduced by the unscrupulous, who, in copying the original
closely enough to deceive the public, and yet not so exactly as to infringe upon legal rights, exercise an ingenuity
that, employed in an original channel, could not fail to secure reputation and profit."—ADAMS.

CAUTION.—*Examine each Bottle, and see that the Capsule is marked ENO'S "FRUIT
SALT." Without it you have been imposed on by a worthless imitation. Sold by all
Chemists.*

Prepared only at ENO'S "FRUIT SALT" WORKS, LONDON, S.E.

By J. C. ENO'S PATENT.

UNPARALLELED!!

HISTORIC LOAN COLLECTION.

BLAKE GALLERY.

- 201 **King Henry VIII.** in the Harry Grâce-a-Dieu, on his way to Calais, preparatory to meeting Francis I. of France, 1520. By DOMINIC SERRES, R.A. *Lent by the Lords Commissioners of the Admiralty.*
- 202 **Men-of-War Saluting, Temp. Henry VIII.** By MONAMY SWAINE. *Lent by H. J. Murcott, Esq.*
- 203 **Thomas Howard, 3rd Duke of Norfolk, K.G., Lord High Admiral. (1473-1554.)** By HOLBEIN.
Born, 1473. Is said to have assisted in the capture and death of Andrew Barton, a noted Scotch pirate. Appointed Lord High Admiral, 1513. Commanded, under his father, at the battle of Flodden. Lord Lieutenant of Ireland, 1520. Succeeded as 3rd Duke of Norfolk, 1524. Died, 1554. *Lent by the Duke of Norfolk, K.G.*
- 204 **Frigate standing out of Portsmouth Harbour.** By W. VAN DE VELDE.
Lent by Admiral Cornish Bowden.
- 205 **The Last Days of the Great Harry.** *Lent by George Palmer, Esq.*
- 206 **Peter Pett.**
Master builder of the Navy in the time of Queen Mary and of Queen Elizabeth, by whom the arms shown in the picture were granted in 1583. *Lent by Captain the Hon. J. Manners Yorke, R.N.*
- 207 **Ancient Sea Piece of the Sixteenth Century.** By L. D. MAN. *Lent by the Rev. F. Paget Wilkinson.*
- 208 **George Clifford, Earl of Cumberland, K.G. (1558-1605.)** Unknown.
Born, 1558. Graduated as M.A. at Cambridge in 1576. Commanded the Elizabeth Bonadventure against the "Invincible" Armada in 1588, and was sent from the fleet to carry the news of the victory off Gravelines to the Queen. It was probably on that occasion that she gave him her glove, which he afterwards wore in the front of his hat. Equipped and commanded numerous expeditions against the Spaniards. Died, 1605.
Lent by the Trustees of the National Portrait Gallery.

- 209 Sir Walter Raleigh.** (1552-1618.) By F. ZUCHARO.
Born, 1552. Took an active share in the early attempts to colonize Virginia. One of the Council for the defence of the country in 1588. Took part in several expeditions against the Spaniards. Discovered Guiana in 1595. Commanded the Warspite at the sack of Cadiz in 1596. In 1603 tried for high treason and condemned to death. After fourteen years' imprisonment in the Tower, he was permitted to undertake a voyage to Guiana, in search of a reported gold mine. On his return without success, he was executed, on the old sentence, 1618.
Lent by the Trustees of the National Portrait Gallery.
- 210 The Henri Grace-a-Dieu.**
This picture was hanging in Canterbury Cathedral, and was given by the Dean and Chapter to Sir John Norris, Admiral of the Fleet, temp. George II.
Lent by H. C. Norris, Esq.
- 211 Embarkation of Henry VIII. from Dover,** on 31st May, 1520, to meet Francis I. at the Field of the Cloth of Gold. By V. VOLPE. (From Hampton Court Palace.)
Lent by Her Majesty the Queen.
- 212 Defeat of the Spanish Armada, 1588.** By P. J. DE LOUTHERBOURG, R.A.
The "Invincible" Armada, equipped in Spain for the invasion of England, was met off Plymouth on 21st July, 1588, by the fleet under Lord Howard of Effingham (afterwards Earl of Nottingham), with Drake and Hawkins as his Vice and Rear-Admirals; and after a running fight up the Channel, was attacked with fire ships off Calais and thrown into confusion on the night of the 28th. The fight was continued vigorously on the following day, and the defeated ships were pursued by Howard as far as the coast of Scotland. The Armada afterwards encountered a violent gale, in which many of the remaining vessels were lost, and scarcely more than a third of the fleet ever returned to Spain.
Lent by the Lords Commissioners of the Admiralty.
- 213 Robert Devereux, 2nd Earl of Essex.** (1567-1601.) By F. ZUCHARO.
Born, 1567. Took part as a volunteer in Drake's Expedition to Portugal in 1589, but was recalled by the Queen. Commanded an expedition to Normandy in 1591; and the land forces at the taking of Cadiz in 1596. In 1597 commanded the expedition to the Azores, known as "the Islands' Voyage." Lieutenant and Governor-General of Ireland, 1599. Executed on a charge of treason and rebellion, 1601.
Lent by the Earl of Warwick.
- 214 H.M.S. Tiger,** commanded by Charles, Lord Berkeley. By VAN DE VELDE.
Lent by Colonel H. Armytage.
- 214A The Great Harry.**
Lent by Mary E. Ayers.
- 215 Fire Ship after Armada Period.** By MONS. A. RAGON.
Lent by Mons. A. Ragon.
- 216 Capture of a Spanish Galleon.** By MONS. A. RAGON.
Lent by Mons. A. Ragon.

217 Sir Francis Drake, Kt. (1540-1596.) By F. ZUCHARO.

Born about 1540. With his kinsman, John Hawkyns, at Vera Cruz in 1568. Took Nombre de Dios and sacked Venta Cruz, 1572-3. Led an expedition to the Pacific through the Straits of Magellan in 1578, and returned to England by the Cape of Good Hope in 1580, "very richly fraught with gold, silver, silk, pearls, and precious stones." Commanded an expedition to the West Indies, and sacked Cartagena, on the Spanish Main, in 1585. Burnt the King of Spain's ships in Cadiz in 1587. Commanded, under the Lord Admiral, against the "Invincible" Armada in 1588. Commanded an expedition to the coast of Portugal in 1589; and again to the West Indies in 1595. Died off Porto Bello, 28th January, 1596. Buried at sea.

"England his hart, his corps the waters have,
And that which rayzed his fame became his grave."

Lent by Lady Elliott-Drake.

218 Thomas Cavendish. (1555-1592.) By MYTENS.

Born about 1555. Commanded an expedition to the South Seas in 1586, which, after great success against the Spaniards, circumnavigated the globe and returned home in 1588. In 1591 sailed for a second voyage round the world; but having lost many men by sickness, was compelled to turn homewards. Died at sea, 1592.

The figure on the right, looking at the picture, is Cavendish.

Lent by the Earl of Lothian.

219 Sir John Hawkyns, Kt. (1532-1595.) By F. ZUCHARO.

Born, 1532. After several trading and smuggling voyages to the Spanish Main, was caught at Vera Cruz in 1568 by a large Spanish fleet; and escaped with great difficulty, and the loss of most of his ships and treasure. Treasurer of the Navy, 1573, and continuously employed for many years in building and equipping the Queen's ships. Commanded as a Rear Admiral in 1588 against the "Invincible" Armada, and was knighted by Lord Howard, the Lord Admiral, on the deck of the Ark. In conjunction with Sir Martin Frobiser, commanded an expedition to the coast of Portugal in 1590; and again in 1595, with Sir Francis Drake, an expedition to the West Indies. Died off Porto Rico, 12th November, 1595.

Lent by C. Stuart Hawkins, Esq.

220 Sir Hugh Willoughby.

Commanded an expedition of three ships sent out in 1553, with the object of discovering a north-east passage to Cathay. After visiting the coast of Nova Zembla, he was forced to put into Arzina, a harbour on the coast of Lapland, and was there frozen to death with the whole of the crews of his ships, early in 1554.

Lent by Lord Middleton.

221 The Spanish Armada, under the Duke of Medina Sidonia, driven out of Calais Roads by Fire Ships, and afterwards attacked by the English Fleet under Lord Howard, Drake, Frobiser, Hawkyns, &c., 1588. By Admiral R. B. BEECHEY.

Lent by Admiral R. B. Beechey.

- 222 Charles Howard, Earl of Nottingham, K.G., Lord Admiral.** (1536-1624.)

Born, 1536. General of Horse, 1569. Admiral, 1570. Lord Howard of Effingham, by the death of his father in 1573. Knight of the Garter and Lord Chamberlain, 1574. Lord Admiral of England, 1585. Commissioner for the trial of Mary, Queen of Scots, 1586. Lieutenant-General and Commander-in-Chief "of the navy and army prepared to the seas against Spain," Dec. 1587. Commander-in-Chief against the "Invincible" Armada, 1588, and at the sack of Cadiz, 1596. Created Earl of Nottingham, 1597. Lord Lieutenant-General of all England, 1599. Ambassador Extraordinary to Spain, 1605. Died, 1624.

Lent by the Duke of Norfolk, K.G.

- 223 The Surrender.** By SEYMOUR LUCAS, A.R.A.

Don Pedro de Valdez delivering his sword to Sir Francis Drake.

"I fell in (God be thanked!) with Valdez's great galleon and in it good booty, which the Dons, his fellows, had left behind, like faithful and valiant comrades, and the Lord Howard let slip past him, thinking her deserted by her crew. I have sent to Dartmouth a sight of noblemen and gentlemen, may be a half hundred, and Valdez himself, who, when I sent my pinnace aboard, must needs stand on his punctillios and propose conditions. I answered him, I had no time to tell with him; if he would needs die, then I was the very man for him; if he would live, then *buena guerra*. He sends again, boasting that he was Don Pedro Valdez, and that it stood not with his honour and that of the Dons in his Company. I replied, for my part, I was Francis Drake, and my matches burning."—*Kingsley*.

Lent by John Paddon, Esq.

- 224 Sir Martin Frobiser. (1535-1594.)** By CORNELIUS KETEL.

Born about 1535. After several years of adventurous trading in the Levant and on the coast of Africa, commanded in three several voyages in search of the North West Passage. Captain of the *Primrose* in Sir Francis Drake's expedition to the West Indies in 1585, and of the *Triumph* against the "Invincible" Armada in 1588. Knighted by the Lord Admiral on the deck of the *Ark*. In 1590 commanded under Sir John Hawkyins in an expedition to the coast of Portugal. Mortally wounded in the attack on Crozon, 1594.

Lent by the Trustees of the Bodleian Library, Oxford.

- 225 Sir Richard Leveson, Knt. (1570-1605.)** By H. VANDYCK.

Born, 1570. Served against the "Invincible" Armada in 1588, and in many Expeditions against the Spaniards, including the sack of Cadiz in 1596, when he was knighted, and "the Islands' Voyage" in 1597. In 1602 he commanded a squadron on the Coast of Spain, and captured a rich galleon from under the batteries of Cezimbra. Admiral of the Narrow Seas and Vice-Admiral of England.

Lent by the Duke of Sutherland, K.G.

- 226 Our Last Shot at the Spanish Armada.** Painted by FRANK BADEN-POWELL.

Lord Howard of Effingham, Lord High Admiral of the British Fleet, in the *Ark Royal*, of 800 tons, supported by the Squadron under Drake and Frobiser, drove the flying Spaniards as far North as latitude 56 in the North sea, and gave orders then for his fleet to desist from the chase, and to beat back to England; seeing that the fury of the rising gale was bound to complete the destruction of the Armada.

Lent by Lieut. Warrington Baden-Powell, R.N.R.

- 227 Robert Blake**, Admiral and General at Sea. (1599-1657.) Unknown.
Born 1599. After graduating at Oxford, was engaged in commercial pursuits till the outbreak of the Civil War. Distinguished himself in the Parliamentary army, and after the death of the king in 1649 was appointed one of the Generals at Sea. Burnt Prince Rupert's ships at Cartagena in November, 1650. Reduced the Scilly Islands and Jersey, 1651. Commanded the fleet against the Dutch in 1652-4. Severely wounded in the battle of Portland, 18th February, 1653. Reduced the pirates of Tunis and Algiers, 1655. Destroyed the shipping at Santa Cruz, 1657. Died 7th August, 1657. Was buried in Westminster Abbey; but after the Restoration his body was dug up and thrown into a common hole dug in the churchyard of St. Margaret's.
Lent by the Warden and Fellows of Wadham College, Oxford.
- 227a Frigate of Early 18th Century.** *Lent by W. Wakeford.*
- 228 Sir John Penington.** (-1646.) By H. VANDYCK.
Admiral of the Fleet and Vice-Admiral of England in the reign of Charles I.
Lent by Mrs. W. Willes.
- 229 The Four Day's Fight**, in June, 1666. By W. VAN DE VELDE.
Fifteen ships are engaged in close combat. In the foreground Prince Rupert's ship, distinguished by the Royal Standard, is in conflict with the Dutch Admiral. Right and left are ships burning to the water's edge, others are foundering, while in the centre foreground a boat is rescuing numerous people from drowning.
Lent by Messrs. J. Gates & Son.
- 230 Battle Scene.** By W. VAN DE VELDE.
Lent by Edward F. Devenish Walshe, Esq.
- 231 Admiral Sir John Lawson.** (-1665.) By SIR P. LELY, Bart.
Served in the Parliamentary Army and Fleet during the Civil War. Commanded the Centurion in the North Sea, in 1650; and with Penn in the Mediterranean. Commanded, 1652, the Fairfax, 62 guns, and for his good services was appointed Rear-Admiral of England. Vice-Admiral of the Red Squadron at Portland, 18th February, 1653; Admiral of the Blue Squadron in the actions of June and of July; Vice-Admiral of England the same year. In 1661 reduced the Barbary States to subjection. In 1665, Vice-Admiral of the Red Squadron under the Duke of York; was wounded in the knee on the 3rd June in action with the Dutch, of which wound he died at Greenwich on the 25th June. Buried at St. Dunstan's-in-the-East on the 2nd July.
Lent by the Lords Commissioners of the Admiralty.
- 232 Sir John Leake, Kt.**, Admiral of the Fleet. (1656-1720.) By SIR GODFREY KNELLER, Bart.
Born, 1656. Captain 1689, and in command of the Dartmouth frigate, relieved Londonderry, 28th July. Commanded the Eagle of 70 guns at the battle of Barfleur, in 1692. Rear-Admiral, 1702. Vice-Admiral, 1703. Knighted, 1704, and in command of the van at Malaga. Commander-in-Chief in the Mediterranean, 1705-7. Admiral, 1707. Admiral of the Fleet, 1708. First Lord of the Admiralty, 1710. Died, 1720.
Lent by S. Martin Leake, Esq.

- 233 **Richard Deane**, Admiral and General-at-Sea. (1610-1653). By ROBERT WALKER.

Born, 1610. Served with distinction in the Parliamentary Army, and on the death of the King in 1649 was appointed one of the Generals-at-Sea. In 1653 commanded against the Dutch, jointly with Blake and Monck, and was killed in the battle of 3rd June, 1653.

Lent by the Earl of Dartmouth.

- 234 **Embarkation of Charles II.** at the Hague, May 23rd, 1660.

Lent by T. Lyon Thurlow, Esq.

- 235 **Admiral Sir George Ayscue.** By SIR P. LELY, Bart.

Knighted by Charles I. Captain, 1646. Appointed, 1649, "for his fidelity and good affection to the Parliament," Admiral of the Fleet in the Irish Seas. Commanded the expedition against the West India Islands, which had declared for the King; and on his return, fought a stubborn action with the Dutch Fleet under De Ruyter, off Plymouth, 16th August, 1652. Vice Admiral of the Blue Squadron under the Duke of York, in the action with the Dutch Fleet on the 3rd June, 1665. Admiral of the White under Prince Rupert and the Duke of Albemarle, and taken prisoner by the Dutch in 1666, the Royal Prince, which bore his flag, having grounded on the Galloper. Time and place of his death not known.

Lent by the Lords Commissioners of the Admiralty.

- 236 **Algernon Percy, Earl of Northumberland**, Lord High Admiral, (1602-1668.) By VANDYCK.

Born, 1602. Appointed, 21st May, 1638, Admiral, Custos-Maris, Captain-General, and Governor of the Fleet, which office he held until 1642. Died, 1668.

Lent by the Earl of Essex.

- 237 **Admiral Sir Thomas Tyddiman.*** (-1668.) By SIR PETER LELY, Bart.

Appointed immediately after the Restoration to be captain of the Resolution. In 1664 Rear-Admiral in command of a squadron in the Channel, on the outbreak of the Dutch War. Served as a flag-officer in most of the actions of the war; and, in particular, conducted the attack upon the shipping in Bergen, where he was repulsed. Died, 1668.

Lent by the Lords Commissioners of the Admiralty.

* This portrait and those numbered 235, 238, 240, 242, 243, 244, 245, 246, 247, 248, 249, form the series of valuable pictures mentioned in "Pepys' Diary" (1666), vol. ii., p. 385, as follows:—"To Mr. Lilly's, the painter's, and there saw the heads—some finished, and all begun—of the flagg men in the late great fight with the Duke of York against the Dutch. The Duke of York hath them done to hang in his chamber, and very finely they are done indeed. Here are the Prince's (Rupert), Sir George Asku's, Sir Thomas Teddman's, Sir Christopher Mings, Sir Joseph Jordan, Sir William Berkeley, Sir Thomas Allen, and Captain Harman's, as also the Duke of Albemarle's; and will be my Lord Sandwich's, Sir W. Penn's, and Sir Jeremy Smith's."

- 238 **Vice-Admiral Sir Christopher Myngs.** (-1666.) By SIR PETER LELY, Bart.

Served as Captain in the first Dutch war. Vice-Admiral of the White in the action of 3rd June, 1665. On the 4th June, 1666, when gallantly leading Prince Rupert's division, was wounded in the throat, but refused to quit the deck to have his wound dressed. He was shortly afterwards mortally wounded by another musket-ball.

Lent by the Lords Commissioners of the Admiralty.

- 239 Robert Rich, Earl of Warwick, Lord High Admiral. (1587-1658.)**
By VANDYCK.

Born, 1587. In 1642, appointed by the Lord Admiral the Earl of Northumberland, at the request of the Parliament, Vice-Admiral, and to command the Fleet. The appointment was disapproved of and negated by the King, who wished to retain the services of Sir John Penington, and His Majesty dismissed the Lord Admiral from his office; but the Parliament supported the Earl of Warwick, who, acting under the orders of the House, retained command of the Fleet, and was appointed Lord High Admiral by the Parliament; by his firmness, the Parliamentary ascendancy over the Navy was, in a great measure, established. Died, 1658.
Lent by the Earl of Chichester.

- 240 Admiral Sir Joseph Jordan. (1603-1685.)** By SIR P. LELY, Bart.

Born, 1603. Captain of the *Cæsar* in 1642. Rear-Admiral of the Irish Squadron in 1643 and 1644. Rear-Admiral under Penn in the Mediterranean in 1651-2. Vice-Admiral of the Blue Squadron, 1653, in the first Dutch war. Rear-Admiral of the fleet under Blake in his expedition against the Barbary States, 1654. Commanded the *St. George* of 60 guns, and served chiefly as a flag-officer all through the second Dutch War. Succeeded Lawson as Vice-Admiral of the Red Squadron, 3rd June, 1665, after that officer was wounded. Commanded a squadron of fire-ships in an attack upon Dutch ships at the Nore, 1667. Vice-Admiral of the Blue Squadron in the battle of Solebay. Died, 1685. Buried at Hatfield.

Lent by the Lords Commissioners of the Admiralty.

- 241 Vessels Saluting, temp. Charles II.** By W. VAN DE VELDE.

Lent by William Webb, Esq.

- 242 Edward Mountagu, Earl of Sandwich, Admiral and General-at-Sea. (1625-1672.)** By SIR PETER LELY.

Born, 1625. Served in the Parliamentary Army during the Civil War. Appointed General-at-Sea, 1654. In conjunction with Blake, commanded the Fleet on the Coast of Portugal, 1656-7. Commanded the Fleet which brought home Charles II., and was created Earl of Sandwich. Admiral of the Blue Squadron, 1665, in the action with the Dutch on the 3rd June. In the third Dutch war again commanded the Blue Squadron, under the Duke of York; and perished in the battle of Solebay, 28th May, 1672, where his flag-ship, the *Royal James*, was blown up, with the loss of nearly the whole crew. The body, identified by the coat, was found floating some days afterwards, and was buried in Westminster Abbey.

Lent by the Lords Commissioners of the Admiralty.

- 243 Admiral Sir Thomas Allin. (1612-1689.)** By SIR P. LELY, Bart.

Born 1612. Commanded a ship in Prince Rupert's squadron, 1649-50. Appointed, 1660, to command the *Dover*. Succeeded Lawson in command of the Mediterranean squadron in 1664. In 1665, engaged off Cadiz a Dutch squadron convoying the *Smyrna Fleet*. Elder Brother of the Trinity House, 1666. Served with distinction as a flag-officer in the second Dutch War. In 1669, reduced the Barbary States to subjection. Comptroller of the Navy, 1670. In 1678, Commander-in-Chief of the Channel Fleet. Died 1685.

Lent by the Lords Commissioners of the Admiralty.

- 244 Prince Rupert, Vice Admiral of England and General at Sea.** (1619—1682.) By SIR PETER LELY, Bart.

Born 1619. Commanded in the king's army during the Civil War. In 1649 commanded a semi-piratical squadron in the name of Charles II. Commanded a squadron of observation in 1664. Admiral of the White Squadron against the Dutch in 1665. Commander-in-Chief jointly with the Duke of Albemarle in 1666. Vice Admiral of England, 1672. Commander-in-Chief against the Dutch in 1673. Died 1682.

Lent by the Trustees of the National Portrait Gallery.

- 245 Sir William Penn, Kt.** Admiral and General-at-Sea (1621-1670). By SIR PETER LELY, Bart.

Born, 1621. In 1644 commanded the Fellowship. Rear-Admiral of the Irish Squadron, 1648. Vice-Admiral, 1650. In 1650 commanded a squadron in the Mediterranean. Admiral of the Blue Squadron in the battle of Portland, 18th Feb. 1653. Vice-Admiral of England, and Admiral of the White Squadron, in the Fleet commanded in chief by the Generals Deane and Monck; and took part in the battles of 3rd June and 31st July, 1653. General and Admiral of the Fleet, 1654, and at the capture of Jamaica, 1655. Great Captain-Commander under His Royal Highness James Duke of York, in 1665, when a decisive victory was obtained over the Dutch Fleet. Died, 1670.

Lent by the Lords Commissioners of the Admiralty.

- 246 Admiral Sir John Harman.** (—1673.) By SIR P. LELY, Bart.

Commanded the *Welcome*, of 40 guns, in the first Dutch War. Captain, under Penn, to the Lord High Admiral, in the action of June, 1665. Rear-Admiral of the White Squadron, June 1666, and severely wounded. Commanded a squadron in the West Indies, and obtained a decisive victory over a French and Dutch squadron at Martinique, in June, 1667. Served as Vice-Admiral and Admiral, in the third Dutch war. Died, October, 1673.

Lent by the Lords Commissioners of the Admiralty.

- 247 Vice-Admiral Sir William Berkeley.** (1639-1666.) By SIR PETER LELY, Bart.

Born, 1639. Lieutenant, 1661. Promoted, 1662, to command the *Bonadventure*; in 1663, to the *Bristol*; and in 1665, to the *Swiftsure*, as Rear-Admiral of the Duke of York's squadron. In the action, 1st June, 1666, Vice-Admiral of the White Squadron. The *Swiftsure*, bearing the Vice-Admiral's flag, was cut off, and after a gallant defence captured by the Dutch. Sir William Berkeley was killed, but the Dutch caused the body to be embalmed, and to be deposited at the Great Church at the Hague, whence in August it was brought to England, and buried in Westminster Abbey, where there is a monument to his memory.

Lent by the Lords Commissioners of the Admiralty.

- 248 Admiral Sir Jeremy Smyth, Kt.** By SIR PETER LELY, Bart.

Commanded the *Advice* frigate in the first Dutch War; and the *Mary*, a third-rate, as a flag-officer, in the second Dutch War; for his conspicuous gallantry in action, was knighted by Charles II., in 1665. In 1666 served as Admiral of the Blue Squadron, under Prince

248—*continued.*

Rupert and the Duke of Albemarle. While the Dutch Fleet was in the Thames, had command of a small squadron, and cruised with effect against the Dutch trade. Appointed Commissioner of the Navy in 1669. Date and place of death not known.

Lent by the Lords Commissioners of the Admiralty.

249 **George Monck, Duke of Albemarle**, Admiral and General-at-Sea. (1608-1670.) By SIR PETER LELY, Bart.

Born, 1608. In 1625 served in Lord Wimbledon's expedition to Cadiz. Appointed, 1652, one of the Generals of the Fleet. Admiral of the White Squadron at Portland, 18th Feb., 1653. In June, 1653, commanded the fleet in conjunction with General Deane; and on the death of the latter, in the heat of the action, is said to have cast his cloak over the mangled body in order that the crew might not be discouraged by the sight. On the 29th and 31st July he commanded the fleet in the action wherein the Dutch Admiral Martin Tromp was killed. Commanded the army, brought about the King's restoration, and was created Duke of Albemarle, 1660. In conjunction with Prince Rupert, commanded the fleet in 1666, and fought several severe and gallant actions. Died, January, 1670.

Lent by the Lords Commissioners of the Admiralty.

250 **Captain Thomas Harman** in the 'Tyger frigate defending English Colliers from 8 Dutch privateers.

Thomas Harman became Captain of the Tyger, a frigate of 457 tons and 46 guns (built in 1647), in 1672. He took all the above privateers, and carried them into the Thames.

Lent by the Lords Commissioners of the Admiralty.

251 **Captain Thomas Harman** in the Tyger frigate taking the Schaerlaes, 36 guns, into Bay of Bulls, in 1674.

In the encounter the Schaerlaes had on board 270 men, the Tyger only 184. The former, which was carried by boarding, lost 140 men killed, and 86 wounded; the latter, only 9 killed and 15 wounded. Harman was wounded under the left eye.

Lent by the Lords Commissioners of the Admiralty.

252 **Ships rounding a Headland.** By W. VAN DE VELDE.

Lent by B. W. Warhurst, Esq.

253 **King Charles II.** reviewing the Fleet at the Nore in 1665. By W. VAN DE VELDE.

Lent by William Baugh, Esq.

254 **Sir George Rooke**, Admiral of the Fleet. (1650—1709.) By SIR PETER LELY, Bart.

Born 1650. Captain, 1673. Rear Admiral of the Red in the battle off Beachy Head, 1690. Vice Admiral of the Blue in the action off Cape Barfleur, 1692; distinguished himself in the chase of the flying enemy, and commanded the boats of the fleet at the destruction of a division of the French ships in La Hogue Bay. In 1693, when commanding a combined English and Dutch squadron, convoying the

254—*continued.*

Mediterranean trade, saved by his prudence the chief part from capture by a superior French force. Appointed, 1702, Vice Admiral of England. Commanded the fleet in the expedition to Cadiz; and at the destruction of shipping in the harbour of Vigo, in 1702. Captured Gibraltar in July, 1704; and fought the battle of Malaga in the succeeding month. Died 1709.

Lent by John Gates, Esq.

255 Rear Admiral Sir Francis Wheler. (—1794.)

Captain, 1680. Knighted, 1689. Commanded the Albemarle at the battle of Beachy Head. Rear-Admiral and Commander-in-Chief in the West Indies, 1692. In 1693 appointed Commander-in-Chief in the Mediterranean. The *Sussex*, carrying his flag, foundered in a violent storm, 19th March, 1794, a little to the east of Gibraltar. "Every person on board perished, two Moors excepted."

Lent by Viscount Hood.

256 King James II., Lord High Admiral (1660-1673), and again whilst King (1685-1689). SIR PETER LELY, Bart.

Commanded the fleet in the action with the Dutch, 1665, when the Dutch Admiral's ship was blown up; and in the battle of Solebay, 1672.

Lent by H. J. V. Neale, Esq.

257 Admiral Sir Cloudisley Shovell. (1650—1707.) By M. DAHL.

Born, 1650. In 1674, while Lieutenant of Admiral Sir John Narbrough's ship, conducted a difficult negotiation, and afterwards led the boats of the squadron to destroy the shipping in the harbour of Tripoli; was immediately promoted to be a Captain of a fifth-rate. Commanded the *Edgar* at the battle in Bantry Bay, in 1689, and was knighted for his gallantry on that occasion. Rear-Admiral, 1690. Rear-Admiral of the Red, at the battle off Cape Barfleur, in 1692. Served under Sir George Rooke at Vigo, and in the battle off Malaga. Rear-Admiral of England, and Commander-in-Chief of the Mediterranean Fleet at the taking of Barcelona, in 1705. After a series of brilliant services, he was lost, with all his crew, on the Scilly Islands, on the 22nd of October, 1707. A monument is erected to his memory in Westminster Abbey.

Lent by S. Martin Leake, Esq.

258 Captain Packington Broke. (—1672.)

Lieutenant, 1661. Captain, 1662. Captain of the *Foresight* in 1664, and again in 1672, when he was killed in the Battle of Solebay, 28th May.

Lent by Lady de Saumarez.

259 George Legge, Lord Dartmouth, Admiral of the Fleet. (1647-1691.) By SIR PETER LELY, Bart.

Born, 1647. Served with distinction in the Dutch wars. Governor of Portsmouth, 1673. Created Baron Dartmouth, 1682. Sent to Tangier to destroy the fortifications and bring away the garrison, 1683. Appointed Admiral of the Fleet by James II., to intercept the Prince of Orange, 1688. Deprived of his offices after the Revolution, and sent to the Tower, where he died, 1691.

Lent by Lord Dartmouth.

260 The Embarkation of Catherine of Braganza; the Royal Charles, in which Lord Sandwich brought the Princess to England, in the near distance. The Arms of Charles II. appear on the stern of the ship. By LINGELBACH.

Lent by B. S. Marks, Esq.

- 261 **The Cinque Ports Fleet in Pegwell Bay.** By WILLIAM VAN DE VELDE (the Elder).

About 60 years ago this picture, with eight others, was discovered behind the plaster of a room in an old house in Harnet Street, Sandwich, and was presented by the owner to the Dowager Countess of Ashburnham. At her death it was sold to Admiral Jolliffe, whose widow gave it to the Corporation of Sandwich in 1882.

Lent by the Mayor and Corporation of Sandwich.

- 262 **Battle of Solebay or Southwold Bay.** 28th May, 1672. By W. VAN DE VELDE.

Lent by the Earl of Sandwich.

- 263 **Battle of Solebay, 1672.**

Lent by the Earl of Sandwich.

- 264 **Sir Robert Holmes.** (1622-1692.)

Born, 1622. Served during the Civil War in the King's Army; and in the squadron with Prince Rupert, 1649-50. In 1660-1 commanded a squadron on the Guinea Coast. In 1664, reduced the Dutch African settlements, and took New York. Served during the Dutch War in all the principal battles. Knighted, March, 1666. Rear-Admiral, May, 1666. Commanded the squadron which burnt the Dutch shipping at the Vlie, August 8, 1666. Captain-General and Governor of the Isle of Wight, 1669. In 1672, commanded the squadron appointed to intercept the Dutch Smyrna Fleet off the Isle of Wight. Commanded the St. Michael in the Battle of Solebay. Died, 1692. Buried at Yarmouth, Isle of Wight.

Lent by Lord Heytesbury.

- 265 **Samuel Pepys.** (1633-1703.) By SIR GODFREY KNELLER, Bart.

Born, 1633. Clerk of the Acts, 1660. Secretary of the Admiralty, 1673 to 1689. Died 1703. The writer of the inimitable "Diary."

Lent by the Council of the Royal Society.

- 266 **Engagement between English and Dutch Fleets (1670).** By VAN DE VELDE.

Lent by John D. Milburn, Esq.

- 267 **British Vessel engaged with three Spaniards.** By N. POCOCK.

Lent by Her Majesty the Queen.

- 268 **Battle of Solebay.** 28th May, 1672. By W. VAN DE VELDE (the Elder).

- 269 Ditto.

- 270 Ditto.

- 271 Ditto.

Lent by the Mayor and Corporation of Sandwich.

- 272 **Vice-Admiral James Sayer.** (1721-1777.) Unknown.

Lent by Mrs. Boysmith.

- 273 **Matthew Aylmer, Lord Aylmer, Admiral of the Fleet.** (-1720.) Unknown.

Lieutenant, 1678. Commander, 1679. Captain, 1688. Commanded the Royal Katherine in the Action off Beachy Head, 1690, and in the battle off Cape Barfleur, 1692. Rear-Admiral, 1693, Vice-Admiral, 1694, and accompanied Admiral Russell to the Mediterranean.

273—continued.

Commander-in-Chief in the Mediterranean, 1698. Governor of Deal Castle, 1701. Commander-in-Chief of the Fleet, 1709. In 1714 appointed Governor of Greenwich Hospital, to which office he was confirmed by patent for life in 1717; Ranger of the Park, and Keeper of the Palace, as well as Admiral, and Commander-in-Chief of the Fleet. Elevated to the peerage, 1718. Rear-Admiral of England, 1718. Died, 1720. *Lent by the Lords Commissioners of the Admiralty.*

274 Sea Fight (Aug. 11th, 1673). By W. VAN DE VELDE.

Prince Rupert commanding the English and French Fleets against the Dutch.

Lent by Her Majesty the Queen.

275 A Mediterranean Fleet, Temp. Charles II. Unknown.

Lent by Messrs. E. and E. Emanuel.

276 The Visit of George (afterwards George I. of England), son of the Elector of Hanover, to England, in 1682. Three Royal Yachts (preceded by a cutter, and two other ships), the foremost flying a flag with the Arms of Brunswick and England at the main, and their seconds, with a similar flag at the sterns. Signed on the stern strake of the hindermost vessel, and dated 1682. By W. VAN DE VELDE.

Lent by F. J. Aldrich-Blake, Esq.

277 Action between English and Dutch vessels. By VAN DE VELDE (the Elder).

Lent by Her Majesty the Queen.

278 The British Fleet returning from Spain.

Lent by the Earl of Sandwich.

279 Edward Russell, Earl of Orford, Admiral of the Fleet. (1652-1727.) By SIR GODFREY KNELLER, Bart.

Born 1652. Captain, 1672. Treasurer of the Navy in 1689. Succeeded the Earl of Torrington as Admiral and Commander-in-Chief of the combined English and Dutch Fleet in 1690; and in May, 1692, obtained a decisive victory off Cape Barfleur over the French Fleet under Comte de Tourville, but from motives of party was soon afterwards dismissed his command. In 1693 re-appointed to the Channel Fleet and made First Commissioner of the Admiralty. Commander-in-Chief in the Mediterranean, 1694 to 1696. Created Earl of Orford, 1697. Died 1727.

Lent by Her Majesty the Queen.

- 280 Burning of the Royal James in the battle of Solebay** (May 28th, 1672). By W. VAN DE VELDE.

Lent by John Lewis Rutley, Esq.

- 281 Destruction of Dutch Shipping at Schelling, and burning of Bandavis** by Admiral Sir R. Holmes, August 8th, 1666. By W. VAN DE VELDE.

Following up their great victory of the 25th of June, the English proceeded to the Coast of Holland, and destroyed about 160 merchant ships and two men-of-war near the Vlie, and the next day burnt Bandavis. The Dutch admitted that they lost by this enterprise eleven millions sterling.

Lent by Her Majesty the Queen.

- 282 Dutch Fleet conveying William of Orange to England.** By VOGELAER.

Lent by Messrs. E. & E. Emanuel.

- 283 Captain John Kempthorne, in the Mary Rose, of 48 guns, attacked by seven Algerines, 29th December, 1669.** Ascribed to W. VAN DE VELDE.

Captain Kempthorne while convoying a fleet of merchant ships through the Straits of Gibraltar repulsed the attack of seven Algerine corsairs. The picture bears the following inscription:—

“Two we burnt, and two we sank, and two did run away,
And one we carried to Leghorn Roads to show we'd won the day.”

The Mary Rose was built at Woodbridge in 1664. For this gallant service Captain Kempthorne was knighted by King Charles II.

Lent by the Lords Commissioners of the Admiralty.

- 284 Sea Piece, showing Frigate of the Period.** Attributed to Sir J. THORNHILL. Restored by Mrs. MANNING.

This picture was painted on the panelled walls of a very old house in Church Street, Greenwich. Its existence, with others, was known to many of the inhabitants of the neighbourhood, and it was commonly reported to have been painted by Sir James Thornhill during the nineteen years he was engaged in decorating the Painted Hall of Greenwich Hospital.

Lent by W. T. Manning, Esq.

- 285 Captain the Hon. Henry Mordaunt.** (-1710.) By SIR GODFREY KNELLER, Bart.

Second son of Charles, third Earl of Peterboro. Captain, 1703. In 1707, when in command of the Resolution, fell in with a squadron of six French ships, and after a running fight of nine hours, ran his ship on shore and burnt her, he himself being severely wounded. Died, 1710.

Lent by Sir Frederick Milner, Bart., M.P.

- 286 Captain Joseph Taylor.** (1661-1733.)

Born, 1661. Captain, 1703. Commanded the Charles galley in the Mediterranean in 1704. Afterwards commanded the Triton of 50 guns, in the Channel, with “almost unprecedented success as a cruiser.” Died, 1733.

Lent by Colonel Pierce T. H. Taylor.

- 287 Admiral Sir Charles Wager, Kt. (1667-1743.) Unknown.**
 Captain, 1692. Served continuously through the wars of William III. and Anne. In 1708, when Commodore of a squadron in the West Indies, he fell in with the Spanish treasure fleet off Carthagena, on the mainland of South America, 28th May, and captured one ship very richly laden; but the ship of the Spanish Admiral, having on board upwards of 12,000,000 dollars, was sunk. Rear-Admiral, 1707; Vice-Admiral, 1716. Commissioner of the Admiralty, 1718. Admiral, 1731. First Commissioner, 1733. Treasurer of the Navy, 1742. Died, 1743. Monument in Westminster Abbey.
Lent by the Rev. E. S. Tiddeman.
- 288 Sir John Norris, Admiral of the Fleet. (-1749.) By GEORGE KNAPTON.**
 Captain, 1690. Commanded the Oxford in the action off Malaga, 1704. Rear-Admiral, 1707. Forced the passage of the Var, and served at the siege of Toulon. Vice-Admiral, 1708. Admiral, 1709; and Commander-in-Chief in the Mediterranean till 1711. Commissioner of the Admiralty, 1718. He continued in active service, with little intermission, till 1739, when he was appointed Vice-Admiral of England, and Commander-in-Chief of the Fleet. Died, 1749.
Lent by the Lords Commissioners of the Admiralty.
- 289 Captain William Dampier. (1652-1715.) By THOMAS MURRAY.**
 Born, 1652. In 1674 went to Jamaica, became associated with the buccaneers, and continued with them engaged in piratical war against the Spaniards for about fifteen years. The accounts of his voyages, which he published, recommended him to the Government, and he was appointed, in 1698, Captain of the Roebuck, for a voyage of discovery. In 1703 he fitted out the St. George privateer for the Pacific, where he left the ship and made his way home by the Eastern Archipelago. He was afterwards master and pilot of the privateering expedition of Woodes Rogers, and died, 1715.
Lent by the Trustees of the National Portrait Gallery.
- 290 Battle off Cape Barfleur (19th May, 1692). By RICHARD PATON.**
 The French Fleet under the Comte de Tourville, assembled with the object of aiding James II. in an attempt to regain the throne of England, was met by the combined English and Dutch fleets under Admiral Edward Russell and Admiral Van Almonde off Cape Barfleur on 19th May, 1692. Portions of the fleets were hotly engaged in close combat when a thick fog suspended the fight until the evening. At the close of the day the French ships were defeated and scattered. Three of the largest of them, including the Admiral's ship the Soleil Royal, were chased to Cherbourg and burnt by a squadron under Admiral Delaval. Another portion of the fleet escaped into the harbour of La Hague, and was there destroyed by Admiral Rooke.
Lent by the Lords Commissioners of the Admiralty.
- 291 Frigate with Convoy. By VAN DE VELDE.**
Lent by H. Grose Smith, Esq.
- 292 Gibraltar relieved by Sir John Leake (1704). By H. VALE. (?)**
Lent by Stephen Martin Leake, Esq.

- 293 **Vice-Admiral Sir Thomas Hopsonn, Kt.** (1642-1717.) By M. DAHL.

Born, 1642. Lieutenant of the Dreadnought at Solebay. Captain, 1678. Commanded the York in the battle off Beachy Head, 1690; and the St. Michael at Barfleur in 1692. Rear-Admiral and Vice-Admiral, 1693. Knighted for the great gallantry he displayed in leading the attack at Vigo, 1702. Died, 1717.

Lent by the Lords Commissioners of the Admiralty.

- 294 **George Byng, Viscount Torrington, Admiral of the Fleet.** (1663-1733.) By SIR GODFREY KNELLER, Bart.

Born, 1663. Entered the Navy as "a King's letter boy," 1678. As agent for the party of the Prince of Orange in 1688, was influential in winning the fleet. Captain, 22nd December, 1688. Commanded the Hope, 70 guns, in the battle off Beachy Head, 1690. Rear-Admiral, 1703. Commanded the attacking squadron at the capture of Gibraltar, 1704, and a division of the fleet in the battle off Malaga, for which services he was knighted. Vice-Admiral, 1705. Commanded the fleet at the taking of Alicant, in 1706. Admiral and Commander-in-Chief of the fleet which gained the brilliant victory over the Spanish fleet off Cape Passaro, 1718. Elevated to the peerage, 1721. Appointed First Lord of the Admiralty, 1727. Died, 1733. *Lent by Mrs. Hartshorne.*

- 295 **Admiral Sir John Balchen, Kt.** (1670-1744.) By SIR GODFREY KNELLER, Bart.

Born, 1670. Captain, 1697. In command of the Chester, 1707, was captured, after a very gallant defence, while protecting a fleet of merchant ships. In 1709 he was again taken, in the Gloucester, by Duguay Trouin's squadron. Captain of the Shrewsbury in the battle of Cape Passaro, 1718. Rear-Admiral, 1728. Vice-Admiral, 1734. Admiral, 1743. Commanded the fleet sent to release Sir Charles Hardy, who was blockaded in the Tagus, and after performing this service was lost in the Victory, 110 guns, with 1,200 of her crew, off Alderney, in October, 1744.

Lent by the Lords Commissioners of the Admiralty.

- 296 **Destruction of the French Ships** in the Bay of La Hogue, after the battle of Barfleur, 23rd May, 1692. By B. WEST, P.R.A.

Lent by the Duke of Westminster, K.G.

- 297 **The Channel Fleet.** By C. BROOKING.

The picture represents eight sail under a Rear-Admiral of the Blue, and a two-decker flying a red ensign and Commodore's broad pennant.

Lent by Major G. L. Cuming.

- 298 **H. M. S. Resolution, 70,** Captain The Hon. Henry Mordaunt, R.N., attacked by six French Men of War, all of superior force, on March 19th, 1707. After a prolonged action of over five hours, the whole of the boats of the French squadron were sent in to attack the vessel, but they were repulsed in the most gallant manner, and obliged to retire to their ships.

The condition of the Resolution was, however, hopeless, although she never fell into the enemy's hands, for the next day, having been previously run on shore, she was set on fire by her heroic crew, who then made their way to the shore.

Lent by Sir Frederick Milner, Bart., M.P.

- 299 **British Man of War with the Sovereign on Board.** By VAN DE VELDE, with additions by J. C. SCHETKY. *Lent by the Misses Schetky.*

- 301 **Prince George of Denmark, Lord High Admiral. (1653-1708.)** By SIR GODFREY KNELLER, Bart.
Consort of Anne, Queen of England. Lord High Admiral, 1702 to 1708. Died, 1708. *Lent by the Lords Commissioners of the Admiralty.*
- 302 **H.M.S. Royal William at Spithead.** By J. C. SCHETKY. *Lent by the Misses Schetky.*
- 303 **Vice-Admiral John Benbow. (1653-1702.)** By SIR GODFREY KNELLER, Bart.
Born, 1653. Master, 1679. Lieutenant, 1689. Captain, 1689. Master of the Fleet under the Earl of Torrington in the action off Beachy Head, and under Admiral Russell at Barfleur and La Hogue. Commanded a squadron employed against the French seaports, 1693-4. Rear-Admiral, 1696. Commanded a squadron in the Channel, 1698; and in the West Indies, 1699. Vice-Admiral, 1700. Sent a second time to take command in the West Indies; and in 1702 was mortally wounded in action with a French squadron under Commadore du Casse. *Lent by the Lords Commissioners of the Admiralty.*
- 304 **James Berkeley, Earl of Berkeley, K.G., Admiral and Commander-in-Chief. (1680-1736.)** Unknown.
Born, 1680. Captain, 1701. Commanded (as Lord Dursley) the Boyne with great credit in Rooke's action off Malaga, 1704; and the St. George at the siege of Toulon, under Shovell; was in company with that Admiral when he was wrecked, but miraculously escaped. Vice-Admiral, 1708, and actively employed in the Channel and North Sea stations. First Commissioner of the Admiralty, 1717. Admiral and Commander-in-Chief of the Fleet, and Vice-Admiral of England, 1719. Was five times one of the Lords Justices when the King went to Hanover. Died, 1736. *Lent by the Lords Commissioners of the Admiralty.*

305 **Capture of Vigo.** *Lent by Her Majesty the Queen.*

306 **Admiral Thomas Mathews.** (1676-1751.) By ARNULPHI.

Born 1676. Captain, 1703. Captured a French frigate, 1707. In command of the Chester, after a spirited action, took the Clorieux, one of Duguay Trouin's squadron, 1709. Captain of the Kent in the action off Cape Passaro, 1718, and assisted in the capture of the Spanish Admiral's ship. Commander-in-Chief in the Mediterranean, 1742. In 1744, attacked the combined French and Spanish fleets with great spirit, but, after a partial action, in which Vice-Admiral Lestock's division took no part, the enemies' fleet escaped. Much discontent was felt at this result, and courts-martial were held, which declared Admiral Mathews incapable of further employment, and acquitted the Vice-Admiral on the ground that he had obeyed orders. Died, 1751.

*Lent by the Lords Commissioners of the Admiralty.*

307 **A Coming Storm.** Attributed to BAKHUYSEN.

Squadron coming up to the wind. Four men-of-war flying the Union of England and Scotland, time of William and Mary.

*Lent by William Little, Esq.*

308 **An engagement,** before the time of the Union, between English and French ships. English flying St. George's Cross. French flying white flag. Attributed to VAN DE VELDE.

*Lent by the Lords Commissioners of the Admiralty.*

309 **The burning of Païta, 1741.** *Lent by Chas. L. M. Pearson, Esq.*

310 **Admiral Edward Vernon.** (1684-1757.) By CHARLES PHILLIPS.

Born, 1684. Captain, 1706. Vice-Admiral, 1739. In command of a squadron captured Porto Bello the same year. Commanded the Fleet at the attack upon Cartagena in 1741. Admiral, 1745. Struck off the list of Admirals, 1746, for publishing two pamphlets containing letters received from the Secretary of State and Board of Admiralty. Died, 1757.

*Lent by Lord Vernon.*

311 **Admiral Thomas Smith.** ( -1762.) By RICHARD WILSON. R.A.

Distinguished among the seamen of his day by the appellation of "Tom of Ten Thousand," which he acquired by having, when First-Lieutenant of the Gosport, in the absence of his captain, compelled a French ship in the Sound to strike her flag, and fire a salute. On the complaint of the French Ambassador, he was dismissed the service, but was afterwards restored. Captain, 1730. Rear-Admiral, 1747. Vice-Admiral, 1748. President of the court martial on Admiral Byng. Admiral, 1757. Died, 1762.

*Lent by the Lords Commissioners of the Admiralty.*

312 **The taking of Porto Bello by Vice-Admiral Vernon, 21st November, 1739.** By GEORGE CHAMBERS.

Porto Bello on the north side of the Isthmus of Darien, defended by strong fortifications, was taken by Vice-Admiral Vernon with a squadron of six ships of the line on 21st November, 1739. Commodore Brown in the Hampton Court led the attack, and after the guns of the strong defence at the entrance to the harbour, called the Iron Castle, had been nearly silenced, the Admiral sent the boats ashore armed with seamen, who quickly climbed into and made themselves masters of the castle. The other defences were surrendered by the Spanish governor on the following day.

*Lent by the Lords Commissioners of the Admiralty.*

- 313 Rear-Admiral Sir Charles Knowles's Squadron attacking Port Louis in St. Domingo, March 8th, 1748.** By R. PATTON. 608  
*Lent by Her Majesty the Queen.*

- 314 Admiral Sir John Jennings, Kt. (1664—1744.)** By JONATHAN RICHARDSON.

Born, 1664. Captain, 1689. In command of the Kent, in 1702 distinguished himself at the destruction of the shipping in Vigo; and in 1704 at the capture of Gibraltar, and action off Malaga; for which services he was knighted. Rear-Admiral, 1705. Headed a storming party at the assault of Alicant in 1706. Vice-Admiral and Admiral, 1708. Commander-in-Chief of the Mediterranean from 1711 to 1713. Commissioner of the Admiralty, 1714. Appointed Governor of Greenwich Hospital, 1720; but still occasionally commanded afloat, till 1726. Rear-Admiral of England, 1733. Died, 1744.

*Lent by the Lords Commissioners of the Admiralty.*

- 315 Admiral The Hon. Edward Boscawen. (1711-1761.)** By SIR J. REYNOLDS, P.R.A. 838

Born, 1711. Entered the Navy, 1726. Lieutenant, 1732. Commander and Captain, 1737. At the capture of Porto Bello; and in command of the Shoreham at Cartagena. Commanded the Namur in Anson's action, May, 1747. Rear-Admiral, 1747; and appointed Commander-in-Chief of a squadron sent to the East Indies, and General of the land forces to be employed on the occasion. Commissioner of the Admiralty, 1751. Vice-Admiral, 1755. Commanded a fleet on the coast of North America in 1755; and again at the reduction of Louisbourg in 1758. Chased and destroyed a French squadron under M. de la Clue, 1759. Admiral, 1759. General of Marines, 1759. Died, 1761.

*Lent by the Trustees of the National Portrait Gallery.*

- 316 Rear-Admiral Sir Charles Knowles's Action with a Spanish Squadron off the Havana, Oct. 1st, 1748.** By R. PATTON.

In this action the Spanish lost the Conquistador, 64 (which struck to Sir Charles's flagship, the Cornwall, 80, Captain Taylor) and 86 killed and 197 wounded. The killed included Admiral Reggio and 14 Officers.

*Lent by Her Majesty the Queen.*

- 375 John Jervis, Earl of St. Vincent, G.C.B., Admiral of the Fleet. (1735-1823.)** By SIR W. BEECHEY, R.A.  
Born, 1735. Commander, 1759. Captain, 1760. Commanded the *Foudroyant* in Keppel's action, 1778; and in the same ship captured the French 74-gun ship *Pégase*, in 1782, for which he was made a K.B. In Lord Howe's Fleet at the relief of Gibraltar. Rear-Admiral, 1787; Vice-Admiral, 1793. Commanded the Naval Forces at the reduction of the French West India Islands, 1794. Admiral, 1795; and Commander-in-Chief of the Mediterranean. On the 14th February, 1797, engaged and obtained a splendid victory over the Spanish Fleet, off Cape St. Vincent. Created an Earl; honoured with a gold chain and medal, and a pension of £3,000 a year. Continued in command of the Mediterranean Fleet till 1799. Commander-in-Chief of the Channel Fleet, 1800, and Lieut.-General of Marines. First Lord of the Admiralty, 1801-1804. Commander-in-Chief of the Channel Fleet, 1806-1807. General of Marines, 1814. Admiral of the Fleet, 1821. Died, 1823.  
*Lent by the Fishmongers' Company.*
- 376 The British Squadron, under Admiral Barrington, beating off a French Squadron at St. Lucia, 15th December, 1778.** By D. SERRES, R.A.  
When Admiral Barrington with a small fleet and 5,000 troops had effected a landing on St. Lucia, the Comte d'Estaing with a superior fleet and a large number of troops arrived for the relief of the island. The Admiral anchored his five line of battle ships across the entrance of the Cul-de-Sac and beat off two attacks made by 10 sail of the line. The French troops, subsequently landed to the northward, were also repulsed with great loss, and, D'Estaing having withdrawn his fleet to Martinique, the French governor surrendered the island.  
*Lent by the Lords Commissioners of the Admiralty.*

Born, 1751. Lieutenant, 1773. Served on the North American Station, and was made a Captain by Lord Howe in 1778. Governor of Dominica, 1783. Baronet, 1790. Rear-Admiral, 1795. Second in command of the Fleet off Cadiz under the Earl of St. Vincent in 1798. Vice-Admiral, 1799. Commander-in-Chief of the Squadron off Cadiz, 1804. Admiral, 1805. Died, 1824.

*Lent by Sir J. Campbell-Orde, Bart.*

- 390 **Death of Captain James Cook, at Owyhee, 14th February, 1779.** By W. HODGES, R.A.

In February, 1779, Captain Cook returned to the Island of Owyhee, which he had discovered in the previous year, and, at first, held friendly intercourse with the natives. Finally, however, a boat was stolen and many thefts from the ship were committed. Captain Cook therefore landed, accompanied by Lieutenant Phillips, of the Marines, and seven of his men, and endeavoured to obtain possession of the king, whom he intended to hold as a hostage until the boat was restored, but a large concourse of natives pressed upon him, and obliged him to retreat to the shore. While turning to restrain the fire from the boats he was stabbed from behind by one of the chiefs, and immediately afterwards despatched by another.

*Lent by the Agent-General of New South Wales.*

- 391 **Rear-Admiral Richard Smith.** (1732-1811.) By SIR H. RAEURN, R.A.

This was an episode of the action off Providien Island.  
*Lent by T. R. S. Temple, Esq.*
- 415 Rear-Admiral Sir Thomas Troubridge, Bart.** (1758-1807.) By SIR W. BEECHEY, R.A.  
Born, 1758. Captain, 1783. Commanded the *Culloden*, and highly distinguished in the battle of St. Vincent, and at the Nile. Commanded the naval brigade in the reduction of St. Elmo at Naples, 1799. Baronet, 1799. Captain of the Fleet to Lord St. Vincent in 1800-1; and with him, a Lord of the Admiralty, 1801-4. Rear-Admiral, 1805, and Commander-in-Chief in the East Indies. Lost in the *Blenheim*, on the passage to the Cape of Good Hope; supposed to have foundered in a hurricane off the coast of Madagascar, February, 1807.  
*Lent by Miss C. F. Troubridge.*

- 416 **Action** between H.M. Ship *Serapis*, 40, Captain Richard Pearson, and the French Ship *Bon Homme Richard*, 40, Captain Paul Jones, off Scarborough, September 23rd, 1779. By THOMAS MITCHELL.  
The French frigate *Alliance*, 40, also engaged the *Serapis*. The Countess of Scarborough, 20, armed ship. Captain Piercy, was at the same time engaged and taken by the *Pallas*, 32, and the *Vengeance*, 12, of Paul Jones's squadron. Captain Pearson won a Knighthood by the gallantry of his defence. *Lent by Rev. E. Elton.*
- 417 **Admiral Sir John Thomas Duckworth, Bart., G.C.B.** (1748-1817.)  
Born, 1748. Captain, 1780. Commanded the *Orion* in the action of 1st June, 1794. In 1798 commanded the naval force at the reduction of Minorca. Rear-Admiral, 1799. K.B., 1801. Vice-Admiral, 1804. Won a singularly complete victory over the French off St. Domingo, 1806. Led a squadron through the Dardanelles, 1807. Commander-in-Chief at Newfoundland, 1810. Admiral, 1810. Baronet, 1813. Died, 1817.  
*Lent by Admiral Sir G. Duckworth-King, Bart., K.C.B.*
- 418 **Entrance to the Tagus**, with a frigate under sail. By T. LUNY.  
*Lent by Admiral Cornish Bowden.*
- 419 **Action** between the French *César*, 74, and H.M. Ship *Isis*, 50, Captain James Rayner. August 16, 1778. By the Rev. J. MITCHELL.  
After a desperate action, which lasted an hour and a half, the *César* sheered off leaving the *Isis* incapable from losses sustained by her masts and rigging but otherwise little injured. The Captain of the *César*, M. Bougainville, lost an arm in the engagement.  
*Lent by Rev. Thos. Halliwell.*
- 420 **Action on the Dogger-bank**, 5th August, 1781. By D. SERRES, R.A.  
*Lent by Henry Twite, Esq.*
- 421 **The Fleet prepared in expectation of war with Spain in 1790.**  
Painted for Admiral of the Fleet Sir G. Byam Martin, from a sketch taken at the time by an officer of the fleet. By WALKER.  
*Lent by Admiral Sir William F. Martin, Bart., G.C.B.*
- 422 **H.M.S. Roebuck**, 44, Captain Andrew Snape Hamond, forcing the passage of the New River, a branch of the Hudson, October, 1777. By D. SERRES, R.A. *Lent by Sir G. E. Hamond-Græme, Bart.*
- 423 **Repulse of the French Fleet at St. Kitt's by Sir Samuel Hood's Fleet**, January 26th, 1782. By N. POCOCK.  
In January 1782 Sir Samuel Hood with 22 ships of the line attempted to relieve the island of St. Christopher, then besieged by the French. By skilful manœuvring he succeeded in drawing the French Fleet off the land and in gaining the anchorage of Basseterre which the French ships had just quitted. Anchored in line of battle the British Fleet repulsed with heavy loss three furious attacks of the French, whose fleet, under the Comte de Grasse, consisted of 29 line of battle ships and two frigates. *Lent by the Lords Commissioners of the Admiralty.*
- 424 **Commissioner John Nicholson Inglefield.** (1748-1828.)  
Born, 1748. Lieutenant of the *Robust* in Keppel's action, 1778. Flag Captain to Sir Samuel Hood, on board the *Barfleur*, in 1781. Captain of the *Centaur* in the action off the Chesapeake, 5th

424—continued.

September, 1781; at St. Kitts, January, 1782, and at Dominica on 12th April. On the passage to England the Centaur foundered, 23rd September, 1782, only the captain and ten others being saved, after almost incredible sufferings. Captain of the Fleet to Lord Hood in the Mediterranean in 1794. For many years Commissioner of the Navy at Halifax. Died, 1828.

*Lent by Admiral Sir E. Inglefield, K.C.B., F.R.S., D.C.L.*

425 Vice-Admiral William Albany Otway. (—1814.)

Captain, 1787. Rear-Admiral, 1807. Second in command of the expeditionary force in the Scheldt in 1809. Vice-Admiral, 1811. Died, 1815.

*Lent by Admiral Sir E. Inglefield, K.C.B., F.R.S., D.C.L.*

426 An Episode of the Battle off Dominica, 12th April, 1782. The British ship Centaur, Captain J. N. Inglefield, engaging the French Ship César.

*Lent by the Lords Commissioners of the Admiralty.*

- 453 **Engagement** between H.M. frigate *Nyphe*, 36, Captain Edward Pellew (afterwards Lord Exmouth), and the French frigate *Cléopâtre*, 40, on June 19th, 1793. By INMAN (?).  
*Lent by Fleet-Paymaster Isaac B. Moorman, R.N.*
- 454 Ditto.  
In this spirited action the *Nyphe* lost 23 killed and 27 wounded. The *Cléopâtre*, which was captured, and which suffered much more severely, lost her gallant Commander, Captain Jean Mullen. For the service, Captain Pellew was knighted.
- 455 **The Engagement** between the *Nyphe*, 36, and the *Cléopâtre*, 40, June 19th, 1793.  
*Lent by Tansley Witt, Esq.*
- 456 **The Engagement** between the *Nyphe* and the *Cléopâtre*.  
*Lent by Tansley Witt, Esq.*
- 457 **Engagement** between the *Nyphe* and the *Cléopâtre*.  
*Lent by Tansley Witt, Esq.*
- 458 **Capture of the French frigate Réunion**, 36, off Cherbourg, by H.M.S. *Crescent*, 36, Capt. James Saumarez (afterwards Lord de Saumarez, No. .), Oct. 20, 1793. By T. ELLIOT.  
It is a singular fact that although the action lasted for over two hours, during which period the enemy lost 33 killed and 48 severely wounded, not a single Englishman was hurt. Capt. Saumarez was knighted for this action, and the prize was added to the navy.  
*Lent by Lord de Saumarez.*
- 459 **Action** between the *Arethusa*, Captain Marshall, and *Belle Poule*, on June 18th, 1778.
- 460 Ditto.  
*Lent by Her Majesty the Queen.*
- 461 **The Destruction of the Arsenal and Shipping at Toulon** (18th Dec., 1793). By W. A. KNELL, Senr.  
The artist painted this picture and another of the same size, "The battle of St. Vincent," in response to an invitation from the British Government in 1847. The St. Vincent picture was purchased from the painter for £800, and is now in one of the committee rooms of the Houses of Parliament.  
*Lent by Messrs. Henry Castle & Sons.*

Nothing accumulates faster than letters, but the Letter Filing System invented by the great Edison, and supplied by the Edison Mimeograph Company, 60, Ludgate Hill, London, makes order out of chaos.

- 478 **Rear-Admiral Sir Charles Brisbane, K.C.B. (1769-1829)**.

Born about 1769. Midshipman of the Hercules in the Battle of Dominica. Lost an eye at the siege of Bastia, while serving under Nelson. Captain, 1796. Served continuously, for the most part in the

478—*continued.*

West Indies, till 1808, when he was appointed Governor of St. Vincent. Knighted, 1807; K.C.B., 1815; Rear-Admiral, 1819. Died, 1829. *Lent by General Sir I. Ewart, K.C.B.*

479 **Sir Horatio Nelson wounded at Santa Cruz, Teneriffe, July 24, 1797.** By R. WESTALL, R.A.

The British attacking party, having suffered very severely, was allowed, upon threatening to burn the town, to re-embark, and was most chivalrously treated by Don J. A. Gutteri, the Spanish Governor.

Nelson's life was on this occasion saved by a seaman called John Sykes. *Lent by the Lords Commissioners of the Admiralty.*

480 **Sir George Martin, G.C.B., G.C.M.G., Admiral of the Fleet. (1765-1847.)** By CHARLES LANDSEER, R.A.

Born, 1765. Served in Keppel's action, 1778, in Byron's action, 1779, and in the three actions under Rodney, 1780. Captain of the Irresistible at the battle off Cape St. Vincent, and of the Northumberland at the capture of the *Généreux*, French 74, and at the blockade of Malta until it capitulated, 1800. Accompanied expedition to Egypt under Lord Keith, 1801. Captain of the *Barfleur* in Sir Robert Calder's action, 1805. Rear-Admiral, 1805. Vice-Admiral, 1810. Held various commands as a Flag Officer. K.C.B., 1815. G.C.B. and Admiral, 1821. Rear-Admiral of the United Kingdom, 1833. Vice-Admiral of the United Kingdom, 1834. Admiral of the Fleet, 1846. Died, 1847.

*Lent by the Lords Commissioners of the Admiralty.*

481 **H.M.S. Dryad, 44, Capt. Lord Amelius Beauclerk, going into action with the French frigate Proserpine, 42, on June 13th, 1796.** By T. WHITCOMBE.

*Lent by the Duke of St. Albans.*

482 **The French frigate Proserpine striking to H.M.S. Dryad, Capt. Lord Amelius Beauclerk, on June 13th, 1796.** By T. WHITCOMBE.

"The fight was conducted with so much vigour and judgment that in less than an hour the Proserpine struck to the Dryad." The Proserpine, though somewhat inferior in weight of metal, was largely superior in size and crew.

*Lent by the Duke of St. Albans.*

483 **King George III. presenting a Sword to Earl Howe, on board the Queen Charlotte, at Spithead, June, 1794.** By H. P. BRIGGS, R.A.

Soon after the victory of the 1st June, the King, accompanied by the Queen and some of the Royal Family, visited the Fleet at Portsmouth, inspected the prizes taken, and presented a valuable sword to Lord Howe.

*Lent by the Lords Commissioners of the Admiralty.*

484 **Action off Guernsey, June 8th, 1794.** Sir James Saumarez in H.M.S. *Crescent*, 36, covering the retreat of H.M. Ships *Druid*, 32, and *Eurydice*, 20, when attacked by a French squadron of six frigates and a brig. Sir James Saumarez was able to elude the enemy by steering through a narrow passage of rocks (never before attempted by a King's ship), having for one of his landmarks his own manor-house in Guernsey.

## 485 Ditto.

498 **Thomas Cochrane, Earl of Dundonald, G.C.B. Admiral.** (1775-1860.) By G. STROELING.

Born 1775. Lieutenant, 1796. Commander, 1800; and in command of the *Speedy* brig cruised with remarkable success on the coast of Spain, and in her captured the Spanish frigate *Gama*, 6th May, 1801. Captain, 1801. Commanded the *Pallas*, 1804; and *Impérieuse*, 1806. In her was specially appointed to take charge of the fire ships in the attack on the French fleet in Basque Roads, 11th April, 1809. Was made a K.B. In 1814 was accused of being implicated in a stock jobbing swindle, and sentenced to a year's imprisonment and a fine of £1,000. He was also dismissed from the Navy, and degraded from the Order of the Bath. After a brilliant and adventurous career in Chili, Brazil, and Greece, he obtained a reversion of the sentence, officially recognised as unjust; was reinstated in his naval rank, 1832, and in the Order of the Bath, 1847. Vice-Admiral, 1841. Commander-in-Chief in the West Indies, 1848. Admiral, 1851. Rear-Admiral of the United Kingdom, 1854. Died 1860.

*Lent by the Earl of Dundonald.*

499 **Blowing up of the *Boyne*, 98, at Spithead, May 1, 1795.** Taken from the old Saluting Battery, Portsmouth. "The flames, which darted from her in a perpendicular column of great height, were terminated by an opaque white cloud like a round cap." (James's Naval History, Vol. 1, pp. 285-6.) Contemporaneous. Unknown.

- 511 **Nelson at the Battle off St. Vincent, February 14th, 1797.** By FRANK BADEN-POWELL.  
Commodore Horatio Nelson leading his boarding party from his own ship, the Captain, to the glorious capture of two Spanish men-of-war—the San Nicolas and the San Josef.  
A private of the 69th Regt., then acting as Marines, was first across the cat-head, and broke in the windows of the upper starboard quarter gallery of the San Nicolas, immediately followed by Nelson, whose triumphant exclamation of "Westminster Abbey!" or Victory was received with a ringing British cheer; he was closely followed by Lieut. Pearson of the 69th, and Midshipman Wilkinson, Pat Fearney, and others. The forward division of the boarding party was led by Captain Berry, who was first man into the enemy's mizen chains, while Captain Miller, out on the bowsprit obeying Nelson's orders, remained on the Captain, and was presented by Nelson, on his return, with the sword of the Spanish Admiral, just surrendered on this most glorious Valentine's Day as Nelson called it. *Lent by William Imrie, Esq.*

- 514 **Commodore Nelson boarding the San Nicolas at the battle off Cape St. Vincent, 14th February, 1797.** By Sir WILLIAM ALLAN, R.A., and P.R.S.A.

This picture represents the memorable achievements of Nelson in the battle of St. Vincent. After engaging the Spanish four-decker Santissima Trinidad, Commodore Nelson directed the fire of his ship, the

514—*continued.*

Captain, against the San Nicolas. This ship ran foul of, and entangled herself with, the San Josef. The Captain lost her fore-topmast, and Nelson, fearing that she would drop astern, ran her into the starboard quarter of the San Nicolas, and carried that ship by boarding. On her surrender, Nelson pushed forward and led the boarders over the bulwarks of the San Josef, which also quickly surrendered.

*Lent by the Lords Commissioners of the Admiralty.*

515 **Rear-Admiral Sir Edward Berry, Bart., K.C.B. (1768-1831).** By THOMAS PHILLIPS, R.A.

Born, 1768. Entered the Navy, 1779. Lieutenant, 1794. In the Agamemnon with Nelson, 1796. Commander, 1796. A volunteer in the Captain, in the victory over the Spanish Fleet off Cape St. Vincent, when he boarded with Nelson, the Spanish ships San Josef, and San Nicholas. Captain, 1797. Flag Captain to Nelson at the Nile; taken prisoner in the Leander when bearing despatches of the victory. Commanded the Foudroyant at the capture of the G n reux and Guillaume Tell, 1800. Captain of the Agamemnon at Trafalgar, and in the action off St. Domingo, 1806. Created a Baronet, 1806. Nominated a K.C.B., 1815. Colonel of Marines, 1819. Rear-Admiral, 1821. Died, 1831.

*Lent by the Rev. E. Stanley Carpenter.*

516 **The Glorious First of June, 1794.** *Lent by Lord Middleton.*517 **Commodore Nelson boarding the Spanish first-rate San Josef in the action off Cape St. Vincent, 14th February, 1797.** By GEORGE JONES, R.A.

After the surrender of the San Nicolas, Nelson, followed by Captain Berry, Lieutenant Pearson of the 69th Regiment, John Sykes, his coxswain, and several others of his boarding party, climbed over the bulwarks of the San Josef, and quickly overcame the resistance offered to them. At this moment a Spanish officer called from the quarter-deck rail that the ship had surrendered, and the swords of the officers were immediately afterwards given up to Nelson.

*Lent by the Lords Commissioners of the Admiralty.*

518 **Captain George Duff. (1764-1805.)** By SIR H. RAEBURN, R.A.

Born 1764. Lieutenant of the Montagu in Rodney's action, 12th April, 1782. Captain, 1793; and served continuously till his death in the battle of Trafalgar while in command of the 74-gun ship Mars. A monument is erected to his memory in St. Paul's Cathedral.

*Lent by Mrs. Norwich Duff.*

519 **Vice-Admiral The Hon. Sir Henry Blackwood, Bart. (1770-1832.)** Unknown.

Born, 1770. Entered the Navy, 1781; Lieutenant, 1790. First Lieutenant of the Invincible at the battle of 1st June, 1794. Commander, 1794. Commanded the Meg ra in Lord Bridport's action, 1795. Captain, 1795, of the Brilliant, and in action with two French frigates of superior force, 1798. Greatly distinguished himself as Captain of the Penelope, 36, in a night action with the Guillaume Tell, 84, which led to her capture, 1800. Rendered important services as Captain of the Euryalus at the battle of Trafalgar, and brought home the despatches announcing the victory. Commanded Ajax in Sir J. T. Duckworth's fleet, in 1807; but his ship took fire and blew

519—*continued.*

up a few days before the passage of the Dardanelles. Rear-Admiral, 1814. Created a Baronet, 1814. K.C.B. and Commander-in-Chief in the East Indies, 1819. Vice-Admiral, 1821. Commander-in-Chief at the Nore, 1827. Died, 1832.

*Lent by the Lords Commissioners of the Admiralty.*

521 Admiral Sir Henry Digby, G.C.B. (1770-1842.)

Lieutenant, 1790. Commander and Captain, 1796. In command of the *Alcmène* in 1799, assisted in the capture of the Spanish treasure-ship *Santa Brigida*, "having on board 1,400,000 dollars, independent of a cargo of immense value." Commanded the *Africa* in the battle of Trafalgar. Rear-Admiral, 1819. Vice-Admiral, 1830. K.C.B., 1831. Admiral, 1841. G.C.B., 1842. Commander-in-Chief at the Nore, 1840. Died, 1842.

*Lent by Lord Digby.*

522 Nelson receiving the swords of Spanish Officers on board the *San Josef*, of 112 guns, at the Battle of St. Vincent, 14 February, 1797. Beyond the *San Josef* is seen the *San Nicolas*, of 80 guns, in possession of the crew of Nelson's ship, the Captain, 74 guns. By BARKER.

The incident here depicted is thus described in Nelson's own words:—"On the quarter-deck of a Spanish first-rate, extravagant as the story may seem, did I receive the swords of vanquished Spaniards; which, as I received, I gave to William Fearney, one of my bargemen; who put them, with the greatest *sang froid*, under his arm. I was surrounded by Capt. Berry, Lieut. Pearson, of the 69th Regiment, John Sykes, John Thomson, Francis Cooke, all old Agamemmons; and several other brave men, seamen and soldiers. Thus fell these ships." In a postscript he adds: "In boarding the *San Nicolas* (from which ship he crossed over to the *San Josef*), I believe we lost about seven killed and ten wounded, and about twenty Spaniards lost their lives by a foolish resistance—none were, I believe, lost in boarding the *San Josef*. There is a saying in the Fleet too flattering for me to omit telling, viz., 'Nelson's patent bridge for boarding first-rates,' alluding to my passing over an enemy's 80-gun ship."

The portrait of Nelson is from a cast by Flaxman. The portraits of Capt. Berry, who stands between Nelson and his bargeman, and Lieut. Pearson, who is on the right of the latter, are from original pictures.

- 547 **Capture of L'Hercule, 74, by H.M.S. Mars, 74, Captain A. Hood, 21st April, 1798.** By T. LUNY.

A most determined action. During most of the time the ships were so close that the guns could not be run out, but had to be fired inboard. Twice the men of L'Hercule attempted to board, but each time were repulsed with great slaughter; and at length, having sustained the terrible loss of about 290 killed and wounded, L'Hercule surrendered. The Mars lost Captain Hood and 60 men wounded and 30 killed or missing. The Mars on this occasion really mounted 82 guns, and L'Hercule, 78; but, all things considered, the two ships were as nearly equal as possible.

*Lent by Admiral Sir A. W. A. Hood, G.C.B.*

- 552 Daylight, March 31, 1800.** By HARRY COLLIS.  
The French ship Guillaume Tell, 80, with many troops on board, slipped out of Malta at 11 p.m., 30th March, 1800. - The Penelope, 44, Captain Blackwood, at once gave chase, came up with her at 12.30 a.m., luffed under her stern, gave her the port broadside, then bore up under the Guillaume Tell's port quarter, and gave her the star-board broadside. The French ship, aware that, if she brought to, the other ships of the British squadron (the Foudroyant, 84, and Lion, 64) would soon take part in the action, only replied with her stern chasers, and steered to the N.E. The Penelope continued all night, and at daybreak the main and mizen topmasts and the mainyard of the enemy came down. The Foudroyant and Lion came up and engaged, and at 8 a.m. the Guillaume Tell struck, after a most gallant defence, the French Admiral refusing to surrender to any but an officer from the frigate. This picture was painted from the description of the action in the log of Mr. Charles Inglis, first lieutenant of the Penelope to whom Rear-Admiral Decrès surrendered his sword. *Lent by Mrs. Charles Combe.*

- 561 **Battle of the Nile, 1st August, 1798.** By J. P. DE LOUTHERBOURG, R.A.  
*Lent by Mrs. Frith.*
- 562 **Lord Nelson, when wounded at the Nile.**  
*This picture, which was sent to Lady Parker, wife of Sir Peter Parker, by Lord Nelson, represents his Lordship at the moment when the French flag-ship L'Orient blew up. The surgeons were dressing a severe wound which he had received in the head, when, hearing that a ship was on fire, he ran up on deck.*  
*Lent by the Lords Commissioners of the Admiralty.*
- 563 **Sea Piece, illustrating an action apparently of the early eighteenth century.** Attributed to R. DODD. *Lent by Messrs. H. Graves & Sons.*
- 564 **Battle of the Nile, 1st August, 1798.** By T. WHITCOMBE.  
*The Fleet under Nelson, consisting of 13 seventy-fours and two smaller vessels, found the French Fleet, composed of 13 line-of-battle ships, four frigates, and two brigs, anchored in Aboukir Bay. The action commenced at sunset, and was contested with the greatest bravery on both sides. About 10 o'clock the French Admiral's ship, L'Orient, of 120 guns, blew up with a tremendous explosion. Several of the enemy's ships continued the action, but eventually the whole were taken or destroyed, except two line-of-battle ships and two frigates. For this most important victory Sir Horatio Nelson was created Baron Nelson of the Nile.*  
*Lent by the Lords Commissioners of the Admiralty.*
- 565 **Battle of the Nile, 1st August, 1798.** By BUTTERWORTH. Blowing up of L'Orient, 120.  
*Lent by James Charles Hurst, Esq.*

- 566 H.M.S. Phœnix**, Captain W. H. Webley, conveying 17 sail of the East India Company's China fleet, from Madras to England, 1814. W. Huggins, who afterwards became a well known marine painter, was then purser's steward on board the *Perseverance*, one of the fleet. For this arduous service the captains of the fleet subscribed £500 and presented Captain Webley with a service of Plate. By W. J. HUGGINS.  
*Lent by the Misses Webley Parry.*
- 567 The capture of the Niemen**, 40, by the *Amethyst*, 36, Captain Michael Seymour, April 6th, 1809.  
*Lent by Vice-Admiral Sir M. Culme Seymour, Bart.*
- 568 Admiral Sir Ross Donnelly, K.C.B.** ( -1840.) By W. SALTER. Lieutenant; 1781 and served in the *Mediator*, with Captain Luttrell (see No. ) in 1782. First Lieutenant of the *Montagu* in the battle of 1st June, 1794, and succeeded to the command on the death of the Captain, who was killed in the action. Commander, 1794. Captain, 1795. Served actively during the war. Rear-Admiral, 1814. Vice-Admiral, 1825. K.C.B., 1837. Admiral, 1838. Died, 1840.  
*Lent by Miss B. N. Melladew.*

*Lent by Capt. W. S. de Kantzow, R.N.*
- 570 Vice-Admiral Sir Thomas Masterman Hardy, Bart., G.C.B.** (1769-1839.) By ROBERT EVANS.  
Born, 1769. Lieutenant, 1793. Commanded the boats of the *Minerve* at the cutting out of the *Mutine*, and promoted May, 1797. Commanded the *Mutine* at the Nile. Captain, 1798. Captain of the *St. George*, and with Nelson on board the *Elephant* at the battle of Copenhagen, 1801. Captain of the *Victory*, bearing Lord Nelson's flag, at Trafalgar. Baronet, 1806. K.C.B., 1815. Commodore on the South American Station, 1819-23. Rear-Admiral, 1824. Commissioner of the Admiralty, 1830. G.C.B., 1831. Governor of Greenwich Hospital, 1834. Vice-Admiral, 1837. Died, 1839.  
*Lent by the Baroness Burdett Coutts.*
- 570a Horatio Nelson, Viscount Nelson, K.B., Vice-Admiral.** (1758-1805.) By JOHN HOPPNER, R.A.  
Born, 1758. Lieutenant, 1777. Commander, 1778. Captain, 1779. Commanded the *Agamemnon* at the reduction of Corsica in 1794, losing an eye at the siege of Calvi. Commodore at St. Vincent, 14th Feb., 1797. Rear-Admiral, 1797. Lost his right arm in an unsuccessful attack on Teneriffe, 21st July, 1797. In 1798 commanded a detached squadron in the Mediterranean, and won the battle of the Nile, 1-2 August. Created Lord Nelson, and in 1799 raised by the King of Naples to the title of Duke of Bronte in Sicily. Commanded a detachment of the fleet in the Baltic and won the battle of Copenhagen, 2nd April, 1801. Created Viscount Nelson. Commander-in-Chief in the Mediterranean, 1803-5. Slain at Trafalgar, in the moment of victory, 21st October, 1805. His body was brought to England, and buried in the Crypt of St. Paul's.  
*Lent by Her Majesty the Queen.*
- 571 Admiral Sir Charles Napier, K.C.B.** (1786-1860.) By T. M. JOY.  
Born, 1786. Lieutenant, 1805. Commander, 1807. When Commander of the Recruit brig, in 1808, was wounded in action with the French corvette *Diligente*. Distinguished himself in

571—*continued.*

the pursuit of three French ships, ending in capture of the *Hautpoul*, and promoted to Captain, 1809. Served as a volunteer with the army in Portugal, and present at the battle of Busaco. Commanded *Euryalus* in the expedition to Alexandria in America, and at the destruction of shipping in the Potomac, 1814. Entered the service of Don Pedro, and established Donna Maria on the throne of Portugal by his victory over the Fleet of Don Miguel, off Cape St. Vincent, 1833. Second in command, under Sir Robert Stopford, in the operations on the coast of Syria, 1840, and the capture of St. Jean d'Acre. K.C.B., 1840. Rear-Admiral, 1846. Vice-Admiral, 1853. Commander-in-Chief in the Baltic in the war with Russia, 1854. Admiral 1858. As a Member of Parliament exerted himself to improve the condition of the seamen. Died, 1860. *Lent by Lords Commissioners of the Admiralty.*

572 **Rev. Alexander John Scott, D.D.** By S. BENDISEN.

Chaplain of the *Victory*, 1803—5, and Private Secretary to Lord Nelson.

*Lent by Mrs. F. P. Smith.*

573 **Old Hulks at anchor.**

*Lent by William Webb, Esq.*

*Lent by Earl Nelson.*

592 **Commander John Wesley Wright.** ( -1805.) By GAETANO CALLEGA.

Commander, 1802. In command of the *Vincejo* sloop, was employed in conducting a correspondence with the royalists of Brittany, when, in 1804, he was caught in a calm by a swarm of gun-boats, was taken prisoner and sent to Paris, where he was closely confined. In November, 1805, he was found one morning in bed, dead, with his throat cut. It was given out by the French authorities that he had committed suicide; but amongst his friends and in England generally, there was no doubt that he had been murdered, by—it was supposed—the order of Napoleon.

- 620 **A Gallant Rescue.**

Towards the close of the long French War, Captain the Honorable Sir Charles Paget, while cruising in the Endymion Frigate on the coast of Spain, described a French ship of the line in imminent danger, embayed among rocks upon a lee shore, bowsprit and foremast gone, and riding by a stream cable, her only remaining one. Though it was blowing a gale, Sir Charles bore down to the assistance of his enemy, dropped his sheet anchor on the Frenchman's bow, buoyed the cable and veered it athwart his hawse. This the disabled ship succeeded in getting in, and thus seven hundred lives were rescued from destruction. After performing this chivalrous action, the Endymion being herself in great peril, hauled to the wind, let go her bower anchor, club hauled and stood off shore on the other tack.

- 625 **The Battle of Algiers, 27th August, 1816.** By GEORGE CHAMBERS.

The depredations upon commerce committed by Algerine corsairs, and the outrages perpetrated by the Dey of Algiers at Bona, determined the British Government to send an expedition to Algiers. A fleet of five line of battle ships, five frigates, and ten smaller vessels, was despatched under Lord Exmouth, who was joined at Gibraltar by Vice-Admiral Baron van Capellen with a squadron of six Dutch ships. The Dey not having acceded to the terms proposed to him, the fleet bombarded the batteries from 2 o'clock until nearly midnight, and set on fire or sank the vessels lying within the Mole. On the 28th of August the Dey yielded, and as a result of the expedition 3,000 Christian slaves of various nations were released from captivity.

- 648 Ditto.

*Lent by Commander Sullivan, R.N.*

- 649 Captain Robert Maunsell, capturing French gun-boats off Java, July 31st, 1811. By W. J. HUGGINS.

The Procris fell in, off the coast of Java, with six gun-boats and a convoy of proas, but was prevented by shallow water from following them. Her commander, Captain Maunsell, therefore proceeded to attack them in the boats of his ship, accompanied by two flat boats containing soldiers of the 14th and 89th Regiments, and gallantly boarded and captured five of them. The sixth was blown up.

## ENGRAVINGS.—BATTLE PIECES, &amp;c.

- 1001 **The Ark Raleigh, or Ark Royal.** The Ship of the English Commander-in-Chief (Lord Howard of Effingham) in the battles with the Spanish Armada, 1588. Autotype, from a Woodcut in the British Museum. *Lent by the Art for Schools Association.*
- 1002 **The famous Game of Bowls on Plymouth Hoe, 27th July, 1588;** with Portraits of the English Captains who fought against the Armada. Engraving after LUCAS, A. R. A. *Lent by Arthur Lucas, Esq.*
- 1003 **The Ark.** Raleigh autotype, said to have been in Spanish Armada. *Lent by Lady Smart.*
- 1004 **The Loss of the Revenge.** Engraved by A. WILLMORE, after SIR O. BRIERLEY, R. W. S. *Lent by the Corporation of the Art Union of London.*
- 1005 **The true Portraiture of H. Matie's Royall Ship the Sovereigne of the Seas.** Built in the year 1637, Captain Phinees Pett being Supervisor, and Peter Pett, his sonne, the Builder. Engraving. *Lent by E. A. Drummond, Esq.*
- 1006 **The Duke of Northumberland, Lord High Admiral in 1636;** on a broad sheet, with a list of the Ships, Tenders, and Merchant Ships forming the Fleet sent to the North Sea to drive off the Dutch busses. This list gives the names of Flag Officers, Captains, and builders of the ships; and it would appear to be an exhaustive list of the Navy at the time, as it gives the ships in the Irish Seas, and the ships in reserve or ordinary. It was the last Fleet sent out by King Charles I. before the Revolution, and was fitted out with the "ship money." *Lent by Captain T. H. Lysaght, R.N.*
- 1007 **Embarkation of Henry VIII. at Dover, May 31st, 1520.** By J. BAZIN. *Lent by Commander W. G. H. Morgan, R.N.*
- 1008 **The Spanish Armada Sailing from Ferrol, July, 1588.** Etched by D. LAW, after Sir O. BRIERLY. *Lent by Arthur Lucas, Esq.*
- 1009 **Defeat of the Spanish Armada.** Engraved for the "Universal Magazine," 1750. *Lent by Messrs. L. & J. Parnell.*
- 1010 **Types of Ships in the Armada.** Three Etchings. *Lent by Messrs. L. & J. Parnell.*
- 1011 **Attack of the Vanguard on the Armada, August, 1588.** By A. WILLIAMS, after Sir O. BRIERLY. *Lent by the Art Union of London.*
- 1012 **Queen Elizabeth at Tilbury.** *Lent by Thomas G. Daniel, Esq.*
- 1013 **Dutch Ships of War, 1584.** Fac-simile, from the original engraving by JOHN PARNELL. *Lent by Messrs. L. & J. Parnell.*
- 1014 **Spanish Ships of War, 1584.** Fac-simile, from the original engraving by JOHN PARNELL. *Lent by Messrs. L. & J. Parnell.*

1018 The Armada Memorial, Plymouth. By H. A. GRIBBLE.  
*Lent by H. A. Gribble, Esq.*

1019 The Revolt of the Fleet. Engraved by GUCHT after LE CHERON and BASTIN.

The Parliament having consoled the Earl of Warwick with the command of the Fleet contrary to his Majesty's pleasure, and the Earl having endeavoured to intercept a small vessel which the Queen had despatched from Holland with arms and ammunition for the King, his Majesty began to think it high time to take the Admiralty into his own hands, and for that purpose sent his Royal letters to the Captains of every ship, commanding them no longer to pay obedience to the Earl of Warwick, but to obey such orders as they should receive from Sir John Pennington. When the Captains had received these letters, many of them expressed their duty and submission, and only waited for the orders of Sir J. Pennington, who was not yet arrived. This delay the Earl improved to encourage those whom he thought true and to watch those he mistrusted. By the proper signal (as represented in this print) he summoned the Captains to attend him on board in Council. This they all did excepting Captain Slingsby and Captain Wake, who attempted to put to sea, but the corruption of the seamen was so great that the Captains were seized by their own men and by them carried to the Admiral.

*Lent by Edward Almack, Esq.*

1020 Admiral Blake informing a Spanish Priest "None but an Englishman shall ever chastise an Englishman."

From this engraving one of the lights of the Blake Memorial Window in St. Margaret's, Westminster, was designed.

# BURROUGHS, WELLCOME & Co.,

*B. W. & Co.'s Offices and Warehouses, occupying Seven Floors in all.*

**Manufacturing Chemists,  
SNOW HILL BUILDINGS,  
LONDON, E.C.**

*Laboratories : DARTFORD, KENT, ENGLAND.*

The attention of Physicians and Surgeons of the Army and Navy, and of all interested in foreign travel and exploration, is respectfully called to **B. W. & Co.'s exhibit of Portable Medicine Chests and Cases** (Naval and Military), fitted and filled with "**Tabloids**" of Compressed Drugs, &c.

"**Tabloids**" of Compressed Drugs as prescribed by the Medical Profession throughout the world, and as supplied to **H. M. Stanley** and other great explorers and travellers.—*Vide published reports.*

**B. W. & Co.** make a speciality of "Pure, Portable, Permanent, and Palatable" Drugs, also equipments for Naval, Military, and Exploring Expeditions, and for Missionaries, Planters, Mining Companies, Caravans, Steamships, etc. *See Exhibit, No. 168 (Howe Gallery).*

The *British Medical Journal* (July 12th, 1890) says:—"Surgeon Parke has personally informed us that the concentrated preparations and 'Tabloids' retained their efficiency throughout the whole journey, and were of the utmost value by reason of their efficiency and portability."

*One of the Medicine Chests filled with "TABLOIDS" of Compressed Drugs, supplied to H. M. Stanley by Burroughs, Wellcome & Co., and carried by Mr. Stanley throughout his Emin Relief Expedition, and brought back as a souvenir, the remaining contents unimpaired.*

- 1990 A Single Masted Ship** with one sail chased with Royal Arms of the period; two deck-houses, and canopy at stern, with groups of men, women, sailors and soldiers. A cannon at the bows. Anchor, flags, &c. Hull chased with sea-horses, mermaids, &c. On four small pierced silver wheels. Antique Nuremberg.
- 1991 A Small Half-open ship or Nef** with one mast, three sails, flags, &c.; topsail richly chased with arms, crest, &c.; groups of men and officers, ladders, &c. Very richly gilt and chased. Resting on pierced and chased wheels. Nuremberg.
- 1992 A Large Open Boat** chased to resemble a shell. One mast and two sails. Groups of men, women, sailors and soldiers on deck-house. Cannon, flags, &c. Silver-gilt, on a tall stand with chased foot, and group of sea-horses beneath the hull. Augsburg.
- 1993 A Half-decked Ship or Nef**, with three masts and all sails set; hull, with elongated bow resting upon tall stand, filigree ornamentation between. Soldiers and sailors, &c.; two guns at portholes, and scroll bulwarks; anchor and chains at bows: Part gilt and with enamelled flags. Nuremberg.
- 1994 A Small Single-masted Ship or Nef.** The hull chased with coat of arms; a canopy on deck, with anchor at the stern. Two or three men on deck and in the rigging; flags, &c. On tall stand, and supported by two dolphins. Old Dutch.
- 1995 A small Ship** with two masts and all sails set. A covered deck with two deck-houses and one cannon, officers, men, women, and soldiers; two anchors, sails chased with arms and naval devices, flags flying. Engraved with name of vessel "Amicitia." Hull resting on two scroll feet. Old French.
- 1996 An open Boat**, with fore and after deck, bows elongated and pierced, one mast and sail, flags, deck-canopy, and groups of men fighting. Silver gilt rests, on four small wheels. Augsburg.
- 1997 A smaller Boat** to match.
- 1998 A small open Boat**, with very tall masts and one sail, rigging, &c.; a small half-deck at stern, and two figures standing on a ball. Pierced gallery at stern. Gilt; resting on four wheels. Augsburg.
- 1999 A model of an Old Three-decker**, in full sail. Parcel gilt. Old Dutch.
- 2000 An open Boat** with four cannon mounted, men standing in groups, mast and sail, anchor, &c. The hull chased with dolphin and scroll work. Silver gilt. Mounted on single oval foot. Old Dutch.

- 2001** **An open Boat** with deck-house, mast, sails engraved with coat of arms, flags, &c. Shell; on small cast and chased scroll feet, with ornamental scroll mount. Augsburg.
- 2002** **A small open Boat**, covered aft, one sail and two flags. Silver-gilt, mounted on tall scroll stem and foot. Augsburg.
- 2003** **An open Boat** with one mast and sail, flags, rudder, anchor, &c. Engraved Crystal. Supported by a sea-horse and man, silver-gilt.
- 2004** **Model of a Dutch Barge**. Silver.
- 2005** **A pair of smaller Dutch Barges** with covered decks. Silver.
- 2006** **A pair of smaller models** with open decks. Silver.
- 2007** **Silver Model** of the Steam Schooner Yacht Helen, R.Y.S. (now Speranza), built for the late Marquis of Conyngham.

*Lent by J. Wood, Esq.*

- 2007A** **Teapot** constantly used by Admiral Lord Nelson.

*Lent by Mrs. H. Nelson Nelson-Ward.*

- 2007B** **Sugar Basin** used by Admiral Lord Nelson.

*Lent by Mrs. H. Nelson Nelson-Ward.*

- 2008** **H.M.S. Britannia** Jubilee Offering of the Royal Navy and Royal Marines to Her Majesty the Queen, 1837-1887.

The Britannia Model measures 25 ins. long, or, including the bowsprit and spankerboom, 31½ ins. To the top of the mainmast the height is 20 in. The ship is treated as though riding at anchor in harbour, the smooth water being represented by a sheet of uneven pale-green dull silvered glass. All the ports are open and the guns run out. The hammocks are all in the netting, and she carries nine boats, the launch, pinnace, and barge being hoisted inboard, two 10-oared cutters hanging from the davits, and the captain's gig in the water astern, attached to a Jacob's ladder by a painter. To indicate what the reduction to 1½<sup>th</sup> of the full size means, her anchors may be instanced, which weighed 110 cwts.,; but in the model are only 1½ ins. long, and weigh only a ¼ of a troy ounce. Her 41 ft. launch is only a shade under 4 ins. long, and all the eye bolts and planking are distinctly shown. In the rigging about 5,000 ft. of wire are employed in making up the shrouds and stays and other ropes which are all three or four stranded according to their thickness, much of the wire used for the purpose being 1½<sup>th</sup> of an in. diameter. Her masts, bowsprit, and yards are built up of over 450 pieces; and in the ship and her fittings there are nearly 4,000 separate pieces of silver, brazed and screwed and bolted together, including some 206 dead eyes and 200 blocks of various sizes. The elaborate stern with its galleries and carved side posts, and the figure-head, have been accurately modelled from pictures of the old ship lent for the purpose by an officer who served in her. Many of the drawings from which the Britannia herself was constructed, dated 1812, have also served to build up the silver model of her. A model of the St. Vincent, made many years ago by Admiral Sir Robert Stopford, and those in Greenwich Museum, have afforded invaluable information, and the rigging is done with the assistance of an old blue-jacket.

- 2009** **H.M.S. Victoria**, Jubilee offering of the Royal Navy and Royal Marines to H.M. the Queen, 1837-1887.

The Victoria is 34 ins. long, and has been made from a set of very exact and detailed drawings specially prepared for the purpose to the same scale as for the old three-decker, and supplied by Sir Wm. G. Armstrong, Mitchell & Co., so that complete accuracy has been ensured for the myriad details of this huge,

2009—continued.

complicated ironclad, with her revolving turret and its guns, her electric search light towers, the flying bridge, anchors and boats, of which there are 13, four being steamers and nine rowing boats. The 56 ft. torpedo boat with which she is furnished, weighs in the model about  $2\frac{1}{2}$  troy ounces. The huge Inglefield anchor weighing several tons, would not be much too large in the model for a scarf pin, and yet every joint of it will move. The eight Nordenfelt guns, carriages and all, can be stood upon a florin, and weigh under half an ounce, and yet are made up of 118 separate pieces of silver. Each of the accommodation ladders is composed of 41 pieces. There are 136 stanchions to hold the rails round the sides of the ship, each with three holes drilled in it no larger than  $\frac{1}{160}$ th part of an inch, and the whole weighing  $\frac{2}{3}$  of an ounce. These details of some of the parts comprising these two models will serve to show the minuteness of the work when such large objects as war ships and their fittings have to be reduced to model sizes. Altogether the two models have been built up of about 9,000 pieces, every one made to measurement. To fit these together about 5,000 separate solderings have had to be made, each time heating the parts to red heat, and something like 7,000 holes have had to be drilled.

Both ships to complete required something like 203 working drawings, to the scale of  $\frac{1}{10}$ th of an inch to the foot, and had to be specially made of the different parts of the two ships, so as to ensure accuracy of form and proportion.

The project was entirely carried out by R. Hodd & Son, at Minerva Works, 30 & 31, Hatton Garden, E.C.

## BY ROYAL LETTERS PATENT. HAY'S WATERPROOF (MARINE) GLUE,

For Coating Composite Ships and Caulking Ships' Decks,

*As used in H.M. Naval Yards, and all the Foreign Yards; by the P. and O., Union, and Inman Lines of Steamships, and by all the Ship and Yacht Builders in the World.*

Section of Deck showing application of Hay's Marine Glue.

1. The Glue as first applied (A). Oakum driven home in the usual way (B). 2. The Glue when contracted by swelling of the wood (A). 3. The Glue when expanded by the heat of the sun (A). (B.) Showing that although wood contracts and leaves the Oakum, the Glue keeps its hold, and secures soundness of the seam.

### THE CINQUE PORTS—"THE OLD ROYAL NAVY OF ENGLAND."

#### **2010 Exhibits belonging to Cinque Ports.**

- (i.) Original Charter of Charles I.
- (ii.) The Yarmouth Flag.
- (iii.) The Register Book of the Cinque Ports (White Book).
- (iv.) The Register Book of the Cinque Ports (Black Book).

#### **2011 The Mayor and Corporation of New Romney.**

- (i.) Assessment Book, 1469—1492.
- (ii.) Assessment Book, 1492—1516.
- (iii.) Assessment Book, 1516—1522.
- (iv.) Original Charter of Queen Elizabeth, and Case.
- (v.) Two Silver-gilt Maces.
- (vi.) Burghmate Horn.

#### **2012 E. W. Knocker, Esq., Registrar of Cinque Ports.**

- (i.) Silver Oar or Mace of the Admiralty of the Cinque Ports. Knops gilt.
- (ii.) Large Seal, with inscription, "Mag. Sigil. Castr. Dover et Curiarum Cancell. et Admir. Qvinq Port" (the great Seal of Dover Castle, and the Chancery and Admiralty Court of the Cinque Ports, Silver, 1692).
- (iii.) Small Seal of Registrar's Office of Dover Castle. Copper, with wooden handle.

#### **2013 The Mayor and Corporation of Faversham.**

- (i.) Mace No. 1. A Commonwealth Mace, altered in 1660, Silver-gilt. Head of Mace containing, at top, the Royal Arms, on sides, Rose, Harp, Fleur-de-lis, Thistle, each surmounted by Crown between the letters C. R. The whole surmounted with arched crown carrying the Orb and Cross. Shaft.—Upper part, four open worked brackets, length divided by two knops; at base, a heavy and much ornamented larger knop; bulbous, band winding round shaft with oak branches inserted containing leaves and acorns.

**2013**—*continued.*

- (ii.) Mace No. 2. Made in 1755, Silver-gilt. Head of Mace containing, at top, the Cinque Port Arms. On sides (1) The Ancient Seal of Faversham; (2) "Sigillum Baronum de Faversham" (Present Seal); (3) Reverse of Present Seal with Legend "Libera Portus Ego Regis ut Arma Rego" (4) Mayoralty Seal with legend, "Sigillum Maioratus Ville de Faversham." Shaft plain, on upper part four open worked brackets, length divided by two knops, bulbous base.
- (iii.) Moot, or Hundred Horn. Brass, covered with leather, in length 22½ in. Legend round mouth, " + Ricardus. Juvenus. Me. Fecit." (Repaired 31 & 32 Hen. VIII.) The Customs of the Cinque Ports, as recited at a Court of Brotherhood at New Romney in 19 Hen. VII., required it to be blown to summon all concerned to the election of Mayors, Bailiffs, and Jurats.

## CHARTERS, &amp;C.

- (iv.) 4 June, 36 Hen. III.—Royal Charter to the Barons of Faversham.
- (v.) 20 May, 44 Hen. III.—Royal Charter to the Barons of the Cinque Ports (not mentioned in Jeake's Charters of the Cinque Ports),
- (vi.) 17 June, 6 Ed. I.—Royal Charter to the Barons of the Cinque Ports.
- (vii.) 28 April, 26 Ed. I.—Royal Charter to the Barons of the Cinque Ports.
- (viii.) 14 Novr., 30 Ed. I.—Royal Charter to the Barons of the Cinque Ports.
- (ix.) 20 June, 11 Ed. III.—Covenant for hire of a ship called the "Katherine" for the King's service.
- (x.) 16 Hen. VI.—Deed of Composition between Dover and Faversham.
- (xi.) 6 June, 10 Hen. VII.—Deed of Covenants between Dover and Faversham.
- (xii.) 28 Eliz.—Privy Council letters for stay of ships in the Cinque Ports.
- (xiii.) 28 Sept., 1634.—Inventory of goods of John Bennett, a sailor at Faversham.

**2014 The Mayor and Corporation of Canterbury.**

- (i.) Large gilt mace presented by Admiral Graydon, Mayor, to the Corporation of Fordwich, near Canterbury. Said to be made of Spanish dollars which fell to his share at the taking of Porto Bello in 1740.
- (ii.) The old mace, silver.
- (iii.) The Corporate seal of Fordwich.

**2015 The Mayor and Corporation of Folkestone.**

- (i.) Ancient Brass Horn used in the olden time to summon the Jurats and Commonalty of Folkestone to the place of Assembly in the Parish Church Yard to elect the Mayor.

**2015—continued.**

- (ii.) Original Grants to the Barons of the Cinque Ports, on Parchment with original Seals : and one seal broken. No. 1 by Edward II., No. 2 by Edward III.

**2016 The Mayor and Corporation of Hythe.**

- (i.) Cinque Ports Ship, 12th Century. Painting by HELEN S. WILKS, Hythe.  
Cinque Ports Ships (2), 15th Century. Painting by HELEN S. WILKS.
- (ii.) 2 Maces, Corporation of Hythe.
- (iii.) Burgh Horn, date 1582, belonging to Corporation of Hythe.
- (iv.) Ship Horn (very ancient) from collection of Henry Bean Mackeson, Hythe.
- (v.) Agreement between Dover and Hythe for fitting out vessel against Armada, in possession of Corporation of Hythe.
- (vi.) Charter of Cinque Ports, 6 Edward I., in the possession of the Corporation of Hythe.
- (vii.) Letters Patent—Order for Shipping to Cinque Port, in the possession of the Corporation of Hythe.
- (viii.) Order to take measures against Mahomedan Sea Rovers, 10 Charles I., in possession of Corporation of Hythe.

**2017 The Mayor and Corporation of Hastings.**

- (i.) Silver Punch Bowl and Ladle presented by Canopy bearers at Coronation of George II., and Queen Caroline, made out of their share of the silver, &c. of the Canopies.
- (ii.) Silver seal (Mayor's) old.
- (iii.) A piece of Cloth with Gold fringe round it, and initial and date upon it, forming part of the Canopy held over Queen Anne at her Coronation.

**2018 The Mayor and Corporation of Tenterden.**

- (i.) Silver seal.
- (ii.) Brass seal.
- (iii.) Silver gilt mace.
- (iv.) Silver mace.

**2019 The Mayor and Corporation of Dover.**

- (i.) Mace, silver gilt, weight 10 lbs. 3 oz. 19 cwt. Inscriptions, "Carolus-Hic Posuit Vestigia Prima Secundus, May 25, 1660;" and concealed, "1655. This Mace was made by Master Thomas Blackhouse, Ironmonger, being Maier of Stafford."
- (ii.) Hand Bell, with inscription, "Petrus Greineus me fecit . . 91" (supposed to be 1491). Subject, Annunciation of Virgin.
- (iii.) Burghmote Horn.

## 2019—continued.

(iv.) Silver Oar of the Mayor and Corporation of Dover, as Water Bailiffs. In brass case.

(v.) Seals. Two largest, obverse and reverse, of Corporate Seal. Ship common to Cinque Ports. Other device showing St. Martin (patron Saint of Dover) dividing his cloak with beggar.

Other five Mayor's Seals; largest of silver, with wooden handle. Next is Girdle Seal; smallest also silver.

(vi.) Charter of Queen Mary, with Royal Monogram, to the Mayor, Jurats, and Commonalty of the Town of Dover, the Rivage and Feriage of the port, A.D. 1553.

(vii.) Charter of Queen Anne appointing Water Bailiff and Governor of Prison, 27th March, first year of reign.

## 2020 The Mayor and Corporation of the Ancient Town of Rye.

A pair of Silver Gilt Maces, dated 1767.

## 2021 Henry Griffith, Esq., F.S.A., London and Scotland.

(i.) Ancient Silver Gilt Mace of the extinct Corporation of Pevensey.

(ii.) Seal and counterpart of ditto. Early 13th century. This is the most antique of the Cinque Port Seals. The obverse exhibits ship with lofty poop and (embattled) forecastle. The crew consists of eight men. Above the yard are a crescent and a star, and beneath it the royal arms of three lions passant. The legend is "Sigllv: Baronvm: Domini: Regis: Anglie: de: Peuenes." = "The Seal of the Barons of our Lord the King of England of Pevensey." On the reverse are two ships with their sails torn to shreds. In hindmost vessel a mitred figure, probably intended for S. Nicholas. Legend—\*See. Nicolae Dvc. Nos. Sponte. Trahe. Peu.

(iii.) A Folio Volume, "A Survey of the Ports on the South West Coast of England, from Dover to Land's End, by Edm<sup>d</sup>. Dummer, Surveyor, and Capt. Thos. Wiltshaw, Esq<sup>res</sup>, Comrs. of His Maties. Navy. Together with Capt. Jas. Conaway and Capt. W<sup>m</sup>. Cruft, Masters of Trinity House, at Deptford. Delineated in July and August, 1698."

## NATIONAL INSURANCE, IN EIGHT PARTS.

By Captain Bruce, R.N., Admiral Sir  
George Elliott, K.C.B., and others.

See the "UNITED SERVICE MAGAZINE."

**2022 Mayor and Corporation of Sandwich.**

- (i.) Carved oak Supporters of Queen Elizabeth, viz., the lion and red dragon; one supporting the arms of the Queen, the other the Cinque Ports arms. They were placed on two posts at Sandown Gate, Sandwich, when the Queen came to the town, staying from Monday, 31st of August, until Thursday, 3rd of September, 1572.
- (ii.) The old Corporate Seal of Sandwich is of brass, in two parts. This Seal was affixed to a deed in the archives of Christchurch, Canterbury, dated 1317. It has probably been in existence since the 11th century
- (iii.) The Common Horn, of great antiquity.
- (iv.) The Customal of Sandwich on vellum, commenced by Adam Champeneys, a town clerk of Sandwich, in April 1301; oak cover.
- (v.) 159 Letters bound, all of great interest and antiquity, the earliest bearing date 1295. There is an index at beginning and end of book.
- (vi.) One of three shots found in the hold of a vessel recently come to view through the change in the current of the river Stour. The vessel was about 70 feet long, and after careful search through the annals of Sandwich it is supposed to be the vessel referred to as follows: "The Caryke that was sonke in the haven in Pope Paulus tyme, did much hurt to the haven and gether a great bank." 1464—71.
- (vii.) Dead-eye, taken from a wreck of a supposed smuggler.
- (viii.) Demi-john, from the same vessel.
- (ix.) Bell from the Canopy used at the Coronation of George IV. (The property of R. J. Emmerson, Esq.)  
 "At a coronation, the Barons of the Cinque Ports bear over the King and Queen the silken Canopy, supported by four staves covered with silver, with small bells, silver-gilt. On that day they sit at the principal table, at the right hand side of the King. The canopy and bells are afterwards shared amongst the Barons."

**2022A The Borough of Queenborough.**

- (i.) 1691.—Declaration made by the Minister and Churchwarden<sup>s</sup> of Queenborough that "Richard Sherburne, first Lieut. of their Majties ship Dutchess, upon the Lord's day, comonly called Sunday, being the 3rd day of May, Anno Domini 1691, immediately after Divine Service and Sermon, did receive ye Sacramt of the Lord's Supper."  
 Witnessed and signed "Isaack Adams, 3rd Lieut., and Benjamin Holmes, Master, of their Majties ship Dutchess."
- (ii.) 169<sup>5</sup>.—Ditto of "Capt. John Knapp, Comand<sup>r</sup> of his Majties shipp Monmouth."  
 Witnessed and signed by "Klopher Mims, Comand<sup>r</sup> of his Majties shipp ye St. Michael, and John Thomas, Chaplain of ye said shipp."
- (iii.) 169<sup>5</sup>.—Ditto of "James Holmes, Capt. of his Majties ship Osory."  
 Witnessed and signed by "Sir Haddock, Lieut., and Edward Hockley, Mas<sup>r</sup>, of his Majties ship Torbay."

## 2022A—continued.

- (iv.) 1701.—Ditto of "Mr. Duncan Gregory, Chaplain of his Majties Torbay."  
Witnessed and signed by "Lord Archibald Hamilton, Commander, and Mr. Edmund Hikes, Lieut. of his Majesties ship Torbay."
- (v.) 1701.—Ditto of "Lord Archibald Hamilton, Comander of his Majties ship Torbay."  
Witnessed and signed by "Mr. Edmund Hicks, and Mr. Duncan Gregory, Chaplain of his Majties ship Torbay."
- (vi.) 1701.—Ditto of "Captain Peter Pickard, Comander of his Matys ship"  
Witnessed and signed by "W<sup>m</sup>. Carter, Capt. of the Mary, and J<sup>n</sup> Paul, Licut. of y<sup>e</sup> Mary."
- (vii.) 1708.—Ditto of "The Hon<sup>ble</sup> James Lidleton, Commander of H.M. The Sovereign."  
Witnessed and signed "John Jennings, Vice-Admiral of her Majesty's Squadron, and James Goble."
- (viii.) 1711.—Ditto of "Mr. Robert Harrison, 2nd Lieutenant of his Majesty's ship the Swallow."  
Witnessed and signed "Francis Drake, Commander of her Majesty's ship y<sup>e</sup> Swallow, and J. John Besse, Lieutenant of the same."
- (ix.) 1711.—Ditto of "Capt. Francis Drake, Commander of her Majesty's ship the Swallow."  
Witnessed and signed "John Bosse, first Lieuetenant of her Majesty's ship y<sup>e</sup> Swallow, and J. Robert Harrison, 2nd Lieutenant of the same."
- (x.) 1714.—Ditto of "Timothy \_\_\_\_\_, Esq<sup>re</sup>, Comander of his Majties ship"  
Witnessed and signed by "John Chamberlen, Comander of his Majties ship Hampshire, and John Temple, Esq<sup>re</sup>, Comander of his Majties ship Garland, ffireship."
- (xi.) 1714.—Ditto of "Capt. Charles Hardy, Comand<sup>r</sup> of his Majt ship the Weymouth."  
Witnessed and signed by "Capt. Francis Cooper, Comand<sup>r</sup> of his Majt ship the Scarborough, and Capt. Thomas Marwood, of his Majt ship the Greyhound."
- (xii.) 1715.—Ditto of "Lieut James Hutchinson, of his Maties ship Swallow."  
Witnessed and signed by "Capt. ffran Drake, and Captain Christopher O'Brien."
- (xiii.) 1715.—Ditto of "Capt<sup>n</sup> Christopher O'Brien, Commander of his Maties sloop the Drake."  
Witnessed and signed by "Fran<sup>s</sup> Drake, Capt<sup>n</sup>, and James Hutchisson, L<sup>t</sup> of his Majesties ship the Swallow."

- (ix.) Silver Gilt Bell used on Canopy of George III. at his Coronation, with inscription at the base.

*Lent by John Eliot Hodgkin, F.S.A.*

MANUSCRIPTS, AUTOGRAPHS, BROADSIDES AND ENGRAVINGS, &c.

**2023** Instructions for the disposition of the Forces in various parts of the kingdom for the repulse of the Spanish Armada, with indications of the places at which the Spanish troops were thought most likely to land. This document was found about two years ago among a large number of papers formerly belonging to Samuel Pepys the Diarist, and is of great interest.

**2024** Oct. 1st, 1600.—“A Certificate of the ordinary charges at Chatham for the month of Septembre last past, amounting to £9860 gs. 2d. Signed by Ffoulke Grevyll, Sir Henry Palmer (controller of the Navy), and Sir Thos. Trevor.”

**2025** 1601.—“An Estimate of the charge for the Victuallinge of Her Mats (Queen Elizabeth's) Shippes in Harbor the monethe of June, 1601.” Signed by Nottingham and Sir Th. Trevor.

- 2026 The seamen were paid at the rate of 6½d. per diem. The "pryncipall maisters" had 5/- per week board wages.  
The list of ships contains many familiar names.
- 2027 1611—1612.—"Charges sustained at Woolwich in the monthe of January 1611—1612," includes "wages unto gravellmen for washinge and slubinge the dock both within and without the gates for the better shoringe His Highnes shippes," and other curious items in all £178 7s. 9d.
- 2028 1617.—"An Estymate of the charge of His Ma<sup>te</sup> Shipps at the narrow seas for a pay to be made to the companies there serving and for other charges incident to the same by the space of iiij. monthes a weeke and a day. Begun the first of January, 1617, and ended the last of April, 1618, next following."  
Eight hundred men in all at 14s. per mensem each man. The wages and other expenses amount to £2,826 for the four months.
- 2029 1617.—"A Certificate of His Maties ordinarye charges susteined at Portsmouth within the moneth of April, 1617." The Clarke of the Cheque was paid at the rate of £20 per annum.
- 2030 1618.—"A Breife Certificate of His Maties. ordinarye charge susteyned at Deptford in the month of October, 1618. £63 12s. 6d."
- 2031 1650. Order to the Commissioners of the Navy, Whitehall, October 25, 1650, that "the guns and all the amunicon belonging to the foure ketches bound for Scotland should be hastened away with all speed." Signed by P. Lyle, Valentine Walton, and Sir H. Vane (the regicide).
- 2032 1652.—Letter (to the Commissioners of the Navy) dated "Hill-house, 20th Janua., 1652. Halfe houre past eleven," from George Monck, suggesting "that he humbly conceives the taking of twelve frigots from y<sup>e</sup> fleete here will be very prejudiciall to y<sup>e</sup> hastening out of y<sup>e</sup> maine Body, and that the twelve frigots joyning with those in ye West will not be sufficient to encounter with y<sup>e</sup> Dutch Fleete and to interrupt them in their way homewards to Holland."
- 2033 Portrait of His "Excellency George Monck, Generall of all the Forces in England, Scotland, and Ireland, &c." Engraved by Gaywood.
- 2034 Portraits of George, Duke of Albemarle and his Dutchesse. A rare chap-print.
- 2035 Portrait of George Monck, Duke of Albemarle. Engraved by Sheppard after Log(g)an.
- 2036 1652.—Contemporary Dutch Broadside. Sea Fight between an English and a Dutch Fishing Dogger on the 9th August, 1652. This print, being in the Dutch interest, naturally relates to one of those skirmishes which resulted in favour of that nation.  
The Dutch fishermen are represented as boarding an English fishing-vessel and nailing down its crew under hatches in sight of an English man-of-war. The master was rewarded with a gold medal, and each of his mates with a rose noble.

- 2037 1653.**—A holograph letter from **Captain Roger Martin**, whose death is mentioned by Pepys (Diary, Aug. 1, 1666) addressed to the Commissioners of the Admiralty.  
A curious effusion, complaining that he had neither a pilot on board, "nor any beare but what doth stincke." Dated from on board the "Bristol" frigott. 5th August.
- 2038 1653.**—**Contemporary Dutch Portrait of Martin Tromp**, who was killed on the quarter deck of his ship in the action of July 31, 1653.
- 2039 1655.**—A holograph letter from **Admiral Sir George Ayscue**, addressed to Col. John Clarke, one of the Commissioners of the Admiralty, dated Feb. 4, 1655, recommending a Mr. Clarke as fit for employment.  
Ayscue, Admiral under the Commonwealth and Restoration, one of the bravest and most capable commanders of his time, was taken prisoner by the Dutch in 1666, and by them ignominiously paraded through the towns for the people to gaze at. Contemporary report says that he was for this purpose painted, and provided with a tail!
- 2040 Portrait of Sir George Ayscue.** A contemporary Italian print, the earliest, from which the others have been copied.
- 2041 Contemporary Broadside Proclamation**, signed by Thurloe, appointing the 23rd of June, 1653, as a Thanksgiving Day for the Naval Victory over the Dutch on June 2 and 3 of that year. Most characteristic of the spirit and language of the time.
- 2042 1652.**—Document addressed to the Commissioners of the Navy from the Council of State, dated White-hall, 25th Sept., 1652. Signed by "James Harrington, Presid." and "Jo: Thurloe, Cler. of the Councill;" approving the setting forth to sea into the States Service of three vessels—the "Princess Maria," "Armes of Scotland," and the "Dolphin."
- 2043 1654.**—Letter dated "Ffairefax in the Downes the 7th July, 1654," addressed to the Commissioners of the Admiralty and the Navy by **Sir John Lawson, Admiral**. "All the shipps here fit for Action are sent abroad according to yo<sup>r</sup> hono<sup>rs</sup>. order formerly received."

"The 'United Service Magazine'  
is the foremost Review for the  
Services."—*Times*.

- 2044** **Portrait of Sir John Lawson.** A contemporary Italian print, and the earliest portrait of him known.
- 2045** **1656.**—Letter dated "Edinburgh, 25 April, 1656," to the Commissioners of the Admiralty and the Navy from Lord Broghill, afterwards Earl of Orrery, complaining that "the pirats and ships of the enemy do so frequently take the Merchant-men which belong unto this country."
- 2046** **1658.**—Warrant to draw an order for payment to Lord Ffaconberg of £500 disbursed by him "for a Jewell given by his Highness dear Lord and ffather of blessed memory to Monsieur Mauchion, who was sent to his late Highness by the Ffrench King." Signed by E. Mountagu (afterwarwds Lord Sandwich).
- 2047** **Portrait of Lord Sandwich** (the "my lord" of Pepys). By BLOOTELING, after Lely.
- 2048** **1659.**—Holograph Letter from John Thynne to "The Right Hon<sup>ble</sup> His Highly Honnor'd Generale Montegue, at Mr. Crew's house in Lincolnes Inn Fieldes," dated March 25th, 1659-'60; recommending Robert Webster to Mountagu, and asking him to admit him into his ship (the Nazeby). On the 2nd April, 1660, Mountagu sailed for Holland to bring back Charles II. (See Pepys under that date.)
- 2049** **1664.**—Contemporary Manuscript Address presented to "his Highness The Duke of Yorke: upon his expedition To sea: the 9<sup>th</sup> of Novem<sup>br</sup> 1664." Pepys, who notes the departure of the Duke on this day, tells us on the 3rd of December, that after his having been abroad at sea three or four days with the fleet, the Dutch were all drawn into their harbours, and it "seemed like a victory." He appears to have considered, however, that it was not much of a triumph for the English, the retirement of the enemy being probably occasioned by the weather.
- 2050** **Portrait of "His Royal Highness James, Duke of York and Albany, &c."** (after Lely). "Sold by Alex. Browne at y<sup>e</sup> blew ballcony in little Queen Streett."
- 2051** **1665.**—Contemporary Manuscript. "Narrative of y<sup>e</sup> Signall Victory w<sup>ch</sup> it pleased God to bestow upon his Maties Navy under y<sup>e</sup> Comand of His Royall Highness James Duke of York, againgt y<sup>e</sup> fleet of y<sup>e</sup> States of the United Netherlands, June 3, 1665." In this celebrated action, resulting in a decisive victory for the English, our fleet was commanded by the Admirals, the Duke of York, the Earl of Sandwich, Sir George Ayscue, and Admirals Penn and Lawson; and the Dutch Fleet by Opdam, Evertzen, Cartemaar, and Cornelius Tromp, son of the Great Tromp. The action was contested with great bravery and determination on both sides, and the slaughter was very great. Three persons of quality were killed by the side of the Duke of York, and soon afterwards Opdam was blown up and Cartemaar killed by a shot from the Duke of York's vessel. Sir John Lawson was wounded in the knee and subsequently died of his injuries.

"Lawson whose valour beyond faith did go,  
"And still fights Opdam in the lake below."

(*Poems on State Affairs.*)

The loss of the Dutch was 18 ships, 6,000 to 8,000 men; that of the English, 7 ships and 2,000 seamen.

- 2052 1665.—**Contemporary and Rare Broadside** entitled "A Broadside more for the Dutch or the Belgick Lion couchant." This effusion contains the usual amount of braggadocio and bad taste to be found in the ephemeral productions of the times.
- 2053 1665.—**Another Contemporary Broadside** on the same subject, entitled "A Gratulatory Verse upon our late Glorious Victory over the Dutch, By the Author of *Iter Boreale*," also in a boastful vein.
- 2054 1665.—**Contemporary Dutch Broadside** with text containing a detailed account of the fight and names of the ships and captains. In the foreground may be seen the explosion by which Opdam's ship was blown up. It will be observed that the date is given in new style whilst the English Broadside is of course in the old style. Opdam is mentioned here as "De Heer Van Wassenaer." This was his Dutch title and he thus signs his name in the rare autograph exhibited under the next No. But to the English he was always known as Opdam.
- 2055 Document in Dutch signed by J. Van Wassenaer, dated, Obdam this first August 1636. This is the very rare autograph of Opdam referred to above.
- 2056 A Portrait of "Jan Evertsen, Lieutenant-Admiraal van Zeeland." (Engraved by Houbraken.) One of the Dutch Admirals engaged in the action mentioned above.
- 2057 1665. Very rough Contemporary Italian Etching of the sea-fight above referred to.
- 2058 1665.—**Contemporary Dutch Broadside** containing a representation of, and emblematic commentary upon, the abortive attempt on the Dutch Fleet in Bergen on the 10th of August 1665.
- 2059 1665.—**Contemporary and very rude Italian print** of the same action. Engraved by Bloem.
- 2060 1666.—**Contemporary Tract**, entitled "A True and perfect Narrative of The Great and Signal Success of a Part of His Majesties Fleet," &c., "the eighth and ninth of this instant August."
- 2061 1666.—**Contemporary Dutch print** of the famous four days naval action between the English and Dutch fleets, which took place on the 1-4 June, O.S. (11-14 June, N.S.), 1666. Both sides claimed the victory in the bloody encounter, and the valour of each was conspicuous. Sir Christopher Myngs, beloved by his comrades, was killed in the action, and Ayscue taken prisoner. The slaughter on both sides was prodigious, and hardly a ship on either side escaped undamaged. De Witt, who was no friend to the English, is reported to have said of them in connection with this action, that "if they were defeated their misfortunes redounded more to their honour than all their former victories. No fleet but theirs, after the severe usage of the first day, would have continued an engagement for three successive days longer. Englishmen may be killed, English ships may be burned, but English courage is invincible." The English Admirals engaged in this action were:—Prince Rupert, Albemarle (Monck), Myngs, Ayscue, and Berkeley. The Dutch:—De Ruyter, Cornelius Tromp, Evertzen, Meppel, Nes, and Vries.

- 2062 Contemporary engraved Italian Portrait of Myngs**, the earliest known. On the fourth day of the great battle above referred to, he received a shot in the neck, after which, though in exquisite pain, he continued in his command, holding his wound with both his hands for above an hour. At length another shot pierced his throat and laid him at rest for ever.
- 2063 1666.—Contemporary** and very rude Italian print of the above sea fight.
- 2064 1666.—Another Contemporary Dutch print** of the above engagement.
- 2065 1666.—Another Contemporary Dutch print** of the Victory, containing a portrait of De Ruyter.
- 2066 1666.—A Contemporary Tract**, entitled "A True Narrative of the Engagement between His Majesties Fleet and that of Holland. Began June the First, 1666, at Two o'clock, afternoon, and continuing till the Fourth, at Ten o'clock at Night."
- 2067 Contemporary Portrait of Michiel Adriansz Ruyter.** Etched by Bloteling.
- 2068 Portrait of Cornelis Tromp.** By Blooteling, after Lely.
- 2069 Document in Dutch**, dated March 13, 1682, signed by C. Tromp, with armorial seal, as in portrait. A rare autograph.
- 2071 Document in Dutch** signed by C. de Witt.
- 2072 1666.—Original Document.** "Additional instructions to be observed in the next engagement, 18th July, 1666." Addressed "to John Kempthorne, Esq. Reare-Admiral of the Blew Squadron to be communicated to ye severall ships of his division." The Original document signed by Rupert and Albemarle. Most interesting directions as to what was to be done, first, in case the English Fleet had the wind of the Dutch, and secondly under opposite conditions. The fight began just a week after, viz., on July 25th and is alluded to under the next No.
- 2073 1667—Original Document**, dated Whitehall, November, 25th 1667, signed by Prince Rupert, directing the Commissioners of the Navy for all such supernumeraries as were borne on-board Sir John Kempthorne's ship, the *Defiance*, in the action above alluded to.
- 2074 Engraved Portrait of Prince Rupert** when young by Snyers after Van Dyck.
- 2075 1666.—Contemporary and Rare Broadside in Rhyme**, dated, 1666, entitled. "A new ballad of a famous German Prince" (Rupert) "and a renowned English Duke, who on St. James' day fought with a beast with seven heads, called Provinces," &c., &c. Pepys says of this fight "Sir W. Coventry is not thoroughly pleased with the late management of the fight, nor with anything that the generals do, only is glad to hear that De Ruyter is out of favor and that this fight has cost them 5,000 men, as they themselves do report." Pepys also mentions that in this fight Banckert's ship was burned. A portrait of Banckert will be found under the next No.

- 2076** **Contemporary Dutch Portrait of D'Heer Adriaen Banckert**, Lieutenant Admiral over Zeelandt.
- 2077** **Fine Contemporary Portrait of Sir Thomas Allin** by P. Vandrebanc after Kneller. He concluded the articles of peace between Charles II. and Algiers, and was successful in engagements against the Dutch.
- 2078** **Holograph Letter**, dated Aug. 25th, from Sir John Kempthorne. "To ye principall officers of His Maties. Ordinance at ye Tower off London," saying, inter alia, "that he writes by this post to Mr. Secretarie Pepys to know His Matie's. pleasure what number of Guns shale bee kept aboard His Matie's. shippes in ye Harbor for Gard shippes."
- 2079** **1667.—Original Order** for payment to "Mr. Francis Moles, of London, Merchant, the sume of fifteen hundred and seven pounds, eleven shillings and six pence, for price of fflanders hempe.....delivered into His Matie's. stores at Woolwich the 17th May, 1667," signed by Sir John Mennes, Controller-in-Chief of the Navy, Sir William Batten, Commissioner of the Navy, (died 5th October, 1667) and Sir William Penn.
- 2080** **Portrait of Sir William Penn**, after Lely.
- 2081** **1667-68.—Certificate of Monies due**, amounting to £33 15s. 9d., for cordage delivered to Harwich, dated Navy Office, 15th Feb., 1667-68, and signed by Lord Brouncker, Sir John Mennes, and Thomas Middleton, Commissioner.
- 2082** **Engraved Portrait of Sir John Mennis** (Mennes).

PRINTS ILLUSTRATIVE OF THE ATTACK ON CHATHAM BY THE DUTCH  
UNDER DE RUYTER, C. DE WITT, AND VAN GHENT.

The disaster resulting from this attack, as is well known, was occasioned by the supineness of Charles II. and the general want of public spirit. Albemarle has left a report of his own exertions in attempting to avert the *contrtemps*, and his contempt falls heavily on the head of Mr. Commissioner Pett, who failed to sink a ship in the narrow channel which the Dutch had to pass. The chain across the entrance to the Medway was broken by the weight of two Dutch fire ships coming on to it one after the other.

- 2083** **1667.—Contemporary Dutch Print**, containing minute details of the taking of Sheerness on the 20th and 21st July, 1667. After R. de Hooge.
- 2084** **1667.—Companion Print to above** (after Schellinks) of the burning of the ships Royal James, Oak, and London at Chatham. The town, cathedral, and castle of Rochester are shown in the foreground.
- 2085** **1667.—Very large and fine Contemporary Engraved Dutch Broadside**, with explanation, containing separate illustrations of the breaking of the chain at the mouth of the Medway, the taking of Sheerness, the burning of the ships, and other incidents.

To illustrate the breaking of the chain by the Dutch vessels, a small engraving is annexed showing a similar operation at a much earlier period of history. It will be observed that the vessel's catwater is fitted with a saw to facilitate operations.

- 2086** 1667.—**Another Contemporary Dutch Engraving**, giving a map of the Thames and Medway on a large and small scale.
- 2087** 1667.—**Another Contemporary Map**, chart of the Thames and Medway, showing the movements of the Dutch fleet.
- 2088** 1667.—**A very rude Contemporary Italian Engraving** of the burning of the ships at Chatham.
- 2089** **A very fine Contemporary Portrait**, by Bary, of David Vlugh, Rear-Admiral of Holland, in whose honour a gold medal was struck and presented to him, with a gold chain, by the States-General for his share in the exploit above referred to. In the background of the picture will be observed a tapestry, on which can be discerned a map of the mouth of the Thames, the island of "Scheppey," the Dutch fleet, &c.
- 2090** **An Engraving** of the gold cup presented to Cornelis De Witt for his share in the exploit. Engraved from the original in the possession of his family.
- 2091** **A Proof** before letters of an engraved portrait (by Houbraken) of Admiral Van Ghent, one of the Dutch Admirals engaged in the attack.
- 2092** **Contemporary Portrait** (by Blooteling, after De Jongh) of Van Nes, a celebrated Dutch Admiral.
- 2093** 1667.—**Contemporary Portrait** (by Blooteling, after Van Eeckhout) of De Fries, a celebrated Dutch Admiral.
- 2094** 1668.—**Document**, signed Sir John Berkeley (Commissioner of the Admiralty), and Sir John Chicheley, Master of the Ordnance, referring to the proposed substitution of one labourer for another in working the crane at Tower Wharf, with seal, a remarkable formality for so small a matter.
- 2095** **Original Contemporary Broadside** (with engraving designed and etched by Hollar) entitled a "True Relation of Captain Kempthorne's Engagement in the Mary Rose with seven Algier Men-of-War."
- 2096** **Engraving of The Old Navy Office**, in Seething Lane, London, pulled down about 1787. This view is extremely interesting as indicating the spot on which Samuel Pepys, Clerk of the Acts, and Secretary to the Admiralty, lived during almost the whole period covered by his diary. Admiral Penn lived hard by in the same building.
- 2097** **Document**, dated Cary House, 8th Jan. 1673, signed by (Thomas Earl of) Ossory, attesting the efficiency of William Jeffereys, who was boat-swain's mate under his command in the Resolution and Victory. A note by the recipient suggests that Jeffereys should be "recommended to Mr. Secretary Pepys."
- 2098** 1670.—**Very Interesting Document**, written for Samuel Pepys, and endorsed in his handwriting, concerning the behaviour of English Admirals when challenged to salute a foreign flag. The instructions given herein to the Earl of Essex were strictly adhered to, and the honour of the English flag vindicated. (See Smith's Pepys, vol. I., p. 127.)

- 2099 Letter**, dated, Darby House, 9th January, 167<sup>3</sup>/<sub>4</sub>, signed by Samuel Pepys, author of The Diary, referring to a letter received by him in reply to a communication relative to the mutinous behaviour of the soldiers to the master of the vessel (the Greyhound), and to the necessities which he fears do but too reasonably provoke them to it, and trusting that some other provision than bread and cheese may be furnished.
- 2100 Portrait of S. Pepys** by White (after Kneller), used as his *ex-libris* and also as the frontispiece to his book "The State of the Navy."
- 2101 Portrait of S. Pepys** also by White (after Kneller), used only as his *ex-libris*, and very scarce.
- 2102 Original Document**, dated "Whitehall, this 29th September, 1674," addressed; "To the Principall Officers and Com<sup>es</sup> of our Navy," superscribed by Charles II. and signed by S. Pepys, recommending John Russell for re-employment as boatswain in his old ship, "as a reward for his service in the Royall Sovereigne, and as a compensation for his sufferings in his captivity under y<sup>e</sup> Moores, and the charge of his redemeing himselfe therefrom."
- 2103 1674—Warrant** dated "this 24th 9<sup>ber</sup> 74" appointing Robert Knewstub purser of a new fourth-rate now building at Woolwich. Signed by John Pepys brother of S. Pepys, whom he succeeded in his office at the Admiralty.
- 2104 1679.—Original Broadside**, in rhyme, addressed to the Duke of York upon his return to England and referring to his command of the Fleet.
- 2105 Order to receive Stores**, dated "Navy Office, this 2<sup>d</sup> of Aug<sup>t</sup> 1682," signed by Sir Richard Haddock, Sir John Narbrough, and Sir Phineas Pett.
- 2106 Mezzotint Portrait**, engraved by W. Faithorne (after Closterman) of Sir Richard Haddock, Comptroller of his Maties Navy.
- 2107 1682. Order to Pay** one debenture for the sum of Ten Pounds out of money remaining in Mr. Bertie's hands upon account of land and sea service, signed by (*the Earl of*) Dartmouth.
- 2109 1686.—Receipt for £1,000**, in connection with the payment of the Garrison of Tangier and the construction of the mole there, given the 29th December, 1686. Signed by Wm. Haver whose name appears so constantly in the Diary of Samuel Pepys.
- 2110 1698.—Directions for forwarding Stores**, dated, "Navy Office, this 6th July, 1698," addressed "To the Storekeeper of his Maj<sup>e</sup> Yard at Deptford," and signed (*inter alios*) by Sir Cloudisley Shovell.
- 2111 A Bonbonnière** of English or perhaps of Dutch workmanship, entirely covered with devices in coloured straw. It represents, with considerable minuteness of detail, the capture of Porto Bello by Admiral Vernon, with six ships only, on November 22nd, 1739. The popularity of this exploit was extraordinary, and gave rise to an enormous issue of commemorative medals, mugs, tea pots, &c.

**2112 A frame containing 16 different medals commemorative of the taking of Porto Bello by Admiral Vernon, in 1739, and of Fort Chagre.**

- (1) *Obv.* "Porto Bello taken by Admiral Vernon with Six Ships. Nov. 22, 1739."  
*Rev.* The Royal Arms. "G.R."
- (2) *Obv.* "Porto Bello taken by Admiral Vernon with Six Men-of-War only. Nov. 22, An. Dom. 1739."  
*Rev.* "Vice-Admiral of the Blew, and Comer-in-Chief of all His Maj. Ships in the Ws. Ies. The Hon. Edward Vernon, Esq." View of Fort Chagre.
- (3) *Obv.* "The British Glory Reviv'd by Adml. Vernon, Comr. Brown."  
*Rev.* "Make room for Sir Robert. No Excise."
- (4) *Obv.* "In Porto Bello ther's not his Fellow. Admiral Vernon."  
*Rev.* "He took Porto Bello with Six Ships only. Nov. 22, 1739."
- (5) *Obv.* "Admiral Vernon took Porto Bello."

*Rev.* "The British Heroes took Carthage. April 17."

**2113 Original Broadside in Verse (with music) "The Battel at Sea." In honour of the glorious victory at La Hogue (May 15th) by the combined English and Dutch Fleets, under Russell and Van Almonde, over the French, under Tourville.**

"Broadsides we'll give them too, till *Monsieur* crys *Morbleu*  
Des *Engletars* vill kill us all.  
Whilst they scower, we will pour  
Thick as hail amongst them, cannon-ball."

**2114 A frame containing (1) a print representing St. James's College at Chelsea, which stood on the site of the present Chelsea Hospital. Chelsea College was founded in 1610, by Dr. Matthew Sutcliffe, Dean of Exeter, "to this intent that learned men might there have maintenance to answer all the adversaries of religion." Archbishop Laud called it Controversy College, and the Roman Catholics in derision called it an alehouse. In 1667, the date of the accompanying token, Evelyn**

2114—*continued.*

delivered, by order of Charles II., the possession of Chelsea College to the Royal Society as a free gift. It was afterwards repurchased by that monarch (but query if the purchase-money was ever paid), and its site utilized for the present hospital.

(2) **A Farthing Token, unique, of Chelsea College.**

*Obv.* "Chelsey Colledge Farthing 1667."

*Rev.* A view of the College.

This token is described in the new edition of Boyne's Trade Tokens, vol. II. p. 814, from the present, the only known specimen.

2115 **1780.—Original Instructions** given by Commodore Collingwood to Captain Houlton of the *Montague*. Given on board the *Grafton*, off St. Lucia, the 4th April, 1780, signed Thos. Collingwood.2115A **1562.—Admiral Sir John Hawkins.** Lord Howard (Lord High Admiral), Lord Burghley—with his Autograph Note, and signed by three others, being an order for paying the sum of £746 14s. the charges for the month of November, 1592, incurred at—

|                      | £     | s. | d. |

Admiral John Hawkins tarnished his reputation by the fact of his being the first European who carried off slaves from the Coast of Africa and introduced them to the West Indies in 1562.

2115B **31st July, 1653.—Martin Harpertzoon Van Tromp**, the celebrated Dutch Admiral, killed in the engagement with Monk. Letter signed and dated 13th July, 1638, when he was Lieutenant-Admiral, with a squadron of eleven ships under his command and serving against the Spanish, and captured many of their ships.

*Lent by George Pritchard, Esq.*

## AUTOGRAPHS, &amp;c.

2116 **23 Sept., 1586.—George Clifford, Third Earl of Cumberland**, eminent Naval Commander, to Lord Burghley. Holograph, asking Burghley to intercede with Queen Elizabeth for the loan of £10,000.2117 **12 Oct., 1538.—Admiral Sir Francis Drake**—A letter signed by him, and by Edward Fenton, the Navigator and Commander, who also distinguished himself against the Spanish Armada, containing a statement of necessities for the Low Countries, amounting to the sum of £20,723 13s. 4d.; also agreement for shipping horses, armour, lances, bows and arrows, muskets, powder, &c., &c., and provisions for 10,000 men, &c., &c.

**2117A 4th December, 1594.—Treasury Order to pay £31,650** to furnish the sea stores and necessities required to send to sea the *Garland*, *Mary Rose*, *Elizabeth*, *Bonaventure*, *Hope*, and *Crane*, with sundry merchant vessels, under the charge of Sir Francis Drake and Sir John Hawkins, "which ships to be prepared in order of Warr." £20,000 to be paid directly it is required and demanded, to prepare for the expedition to the West Indies under Admirals Drake and Hawkins, which sailed from England 1595, and terminated in the death of both of these great admirals. Order given under the Privy Seal, at our house in the Strand. Indorsed on this Order, in Lord Burleigh's holograph, is as follows:—"Make an order to pay to Sir John Hawkins and Sir Francis Drake y<sup>e</sup> first 4 Thousand Pounds. W. Burghley." Drake and Hawkins never returned home; both died during this voyage, and within twelve months from the departure of this expedition.

**2117B July, 1601.—Lord Howard of Effingham, Earl of Nottingham.** Certificate, bearing his signature, showing the whole charge at Chatham, Deptford, Woolwich, and Portsmouth, for the month of July, 1601, amounted to the small sum of £1,271 17s.; also signed by three others.

**2117C 28th July, 1602.—Sign-Manual of Queen Elizabeth** (very fine specimen) to a letter addressed to the High Sheriffs and Commissioners of the Musters in county of Norfolk, calling for fifty able and serviceable men, and for money, "having sent forth our fleet to the coast of Spain, and have resolved to reinforce our army in Ireland."

**2118 Dec., 1618.—Earl of Nottingham, Charles Lord Howard of Effingham, Lord High Admiral,** defeated the Spanish Armada, July, 1588. Signature to an order for charges at Chatham, Deptford, Woolwich, and Portsmouth, on the Treasurer of the Navy, for the month of December, 1618. He retired from the service just at this date.

**2118A 1638.—The Booke of the Great Cause for the Shippe Money,** containing a full account in detail of the trial of John Hampden for refusing to pay the tax of 20s., levied upon him by King Charles I. for ship money. The Lord Keeper's speeches, the king's letter to the judges, Mr. St. John's defence of Hampden, the argument of the twelve judges, their decisions, and other matter contained in 1068 pages of manuscript. Written directly after the trial. The book is in the original binding, well written in the style of the period, and on its first page is written the name of the gentleman to whom it first belonged, one Thomas Windesor, who gave £3 10s. for it.

This well-known trial was the primary cause of the Civil War, four years later, causing the death of Hampden and the execution of the King.

**2118B 1643.—English Navy—Civil War.** Consisting of 44 ships of 24,411 tons. Original Manuscript, upwards of fifty pages containing account of supplies delivered on board each ship from H.M. Stores within the office of the Ordnance. Each ship's account kept distinct, and all "appointed to serve at y<sup>e</sup> seas in this p<sup>e</sup>sent expedition by warrant from the L<sup>ds</sup> and Commons, Com<sup>rs</sup> for y<sup>e</sup> Admiralty."

Names of the ships are given, consisting of *Bonadventure*, *X<sup>th</sup> Whelpe*, *Nichodemus*, *Prince Royall*, *James*, *Dreadnought*, *John of London*, and

**2118B—continued.**

the other war vessels. Some of the supplies delivered were round shot, cross-bar shot, cannon, culverines, sakers, mynions, barrels of powder, hand-grenades, fireworks, swords, beds, muskets, brass and iron ordnance mounted, and many curious entries.

He mentions Admiral de Courcy; speaking of General Moore's troops he says, "they seem to think of Corunna Bay to embark from, they appear to be in want of provisions and ammunition for 6 and 9 pounders, and camp equipage. . . . General Beresford says the division he was in was much harrassed, many without shoes or stockings. . . . Colonel Crawford commands the British light troops under the General. . . . Have been told Bonaparte was in person at Astorga. . . ."

**2119 No date (about 1650).—Prince Rupert—Holograph to Thomas Eliot, one of the Grooms of the Bedchamber.** "I send to you, here inclosed, the excellent answer to my declaration . . . Yesterday the rebels assaulted our men at Bellin, but had the worst of it, altho' far more in number; it caused the conversion of three who have taken service with us; they all assure us how ill they are manned. Capt. Allin made opposition yesterday . . . I shall be willing to confer with you and Sir John Mens about it to-morrow, about 9 in the morning. I will not fail to be at Long Neds . . . Friday, one of the clock."

**2119A 8th February, 1652.—Admirals Blake and Richard Deane.** Letter to the Commissioners of the Admiralty, signed by both Admirals on board the Eryburgh, in the Twinn (preparing for the war with Holland), with part of the fleet. "we have, and in sight, little and great 40 saile, many of them in great want of seamen. . . ." From this period Blake's brilliant achievements began—in the conflict with the Dutch. "Assuring you wee shall endeavour to answer the Trust reposed in us, and to manifest ourselves to bee your. . . ."

**2120 7 June, 1653.—Admiral Robert Blake and George Monck.—**Warrant signed on board the Resolution, as joint Commanders, ordering Capt. Holman, Commander of the William and John, to sail for the Thames and to give "an account of what prisoners you have on board you, and the names of the Dutch captains, if you have any." This was written a few weeks before the death of Tromp.

**2121 31 July, 1654.—Admiral Sir John Lawson—**Letter written on board the Fairfax, in the Downs, to the Admiralty and Navy at Whitehall, respecting a man on board that had confessed to a murder committed three years before; also about victualling the ship, &c., &c. "The other day came in here a ship from Bilboa, named the Fortune, Jonas Smith master, bound for London, having in her three passengers, whereof was one Colonel Walter Harvy, having been seven years in the King of Spain's service; also one Irishman and one gentlewoman . . . but finding nothing upon examination whereby they might be detained, gave them their liberty . . ."

- 2121A 9 June, 1666.—Prince Rupert and The Duke of Albemarle, signed as Admirals of the Fleet, appointing John Kempshorne Rear-Admiral of the "Blew Squadron," and thereby "Empowering you to weave a Blew Flag on the Mizon topmast head of His Majties Ship. Dated on board the Royal Charles, eight days after the great sea-fight off Harwich with the Dutch, which took place June 1st, 1666 With two seals.
- 2122 27 June, 1671.—Admiral Edward Montagu, Earl of Sandwich—Signature transferring £1,500 to George, Duke of Buckingham, about eleven months before his gallant death in Solebay.
- 2123 13 July, 1698.—Admiral Edward Russell, Earl of Orford, cousin of the patriot—Signature to a transfer assigning £300 of stock to one Mathew Aylmer, Esq.
- 2124 7 May, 1703.—Admiral Sir George Byng, Viscount Torrington, to Admiral Sir George Rooke—Holograph on board the Renelaugh at Spithead. "Vice-Admiral Leak sailed yesterday in the Northumberland to the Westward in order to join you, there remains still at St. Helena the St. George, which you left for Count Guildenlieu, who is not yet arrived. I have directions to send the Eagle into the Harbour of Portsmouth to clean, and being ordered to send a 70-Gun Ship to convoy the Ships and Vessels here to the Downs . . . Sir Cloudesly Shovel is not yet come down, nor have I any notice of his coming."
- 2125 22 Apr., 1704.—Admiral Sir George Rooke—Holograph dated from Royal Catherine at Lisbon to Lord ——— recommending Sir Martin Wytcombe to be appointed Queen Anne's Secretary or Resident at the Spanish Court, and he thinks that the Spanish War of Succession to be rapidly approaching, &c.
- 2126 22 Jan., 1706.—Hon. Henry Boyle, Chancellor of the Exchequer—Order, signed, to the Justices of the Peace for the West Riding of Yorkshire, urging strongly the necessity of putting in force the Impressment of Seafaring Men, and to look for such men as have withdrawn themselves into the Country to avoid the Press, and to get them impressed and given to the Press Master.
- 2127 21 Apr., 1707.—Admiral Sir Clowdisley Shovell (also signed by W. Hobart). Order, dated Lisbon, for the supply of Gun and Carriage, and other requirements for Panther. This admiral was lost on the Scilly Isles just six months and a day from this date.
- 2128 22 Oct., 1727.—Admiral John Byng—Holograph addressed to Sir Jacob Ackworth, written on board the Gibraltar just as he was appointed to his first command. Speaks of the quality of his Ship:—"No ship could do better in all respects than she does. . . . I have an order to carry Mr. Compton and his Lady to Lisbon. I believe you are sensible what poor convenience I have for the Ladies. . . . As soon as they come I shall march."

- 2129 8 Jan., 1727-8.—Admiral Sir Charles Wager.—Holograph, written from Gerbz, off Lagos, to Hon. Charles Stewart. "I wish you success in your work at the Mole, and shall be glad to help it forward. Byng has gone this morning for Lisbon . . ."
- 2130 30 Oct., 1766.—Captain James Cook, the celebrated English Navigator.—Holograph from St. John's, Newfoundland, addressed to Captain Debburg. "The angle at the place of observation which the Gibet Hill makes with the meridian is 90° 16' 20" from the south, or 89° 48' 40" from the north." Cook went to Newfoundland on this occasion to observe the Eclipse of the Sun in the Autumn of 1766.
- 2131 20 Feb., 1730-1.—Admiral Sir John Norris.—Holograph from Surrey Street, Strand. "You seem to think was my own choice, my resigning my appointment, but I assure you I was dismissed without the least knowledge of it . . . In the course of my life I have ever acted with great duty to the, and affection, to the constitution of our Country, in both which no man can lay anything to my charge, and this gives me all the quiet of mind an honest man can have. . . . I am glad so much of the Spanish wreck is saved and hope all the rest of the bullion will be so too." He asks for Sir Clowdisley Shovell's sister's son to be promoted in the Service, "the only relation he has left at Sea."
- 2132 23 July, 1747.—Admiral George, Lord Anson to Rear-Admiral Edward Boscawen.—Holograph, written shortly after his victory and the capture of six French men of war. "I am sorry your old fortune did not attend you; I am sure if it had, the French commerce would have been totally ruined. . . . There is this moment arrived from Italy an account that the Sardinian and Austrian Army has beat a part of Marshal Bellisle's army." He mentions Admirals Hawke, Sir John Norris, Lord Sandwich, and others.
- 2132A 22nd October, 1753.—Admiral Honourable John Byron, British Naval Officer and Circumnavigator. His sufferings when wrecked in the *Wager* are graphically described in his "Narrative." The poet was his grandson, who, in his "Epistle to Augusta," his sister, says:—  
"Reversed for him our grandsire's fate of yore,  
He had no rest on sea, nor I on shore."  
Campbell, in his "Pleasures of Hope," gives a striking description. Signature, as Captain, for Phillip Carteret to join the *Vanguard*.
- 2133 16 Jan., 1757.—Admiral Charles Watson—his signature to a Commission appointing Edward Roberts 4th Lieutenant of the *Salisbury*. Dated from H.M. Ship *Kent* at Calcutta in the river Hoogley. This was signed just before the attack on Chandernagore and about seven months before his death.
- 2134 12 March, 1757.—Admiral John Byng, dated 48 hours before he was shot, being the duplicate of his last will and codicil, duly executed and signed thrice. Signed at the time he was awaiting his execution at Portsmouth.

- 2135** 28 Feb., 1759.—Admiral Edward, Lord Hawke—Letter, signed, addressed to the Commissioners of the Navy, certifying that he, his retinue, and servants “were borne on the books” of H.M. Ship *Ramillies* from 26 Feb., 1758, to 28 Feb., 1759.
- 2136** 20 Aug., 1769.—Admiral Sir Hugh Palliser—Holograph to Joseph Sharpe, Esq., dated from Bagshot. In Sept. 1759 he led the body of seamen which assisted in the capture of Quebec, memorable for the death of General Wolfe. He was the early friend of Captain Cook the Navigator, and greatly assisted his promotion in the Royal Navy.
- 2137** 28 May, 1769.—Admiral Sir George Pocock—Holograph, addressed to Mr. William (afterwards Sir William) Hamilton.
- 2138** 22 Feb., 1773.—Captain Constantine John Phipps, Lord Mulgrave, to Sir Joseph Banks—Holograph written from Harley Street at the time he was preparing his ships for his Arctic Expedition. “I don’t know whether you knew before you went that I am to have two Ships and that they will be fitted as I wish.”
- 2139** 17 April, 1773.—Admiral Augustus, Viscount Keppel—Holograph, written from Bath to Henry Bullock, Esq.
- 2140** 13 July, 1782.—Admiral George Brydges, Lord Rodney. His signature to a Bill of Exchange from Kingston, Jamaica, for £350 at thirty days sight on the Ordnance Office, London, for supplies to His Majesty’s Fleet at Jamaica.
- 2141** 14 June, 1783.—Admiral Richard, Earl Howe—Holograph to Sir Andrew Hamond, congratulating him on his safe arrival in England from Halifax. “I had not the least suspicion that you were delayed by accidents similar to those you met with in the *Caton*. . . .”
- 2142** 6 Nov., 1789.—Admiral Sir John Jervis, Earl St. Vincent—Holograph, written from Brentwood to D. Serres, Esq. “As I came through the City yesterday in my chaise, I thought I saw the landing of Charles II. at Dover, and Oliver Cromwell removing the mace from the table of the House of Commons, hanging in Boydell’s window; if so, I hope Mr. West has taken care of me . . . .”
- 2143** No date.—Admiral George Brydges, Lord Rodney. His autograph in the third person.
- 2144** No date (1791).—Captain Edward Riou to Sir Charles Saxton. Holograph—Killed at the battle of Copenhagen, fighting gallantly. He said—“Come then, my boys, let us die together,” when a shot literally cut him in two.
- 2145** Dec., 1793.—Captain George Vancouver. Signatures to an account of the Expenses of Gunner’s Stores on board His Majesty’s Sloop *Discovery* during his well known voyage of discovery. “Dec. 13 on the coast of California. May 25, 1794, fired to salute the King at his giving up the Island (*Owhyhee*) to his Britannic Majesty. Made a present to the King, by order of Captain Vancouver—one drum, complete . . . . Burnt for the entertainment of the Chiefs, sky and water rockets. . . .”
- 2145A** Jan., 1794.—See above.

- 2145B 1794.—Admiral Sir Thomas Troubridge on board the *Castor*, at Spithead. He was taken prisoner by the French shortly after, and regained his liberty at Lord Howe's victory after 1st June, 1794.
- 2146 16 Dec., 1795.—Captain George Blagden Westcott. Killed whilst in command of the *Majestic*, at the battle of the Nile. Naval certificate signed.
- 2147 19 Oct., 1796.—Admiral Samuel, Viscount Hood. Holograph signed from Greenwich Hospital to J. J. Jackson—"I enclose you a letter for the Commissioners and Captain Domett of the Royal George. . . ."
- 2148 4 Dec., 1796.—Captain William Bligh, Captain of H.M. Ship *Bounty*, and subsequently Governor of New South Wales. Naval certificate signed.
- 2149 No date; but in June, 1797.—Admiral Horatio, Lord Nelson. Written with his right hand about six weeks before its loss. His directions for approaching Cadiz, showing his intimate knowledge of the coast and Channel.
- He wrote to Admiral Sir John Jervis at this time, saying—"I have given out a line of battle, myself to lead, and you may rest assured I will make a vigorous attack upon them the moment their noses are outside the Diamond."
- 2150 5 Oct., 1798.—Capt. Thomas Bowen, to Admiral Sir Horatio Nelson—Holograph, complaining that the Neapolitan Government had stopped a French ship he had captured at Messina, and the money on board her; dated from Naples.
- 2151 13 Sept., 1799.—Admiral Horatio, Lord Nelson—Very fine Holograph, written with his left hand, to the Bashaw of Tripoli. "I am told that your highness thinks that I should have shown you greater friendship . . . You will have heard that a French fleet ventured itself in the Mediterranean, and how the British fleet has chased it into the ocean, where I hope they will meet; and if so, I venture to assure you that the naval power of France will be totally annihilated. You will have heard of the total defeat of that vain fool, Bonaparte, by the English and the brave inhabitants of St. Jean D'Acre . . . You will have heard that I went into the Bay of Naples, landed the people from my fleet, took the Castles of St. Elmo, and had afterwards 6,000 French prisoners at my feet, besides rebels at Capua and Gael . . . and that a part of my Royal Master's fleet is gone to carry the King of Sardinia and his family to his kingdom. This is the glorious work I have been engaged in . . . ."
- 2152 30 Sept., 1799 to 4 Jan., 1800.—Admiral Sir William Sidney Smith—Tigre order book. The whole of the entries in the Admiral's writing, and signed by him daily, containing his general orders, and most interesting matter, over a period of three months during his Egyptian expedition in the locality of Aboukir, Damietta, Alexandria, and the Egyptian coast.

2152—*continued.**Extracts.*

23 Oct., 1799, Damietta. "A good look out to be kept towards the enemy. At 4 o'clock the boat to be hoisted out and armed; Lieut. Bushby to take the launch and pinnace and go and reconnoitre the position of the enemies' vessels and the mouth of the river."

22 Dec., 1799. "Lieut. Wright to take the launch and barge at 4 o'clock and go for Lt.-General Desaix . . . carrying two baskets and the note herewith for General Kleber; a subaltern's guard to be clean, ready to receive the Lt.-General above named . . ."

2152A 16 Oct., 1779.—Admiral George Bridges, Lord Rodney. Holograph to James Galbraith. He is credited as being the *first* to adopt the manœuvre of breaking the line—as he did in the battle of April 12th, 1782, when the Dutch Settlement of St. Eustatia was taken. In January, 1780, three months after the date of this letter, he defeated the Spanish fleet under Admiral Langara off Cape St. Vincent.

2153 16 Dec., 1800.—Admiral Sir Alexander John Ball, Governor of Malta, and friend of Nelson, to Sir Sidney Smith—Holograph letter, dated from Malta: "I shall ever retain the highest sense of your exertions and influence in procuring corn for this island at a time of such general scarcity. I have now 3 months corn stored, but shall require 10,000 salms more to serve until the next harvest . . ."

2154 29 May, 1800.—Admiral Sir Philip Charles Calderwood Durham—Holograph letter to James Strange, Esq., M.P. "In case Mr. Bell, Wine Merchant of Guernsey, should draw on your house in my absence, I beg you will honor his draft. I have received orders to proceed with some transports, &c., under my commander to Gibraltar."

2155 25 Feb., 1800.—Admiral George Keith Elphinstone, Viscount Keith—Holograph letter written off Malta in the Queen Charlotte. "I am still here and hardly know how to quit it; Lord Nelson and Troubridge are both so unwell; the French know the fate of the intended succour and desert 'some' every day; they are preparing their ships to push out . . . Assure the royal family their commands will honour me at all times . . . and make my best regards acceptable to Lady Hamilton." Three weeks after this the Queen Charlotte caught fire and blew up, and of 840 souls only 168 were saved. Lord Keith was fortunately on shore at the time.

2156 28 Sept., 1800.—Captain Thomas Louis, to Sir Sidney Smith.—Holograph letter written on board the Minotaur at Mahon. "I am quite sorry for the loss of H.M. Ship Cormorant, and have, agreeable to Lord Keith's orders, sent the Termagant to you . . . Lord Keith has gone upon some piece of service that is not yet known. Affairs are going on well in this part; Malta at last fallen, and the French landed in France. I hope you enjoy your health and that we shall all some day meet in Old England."

- 2157** 28 Dec., 1801.—Admiral James, Lord de Saumarez—Holograph letter, written on board *Cæsar*, Gibraltar Bay, to — Le Mesurier, Esq. "We have accounts from London so late as the 15th, at which time great hopes were entertained that the definite treaty would be speedily concluded, but from the precautions taken by government in sending a large naval force to the West Indies, it would appear we rather doubted the intentions in that quarter, where the French are sending a powerful armament under pretext of subduing St. Domingo."
- 2157A** 21 April, 1802.—Paris, 2nd Florial, 10 a.m. Admiral Pierre C. J. B. S. Villeneuve, French Naval Commander at Trafalgar. Holograph to Citizen Minister, acknowledging his letter—announcing that the First Consul had named him (Villeneuve) to the Command of the Escadre, destined to retake the Island of Martinique, and ordering him to repair to the Port of Brest to accelerate the armament, &c.
- 2158** 4 Sept., 1803.—Admiral Roddam—Holograph written from Killingworth, near Newcastle-on-Tyne, on the renewal of the war with France. "I am fully of opinion by such proper methods this country will find its best security, and I trust in the Almighty, Britain will be enabled to subdue its foes both foreign and domestic. My professional services of 69 years to my sovereign and my country I offered to resume last March . . ."
- 2159** 6 July, 1803.—Admiral Sir Philip Bowes Vere Broke—Holograph from Tunbridge Wells to S. Kilderbee, Esq., respecting the sale of one of his farms in Essex. The purchaser failed to pay down the full amount of the purchase money on day agreed, but "he will be anxious to get business concluded, from an apprehension that I shall be sent to sea . . . I am glad to hear you are so stout again, you will be ready to prosecute Bonaparte if he trespasses upon our manors. If I can't get a ship, I must come home and turn soldier . . ."
- 2160** 17 Nov., 1804.—Admiral Sir John Thomas Duckworth. Holograph, written on board the *Spark* at Port Royal. To James Sykes, Esq. Complains that his business had not received that prompt attention from the hands of Mr. Sykes that it should have had. "The prize I mentioned was not the *Morning Star* but a valuable Spanish ship brought into Gibraltar by the *Phoenix*, Captain Halsted, and *Emerald*, Captain Waller, whilst my Flag was flying there in March, 1800, and for which my share as junior Flag Officer with Lord Nelson was calculated at £1,000 each, consequently Lord Keith's two . . ."
- 2161** 23 Sept., 1804.—Admiral Sir John Borlase Warren—Holograph to Sir Joseph Banks, written from St. Petersburg. Introducing Mr. De Novaszsoff, a Russian Minister of Justice. "A man of worth and talent, and high in the Imperial confidence. His object in travelling to England is to collect whatever information he can respecting the British laws and the mode of administering them. . . ."
- 2162** 17 June, 1805.—Admiral Lord Nelson to Sir Richard Bickerton—Holograph written on board the *Victory* with his left hand. "I cannot tell you what I wish you to do, as I cannot know the state both you and the enemy are in on the Mediterranean; there-

**2162**—*continued.*

fore I can only say I am approaching you, and so are, I believe, the French Fleet, and I think they will go to Toulon, therefore be upon your guard against a surprise, especially if you are off Cadiz. . . . I send you a brief account of my West India trip and General Brereton's unfortunate intelligence, which led me wrong, or June 6 would have been a fighting day; but I must not despair, perseverance will do much. . . ."

**2163** 21 Aug., 1805.—Admiral Sir George Martin—Letter signed on board the *Barfleur*. To the Commissioners of the Navy, asking to be allowed the cost of 19 new beds issued to 19 men who lost their hammocks during the action of 22nd June, 1805, off Ferrol, between Admiral Sir Robert Calder and Villeneuve.

**2163A** 1805.—*Morning Chronicle*, containing a copy of Collingwood's dispatch giving account of the Battle of Trafalgar and the Death of Nelson.

**2163B** 1805.—Order signed by Lord Nelson and by his secretary John Scott for survey of carpenters' stores on board the *Conqueror*, Captain Pellew.

**2163C** 1805.—Lord Nelson's last writing on shore in England. Envelope addressed to Lady Hamilton. Merton, with his initials thereon, just as he was leaving the "*George Inn*," Portsmouth, to go on board the *Victory*.

**2164** 15 Aug., 1806.—Admiral Cuthbert, Lord Collingwood—Holograph on board the *Ocean*, off Cadiz, to Nathaniel Clayton, Esq., Town Clerk of Newcastle-on-Tyne, thanking in warm terms the Corporation of Newcastle for the presentation of a piece of plate, and for the further honour of agreeing to have his portrait hung in the Mansion House. This portrait was painted by the desire of the Royal Volunteers of Newcastle, of which place Collingwood was a native. See No. 407.

**2164A** 1809.—Admiral Collingwood on board the *Ville de Paris*, off Toulon. Letter signed, containing proposed "Signals and Recognizances" between British and Portuguese ships, together with a sketch of the flags, with proposed key.

**2164B** 13 Jan., 1809.—Admiral Sir Samuel Hood. Present in many glorious actions, was with Nelson at Teneriffe and the Nile; wounded and lost his right arm in 1806.

Autograph letter signed on board the *Barfleur*, ordering vessels to proceed without delay to the Bay of Corunna for the purpose of embarking the troops under the command of Sir John Moore, who was killed three days later.

**2164C** 18 June, 1810.—Captain John T. Peyton, at the Battle of the Nile commanded the Defence, 74 guns, 590 men. 4 killed and 11 wounded.

Holograph dated from Cadiz, taking specie to Lisbon.—*Address to Hon. G. C. Berkeley at Lisbon.*

- 2165 25 May, 1811.—Admiral Sir Richard Keats—Holograph on board the Milford, Cadiz. To Admiral George Berkeley, Commander-in-chief, Tagus. "The campaign has indeed been glorious and perhaps has given the first solid shock to the colossal power of the French. The battle of Albuera is greatly to be attributed to the same great general . . ."
- 2166 12 Nov., 1812.—Admiral Sir Edward Berry—Holograph, written on board the Barfleur, at Spithead, to James Halford, Esq. He is on the point of again going to sea; he likes the ship and officers; Lady Berry intends to join him next autumn at Minorca.
- 2166A 1 June, 1813.—The Action between H.M.S. Shannon and the Chesapeake. Certificate signed by Captain P. B. V. Broke, his Lieutenant, the Master, and Surgeon on board the Shannon, that James Clarke was severely wounded in this action by a musket ball in the left shoulder, by splinters in the left arm, and by cannister on the upper part of the left hip. Clarke was an ordinary seaman and a native of Shetland.
- 2167 4 Sept., 1813.—Admiral Sir Robert Calder, dated from Plymouth, to Sir George Berkeley: "It has been a tough morsel, this St. Sebastian, but I hope it is now over, and that you may reap the glory and advantages of its fall. This comes to you by Rear-Admiral Martin, sent out in the Creole, to go to the Marquis of Wellington, by Lord Melville, to know his lordship's plans and wishes respecting the naval assistance required . . ."
- 2168 14 Oct., 1813.—Sir John Franklin, Arctic Voyager. Holograph on board the Bedford in the Downs. To Mrs. Matthew Flinders. Captain Flinders was much engaged writing an account of a voyage to the Terra Australis, and Franklin says: "I can easily fancy Captain Flinders to be fully occupied . . . I am truly rejoiced he keeps his health and spirits in such good trim, in spite of the intense reading and close application he must have had these last two years . . ."
- 2169 17 Sept., 1814.—Captain P. Pípon—Report, sent to Sir Joseph Banks on his finding the home of the mutineers of the Bounty, at Pitcairn Island. He was the captain of H.M. Ship Tagus, and was in company with Sir Thomas Staines, the Captain of the Briton, Captain Pípon's narrative of this event is very clear and particular, and gives the fullest information of the condition of the mutineers from their landing on the island until their death. Adams alone being then alive, having been on the island 25 years.
- 2170 23 Nov., 1816.—Admiral Edward Pellew—Viscount Exmouth—Holograph, written shortly after his return from the bombardment of Algiers (Aug. 27, 1816). "My family and myself think it practicable to make some alteration in my arms, and I wish to consult you on the subject. . . . The saving the crew and a regiment of troops, above 600 souls, out of the Dutton when shipwrecked at Plymouth, and the attack of Algiers and its consequent release of our fellow Christians and the abolition of Christian slavery" . . . he declares to be the two leading features of his life.

2171 7 Sept., 1819.—Admiral Sir Thomas Masterman Hardy (Flag Captain to Lord Nelson on board the *Victory*)—Holograph, written on board the *Superb*, at Plymouth, to Captain R. B. Young. "Lord Nelson always expressed himself much satisfied with your zeal and good conduct . . . had his lordship been spared (I have no doubt) he would have recommended you. . . ."

2172 3 Dec., 1819.—Admiral Sir Israel Pellew—Holograph to Sir Sidney Smith. He accompanied Lord Nelson to the West Indies in 1805, and was at the battle of Trafalgar in command of the *Conqueror*. The letter is on the death of his son Edward (his only child), killed at Paris, 6 October, 1819, in a duel, by Lieut. Walsh. The loss overwhelmed him with sorrow.

2173 26 April, 1823.—Admiral Sir George Cockburn—Holograph to Sir Sidney Smith, acquainting him that his nephew, Mr. W. H. Smith had been promoted to be Lieutenant of the *Martin* in the Mediterranean.

2174 10 July, 1825.—Captain R. W. Otway—Holograph to Captain Young.

2175 7th Aug., 1827.—Admiral Sir Edward Codrington—Holograph to W. Hoffman. Written at Smyrna a short time before the battle of Navarino—counter-ordering the despatch of the "*Sun newspaper*," as they never arrive in time.

"I get '*Galignani's Messenger*,' which contains the cream of all English news . . . ."

2175A 1827 or 1828.—The following **Conundrum**, written, and probably composed by, Admiral Sir William Sidney Smith, about the year 1827 or 1828:—

Of base extraction, origin most low,  
My elevation to the stocks I owe,  
Nor bulls nor bears I fear, yet won't dissemble,  
A run on any bank would make me tremble;  
Stout, free and generous, now and then engage  
In the destructive passion of the age,  
Give balls and routs, though my address be rough  
My company will cheer you; that's enough.

Can any reader find the answer?

2175B Card of Admission to the Funeral of Lord Nelson.

2176 5 March, 1828.—King William IV.—signed as Prince William, Duke of Clarence.—Holograph, written from the Admiralty.

"In answer to yours of the 29th Feb., enclosing a memorial from yourself and others, Flag Officers, who were, at the time, Captains under Lord Nelson in the action off Copenhagen . . . His Majesty's Government were most perfectly sensible of the eminent services of yourself and your companions in arms under the great and immortal Nelson, but regret they could not advise the king, at this late period, to issue medals."

- 2177 12 July, 1829.—Admiral Sir Henry Blackwood. Holograph written from Rochester enquiring after pictures from Leghorn not arrived and long delayed.
- 2178 1829.—Sir John Ross, Arctic Explorer—Holograph, written on board the *Victory*, in the Arctic Seas, to Sir Byam Martin, Comptroller of the Navy, giving a most interesting account of his progress in the Arctic region.
- 2179 14 May, 1834.—Sir George Rose Sartorius to Mrs. Fry, shortly after his return from Portugal.  
“What with a broken knee, swelled chops, and private business, &c., I have not been able to get down to you . . . .”  
He was at Trafalgar and at the siege of Cadiz. When in command of the *Slaney* he was present at the surrender of the Emperor Napoleon, 1815.
- 2180 11 Dec., 1834.—Sir John Richardson, Arctic Explorer and friend of Sir John Franklin—Holograph, to Col. C. H. Smith. He mentions his old friend Sir John Franklin, and his first and second expeditions; his “*Fauna Boreali-Americane*”; and the fish found in and about the Great Lakes, common to New York and Canada . . . .
- 2181 19 July, 1837.—Admiral Thomas Cochrane, 10th Earl of Dundonald—Holograph, to Thos. Metcalf, Esq.  
“Bramah has now declared unreservedly favourable to my revolving engine, and has now written to the Admiralty on the subject . . . .”  
“I have let Hanover Lodge for 800 guineas a year . . . . to the East Indian Nabob . . . .”
- 2182 20 April, 1838.—Lieutenant Thomas Waghorn, R.N. (projector of the Overland Route to India)—Holograph from Cairo to R. Gordon, Esq., of the India Board, introducing to him his “private and confidential friend in Egypt. He knows and can tell you of everything in it. Pray support his claim for remuneration. He will explain to you personally how much his claim is, and how he has been disappointed.”
- 2183 18 Sept., 1840.—George Eden, Earl of Auckland, First Lord of the Admiralty 1834, and again in 1846.—Holograph, written in India when Governor General, to B. Bayley, Esq., on Indian affairs. “There was more discouragement upon the first difficulty of the Indus navigation than circumstances have since seemed to justify. It is apparently a difficult river, but our steamers have lately rendered excellent service in the conveyance of troops. . . .”
- 2184 8 Sept., 1840. — Admiral Sir William Edward Parry, Arctic Voyager—Holograph respecting Ericson’s Sounding Instruments. “I have in my own department more Inventions to examine than I can well find time to attend to. . . .”

- 2185** 15 Sept., 1841.—John Pascoe, Senior Lieutenant on board the Victory, at Trafalgar, describes his personal interview with Lord Nelson a few hours before the battle, and his lordship's devotions at that period. He relates that he was "on his knees penning that beautiful prayer to the God of battles, a passage of which runs thus: 'and may the prevailing feature of the British fleet (after the action) be that of mercy.' This prayer has not been sufficiently shown in his life, &c., seeing that he did not put his trust in an arm of flesh."
- 2186** 7 July, 1843.—Admiral George Back, Arctic Explorer, to Mr. Dougall—Holograph, written from his club, apologising for not having dined with Mr. Dougall, having a prior engagement, and having mistaken the day.
- 2187** 25 July, 1848.—Admiral Sir Charles Napier, to Lord Auckland—Holograph, written at Cork: "Steamers I have none, and I will pause before I move the Marines; but I suppose I am entering into your views and the views of the government in doing all I can to prevent an insurrection. . . ."
- 2188** April, 1852.—Admiral Edmund, Lord Lyons—Holograph to his friend Young. "Here I am still, and must remain until after the Naval Review of the 23rd, for Her Majesty has done me the honour to invite me on board her yacht on that occasion. . . . I am so pestered in consequence of the unfortunate report of my going to Constantinople. . . ."
- 2189** 20 Feb., 1856.—Admiral Sir Michael Seymour, to Sir Albert Woods—Holograph. "Having been appointed to the Naval Command in India, and ordered to Devonport to hoist my Flag, I fear it will be impossible for me to return to London, from so distant a point, in sufficient time to attend Her Majesty's Investiture of the Order of the Bath. . . ."

*Lent by Messrs. L. & J. Parnell.*

- 2190** 1668.—London Gazette, with Account of the Launch of the Edgar man-of-war at Bristol.

*Lent by Miss A. J. Grindall.*
- 2294 1795.—**Original Record** of Gunners' Stores expended by H.M. frigate Crescent, 36 guns, in the action with La Reunion, 20th October. Original record of stores expended in H.M.S. Orion, 74 guns, during Lord Bridport's action, June 23rd.  
*Lent by Lord de Saumarez.*
- 2295 1796.—**Sailing Orders** of Admiral Sir John Jervis (afterwards Earl St. Vincent), dated on board the Victory, 9th May.  
*Lent by H. T. Dundas Bathurst, Esq.*
- 2296 1797.—“**God bless you and Fremantle**”; supposed to be the first writing of Nelson after the loss of his right arm, 25th July, 1797.  
By the accompanying letter it seems to have been written on board the Seahorse on 3rd or 4th August, 1797, in which case ‘you’ must be Mrs. Fremantle. With it is placed a right handed signature of Nelson's, dated 12th September, 1794.  
*Lent by Edwin Dawes, Esq.*

- 2297 1797.—**Times newspaper of July 3rd**, containing an account of the execution of Richard Parker for the part he took in the mutiny at the Nore. *Lent by O. R. Fabian, Esq.*
- 2298 1797.—**An account of the state of Sheerness during the Mutiny at the Nore, 12th May.** *Lent by Alfred Bastard, Esq.*
- 2299 1797.—**The first letter written by Lord Nelson**, then Sir Horatio Nelson, with his left hand, addressed to Sir John Jervis, K.B., afterwards Earl of St. Vincent, and bequeathed by him to Admiral Sir William Parker. "I hope you will be able to give me a frigate to convey the remains of my carcass to England." "You will excuse my scrawl, considering it is my first attempt." *Lent by Sir William Parker, Bart.*
- 2300 1797.—**The Freedom of the City of London to Commodore Nelson.** Presented to Greenwich Hospital by Her Majesty the Queen in 1861. *Lent by the Lords Commissioners of the Admiralty.*
- 2301 1797.—**A letter giving interesting particulars of a Naval Action off Ushant** written by Lieutenant A. Wilson, R.N. "The enemy was several times on board us—once in particular." *Lent by Miss Fleetwood Wilson.*
- 2302 1797.—**Original Memorandum** given to the Rev. J. Greville, Curate of St. George's, Hanover Square, by Admiral Lord Nelson after the loss of his arm. Purchased from the Rev. P. G. Greville (his son) by Sir W. A. Fraser, Bart., Nov. 30th, 1867. The frame made from the mainmast of the Victory. "An officer desires to return thanks to Almighty God for his perfect recovery from a severe wound, and also for the many mercies bestowed upon him." *Lent by Sir William Augustus Fraser, Bart.*
- 2303 1797.—**Memorandum**, by Sir James Saumarez, with information respecting the Expedition of General Bonaparte to Egypt, and the French fleet subsequently destroyed at the Nile. *Lent by Lord de Saumarez.*
- 2304 1797.—**Log** kept by mutineers on board H.M.S. Comet, Fire-ship, May and June. *Lent by the Rev. W. Cumby.*
- 2305 1797.—**Letter of Admiral Sir Horatio Nelson** to the Mayor of Norwich, dated on board the Irresistible, off Lisbon, 26th Feb., communicating his desire to present the sword of the Spanish Rear-Admiral Dom H. F. Winthuysen, surrendered to him on the 14th Feb., in the action off Cape St. Vincent, to the town of Norwich. *Lent by the Mayor and Corporation of Norwich.*
- 2306 1797.—**Letter from Sir John Jervis** to Sir James Saumarez: dated, on board the Ville de Paris, 11th May, during the blockade of Cadiz. "I have a beautiful woman (Mrs. Mansfield) on board the Ville de Paris, who, with her husband, Capt. Mansfield, are very desirous to see Cadiz before they go to England, and if Don Joseph will permit them to land for a few days, and return to me, I shall be very much obliged." The application was made and refused. *Lent by Lord de Saumarez.*
- 2307 1797.—**Original Draft** of the bet between Lord St. Vincent and Sir James Saumarez respecting conclusion of peace; dated 12th August. "That preliminaries for peace are at this moment signed, four o'clock in the afternoon, and that hostilities will cease between the belligerent Powers on or before the 12th day of September next." The bet was won by Sir James Saumarez; peace was signed. *Lent by Lord de Saumarez.*

- 2308 1797.—**Original Record** of Gunners' Stores expended on board H.M.S. Orion during the action of 14th February.  
*Lent by Lord de Saumarez.*
- 2309 1798.—**Original Record** of Gunners' Stores expended on board H.M.S. Orion during the battle of the Nile, August 1st.  
*Lent by Lord de Saumarez.*
- 2310 1798.—**Passport** for Pope Pius VI. (escorted by a small Spanish squadron) to pass from Leghorn to a Spanish port, while England and Spain were at war, issued by Admiral Lord St. Vincent, and dated June 15th, 1798, with original signature of Sir Horatio Nelson.  
*Lent by Lord de Saumarez.*
- 2311 1798.—**Original Agreement** signed by the Captains of the Fleet off the Nile dated on board H.M.S. Orion, 6th October, whereby they agree to share equally Prize money, including Head money, &c. &c.  
*Lent by Lord de Saumarez.*
- 2312 1798.—**Resolution of the Court**, making a grant of £10,000 to Lord Nelson, after the Battle of the Nile, and his lordship's reply.  
*Lent by the Rt. Hon. the Sec. of State for India.*
- 2313 1798.—**Letter of Admiral Sir Horatio Nelson** to the Captains of His Majesty's ships, dated Off the Nile. Vanguard. 3rd August. "My prompt decision was the natural consequence of having such Captains under my command, and I thank God I can say that in the battle the conduct of every officer was equal. I accept as a particular mark of your esteem the sword you have done me the honour to offer."  
*Lent by Lord de Saumarez.*
- 2314 1798.—**Letter from Sir Horatio Nelson** to Lady Collier from on board the Vanguard at St. Helena dated April 8th. "You may rely that your son shall spend as little as possible, for he will be a very lucky fellow if he gets on shore twice in a year."  
*Lent by Mrs. Carr-Glynn.*
- 2315 1798.—**Times Newspaper**, 3rd October, containing Nelson's official despatch after the battle of the Nile.  
*Lent by O. R. Fabian, Esq.*
- 2316 1798.—**Copy of the Times Newspaper** dated October 3rd.  
*Lent by Alfred S. Phillips, Esq.*
- 2317 1798.—**The Times** of October 3rd, containing the account of the victory at the Nile, and list of killed and wounded.  
*Lent by George Hollis, Esq.*
- 2318 1799.—**General Order** issued by Admiral Lord Nelson to Captains of H.M. ships, dated on board the Foudroyant, 4th October, and signed Nelson.  
*Lent by Mr. William Baugh, late Steward H.M.S. Victory.*
- 2319 1799.—**Letter** from Admiral Lord Nelson to Admiral the Hon. William Cornwallis, dated Palermo, January 31st. "Nothing could give me more pleasure than receiving a visit from my very old acquaintance who has more than once saved my life by his friendship, and taught me by his example to be at the French."  
*Lent by Cornwallis Wykenham-Martin, Esq.*
- 2320 1799.—**Letter** from Captain Alexander J. Ball, H.M.S. Alexander, to Sir James Saumarez, dated 27th April. "I congratulate you on your appointment to the Marines, and the command of the Caesar, which are given to you as a mark of the high estimation in which you are regarded by the Admiralty and the public."  
*Lent by Lord de Saumarez.*
- 2321 1800.—**Notice Board** offering inducements to sailors to join H.M. service.  
*Lent by Messrs. James Hawker & Co.*

- 2322 1800.—**Order Book** (Collingwood's) all in manuscript, dates from 1800.  
*Lent by Lady Wilson.*
- 2323 1800.—**M.S. in Frame.** Parole d'honneur, given to William Augustus Thomson, H.M.S. Florentine, by Jean Lambert Tallim and Jules Banke, on the strength of which that officer, the only Englishman on board, conveyed them, with 88 other prisoners of war, from Alexandria to Malta, in the Florentine's prize, L'Union, 11th December, 1800.  
*Lent by Mrs. J. T. Anderson.*
- 2324 1800.—**Letter** from Admiral Earl St. Vincent to Sir James Saumarez, dated on board the Ville de Paris, off Ushant, 15th Sept., when the latter was commanding the advanced squadron, blockading Brest. "I repose such unbounded confidence in your zeal and judgment, that I sleep as sound as if I had the keys of Brest in my possession."  
*Lent by Lord de Saumarez.*
- 2325 1801.—**Draft Convention of Treaty of Copenhagen**, with original notes by Rear-Admiral Lord Nelson.  
*Lent by the Rev. Alfred Gatty, D.D.*
- 2326 1802.—**Holograph Letter** from Admiral Lord Nelson to Captain Digby, H.M. Sloop Kite, dated 6 Jan. Lord Nelson came home from the Baltic in the Kite in 1801. "There are few things, I assure you, that would give me so much pleasure as being in the smallest degree instrumental in your promotion."  
*Lent by Captain Noel S. F. Digby, R.N.*
- 2327 1802.—**Letter** from Lord Nelson to Lady Collier, dated Merton, 18th June. "I assure you I regard your son for his own worth."  
*Lent by Mrs. Carr-Glyn.*
- 2328 1803.—**Letter** from Admiral Lord Nelson to Lady Collier, dated 21st March—"I am very happy to hear that your good son is made a Lieutenant."  
*Lent by Mrs. Carr-Glyn.*
- 2329 1804.—**The Attestation Paper** (framed) of an Italian, enlisted for the Royal Marines in 1804 by Captain C. W. Adair, Royal Marines, of H.M.S. Victory. Signed "Nelson and Bronte."  
*Lent by General Sir Charles Adair, K.C.B.*
- 2330 1804.—**Framed Memorandum**, dated "Victory at sea, 15th March." Signed, "Nelson and Bronte;" directing ships under his command ordered home to England, not to take away a greater portion of provisions or stores than might be necessary for the passage. Addressed to the Commanders of H.M. Ships on the Mediterranean Station.  
*Lent by the Mayor and Corporation of Dover.*
- 2331 1804.—**Letter of Lord Nelson** describing his wounds, and stating his opinion on the politics of the English Government:—"When I run over the undermentioned wounds—eye in Corsica, belly off Cape St. Vincent, arm at Teneriffe and head in Egypt, I ought to be thankful what I am."  
*Lent by T. Bruce-Kingsmill, Esq., R.H.A.*
- 2332 1804.—**A Letter from Lord Nelson** to Mr. James Lockhart, dated "Victory, 31st March, 1804."  
*Lent by C. Percy Henderson, Esq.*
- 2333 1805.—**Rough Signal Book** of H.M. Ship Naiad, Captain Thomas Dundas, repeating frigate in the battle of Trafalgar. It contains the celebrated signal, "England expects that every man will do his duty."  
*Lent by Mrs. E. M. Becher.*

- 2334 1805.—**Two Letters** by Captain Thomas Dundas, one referring to his escape from a French squadron in August, 1805; and the other giving a description of the battle of Trafalgar, in which he was present. Both written on board H.M. Ship Naiad. *Lent by Mrs. E. M. Becher.*
- 2335 1805.—**Original General Order** from Lord Collingwood, thanking officers and men for their gallant conduct, dated on board the Euryalus, 22nd Oct., 1805. See *Times*, 6th Nov., 1805 (No. ).  
Original General Order from Lord Collingwood, for a day of humiliation and thanksgiving, and fixed for Thursday, Nov. 7th; dated Euryalus, off Trafalgar, 22nd Oct., 1805. *Lent by Miss A. J. Grindall.*
- 2336 1805.—**Holograph Letter** from Lieutenant John Pasco, Signal Officer of the Victory, 21st Oct., 1805, giving an account of Nelson's last telegraphic signal, and how the writer suggested the alteration of the word "confides" to "expects." (Date, Aug., 1846.)  
*Lent by Lieut.-Col. Baylis.*
- 2337 1805.—**Book** (Memoirs of Count Gramont), damaged by a shot during the battle of Trafalgar. *Lent by Lord Digby.*
- 2338 1805.—**Lord Nelson's Letter** to Samuel Briggs, Esq., 4th Feb.  
*Lent by Rear-Admiral W. R. Kennedy.*
- 2340 1805.—**Letter from Lord Nelson**, dated Victory off Cadiz, October 18th, the day before the Spanish fleet put out, and three days before the battle of Trafalgar. "Our friends at Cadiz are ready to come forth."  
*Lent by Lord de Saumarez.*
- 2341 1805.—**Copy of Admiral Collingwood's general order** after the action, and dated 22nd October, addressed to Sir Robert Moorsom.  
*Lent by Lieut. Col. Henry Moorsom.*
- 2342 1805.—**Letter by same writer** dated 4th December, giving further account of action and an amusing incident of it.  
*Lent by Lieut.-Col. Henry Moorsom.*
- 2343 1805.—**Autograph letter of Lord Nelson**, dated from the Victory, July 20th, to Lieut. Henry Sharp, R.N., commanding the Victualling ship Momus, charging him with a packet for the Admiralty.  
*Lent by Felicia White*
- 2344 1805.—**Card of admission to Lord Nelson's funeral.**  
*Lent by the Royal United Service Institution.*
- 2345 1805.—**Printed Instructions**, giving orders for a Naval procession to St. Paul's Cathedral "to lay colours" on the altar.  
*Lent by Miss A. J. Grindall.*
- 2346 1805.—**Letter** written by Captain, afterwards Admiral, Sir Robert Moorsom, R.N., commanding H.M.S. Revenge, dated 1st November, Gibraltar, and sent to England in the Victory, giving an account of the Battle of Trafalgar.  
*Lent by Lieutenant-Colonel Henry Moorsom.*
- 2347 1805.—**Application** in the matter of John King, who fell on board the Victory.  
*Lent by William Hall, Esq.*
- 2348 1805.—**Autograph of Captain Hardy, R.N.**, in whose arms Nelson breathed his last.  
*Lent by William Hall, Esq.*

- 2349 1805.—**London Gazette** of 6th November, 1805. Admiral Collingwood's despatch of the victory off Trafalgar and death of Admiral Lord Viscount Nelson.

"His Lordship received a musket ball in his left breast about the middle of the action and sent an officer to me immediately with his last farewell and soon after expired."

The identical musket ball is exhibited by H.M. the Queen and is numbered in the catalogue. *Lent by the Rev. F. J. Richards.*

- 2350 1805.—**Grant** of the Freedom of the City of London, to Captain Hardy, after the battle of Trafalgar.

*Lent by William Manfield, Esq.*

- 2351 1805.—**Writing Book** on which the Trafalgar despatches were written (only the boards left).

*Lent by Lady Wilson.*

- 2352 1805.—**Prayer Book** used by Rev. Dr. Scott, Chaplain of H.M.S. Victory, 1805.

*Lent by Rev. Reginald A. Gatty.*

- 2353 1805.—**A copy of Milton's Paradise Lost**, struck by a cannon ball in the battle of Trafalgar in cabin of H.M.S. Africa, Captain H. Digby. The book contains an autograph memorandum of the fact.

*Lent by Keuchm E. Digby, Esq.*

- 2354 1805.—**Letter of Earl Nelson**, referring to his brother Vice-Admiral Viscount Nelson. "I am perfectly satisfied from the Surgeon's reports which have sent to me that every thing proper has been done. I cou'd have wished to have known what was done with ye bowels, whether they were thrown overboard, or whether they were preserved to be put into ye Coffin with the Body. The features being now lost, The face cannot, as Mr. Beatty very properly observed, be exposed. I hope therefore everything is closed and soldered down."

*Lent by A. Scott Gatty, Esq.*

- 2355 1805.—**Writing Book** on which the Trafalgar Despatches were written by Admiral Lord Collingwood.

*Lent by Lady Wilson.*

- 2356 1805.—**A Log of the Weather** in the hand-writing of Admiral Lord Nelson, from May, 1805, to October 20th, 8 p.m., including the last night of his life.

The book is opened at the last entry made by him at 8 p.m. on Sunday 20th October.

*Lent by W. Eyre Matcham, Esq.*

- 2357 1805.—**Ticket to the Funeral of Lord Nelson**, No. 400. Colonel Elford, signed by Isaac Heard, Garter; and Sealed.

*Lent by Charles Taylor Phillips, Esq.*

- 2358 1805.—**Letter from Admiral Collingwood** dated on board Euryalus off Cadiz, 24th October, addressed to H.B.M. Minister Plenipotentiary at Lisbon.

"The great day has not been without a considerable suffering on our part in loss of officers and men, and what the British Navy and the British Nation will have to lament is the death of the Commander-in-Chief, Lord Nelson, who in the middle of the action fell covered with glory."

*Lent by the Chevalier Dalton.*

- 2359 30th Oct., 1805.—**Mr. John Wells**, Signal-Midshipman on board the Britannia, at Trafalgar; letter to his parents describing the battle. "We do not yet know what has become of the remainder of the enemy's fleet, who took to their heels as soon as they saw we had got so many of their ships in our possession."

*Lent by Mrs. Older.*

- 2360 1805.—**Times** of November 7th, containing the list of killed and wounded at the battle of Trafalgar. "If ever there was a man who deserved to be praised, wept, and honoured by his country, it is Lord Nelson." The Leader.  
*Lent by the Hon. J. J. Carnegie.*
- 2361 1805.—**Secret Orders** of Lord Nelson to the Right Hon. the Earl of Northesk prior to the battle of Trafalgar, dated Victory, off Cadiz, 9th Oct. "Thinking it almost impossible to bring a fleet of Forty Sail of the Line into a line of battle in variable winds, thick weather, and other circumstances which must occur without such a loss of time that the opportunity would probably be lost of bringing the enemy to battle in such a manner as to make the business decisive, &c., &c., &c."  
*Lent by the Hon. J. J. Carnegie.*
- 2362 1806.—**Rough Log of H.M. Ship Victory**, from 19 Sept., 1805, to 15 Jan., 1806, kept by Mr. Thomas Atkinson, Master of the Victory. Contains the passage from England, the battle of Trafalgar, the passage home, and the discharge of Lord Nelson's remains to the shore.  
*Lent by Messrs. Forbes, Forbes & Co.*
- 2363 1806.—**Letter of Admiral Roddam**, dated 27 Feb., relating to Admiral Lord Collingwood. "I found both him and his brother Wilfrid so promising and deserving in every way that my zeal for the good of the Service, and my strong wish to push such meritorious young men forward, made me not rest until I got them both made captains."  
*Lent by Rev. E. W. J. Symons.*
- 2364 1806.—**Letter of Admiral Lord Collingwood**, giving a short account of his services, dated the Queen, at sea; 7th January. "My life has been a continued service at sea, but unmarked by any of those extraordinary events or brilliant scenes which hold men up to particular attention."  
*Lent by Rev. E. W. J. Symons.*
- 2365 1806.—**Holograph Letter** from Admiral Sir Ed. Pellew (afterwards Lord Exmouth), dated Bombay, 18th July.  
*Lent by H. T. Dundas Bathurst, Esq.*
- 2366 1809.—**Letter Book** of H.M.S. Polyphemus, with the account of the surrender of the city of St. Domingo, July 7th, and the two years following.  
*Lent by the Rev. W. Cumby.*
- 2367 1810.—**Holograph Letter** of Admiral Sir James Saumarez (afterwards Lord de Saumarez), dated Guernsey, 22nd January.  
*Lent by H. T. Dundas Bathurst, Esq.*
- 2368 1812.—**Letter** (confidential) to Captain Samuel Evans, commanding U.S. Frigate Chesapeake, dated 4th Oct., taken in that vessel at her capture. "American vessels of war appearing off Sandy Hook will be known, for the present, by an American ensign hoisted at each mast-head, and a large black ball either suspended at the flying jib-boom end, or the mizen peak, as can be most easily distinguished."  
*Lent by the United Service Institution.*
- 2369 1812.—**Signals** (confidential) relating to Public and Armed Private Ships, taken in the U.S. Ship Chesapeake at her capture. "Strictly confidential, and the commanders of private armed vessels are to keep this paper connected with a piece of lead or other weight, and to throw the whole overboard before they shall strike their flag, that they may be sunk."  
*Lent by the United Service Institution.*

- 2370 1812.—**Letter**, dated Navigation Department, 11th November, taken in the U.S. Ship Chesapeake at her capture. "You are not to interrupt any British unarmed vessels, &c."  
*Lent by the United Service Institution.*
- 2371 1813.—**Letter from Captain Broke**, of H.M.S. Shannon, to his wife, announcing the capture of the Chesapeake, written with his left hand, his right side having been disabled by wounds. "I am fast recovering of my wounds, and trust shall be quite well in another week."  
*Lent by Lady de Saumarez.*
- 2372 1813.—**Signal Book** of the U.S. frigate Chesapeake, captured by H.M.S. Shannon, June 1, 1813. The bullets were attached to this book for the purpose of sinking it.  
*Lent by the Royal United Service Institution.*
- 2373 1813.—**Letter** dated U.S. frigate President, 25th April, taken in the U.S. ship Chesapeake at her capture. "Enclosed you will receive a copy of certain British Private Signals."  
*Lent by the United Service Institution.*
- 2374 1813.—**Private Signal Book** of U.S. Ship Chesapeake taken at her capture.  
*Lent by the United Service Institution.*
- 2375 1814.—**Letter of Mr. George Grover, Midshipman, R.N.**, describing *inter alia* the voyage in H.M.S. Undaunted, conveying Napoleon I. to Elba, 28th April—3rd May, 1814, and the bombardment of Algiers, 27th August, 1816, when he was on board the Queen Charlotte, Lord Exmouth's flag-ship.  
*Lent by Colonel G. E. Grover, R.E.*
- 2376 1816.—**Letter of George Grover, Midshipman**, to his father, dated on board the Queen Charlotte, off Algiers, 29 Aug. "I hope Lord Exmouth has proved that he is a degree better than the Mediterranean waterman which some people were pleased to call him."  
*Lent by Colonel G. E. Grover, R.E.*
- 2377 1816.—**Private Letter**, dated H.M.S. Queen Charlotte, 28th Aug., from a Midshipman to his parents, describing the bombardment of Algiers. "If you can fancy rain falling in water, you can the walls of Algiers, which I am sure will never defy again English superiority."  
*Lent by Mrs. Yorke Triscott.*
- 2378 1816.—**Minutes** of the action between the English squadron and the Algerine batteries on the 27th August, 1816, taken by Mr. Richard Triscott, midshipman on board the Queen Charlotte.  
*Lent by Mrs. Yorke Triscott.*
- 2379 1818. **Letter** of Admiral Lord Exmouth, dated Plymouth, 11th March, to the father of Midshipman Grover. "He has now some pulse and is quite sensible and, in my judgment, greatly better."  
*Lent by Colonel G. E. Grover, R.E.*
- 2380 1818. **Letter** of Admiral Lord Exmouth, dated Plymouth, 13th March, to the father of Midshipman G. Grover. "My good young friend departed this life at four o'clock this morning."  
*Lent by Colonel G. E. Grover, R.E.*

- 2381 1825. Autograph Letters** to J. C. Schetky, from distinguished naval men, including :—
- (a) Admiral Sir C. Paget.
  - (b) „ Sir W. Hoste.

*Lent by Mrs. Nutting.*
- 2405 **Captain Cameron's Journal.** Across Africa.  
*Lent by Commander Verney Lovett-Cameron, C.B., R.N.*
- 2406 **Captain Cameron's Note Book.** Across Africa.  
*Lent by Commander Verney Lovett-Cameron, C.B., R.N.*
- 2407 **Captain Cameron's observation book.** Across Africa.  
*Lent by Commander Verney Lovett Cameron C.B., R.N.*
- 2408 **Copy of the despatch of Captain Hall, R.N.**, commanding the Sicilian Flotilla in which the services of Lieut. Le Hunte are mentioned.  
*Lent by George Le Hunte, Esq.*
- 2409 **Sketch of log book** kept by Captain Bligh during his 6 weeks' voyage in an open boat after the mutiny of the Bounty : and of the gourd, bullet weight, and  $\frac{1}{4}$  pint mug, used by him for weighing and measuring food and water during the same time.  
*Lent by Mrs. Glennie.*
- 2410 **Letters of Marque and Reprisals** against Spain.  
*Lent by William Walton, Esq.*
- 2411 **An Account** between Joseph Taylor and his prize agent, showing nature, value, of cargoes, &c., prizes ; to whom sold, value received, &c.  
*Lent by Colonel P. T. H. Taylor.*

*Lent by W. Laird Clowes, Esq.*

- 2411A 1712.—Admiralty Order as to the issue in ships of war of plantation-grown tobacco only, dated Feb. 2nd, 17 $\frac{1}{2}$ , and signed by Sir John Leake, Sir George Byng, Mr. George Clarke, and Mr. Secretary Thomas Burchett.
- 2411B 1690.—Admiralty Order empowering Constables to press seamen, dated Aug., 1690.
- 2411C 1706.—Admiralty Order as to uniform slop-clothes for seamen, dated Aug. 24th, 1706.
- 2411D 1708.—Admiralty Order as to abuses among Naval Surgeons, dated Feb. 12th, 1708, signed by Mr. Secretary Thomas Burchett.

- 24IIE 1687.—General Instructions to Lieut. Richard Chapman, H.M.S. Assistance, signed by Mr. Secretary Samuel Pepys, and dated July 15th, 1687. To this is added "General Instructions to be observed by the Commanders of H.M. Ships."
- 24IIF 1686.—Regulations of King James II. concerning carriage of Treasure, keeping of journals, captains' allowances, etc., dated July 15th, 1686.
- 24IIG 1703.—Admiralty Order concerning the victualling of Marines. dated July 31st, 1703, and signed by Sir David Mitchell, the Hon. James Bridges (afterwards Duke of Chandos), and another.
- 24IIH 1677.—The Qualifications for a Lieutenant in 1677.
- 24III 1691.—Sailing and Fighting Instructions of Admiral Edward Russell. Under these was fought the battle off Cape La Hague, May, 1692.
- 24IIJ 1703.—Sailing and Fighting Instructions of Admiral Sir George Rooke. Under these was fought the battle off Malaga, Aug. 13th, 1704.
- 24IIK 1700.—The oldest known Official Navy List (printed). This list, which is dated April 18th, 1700, extends to pp. 9, and is a list only of Lieutenants.
- 24IIL 1704.—Official Navy List. This list extends to pp. 8, and is a list of Captains and of Masters and Commanders. It is dated Aug. 18th, 1704. Pp. 5—8, however, contain a list of Captains and their ships, dated May 27th, 1700. These four pages were printed in 1700, and appear to have been added to pp. 1—4 (with which they are consecutively paginated) in lieu of some missing pp. 5—8 of Aug. 18th, 1704.
- 
- 24IIM Sixteen Letters from Lord Collingwood to Sir E. Blackett, Bart.  
*Lent by Miss J. C. Blackett.*
- 24IIN Letter from the celebrated Dr. Maskelyne, Astronomer Royal at Greenwich, 1793, to Sir H. Parker, Bart., Secretary to the Board of Longitude at the Admiralty, about a time-keeper.

*Lent by the Executors of the late John Corner, Esq.*
- 24IIP Appointment of Richard Graham to Major, Royal Marines, 25th April, 1808.  
*Lent by Mrs. Clayton.*
- 24IIQ The Freedom of Drogheda to Lieutenant-Colonel Richard Graham, Royal Marines, 16th March, 1798.  
*Lent by Mrs. Clayton.*
- 24IIR Parchment, Lines of Battle.  
*Lent by George Anthony Partridge, Esq.*
- 24IIS Book containing account of "Admiral" Richard Parker's Trial.  
*Lent by Coghlan McL. MacHardy, Esq.*
- 24IIT Certificate given to the Widow of Lord Nelson's favourite Coxswain, who was killed by the same ball that took off Lord Nelson's Arm.  
*Lent by S. K. West, Esq.*

## SNUFF BOXES, ETC.

- 2412 **Snuff Box** made from wood of H.M.S. Victory.  
*Lent by Colonel H. Montagu.*
- 2413 **Snuff Box** made from wood of H.M.S. Royal George.  
*Lent by Colonel H. Montagu.*
- 2414 **Snuff Box** made from wood of Admiral Lord Nelson's Funeral Car.  
*Lent by Colonel H. Montagu.*
- 2415 **Snuff Boxes** given by King and Queen of Naples to Captain Robert Campbell, R.N.  
*Lent by Mrs. Pemberton.*
- 2416 **Gold and Tortoise Shell Snuff Box** with miniature painting of Napoleon, presented to Admiral Sir C. Tyler, by King George III.  
*Lent by Lieutenant G. W. Tyler, R.N.*
- 2417 **Lapis Lazuli Gold Snuff Box**, presented by the King and Queen of Naples to Captain Robert Campbell.  
*Lent by Mrs. Pemberton.*
- 2418 **Gold Snuff Box**, presented by the King and Queen of Naples to Captain R. Campbell.  
*Lent by Mrs. Pemberton.*
- 2419 **Silver-gilt Snuff Box**, with head of Nelson in oval Medallion, on a pedestal. Figure of Fame on one side, and Britannia on the other; hull of H.M. Ship Victory in the background.  
*Lent by Messrs. Collingridge Bros.*
- 2420 **Papier-maché Snuff Box** with miniature of Lord Nelson.  
*Lent by Messrs. Collingridge Bros.*
- 2421 **Snuff Box** made from the timbers of H.M.S. Bellerophon.  
*Lent by Miss Emily Cole.*
- 2422 **Gold Snuff Box**, presented by the Mayor and Corporation of the City of London to Captain Edward Berry, containing the Freedom of the City as testimony of his gallant behaviour on Aug. 1st, 1798, while serving under Rear-Admiral Sir Horatio Nelson, as Flag Captain in H.M.S. Vanguard at the Battle of the Nile. On the lid is a representation in enamel of the action at the time of the blowing up of the Orient. On the bottom is carved in thin gold a picture of H.M.S. Vanguard.  
*Lent by the Rev. Ed. Stanley Carpenter.*
- 2423 **Gold and Diamond Snuff Box**, presented to Captain Edward Carpenter, R.N., after the battle of Navarino.  
*Lent by Rev. Ed. Stanley Carpenter.*
- 2424 **Snuff Box**, horse's head, carved in black oak, formerly part of H.M. Ship Royal George. It belonged to Commander W. Hutchinson, Harbour Master of Kingstown, and was given by him to the present owner.  
*Lent by the Chevalier Dalton, I.S.R.C.*

- 2425 Snuff Box** made from a piece of the oak of the Royal Sovereign, Vice-Admiral Collingwood's flag-ship at Trafalgar.  
*Lent by C. Collingwood Denny, Esq.*
- 2426 Silver Snuff Box** which belonged to Lord Nelson.  
*Lent by Mrs. F. J. Furrell.*
- 2427 Oak Snuff Box**, with copper mounts attached, made from the wreck of the Royal George.  
*Lent by R. Gibbens, Esq.*
- 2428 Snuff Box** made out of the wood of the Black Joke, the famous slaver, taken by Sir F. Collier.  
*Lent by Mrs. Carr Glynn.*
- 2429 Box** made from the timbers of H.M.S. Goliath, in which Mr. J. A. Gordon served under Captain Foley in the battle of the Nile, 1st August, 1798. The Goliath was broken up at Devonport in 1833.  
*Lent by the Misses Gordon.*
- 2430 Box** made from the timbers of H.M.S. Active, commanded by Captain Gordon in the Adriatic in 1810-1812, and in 1818-1821. Broken up at Devonport in 1833.  
*Lent by the Misses Gordon.*
- 2431 Box** made from the wood of the Royal George, 100, sunk in 1782; Royal William, 84; Victory, 100; and Edgar, 70, blown up at Spithead in 1711.  
*Lent by the Misses Gordon.*
- 2432 Snuff Box** brought up from the wreck of the Royal George, and supposed to have belonged to Rear-Admiral Kempenfelt.  
The snuff box is made of a univalve shell with a silver lid, engraved on the outside with the arms of Knight, of Clopton. On the inside of the lid are rudely cut the letters J. K., 1772. There was no officer of the name of Knight on board the Royal George when she was lost, and the box may very probably have been a present to Kempenfelt from his contemporary, Rear-Admiral John Knight. *Lent by Dr. C. J. Hare.*
- 2433 Silver Snuff Box**, once the property of Lord St. Vincent.  
*Lent by Colonel E. H. B. Lysons.*
- 2434 Mother-of-Pearl Snuff Box**, mounted in gold, made of materials from the cabin of the Royal George.  
*Lent by A. S. Marsden, Esq.*
- 2435 Twenty-four Snuff Boxes**, &c., made from the timbers or fittings of various old men-of-war, mostly ships engaged in the Battles of St. Vincent and Trafalgar.  
*Lent by the Earl of Northesk.*
- 2436 Gold Snuff Box** presented to Captain Palmer by the Officers of the Hebrus after the Battle of Algiers.  
*Lent by Lt.-Col. Edmond Palmer.*
- 2437 Armada Snuff Box.**  
*Lent by H.M. The Queen.*
- 2438 Admiral Lord Nelson's Snuff Box.**  
*Lent by H.M. The Queen.*
- 2439 Small Snuff Box** made of a portion of a beam of the Royal George. Formerly in the possession of Commander F. W. R. Sadler, who, as Assistant Master-Attendant of Portsmouth Dockyard, was officially present at the blowing up of the wreck.  
*Lent by J. P. Sadler, Esq.*

- 2440 **Gold Enamelled Snuff Box**, the property of Lord Nelson; presented to him by the Austrian Government.  
*Lent by Lieut. Lionel G. Tufnell, R.N.*
- 2441 **Gold Snuff Box** presented to Capt. Webley-Parry, R.N., by the Officers of the Ward-room of H.M.S. Prince Regent, December, 1825, on his giving up the command of the vessel.  
*Lent by the Misses Webley-Parry.*
- 2442 **Gold Snuff Box** presented by the officers of H.M.S. Christian VII. to Admiral the Hon. Sir Joseph Yorke, 1808.  
*Lent by Captain the Hon. John Yorke, R.N.*
- 2443 **Sir Francis Drake's Snuff Box.**  
*Lent by the Royal United Service Institution.*
- 2444 **Box** made of the wood of the cask in which Nelson's body was brought home.  
*Lent by Edgar Goble, Esq.*
- 2445 **Gold Snuff Box** presented to Rear-Admiral Sir Thomas Louis by the Queen of Naples.  
*Lent by Miss Louis.*
- 2446 **Gold Snuff Box** presented to Captain Charles Ekins by the officers of his ship, the *Superb*, after the bombardment of Algiers, 1816; with inscription.  
*Lent by Rear-Admiral Sir Lambton-Lorraine, Bart.*
- 2447 **Oak Snuff Box** made of wood from the *Mary Rose* sunk at Spithead, 1545.  
*Lent by L. Ratcliffe, Esq.*
- 2448 **Snuff Box** made from the block by which was hoisted the signal "England expects that every man will do his duty." The wood was presented to Mr. Richard Nisbet by Captain, afterwards Sir Benjamin Hallowell, his former commander in H.M. Sloop *Scorpion*.  
*Lent by Captain Edward Perry Nisbet.*
- 2449 **Snuff Box** presented by Lord Nelson to Sir Samuel Chambers, by Sir Samuel Chambers to Michael Goatham, Esq., by Michael Goatham, Esq., to the present owner.  
*Lent by W. F. Richmond, Esq.*
- 2450 **Gold Snuff Box** taken at Manilla, 1762, by Admiral Sir Samuel Cornish.  
*Lent by Miss Sumner.*
- 2451 **Gold Snuff Box** presented by the Ward Room Officers of H.M.S. Cornwall to Captain J. Broughton R.N., February 20th, 1813.  
*Lent by Lady Glover.*
- 2452 **Snuff Box** made from the timbers of the Royal Sovereign (containing in the lid a lock of Lord Collingwood's hair).  
*Lent by the Corporation of Newcastle-upon-Tyne.*
- 2453 **Snuff Box** made from timbers of H.M.S. Bellerophon (contains a French coin given by Napoleon to the coxswain of the boat that conveyed him ashore at St. Helena).  
*Lent by the Officers of the R.M.L. Infantry, Plymouth Division.*
- 2454 **Snuff Box** made from the timbers of a Turkish ship destroyed at Navarino.  
*Lent by the Officers of the R.M.L. Infantry, Plymouth Division.*

- 2455 **Snuff Box** made from the timbers of H.M.S. Shannon (Captain Sir P. Broke).  
*Lent by the Officers of the R.M.L. Infantry, Plymouth Division.*
- 2456 **Gold Snuff Box** with mosaic landscape on the lid. Inside is the following inscription :  
"Presented at Rome, Dec. 1st, 1816, by Pope Pius the VII., to Capt. Thos. Forrest, commanding H.M. Frigate Ister, on the occasion of his restoring to their country the last of the Christians liberated from slavery at Tunis."  
*Lent by Thomas Vaughan Forrest, Esq.*
- 2457 **Snuff Box** which belonged to Sir John Franklin.  
*Lent by Admiral H.R.H. the Duke of Edinburgh, K.G.*
- 2458 **Snuff Box** made from a piece of the keel of H.M.S. Centurion (Anson's ship), which circumnavigated the world, 1740-1744.  
*Lent by the executors of the late Staff-Captain Henry Hosken, R.N.*
- 2459 **Gold Snuff Box** presented by the City of London to Admiral Sir John Borlase Warren, after his victory won in 1794.  
*Lent by the Hon. William Warren Vernon.*
- 2460 **Silver Snuff Box** that belonged to Lient. Brett, First Lieutenant of the Centurion, in her voyage round the world under Anson.  
*Lent by Mrs. T. R. Hoare.*
- 2461 **Gold Snuff Box** presented to Admiral Lord Exmouth by the Mayor and Corporation of the Town of Bideford.  
*Lent by Viscount Exmouth.*
- 2462 **Gold Snuff Box** which belonged to Viscount Nelson.  
*Lent by Horatio Girdlestone, Esq.*
- 2463 **Snuff Box**, made from the wood of the Spanish ship San Nicolas captured in the battle off Cape St. Vincent on the 14th Feb., 1797. Presented to the late Dr. Butler, of Brentwood, Essex, by the niece of Earl St. Vincent.  
*Lent by Mrs. Henry Woodrow.*
- 2464 **Gold Snuff Box** presented by the Town of Hull to Admiral Lord Duncan.  
*Lent by Earl of Camperdown.*
- 2465 **Gold Snuff Box** presented by the City of Edinburgh to Admiral Lord Duncan.  
*Lent by Earl of Camperdown.*
- 2466 **Silver and Bog Oak Snuff Box** presented by the City of Dublin to Admiral Lord Duncan.  
*Lent by Earl of Camperdown.*
- 2467 **Gold Snuff Box** presented by the City of Cork to Admiral Lord Duncan.  
*Lent by Earl of Camperdown.*
- 2468 **Gold Snuff Box** presented by the City of Glasgow to Admiral Lord Duncan.  
*Lent by Earl of Camperdown.*
- 2469 **Snuff Box**, with head of Nelson in relieve, A.D. 1805.  
*Lent by Messrs. L. & J. Parnell.*
- 2470 **Snuff Box** which formerly belonged to Vice-Admiral Lord Collingwood.  
*Lent by the Mayor and Corporation of Brighton.*

- 2471 **Silver-gilt Snuff Box** presented to Admiral Sir Richard Onslow, Bart., by the City of Hull. *Lent by Sir William W. R. Onslow, Bart.*
- 2472 **Silver and Bog-oak Snuff Box** presented to Admiral Sir Richard Onslow, Bart., by the City of Dublin. *Lent by Sir William W. R. Onslow, Bart.*

## DECORATIONS, MEDALS, COINS, &c.

**2478 Collection of British War Medals and Decorations.** Representing all the Wars in which Great Britain has taken part.

*Lent by Captain A. E. Whitaker, 5th (Northumberland) Fusiliers.*  
Amongst them are the following :—

1.—The GOLD MEDAL FOR CAPTAINS commanding men-of-war in general actions—one for the Captain of the *Queen Charlotte*, at Lord Howe's victory on the 1st June, 1794; one for the Captain of the *Russell*, at the battle of Camperdown under Admiral Duncan; and one for the Captain of the *Britannia* at the battle of Trafalgar under Lord Nelson.

The GOLD BLAKE MEDAL, for the defeat of the Dutch Fleet under Admiral Von Tromp, on 31st July, 1653, by Admiral Blake; the SULTAN'S GOLD MEDAL FOR EGYPT, 1801, in four varieties, for services by the British Navy and Army under Admiral Lord Keith and General Sir Ralph Abercromby respectively; medals in gold, silver, and bronze, for the storming of ST. JEAN D'ACRE by the British fleet under Admiral Sir Robert Stopford in 1840; and the ABYSSINIAN ORDER OF SOLOMON given by King John to the Naval Embassy, under Admiral Sir William Hewett.

2.—The SILVER NAVAL WAR MEDAL, to which there are 202 clasps, the combinations being from one to five clasps. In this collection there are over one hundred varieties, including clasps for “1st June, 1794,” Lord Howe's victory over the French fleet; “14 March, 1795,” action with the French fleet in which Lord Hotham captured two ships of the line; “23 June 1795,” action by Admiral Lord Bridport and capture of three French sail of the line; “*Dryad* 13 June 1796,” capture of a French frigate by Lord A. Beauclerk; “*Camperdown*,” Admiral Duncan's victory over the Dutch fleet and capture of eight ships and two frigates; “*Indefatigable* 13 January 1797,” and “*Amazon* 13 January 1797,” destruction of the French ship *Droits de l'Homme* and the loss of the *Amazon*; “*Phæbe* 21 Dec. 1797,” capture of the French ship *Nérède* by Captain Robert Barlow; “*St. Vincent*,” Admiral Sir J. Jervis' victory over the Spanish fleet; “*Lion* 15th July 1798,” action with Spanish frigates; “*Nile*,” Rear Admiral Sir Horatio Nelson's victory over the French fleet; “12 Oct. 1798,” action with the French squadron and capture of two vessels by Sir J. W. Warren; “*Sybilie* 28 Feby. 1799,” capture of the French frigate *Forte* by Captain Cooke; “*Acre* 30 May 1799,” successful defence of St. Jean d'Acre by Sir Sidney Smith during the siege by the French; “*Penelope* 30 March 1800,” capture of the French line-of-battle ship *Guillaume Tell*; “*Seine* 20 Augt. 1800,” capture of the French frigate *Vengeance*; “*Egypt*,” operations on the coast by the fleet under Admiral Lord Keith in co-operation with the army under Sir Ralph Abercromby; “*Phæbe* 19 Feby. 1801,” capture of the *Africaine* by Captain Robert Barlow; “*Copenhagen* 1801,” the battle

2478—continued.

of Copenhagen by the fleet under Vice-Admiral Lord Nelson; "*Speedy* 6 May 1801," capture of the Spanish xebec *Gamo* by Commander Lord Cochrane; "*Gut of Gibraltar* 12 July 1801," action with the French and Spanish squadrons by the fleet under Sir J. Saumarez; "*Arrow* 3 Feby. 1805," and "*Acheron* 3 Feby. 1805," gallant protection of 28 merchant ships by commanders Vincent and Farquhar; "*Phoenix* 10 Aug. 1805," capture of the French frigate *Didon* by Captain Baker; "*Trafalgar*," the battle on the 21st Oct. 1805, at which Lord Nelson was killed; "4th November 1805," four French line-of-battle ships captured by the squadron under Sir R. Strachan; "*St. Domingo*," the battle of St. Domingo and destruction of four sail of the line by Vice-Admiral Sir J. Duckworth; "*London* 13 March 1806," capture of the French ships *Marengo* and *La Belle Poule* by the *London* and *Amazon*, under Captains Sir Harry Neale and Parker; "*Sirius* 17 April 1806," action with French flotilla at Civita Vecchia by Captain Prowse; "*Blanche* 19 July 1806," capture of the *Guerrière* by Captain Lavie; "*Curaçoa*," capture of the island on the 1st January, 1807, by the *Arctusa*, *Anson*, *Fisgard*, *Latona*, and *Morne Fortunée*; "*Hydra* 6 Aug. 1807," attack on batteries at Begur and capture of two men-of-war by Captain Mundy; "*Stately* 22 March 1808," destruction of the Danish line-of-battleship *Prince Christian Frederick* by Captain Parker; "*Virginie* 19 May 1808," capture of the Dutch frigate *Guilderland* by Captain Brace; "*Centaur* 26 Aug. 1808," and "*Implacable* 26 Aug. 1808," defeat of Russian fleet and capture of the *Sevokol* by Rear-Admiral Sir Samuel Hood; "*Amethyst with Thetis*," capture of the frigate *Thetis* on 10th Nov., 1808, by Sir Michael Seymour; "*Martinique*," capture of the island by the fleet under Rear-Admiral Sir A. Cochrane in conjunction with the troops under General Beckwith; "*Horatio* 10 Feby. 1809," capture of the French frigate *Junon*; "*Basque Roads* 1809," action with and destruction of ships of the French fleet on 12th April, 1809, by Admiral Lord Gambier; "*Pompée* 17 June 1809," capture of the French man-of-war *Hautpoult* by Captain Fahie; "*Diana* 11 Sept. 1809," capture of the *Zephyr* by Lieut. Kempthorne; "*Anse-la-Barque* 18 Dec. 1809," storming of batteries and capture of the frigates *Loire* and *Seine* by Captain Ballard; "*Guadaloupe*," capture of the island by the fleet under Sir A. Cochrane in conjunction with a military force under General Beckwith; "*Banda Neira*," capture of Banda and its dependent spice islands by Captain Cole; "*Spartan* 3 May 1810," action with the French vessels *Cérès* and *Fama*, Murat's yacht, a cutter of 10 guns, and eight gun boats—the cutter was captured by the *Spartan*, commanded by Captain Brenton; "*Boadicea* 18 Sept. 1810," action with the French squadron and capture of vessels; "*Lissa*," action against the combined French and Italian squadrons by four frigates under Captain Hoste; "*Anholt* 27 March 1811," defence of the island and repulsion of the Dutch flotilla by 350 men of the navy in conjunction with some troops; "*Off Tamatave* 20 May 1811," action with French squadron and capture of a frigate by Captain Schomberg; "*Java*," capture of the island by the fleet under Rear-Admiral Stopford in conjunction with the troops under General Auchmuty; "*Pelagosa* 29 Nov. 1811," capture of two French frigates; "*Northumberland* 22 May 1812," destruction of two French frigates and a brig by Captain Hotham; "*Off Mardoe* 6 July 1812," destruction of two Danish frigates

2478—continued.

and two brigs by Captain Stewart; "*Shannon with Chesapeake*," sea duel between the two frigates; "*St. Sebastian*," a squadron of the navy under Sir George Ralph Collier supported the army during the blockade; "*Gluckstadt 5 Jany. 1814*," capture of the fortress by six gunboats; "*Venerable 16 Jan. 1814*," capture of two French frigates by Rear-Admiral Durham; "*Eurotas 25 Feb. 1814*," capture of the French frigate *Clorinde* by Captain Phillimore; "*Hebrus with L'Etoile*," capture of the French frigate *Etoile* on 27 March, 1814, by Capt. Palmer; "*Phoebe 28 March 1814*," capture of the American frigates *Essex* and *Essex Junior* by Captain Hillyar; "*The Potomac 17 Aug. 1814*," capture of Fort Washington, destruction of the Forts at Alexandria, America, and the capture of twenty-two vessels with all their merchandise by Captains Gordon and Napier; "*Endymion with President*," capture of the American frigate *President* on 15th January, 1815, by Capt. Hope; "*Gaieta 24 July 1815*," reduction of Gaieta by Capt. Fahie; "*Algiers*," the bombardment of Algiers on 27th August, 1816, by Admiral Lord Exmouth; "*Navarino*," destruction of the Turkish fleet by Vice-Admiral Sir Edward Codrington; "*Syria*," capture of Acre and operations on the coast of Syria in November, 1840, under Admiral Sir Robert Stopford. There are also clasps for "*Boat Services*" bearing the dates the various actions, or cutting-out expeditions on which the boats were engaged.

3.—*The Baltic Medal*, specially issued to the fleet employed in that sea during the war with Russia.

4.—THE VICTORIA CROSS, awarded to "Seaman Thomas Reeves, 5 November 1854."

Medals for *Conspicuous Gallantry*, and *Meritorious Service* (Arctic Expedition, 1854), and *Long Service and Good Conduct* in two varieties.

5.—The following medals, being alike for both services, were issued to the Navy and Army:—

THE FIRST BURMESE WAR; the INDIAN WAR MEDAL, 1799 to 1826; CAMPAIGN IN SCIENDE, 1843; PUNJAB CAMPAIGN, 1849; the INDIA GENERAL SERVICE MEDAL, for the *Second Burmese War* and *Persia*; the INDIA MUTINY; all by the Honourable East India Company.

The Medal for the CRIMEA; First and Second Medal for SOUTH AFRICA; CHINA, 1840-42; SECOND CHINA MEDAL; NEW ZEALAND; ABYSSINIA; ASHANTEE; EGYPT, 1882-85; and BURMA, 1885-87.

6.—The miscellaneous collection contains the following naval medals; a large silver MEDAL OF KING CHARLES II., for the naval victory over the Dutch at Lowestoft, on 3rd June, 1656; and another for the PEACE OF BREDA, 1667.

*Boulton's Trafalgar Medals* (two varieties); *Davison's Nile Medal* in silver, bronze-gilt, and bronze; *Earl St. Vincent's testimony of approbation* to the seamen of H.M.S. *Ville-de-Paris*; medals for Arctic Discoveries, 1818-55 and 1876; *Sir Gilbert Blane's Gold Medal*.

*Lent by Col. E. H. B. Lysons.*
- 2672** Sword presented to Sir Thomas Masterman Hardy by the City of London.  
*Lent by Lady Helen Macgregor of Macgregor.*
- 2673** Sword with inscription: "Presented by the Commander of H.M. Forces to George Dobson, Fort Matagorda, April, 1810." Mr. Dobson was at this time a Midshipman of the Invincible, off Cadiz, and was lent, in command of a party of seamen, to strengthen the garrison of Fort Matagorda.  
*Lent by G. M. P. Murray, Esq.*
- 2674** Naval Sword worn by Captain Robert Finnis, of the Queen Charlotte, 16, one of Capt. R. H. Barclay's squadron on Lake Erie, when killed in action, 10th Sept., 1813.  
*Lent by Commander Charles McLaughlin.*
- 2675** Dirk worn at Trafalgar by Mr. Richard Langdon, Midshipman of the Tonnant.  
*Lent by W. E. Langdon, Esq.*
- 2676** Sword Presented to the late Admiral of the Fleet, Sir Fairfax Moresby, G.C.B. The sword is in form of a Turkish scimitar, with gold and silver-gilt scabbard, richly engraved and embossed with figures representing the labours of Hercules. It has the following inscription on the blade: "From the British Insurance Co. at Malta to Captain Fairfax Moresby, of H.M.S. Wizard. This sword is presented in grateful sense of the protection afforded by him to the trade of that island during the period of his station in the Mediterranean sea, 1812." The Lords of the Admiralty accorded permission to Sir F. Moresby to wear this sword on full dress occasions.  
*Lent by Vice-Admiral J. Moresby.*
- 2677** Sword and scabbard, silver mounted, surrendered by Captain Mullon, of the French frigate Cléopâtre, to Lieut. Amherst Morris, of the Nymphé. Captain Mullon was mortally wounded in the engagement, and died as he was trying to swallow a paper which he believed to be the code of coast signals. See No.  
*Lent by Rev. F. O. Morris.*
- 2678** Midshipman's sword, worn at the battle of Navarino, 1827.  
*Lent by Rev. F. O. Morris.*
- 2679** Sword of the Dutch Admiral, delivered up to Captain Bligh on the quarter-deck of the Director, 11th October, 1797.  
*Lent by Mrs. Nutting.*
- 2680** Lord Nelson's service sword; made left handed for him after the loss of his arm. From documents attached it appears certain that it is the one he wore at Trafalgar.  
*Lent by the Earl of Northesk.*

- 2681 **Sword** presented by the City of London to Rear-Admiral William, 7th Earl of Northesk, after the battle of Trafalgar, at which he commanded in the third post. *Lent by the Earl of Northesk.*
- 2682 **Service sword** of Rear-Admiral William, 7th Earl of Northesk. Worn by him at the battle of Trafalgar. *Lent by the Earl of Northesk.*
- 2683 **Sword** presented by the Municipal Government of Paris in 1789 to Mr. (afterwards Vice-Admiral) Nesham, then an unemployed Midshipman, in recognition of the assistance he rendered to an unfortunate official, whom the mob of Vernon, in Normandy, were on the point of hanging. *Lent by Captain T. Nesham, R.N.*
- 2684 **Old Naval Swords.** *Lent by Messrs. L. & H. Nathan.*
- 2685 **Naval Sword**, which belonged to Mr. John Wells. *Lent by Mrs. Older.*
- 2686 **Officers' Swords** and Midshipman's dirk of about 1800; and an old cutlass. *Lent by W. H. Overend, Esq.*
- 2687 **Sword** presented by the French Government to Lieutenant (afterwards Admiral) Popplewell for services rendered to the crews of the French ships of war Gloire and Victorieuse, wrecked on the coast of Corea, 1844-8. *Lent by Matthew Colin Popplewell, Esq.*
- 2688 **Sword and belt** presented by Lloyd's Patriotic Fund to Captain William Pryce Cumby. First Lieutenant of the Bellerophon at the battle of Trafalgar. Mr. Cumby succeeded to the command on the death of Captain Cooke. *Lent by Mrs. Pearson.*
- 2689 **Sword and knot.** The blade made from iron bolts of the Royal George. The ship sank in 1782; the bolts were recovered in 1839. *Lent by F. L. Smith, Esq.*
- 2690 **Sword** presented to Rear-Admiral Sir James Saumarez, K.B., by the Corporation of the City of London. *Lent by Lord de Saumarez.*
- 2691 **Cutlass**, ivory handle engraved "Honor est a Nilo, October 21st, 1805." *Lent by F. L. Smith, Esq.*
- 2692 **Cutlass**, alleged to be one which cut down Captain Broke, of the Shannon, in boarding the Chesapeake. It was given to Commander Shipton, who was on the North American Station at the time. The cutlass is doubtless a relic of the action; but Broke's wound, it is authoritatively stated, was inflicted by the butt of a musket. *Lent by P. M. Shipton, Esq.*
- 2693 **Sword** used by Captain Broke of the Shannon in boarding the Chesapeake, June 1, 1813. *Lent by Lady de Saumarez.*
- 2694 **Sword** presented to Captain Broke by the Corporation of the City of London. *Lent by Lady de Saumarez.*
- 2695 **A Naval Court Sword**—temp. George 3rd or 4th. *Lent by J. P. Sadler, Esq.*
- 2696 **Sword** commemorating the Victory of the Nile, presented to Captain Sir James Saumarez by the Corporation of the City of London. A similar sword was presented to each of the Captains of the ships engaged. *Lent by Lord de Saumarez.*

- 2697 **Two swords**, one with brass hilt, taken by Sir Horatio Nelson from Don Miguel Tyraon commanding the Spanish Flotilla at Cadiz, 3rd July, 1797. *Lent by Colonel Seddon, R.E.*
- 2698 **Naval sword** with ivory handle, leather scabbard, brass mountings. Affixed is a label, on one side of which is written "Nelson's first sword, from Burnham Thorpe, Norfolk"; on the other side: "This sword brought to Cambridge by E. Dennington about 1843, from Burnham Thorpe in Norfolk; given to him by a servant of Nelson's family; was the first sword worn by Horatio Nelson when he went to sea, 1770." *Lent by Rev. F. F. Starbuck.*
- 2699 **Sword** with inscription presented to Admiral Sir Edward Thomas Troubridge, Bart., by the Patriotic Fund at Lloyd's for services in the Java Sea when Commander of H.M. sloop Harrier, July, 1806. See No. *Lent by Sir Thomas Troubridge, Bart.*
- 2700 **A silver hilted dress sword**; belonged to Admiral Kempenfelt. *Lent by Mrs. Zouch Troughton.*
- 2701 **Scimitar** presented by Syyed Saaed, Sultan of Oman, to Captain John Wainwright, R.N., H.M.S. Chiffone, in recognition of his exertions against the Tau-assin Pirates, Persian Gulf, 1809. Scabbard gold and silver mounted. *Lent by Mrs. Dean-Pitt and Miss Wainwright.*
- 2702 **Sword** taken from a Spanish officer by Lieutenant W. H. Webley, first Lieutenant of H.M.S. Zealous, Captain (afterwards Sir) Samuel Hood, at the blockade of Cadiz by Nelson in 1797. It was taken in a hand-to-hand fight whilst Mr. Webley was boarding a Spanish gun-boat, from her commander, whose sword was descending on Mr. Webley's head when the latter parried the blow and struck his adversary dead. He subsequently took the gun-boat. *Lent by the Misses Webley-Parry.*
- 2703 **Sword** presented to W. H. Webley, first Lieut. of H.M.S. Zealous, after the Battle of the Nile. *Lent by the Misses Webley-Parry.*
- 2704 **Old Sword**, 37 in. long, inclusive of handle, and 2½ in. wide, with black embossed scabbard. Makers: W. Kingdom, Plymouth. *Lent by Robert Wisken, Esq.*
- 2705 **A Sword** presented to Admiral the Hon. Sir Joseph Yorke by the officers of H.M.S. Circe, 1793. *Lent by Capt. the Hon. John M. Yorke, R.N.*
- 2706 **Sword** worn by Captain Alexander Hood in the action between the Mars and Hercule, April 21, 1798, when he was killed. *Lent by Sir Alexander Acland Hood, Bart.*
- 2707 **Dirk** worn, when he was a Midshipman, by Capt Alexander Hood, who fell in the action between the Mars and Hercule, 1798. *Lent by Sir Alexander Acland Hood, Bart.*
- 2708 **Sword** presented to Sir Samuel Hood, Captain of H.M.S. Zealous at the victory of the Nile, 1801. *Lent by Sir Alexander Acland Hood, Bart.*
- 2709 **Sword** presented to Sir Samuel Hood by the House of Assembly of Jamaica, 1791, for saving shipwrecked sailors. *Lent by Sir Alexander Acland Hood, Bart.*

- 2710** Sword presented to Sir Samuel Hood.  
*Lent by Sir Alexander Adland Hood, Bart.*
- 2711** Sword presented by the Sultan of Morocco to Captain W. H. C. St. Clair, R.N., H.M.S. Phaeton.  
*Lent by Captain W. H. C. St. Clair, R.N.*
- 2712** A short Sword or Dagger which belonged to Admiral Blake. It has been ever since his death in the possession of the descendants of a near relative.  
*Lent by Mrs. Blake.*
- 2713** Sword presented by British Merchants to the late Rear-Admiral Macleod Baynes Cockcraft when lieutenant in command of H.M. steamer Albert, 1844, in recognition of the protection which he afforded to their property on the West Coast of Africa.  
*Lent by Mrs. Cockcraft.*
- 2714** Naval Cutlass, once the property of Admiral Vernon.  
*Lent by George W. Homan, Esq.*
- 2715** Sword worn by Captain John Cooke at Trafalgar.  
*Lent by R. D. Gibney, Esq.*
- 2716** Dirk worn by Captain John Cooke at Trafalgar.  
*Lent by R. D. Gibney, Esq.*
- 2717** Spearhead from the Spanish Armada.  
*Lent by the Royal United Service Institution.*
- 2718** Cutlass or hanger which belonged to Captain James Cook.  
*Lent by the Royal United Service Institution.*
- 2719** Pike captured in Admiral Duncan's action off Camperdown in 1797.  
*Lent by the Royal United Service Institution.*
- 2720** Sword of honour presented to Captain Richard Grindall, of H.M.S. Prince, after the battle of Trafalgar, by the Patriotic Fund, 1805.  
*Lent by Miss A. J. Grindall.*
- 2721** Sword of honour presented by Lloyd's Patriotic Fund to Captain Conway Shipley, R.N., for the capture of the French privateer frigate Egyptienne, 36, by H.M.S. Hippomenes, 14, on 25th March, 1804.  
*Lent by Mrs. Conway Shipley.*
- 2722** Sword of the Danish Naval Commandant who fell in leading his men to the unsuccessful attack on the island of Anholt, March 27th, 1811. The officer in question was the gallant Lieut. Holstein, who was killed by a cannon shot.  
*Lent by the Royal United Service Institution.*
- 2723** Sword presented to Sir J. Thomas Staines by the gentlemen of the Isle of Thanet.  
*Lent by the Royal United Service Institution.*
- 2724** Regulation sword which belonged to the Earl of St. Vincent.  
*Lent by the Royal United Service Institution.*
- 2725** Regulation sword formerly belonging to King William IV.  
*Lent by the Royal United Service Institution.*
- 2726** Sword used by Nelson when boarding the San Josef at the Battle of Cape St. Vincent, 1797.  
*Lent by the Royal United Service Institution.*
- 2727** Sword taken from an Officer of the French ship Intrépide, which struck at Trafalgar, 1805.  
*Lent by the Royal United Service Institution.*

- 2728 **Officer's Dirk** taken out of the French *Intrépide* which struck at Trafalgar, 1805. *Lent by the Royal United Service Institution.*
- 2729 **Sword** of Admiral Sir W. Sidney Smith. *Lent by the Royal United Service Institution.*
- 2730 **Hanger of a Danish Midshipman**, taken at Copenhagen by Mr. (afterwards Captain) Boswall, R.N. *Lent by Miss Arneil.*
- 2731 **A Sword**, the hilt encrusted with jewels, scabbard of silver gilt. Of Arab or Persian manufacture. Presented in 1826 by the great Imaum Seyyid Said, Sultan of Muscat and Zanzibar (for 50 years ally of the English), to Captain Kinchant, I.N., for his services in suppression of piracy in the Persian Gulf. The sword was purchased in 1878 by his brother officers of the Indian Navy, and presented to Lieutenant Low, I.N., in acknowledgment of his labours as historian of the Indian Navy. *Lent by Lieutenant C. R. Low (late I.N.)*
- 2732 **Naval Sword** of George III. *Lent by H.M. The Queen.*
- 2733 **Naval Sword** of William IV. *Lent by H.M. The Queen.*
- 2734 **Broadsword** of Gavin Drummond, of Stragath, Surgeon in H.M. Navy. *Lent by Captain A. G. Drummond, of Stragath.*
- 2735 **Sword** presented by the City of London (with the Freedom of the City), to Admiral Sir T. Louis, Bart., for Distinguished Services at the battle of St. Domingo, *Lent by Miss Louis.*
- 2736 **Ashantee Sword** picked up at Coomassie. *Lent by Lieutenant Gerald R. Maltby, R.N.*
- 2737 **Ashantee Dagger.** *Lent by Lieutenant Gerald R. Maltby, R.N.*
- 2738 **Gold Sword** presented to Admiral Sir Richard Onslow, G.C.B., Bart., by the City of London, for his gallant conduct at the battle of Camperdown. *Lent by Sir William W. R. Onslow, Bart.*
- 2739 **Sword**, presented to Rear-Admiral (then Captain) Cockcraft by the inhabitants of Mozambique.
- 2740 **Sword** of Robert Hughes of Plas, near Llangoed, Esq., R.N., worn by him at the battle of the Nile. *Lent by John R. Hughes, Esq.*
- 2741 **Gold Hilted Sword** presented to Captain Otway by the French Colony of Martinique. *Lent by Sir Arthur John Otway, Bart.*
- 2742 **Presentation Sword** (Gold hilted), bearing the following inscription.—“Presented by the Masters of Transport Vessels employed on the expedition to Egypt, 1801, to Captain William Young, of the Royal Navy, as a mark of their esteem and gratitude for services rendered while under his orders.” *Lent by Sir Frederick Young, K.C.M.G.*
- 2743 **Sword of Honour** presented by Lloyd's to Lieutenant Michael Fitton, commanding H.M. Schooner Pitt, which by superior skill and bravery, “although greatly inferior in force, captured *La Superbe*,” French privateer, off Cape Maize on 26th October, 1806. *Lent by Mrs. Lowe.*
- 2744 **Naval Sword** of 1813. *Lent by Captain Sutton R.N.*
- 2745 **Naval Epaulettes** of 1813. *Lent by Captain Sutton, R.N.*
- 2746 **Sword** presented to the late Rear-Admiral M. Farquhar, K.C.B., by the Patriotic Fund, Lloyd's. *Lent by Admiral Sir Arthur Farquhar, K.C.B.*

- 2747 **Sword** presented to Lieutenant John Richards Lapénotiere, of H.M. Schooner Pickle, for bringing home Vice-Admiral Collingwood's despatches, announcing the glorious victory of Trafalgar.  
*Lent by Miss G. P. Graves Lapénotiere.*
- 2748 **Sword** presented by the Patriotic Fund, Lloyd's, London, to Captain Wm. Prowse, H.M. Ship Sirius, 1805.  
*Lent by General Sir Charles W. Adair, K.C.B.*
- 2749 **Sword** which belonged to Captain Wm. Hollamby.  
*Lent by Commander E. B. Boyle, R.N.*
- 2750 **Sword** worn by Admiral Lord Rodney, not perfect, a part of the handle and scabbard being deficient. (The sword was given by Lord Rodney to Captain Cranston of H.M.S. Defence, &c., &c.)  
*Lent by Rodney Cranston Baker, Esq.*
- 2751 **Officer's Sword** taken out of the Santissima Trindada by the late Capt. Peter Sampson Hambly, R.N., when serving as Master's Mate in H.M.S. Prince at the Battle of Trafalgar.  
*Lent by Captain William Tocken Wheam Hambly.*
- 2752 **The Dress Sword** of Admiral Blake. *Lent by William Blake, Esq.*
- 2753 **Sword** presented by Lloyd's Patriotic Fund to Lieutenant Thomas Forrest, R.N.  
*Lent by Thomas Vaughan Forrest, Esq.*
- 2754 **Turkish Sabre** presented by the Sultan of Turkey to Rear-Admiral Lord Nelson.  
*Lent by the Lords Commissioners of the Admiralty.*
- 2755 **Sword** of the late Sir Henry Ducie Chads, G.C.B., presented to him after the Java's action with the Constitution in 1812, by General Sir Thomas Hislop, who was on board the ship during the action.  
*Lent by Admiral Sir Henry Chads, K.C.B.*
- 2756 **Sword** presented to the late Sir Henry Ducie Chads, G.C.B., by the Court of Direction of the Honourable East India Company, 1837, in recognition of his services in the suppression of piracy in the Straits of Malacca when in command of H.M.S. Andromache, 28, from 1834 to 1837.  
*Lent by Admiral Sir Henry Chads, K.C.B.*
- 2757 **Sword** presented to Midshipman William Augustus Thompson, H.M.S. Pallas, by the Patriotic Fund at Lloyd's, for gallant and spirited conduct in command of one of three boats of the Pallas, containing in all 39 volunteers, which proceeded 16 miles up the Gironde, cut out the French Brig Tapageuse, of 14 guns and 120 men, and beat off and rendered almost an entire wreck the César, 14, which attempted to retake the Tapageuse, 5th April, 1806.  
*Lent by Mrs. John T. Anderson.*
- 2758 **Naval Sword**, of about 1760, with silver handle, of French make, and apparently a Court sword,  
*Lent by Captain Henry T. Beger, R.N.*
- 2759 **Service Sword** which belonged to William IV.  
*Lent by H.R.H. the Duke of Edinburgh, K.G.*

*Lent by Robert Whisken, Esq.*

## THE LOFTUS' PATENT GLYCERINE SIDE LIGHTS & SCREENS

*Exhibit 180, COOK GALLERY, Navigation Section.*

These Lamps are of great durability and possess many important improvements over those now in use, among which may be mentioned—

- I. The burner and chimney are provided with breakwind guards for protection from extinction of the flame during the firing of guns.
- II. They are so constructed that perfect ventilation is secured.
- III. Instead of using coloured glass shades which absorb a great percentage of light, the lenses contain the purest glycerine coloured with imperishable mineral dyes.
- IV. The oil tanks are made to revolve in the lamp for the purpose of being trimmed without removal.
- V. Special condensing reflectors are firmly attached to each oil tank.
- VI. Expansion bands are fitted round all the lenses, which prevents crackage of the glasses from undue expansion.

These lamps went through a severe test at the hands of the Board of Trade at Shoeburyness, and were found proof against sea and wind, and moreover showed that by the use of purest glycerine coloured with mineral dyes the penetrating power of the light was fully 50/80 % more than the same light through coloured glass lenses. They have also undergone the tests of the Corporation of the Trinity with most satisfactory results. They will burn 18 hours steadily without attention, if properly trimmed when first lighted. Testimonials have been received from Commanders of steam vessels, speaking of them in terms of the highest praise.

For further particulars and prices apply to the Stall Attendant, or to the Inventor—

Captain A. J. LOFTUS, S.R.N., F.R.G.S.,  
16, Lever Street, MANCHESTER.

## CHINA AND GLASS.

*Lent by Henry Willett, Esq.*

- 2863 Sir John Franklin (Statuette).  
 2864 Sir S. Smith (Bust).  
 2865 Do. (Bust).  
 2866 Admiral Duncan (Bust).  
 2867 Punch Bowl, with figures, inscribed—  
     "Admiral Rodney."  
 2868 Mug, with Ships (salt glaze).  
 2869 Mug, with figure of ship being launched, inscribed—  
     "Britannia Rules the Waves."  
 2870 Mug, British Sailors trying to save a slave, inscribed—  
     "To reach the rope poor Zambo tries,\*  
     But e'er he grasps it, faint with toil,  
     The struggling victim sinks and dies."  
 2871 Mug, inscribed—  
     "De Winter's Ship Vryheid. Duncan's Ship Venerable.  
     Vain are the boasts of Belgick's sons,  
     When faced by British ships and guns,  
     Tho' de Winter does in autumn come,  
     Brave Duncan brings his harvest home."  
 2872 Mug, inscribed—  
     "Horatio, Lord Viscount Nelson, Vice-Admiral of the White, Knight of the  
     Order of the Bath, Duke of Bronte in Sicily, Grand Cross of the Order of Ferdinand  
     and of Merit, and Knight of the Imperial Order of the Crescent. Copenhagen, Nile,  
     Trafalgar. Nelson—England expects every man to do his duty.  
     Shew me my country's foes, the hero cry'd;  
     He saw, he fought, he conquer'd, and he di'd."  
 2873 Mug, inscribed—  
     "Success to the British Fleet. D.S.F.C."  
 2874 Mug, inscribed—  
     "Remember, whilst his mortal part has rest,  
     He, immortal, lives in every Briton's breast;  
     Tho' short his span of life, recording fame  
     Inscribes a deathless volume to his name.  
     Mourn not for me, 'tis vain, chase grief away,  
     Compleat my work, and crown the glorious day;  
     Behold 'tis done, his parting spirit flew,  
     And lighting rests brave Collingwood with you.  
     Fell in the glorious cause of his country in the memorable battle of Trafalgar, 21  
     October, 1805. Aged 47. Motto—*Palmarum qui meruit ferat.* Translation—Let  
     him bear away the palm who has deserved it. England expects that every man  
     will do his duty."

- 2875 Jug, decorated with three Ships and Flowers, inscribed—  
 "Captain Joseph Anthony, Ship St. Ann, with her two prizes, Le Pelerin and Consalateur."
- 2876 Jug, decorated with Ship, two figures, compass, inscribed—  
 "The sailors guide this little thing,  
 O'er trackless paths they roam,  
 It will conduct, or safely bring  
 To Frigid or from Torrid Zone."
- 2877 Jug, decorated with two Ships and figures—  
 "G.R."
- 2878 Jug, with raised figures coloured, inscribed—  
 "Admiral Duncan. Captain Trollet."
- 2879 Jug, with raised figures coloured, inscribed—  
 "Lord Jarvis."
- 2880 Jug, with Ship, inscribed—  
 "The Royal Charlotte."

## THE NEGLECTED TAR.

I sing the British seaman's praise,  
 A theme renown'd in story,  
 It well deserves more polished lays,  
 Oh ! 'tis your boast and glory.

When mad brain'd war spreads death around,  
 By them you are protected,  
 But when in peace the nation's found  
 These bulwarks are neglected."

- 2881 Mug, decorated with Ship and Flowers, inscribed—  
 "Saturday Night."
- 2882 Jug, with Ships and Figures, inscribed—  
 "Manning the Navy."
- 2883 Punch Bowl, decorated with black, two Ships, inscribed—  
 "A second view of the Earl of Sandwich in the same gae. A 3d view of the Earl of Sandwich as she appear'd stretching for the land."
- 2884 Jug, inscribed—  
 "POOR TOM BOWLING.
- Here a sheer hulk lies poor Tom Bowling, the darling of our crew,  
 No more he'll hear the tempest howling, for death has broached him to.  
 His form was of the manliest beauty, his heart was kind and soft ;  
 Faithful below he did his duty, and now he's gone aloft.
- Tom never from his word departed, his virtues were so rare,  
 His friends were many and true hearted, his Poll was kind and fair ;  
 And then he'd sing so blithe and jolly, ah, many's the time and oft ;  
 But mirth is turned to melancholy, for Tom is gone aloft.
- But soon shall Tom find pleasant weather, when He who all commands  
 Shall give, to bring life's crew together, the word to pipe all hands ;  
 Thus Death who kings and tars dispatches, in vain Tom's life has closed,  
 For tho' his body's under hatches, his soul is gone aloft.
- Jack in his element,"

- 2885 Jug, with Ship, sailor casting the lead ; reverse, figures dancing, inscribed—

"THE FLOWING CAN.

A sailor's life's a life of woe :  
 He works now late, now early,  
 Now up and down, now to and fro,  
 What then, he takes it cheerly.  
 Blest with a smiling can of grog,  
 If duty call, stand, rise or fall,  
 To fate's last verge he'll jog.  
 The cadge to weigh, the sheets belay,  
 He does it with a wish ;  
 To heave the lead or to cat head  
 The pondrous anchor fish ;  
 For while the grog goes round,  
 All sense of danger's drown'd,  
 We despise it to a man.  
 We sing a little, and laugh a little,  
 And work a little, and swear a little,  
 And fiddle a little, and foot it a little,  
 And swig the flowing can."

- 2886 Jug, inscribed—  
 "Decator" (portrait). "Don't surrender the ship. Lawrence" (portrait).
- 2887 Jug, inscribed—  
 "Captain Hull, of the Constitution" (portrait): "Be always ready to die for your country. Pike" (portrait), with Eagle "E Pluribus unum. America."
- 2888 Jug, inscribed—  
 "The Constitution's escape from the British squadron, after a chase of sixty hours. Commander Macdonough's victory on Lake Champlain, Sept. 11, 1814."
- 2889 Jug, inscribed—  
 "Captain Hull, of the Constitution" (portrait). "We have meet the enemy, and they are ours. Perry" (portrait).
- 2890 Admiral Boscawen. Mug.
- 2891 Admiral Vernon. Teapot, with figure of Vernon, and ship. Burfield.
- 2892 Admiral Vernon. British Glory. Carved Basin.
- 2893 Battle of Trafalgar. Names of ships. Mug.

- 2904 Jug. Defence of Acre. By Sir W, SIDNEY SMITH. In high cameo relief.  
*Lent by Rev. S. M. Mayhew.*

- 2905 **China Basin** belonging to the breakfast set used by Lord Nelson on board the Victory. The basin was broken in the battle of Trafalgar, but the pieces were preserved; and Mr. A. W. Richards, then a midshipman of the Victory, had it afterwards repaired as it is now.  
*Lent by Miss Lucy Mercer.*
- 2906 **Crown Derby Cup, saucer and cover**, inscribed—  
"Nelson of the Nile."  
*Lent by Arthur Rigg, Esq.*
- 2907 **Nelson Jug.** China.  
*Lent by G. H. Rudd, Esq.*
- 2908 **Pair of Small Medicine Jars**, recovered from the Royal George.  
*Lent by Mrs. Cecil Thorne-George.*
- 2909 **Two Plates** (dessert size), bearing effigy and name of Admiral Keppel (one slightly cracked). These plates formed part of a dinner service which was presented to the Admiral by the City of London.  
*Lent by Dr. Hayes.*
- 2910 **Jug** recovered from H. M. S. Boyne, which took fire and blew up at Spithead, 1795.  
*Lent by the Royal United Service Institution.*
- 2911 **Captain Cook's Punch-bowl.**  
*Lent by the Royal United Service Institution.*
- 2912 **Brown Earthenware Jug** with bust of Nelson. By FLAXMAN.  
*Lent by Frederick Goodall, Esq., R.A.*
- 2913 **Quaint old Jug**, with profile of Nelson and verses.  
*Lent by Edgar Goble, Esq.*
- 2914 **Coffee Cup and Saucer** of Capo di Monte porcelain; the cup bearing a portrait of Lord Nelson; the saucer his name in gold.  
Believed to have been made when Nelson was with the Fleet in the Bay of Naples.  
*Lent by C. Drury E. Fortnum, Esq.*
- 2915 **Saucer** formerly belonging to Lord Nelson and used by him on the morning he met his death. It was taken from his cabin by Captain Richards, R.N., at that time a Midshipman on board the Victory.  
*Lent by William Hull, Esq.*
- 2916 **Jug of Leeds Pottery Ware**, with Portraits of Admiral Nelson and Captain Barry and ships.  
*Lent by Frederick Clifford, Esq.*
- 2917 **Porcelain Plate**, H.M.S. Royal Oak.  
*Lent by H.R.H., the Duke of Edinburgh.*
- 2918 **A Dessert Dish** 9 in. long with a border of oak leaves, and the names of Nelson's victories inscribed: in Leeds Ware.  
*Lent by Lady Dorothy Nevill.*
- 2919 **Large Drinking Cup**, with the Arms of Viscount Nelson: inside the cup is a shilling.  
*Lent by Lady Dorothy Nevill.*
- 2920 **Bowl.** Inscription, &c., on same—  
"Thou noble bark of brightest fame,  
That bear'st proud England's honoured name,  
Right welcome home once more.  
'Welcome thou gallant little sail;  
In England's name I bid thee hail  
And welcome to her shore."  
*Lent by Messrs. Frank Giles & Co.*

- 2921 Small Jug.** Inscription on same—  
 "England expects every man will do his duty." Portrait of Admiral Nelson.  
 The victory off Trafalgar, October 21st, 1805.  
*Lent by Messrs. Frank Giles & Co.*
- 2922 Large Jug, Coat of Arms, "Crimea." Frigate in full sail.**  
 "England, England, glorious name,  
 Home of freedom, star of fame,  
 Light o'er ocean widely sent,  
 Empress of the element.  
 Gorgeous sea-encircled gem  
 Of the world's bright diadem.  
 Nations, Nations, to command;  
 And who but points admiring hand  
 To thee, our own, our native land!"  
*Lent by Messrs. Frank Giles & Co.*
- 2923 Large Jug.** Inscription on same—  
 "Swiftly see each moment flies,  
 See and learn, be kindly wise;  
 Every pulse beats life away,  
 Every moment shortens day;  
 Thus this every heaving breath;  
 Waft thee on to certain death,  
 Seize the moments as they fly,  
 Know to live and learn to die."  
*Lent by Messrs. Frank Giles & Co.*
- 2924 Jug with Portrait of Lord Nelson and plan of the Battle of Trafalgar, A.D. 1805.**  
*Lent by Messrs. L. & J. Parnell.*

- 2936A **Jack's Pitcher,** a curious tankard of earthenware with the song "Hearts of Oak" on one side and picture on reverse. A lion in fighting attitude on top. *Lent by Captain J. Eardley-Wilmot, R.N.*
- 2936B **Two Plaques** (old Leeds ware), with frigate Shannon and Chesapeake. *Lent by Richard Morrison, Esq.*
- 2936C **Glass Decanter, Tumbler, and Wine Glass,** which belonged to Admiral Lord Nelson. *Lent by W. Eyre Matcham, Esq.*
- 2936D **Decanter and Wine Glasses** used by Admiral Lord Nelson on the eve of the Battle of Trafalgar. *Lent by General Viscount Bridport, K.C.B.*
- 2936E **Part of Tea Service,** the property of Admiral Lord Nelson. *Lent by W. Eyre Matcham, Esq.*
- 2936F **Set of Wine Glasses** given to Captain Richard Grindale by H.R.H. the Duke of Clarence, afterwards William IV. The glass bears an anchor and oak leaves, with the motto "Success to the Thalia, God save the King." *Lent by Miss A. J. Grindale.*
- 2936G **A Large Drinking Glass,** once the property of Captain Bligh, of the Bounty. *Lent by Lady Denison.*
- 2936H **An Old "Toad" Mug,** with picture of Jack Crawford, of Camperdown, on it, recently bought at Lowestoft.

Jack Crawford, the hero of Camperdown, was evidently a very prominent hero when the memory of his gallant feat was fresh in the minds of his countrymen, a proof of which is supplied by the old "Toad" Mug. On one side of the mug is the following inscription, which, of course, refers to the toad :—

"Tho' malt and venom  
Seem united,  
Don't break my pot  
Or be affrighted ;  
For when it's full  
No spleen is seen,  
And when it's empty  
It's quite clean."

*Lent by John E. Cussans, Esq.*

## RELICS, &amp;c.

- 2937 **Circular oak box**, made from a splinter of the Dutch Vice-Admiral de Reyntjes' ship *Jupiter* (afterwards named *Camperdown*), caused by a shot from the *Monarch* in the battle off *Camperdown*, 11th October, 1797.  
The above splinter struck the Dutch Vice-Admiral in the lower part of the body, mortally wounding him. *Lent by W. C. Aycliffe, Esq.*
- 2938 **Ivory box** with Lord Nelson's hair.  
*Lent by General Viscount Bridport; Duke of Bronte, K.C.B.*
- 2939 **Box** made from the timbers of the *Discovery*, which sailed round the world with Vancouver, 1790; presented to Rear-Admiral Sir Robert Barrie, K.C.B., by Rear-Admiral Sykes about the year 1840.  
*Lent by Robert Barrie, Esq.*
- 2940 **Box** made from timbers of H.M.S. *Eurydice*, lost with 318 lives on March 24th, 1878.  
*Lent by Mrs. & Miss A. Cradock.*
- 2941 **Box** made from the timbers of the *Bellerophon*, 74.  
It belonged to the owner's father, who was serving on board at the time of Napoleon's surrender to Captain F. L. Maitland, 1815. This ship, built in 1786, was re-named *Captivity* in 1824, and broken up in 1826.  
*Lent by A. L. McIlwaine, Esq.*
- 2942 **Box** made out of the wood of the *Shannon*, 38, of 1806, the ship which Captain Broke commanded in the celebrated action with the U.S. frigate *Chesapeake*, 1st June, 1813.  
*Lent by Lady Lambton-Lorraine.*
- 2943 **Box** made from that part of the rider in the midshipman's berth of H.M.S. *Victory* against which Lord Nelson leaned when he died.  
The wood was preserved by Mr. Willcox when the ship was undergoing a large repair in Portsmouth Yard, between March, 1814, and January, 1815. Mr. Willcox had it in his possession until his death, and Fleet-Surgeon Robert Willcox gave it to the present owner.  
*Lent by Edgar Goble, Esq.*
- 2944 **Silver cigar box**, commemorating the achievements of Lord Nelson.  
The oak case is made from a piece of the *Victory* obtained on the arrival of the ship at Spithead, after the battle of *Trafalgar*.  
*Lent by the Vestry Club of St. Margaret, Westminster.*
- 2945 **Round box** made of wood of the *Royal George*, which sank at Spithead in 1782. Belonged to the late Captain H. Murray E. Allen, R.N.  
*Lent by Mrs. Nevile Mackay.*
- 2946 **Oak box**, silver mounted, made of wood of H.M.S. *Bellerophon* (of 1786), presented to the first Duke of Wellington.  
*Lent by Colonel Crichton Maitland.*

- 2947 **Circular copper box.** Engraved on the lid :—"This box was made from a bolt of H.E.I.C. Steamer Hugh Lindsay, Commander John Henry Wilson, which vessel was launched in Bombay, 14th October, 1829, and carried the first overland mail from India to Suez, leaving Bombay 20th March, arriving at Suez, 22nd April, 1830. She carried Government despatches and 306 private letters."  
*Lent by Edwin Dawes, Esq.*
- 2948 **Box in Battersea enamel** commemorating Lord Nelson's actions.  
*Lent by Messrs. Collingridge Bros.*
- 2949 **Box** made from timbers of H.M. Ships Mary Rose, Royal George, and Victory.  
*Lent by Mrs. & Miss A. Cradock.*
- 2950 **Small round box** and other articles made from a beam of the Royal George. Presented to Sir Robert Seppings' children.  
*Lent by Mrs. Cecil Thorne George.*
- 2951 **Battersea enamel box** bearing a trophy of arms, wreaths, flag, &c. "Nelson and British gratitude."  
*Lent by Messrs. Collingridge Bros.*
- 2952 **Tooth-pick case** made out of a splinter from the quarter-deck of H.M.S. Victory.  
*Lent by Miss Emily Cole.*
- 2953 **Box** made from that portion of the deck of the Victory on which Nelson fell.  
*Lent by Mrs. Wise.*
- 2954 **Cabinet** formerly belonging to Captain James Cook, R.N., the celebrated navigator.  
*Lent by Rev. Fanshawe Bingham.*
- 2955 **Captain Cook's sextant.**  
*Lent by Rev. E. Amyatt Burney.*
- 2956 **Gold-headed stick,** presented to Lord Collingwood by the Spanish Admiral de Alava.  
*Lent by John C. Blackett, Esq.*
- 2957 **Gold-headed cane** constantly used by William, 7th Earl of Northesk, Admiral of the Red.  
*Lent by the Earl of Northesk.*
- 2958 **Gold-headed cane** which belonged to the Earl of St. Vincent, Admiral of the Fleet.  
*Lent by the Earl of Northesk.*
- 2959 **Gold-headed cane** constantly used by George, 6th Earl of Northesk, Admiral of the White.  
*Lent by the Earl of Northesk.*
- 2960 **Seal** formerly belonging to Admiral Lord Nelson and frequently used by him.  
*Lent by E. K. Bridger, Esq.*
- 2961 **Seal** taken from a ship of the Spanish Armada and given to Vice-Admiral J. R. Dacres by the 4th Earl of Effingham.  
*Lent by Miss Dacres.*
- 2962 **Lord Collingwood's seals.**  
*Lent by John C. Blackett, Esq.*
- 2963 **The gold seals and ring** worn by Lord St. Vincent.  
*Lent by Col. E. H. B. Lysons.*
- 2964 **Silver seal,** supposed to be the one used by Lord Nelson at Copenhagen.  
*Lent by Earl Nelson.*
- 2965 **Seal** which belonged to Captain Richard Grindall, R.N., bearing the motto : "Our defence in God through Howe."  
*Lent by Miss A. J. Grindall.*
- 2966 **Silver nutmeg grater** which belonged to Lord Nelson and was given by him to Collingwood.  
*Lent by John C. Blackett, Esq.*

- 2967 Relics of the mutineers of H.M.S. *Bounty*, given to the lender when he visited Pitcairn's Island in H.M.S. *Actæon* in 1832.  
*Lent by John C. Blackett, Esq.*
- 2968 Christian's (one of the Mutineers of the *Bounty*) thimble, presented by his daughter to the lender.  
*Lent by John C. Blackett, Esq.*
- 2969 Piece of the copper of H.M.S. *Bounty*.  
*Lent by John C. Blackett, Esq.*
- 2970 Bell used on board Lord Howard of Effingham's ship, *The Ark Royal*, in his fight with the Spanish Armada, inscribed round base—  
"This is my Lord Ameral Bel 1573 H.W."  
*Lent by Hedworth T. Barclay, Esq.*
- 2971 Epaulette, buttons, and lace, which belonged to Lord Collingwood; bought at the sale of his daughter's effects, 1884.  
*Lent by A. F. Boxer, Esq.*
- 2972 Silver bell with inscription "Ora Pro Nobis," taken from a Spanish galleon captured by Commodore Anson.  
*Lent by Mrs. de Sausmarez.*
- 2973 White silk ensign and broad pennant which belonged to Lord Collingwood.  
*Lent by A. F. Boxer, Esq.*
- 2974 Flag carried by Mr. D. G. Boyes, Midshipman of H.M.S. *Euryalus*, on the occasion of his gaining the Victoria Cross, in the attack on the Forts at Simonosaki, Japan, 1865.  
*Lent by Captain G. T. H. Boyes, R.N.*
- 2975 Piece of the flag flown by Lord Collingwood as 2nd in Command at Trafalgar, 1805.  
*Lent by C. Collingwood Denny, Esq.*
- 2976 Royal standard (silk), given to Captain Cooke, in command of H.M.S. *Amethyst*, on the occasion of his taking H.R.H. the Duke of York to Holland.  
*Lent by Major R. D. Gibney,*
- 2977 Silk boat flag of H.M.S. *Victory*.  
*Lent by Colonel E. H. B. Lysons.*
- 2978 Silk flag of H.M.S. *Ville de Paris*, Flag-ship of the Earl of St. Vincent in 1801.  
*Lent by Colonel E. H. B. Lysons.*
- 2979 Satin banner with the Armorial Bearings of Lord Nelson; supposed to have been one of those on the funeral car.  
*Lent by Colonel Horace Montague.*
- 2980 Flag of H.M.S. *Brunswick*, flown by her in the Battle of 1st June, 1794. The *Brunswick* was commanded by Captain John Harvey, who in the engagement received wounds of which he subsequently died.  
*Lent by Captain F. Harvey, R.N.*
- 2981 Silk flag presented to the Fishmongers' Company by Earl St. Vincent, to whom it had been presented by the crew of the *Ville de Paris*.  
*Lent by the Fishmongers' Company.*
- 2982 Silk pennant, believed to have belonged to Admiral Roddam.  
*Lent by R. J. Roddam, Esq.*
- 2983 Old Union Jack, made of rich silk; stained in places with blood. Believed to have belonged to Admiral Roddam.  
*Lent by R. J. Roddam, Esq.*

- 2984 Piece of the Union Jack cut to pieces by Russian shot before Sevastopol, after having been planted three times on the parapet of the Diamond Battery, by Captain Peel, R.N., December, 1854.  
*Lent by Herbert Roberts, Esq.*
- 2985 Gold ring set with brilliants and yellow topaz, inscribed—"Given by Commodore Nelson to Captain Miller after the defeat of the Spanish Fleet, 14th February, 1797."  
*Lent by Mrs. Bruce.*
- 2986 Mourning ring for Lord Collingwood, with pendant.  
*Lent by Miss A. J. Grindall.*
- 2987 Mourning ring for Lord Nelson, containing some of his hair.  
*Lent by Miss A. J. Grindall.*
- 2988 Memorial ring presented to Admiral Sir Thomas M. Hardy, Bart., G.C.B., by Lord Nelson's family.  
*Lent by W. Manfield, Esq.*
- 2989 Ring, with Nelson's hair, formerly belonging to Mr. Benjamin H. Carew.  
*Lent by Admiral Sir Arthur Farquhar, K.C.B.*
- 2990 Chess board that belonged to the Rev. Dr. Scott, Chaplain of H.M.S. Victory. Vice-Admiral Lord Nelson and Dr. Scott are said to have frequently used this board.  
*Lent by A. Scott Gatty, Esq.*
- 2991 Banneret from the funeral pall of Vice-Admiral Lord Nelson.  
*Lent by Rev. R. A. Gatty.*
- 2992 Ring belonging to Sir John Glover, lost while crossing the Prah during the Ashantee War, and subsequently found by Colonel Barnard.  
*Lent by Lady Glover.*
- 2993 Signet ring of Admiral Sir Home Popham, with his name engraved in Arabic.  
*Lent by Hyde Parker, Esq.*
- 2994 Gold watch and chain which belonged to Lord St. Vincent.  
*Lent by Colonel E. H. B. Lysons.*
- 2995 Silver verge watch, with enamelled dial showing a fortress and a man of war at the side of the dial, and a sea fight, with vessels burning, below.  
*Lent by Messrs. Collingridge Bros.*
- 2996 An enamelled dial verge watch with vessels leaving a port and with columns and figure.  
*Lent by Messrs. Collingridge Bros.*
- 2997 A silver verge watch with Enamel Dial, showing a sailor and his lass on one side, and a departing vessel on the other.  
*Lent by Messrs. Collingridge Bros.*
- 2998 The watch and seal usually worn by Lord Nelson.  
*Lent by the Lords Commissioners of the Admiralty.*
- 2999 Lord Anson's watch, presented to him in 1747 by the Earl of Hardwicke.  
*Lent by Capt. the Hon. John Yorke.*
- 3000 Watch, chain, and pendants, belonging to Admiral Sir Thos. M. Hardy.  
*Lent by Will. Manfield, Esq.*
- 3001 Chronometer worn by Lord Nelson at Trafalgar.  
*Lent by General Viscount Bridport, K.C.B.*
- 3002 Pocket chronometer in case, formerly belonging to Lord Nelson.  
*Lent by Frederick G. Redman, Esq.*

- 3003 **Binnacle of H.M. Ship Condor (1876.)** See No. 3044.  
*Lent by Captain Lord Charles Beresford, C.B., R.N.*
- 3004 **Piece of oak of the Royal George**, which sank at Spithead, 29th August, 1782, given to the late John Churcher, of Her Majesty's Victualling Yard, Gosport, by Mr. Dralle, the diver. (Recovered, 1841.)  
*Lent by G. P. Churcher, Esq.*
- 3005 **Old Naval pocket compass.**  
*Lent by G. P. Churcher, Esq.*
- 3006 **Two Naval cocked hats ; one circ. 1800, the other circ. 1815.**  
*Lent by W. H. Overend, Esq.*
- 3007 **Naval cocked hat of the last century.**  
*Lent by Mrs. Gosset.*
- 3008 **Cocked hat worn by Captain H. Digby, of H.M. ship Africa, at the battle of Trafalgar.**  
*Lent by Lord Digby.*
- 3009 **Hat worn by Lord Nelson at the battle of the Nile, and presented by him to the late Sir William Beechey, R.A.**  
*Lent by Miss E. M. Beechey.*
- 3010 **Lock of Lord Nelson's hair.**  
*Lent by Earl Nelson.*
- 3011 **Lock of Lord Nelson's hair, and piece of the Victory.**  
*Lent by the Earl of Northesk.*
- 3012 **Lock of Lord Nelson's hair, cut after death on board the Victory.**  
*Lent by the Chevalier Dalton, I.S.R.C.*
- 3013 **Folding library chair (with leather cushion), which belonged to Lord Nelson, and was used by him on board H.M.S. Victory.** It came into the present owner's possession from the late Dr. Scott, chaplain and private secretary to Lord Nelson.  
*Lent by Vice-Admiral the Hon. W. C. Carpenter.*
- 3014 **Admiral Byng's chair.**  
*Lent by the Viscountess Torrington.*
- 3015 **Chair, bearing the following inscription :—"This was Lord Nelson's favourite chair when he was Captain of the Boreas frigate."** Presented by his master James Jamieson to William Heather, being part of the property purchased by J. W. Norie and Wilson in Leadenhall Street, London.  
*Lent by Messrs Norie & Wilson.*
- 3016 **Arm chair made of oak taken from the Victory when she was repaired, and given to John, 2nd Earl of Chatham, when First Lord of the Admiralty.** Figurehead of Victory, rudder, guns, &c., carved in relief.  
*Lent by Captain J. E. Pringle, R.N.*
- 3017 **Chair from the Cabin of the Victory.**  
*Lent by Earl Nelson.*
- 3018 **Mahogany arm chair from Burnham Thorpe Rectory, Norfolk.** It formerly belonged to the Rev. Edmund Nelson, father of Admiral Lord Nelson.  
*Lent by Rev. G. W. Minns.*
- 3019 **Lord Nelson's arm chair.** In the cabin of the Victory, during the battle of Trafalgar ; was struck by a round-shot and shattered, and is now held together with iron bands.  
*Lent by Lady Helen MacGregor, of MacGregor.*
- 3020 **Arm chair made from the wood of one of the Dutch ships captured in the battle of Camperdown, 11th October, 1797.**  
*Lent by David Harrison, Esq.*

- 3021 **Oak chair** made of wood from the Dutch ships captured in the battle of Camperdown, 1797. Presented by Lord Duncan to Mr. John Hunter, of the Navy Pay Office, great-great-grandfather of the present owner.  
*Lent by Douglas W. Gardiner, Esq.*
- 3022 **Armchair**, from the Victory's cabin. In leather, with large pockets for dispatches.  
*Lent by Thomas St. Leger Blaauw, Esq.*
- 3023 **State stool** of King Ja-Ja, West Coast of Africa.  
*Lent by Commander W. M. Annesley, R.N.*
- 3024 **Bottle** from a vessel which formed part of the Spanish Armada.  
*Lent by Admiral H.S.H. Prince Victor of Hohenlohe, G.C.B.*
- 3025 **Bottle of port** which was on board the Victory at the battle of Trafalgar. It belonged to Lord Nelson and was purchased by the late Mr. John Weston from the executors of Lady Nelson.  
*Lent by Spencer J. Weston, Esq.*
- 3026 **Bottle of wine** (seal unbroken) that was recovered from the wreck of the Royal George.  
*Lent by Joseph J. Drury, Esq.*
- 3027 **An encrusted bottle** from the wreck of the Royal George.  
*Lent by H. Bridgewater, Esq.*
- 3028 **Two brass 4-pr. smooth-bore guns** of Spanish make, both dated 1795, captured on board the French bombard Victoria by the boats of H.M.S. Tigre, Cumberland, Apollo, &c., in the Bay of Rosas on the 31st October, 1809.  
*Lent by Admiral Lord Alcester, G.C.B.*
- 3029 **Turkish gun and canteen**, presented by the Sultan of Turkey to Lord Nelson.  
*Lent by the Lords Commissioners of the Admiralty.*
- 3030 **Brass gun** formerly the property of Admiral Blake. (1650.)  
*Lent by John Pearson, Esq.*
- 3031 **Model of a Russian gun and carriage** made out of the brass and carriage of a Russian field-piece recovered from the Harbour of Sevastopol after the fall of that place.  
*Lent by General Sir Charles Adair, K.C.B.*
- 3032 **Brass gun** supposed to have belonged to a privateer.  
*Lent by Rear-Admiral Kennedy.*
- 3033 **Two Chinese breech loaders** taken from the walls of Nankin, 1842.  
*Lent by the Officers, Plymouth Division, Royal Marines.*
- 3034 **Two small bronze guns mounted on oak carriages** made from the wood of the Royal George. The guns went down with the ship on 29th August, 1782, and are believed to have been used in Admiral Kempenfelt's barge.  
*Lent by General R. Cadell, C.B.*
- 3035 **Seven-barrelled short gun** used in the tops to sweep an enemy's decks.  
*Lent by Miss Margaret Rhodes.*
- 3036 **A small brass cannon** of Spanish make; history unknown.  
*Lent by Rear-Admiral W. R. Kennedy.*
- 3037 **Iron bar shot**, weight nearly 60 lbs., fired into the Excellent, 74, Captain Cuthbert Collingwood, from the Spanish Santissima Trinidad, 130, in the action off Cape St. Vincent, February 14th, 1797.  
*Lent by Major-General Sir E. W. Blackett, Bart.*

- 3038 **Russian shot** from Sevastopol. *Lent by Rear-Admiral Kennedy.*
- 3039 **Shot** which was one of several fired, when red-hot, from the Forts of Bomarsund on the morning of the 10th August, 1854, at H.M.S. *Penelope*, Captain J. Crawford Caffin (afterwards Admiral Sir Crawford Caffin, K.C.B.), who had been ordered by Admiral Sir Charles Napier to reconnoitre the Russian Forts in order to ascertain what guns they had. While thus engaged, the *Penelope*, in charge of the Master of the Fleet, who was on board to pilot her, ran on a rock abreast of the 17th embrasure. In this position she remained for 4 hours under a galling fire from the enemy. Twelve shot struck or went through the ship and 5 cut away her rigging. This shot first came in at the water-line on the port side, went through the midshipman's berth, passed through two of the midshipmen's chests, setting fire to their linen; and fell spent in the clerk's office. *Lent by Miss Crawford-Caffin.*
- 3040 **Piece of shell** which passed through the funnel of H.M.S. *Sultan* during the bombardment of Alexandria on the 11th July, 1882. *Lent by Mr. George Walton, late A.B. of the Sultan.*
- 3041 **Grape shot** found in a hammock the day after the battle of Navarino. *Lent by the Rev. F. O. Morris.*
- 3042 **Fragments of stone shot**, fired by the Turkish guns on the occasion of Sir John Duckworth forcing the passage of the Dardanelles in 1807. *Lent by Colonel Horace Montagu.*
- 3043 **A 42 lb. shot** which was fired from Fort Constantine, Sevastopol, which struck H.M.S. *Rodney*. *Lent by Rear-Admiral W. R. Kennedy.*
- 3044 **Two fragments of shell** fired by H.M. Ship *Condor* during the attack on Fort Marabout at Alexandria. See No. 3003. *Lent by Captain Lord Charles Beresford, C.B., R.N.*
- 3045 **Cap of Liberty** from the French frigate *Unité*, captured off Ushant, April 18th, 1796, by Captain Francis Cole, R.N., in the *Révolutionnaire*. The *Révolutionnaire* had been captured, October 21st, 1794. *Lent by Major General F. Close.*
- 3046 **Silver gilt pin**, with bust of Lord Nelson. *Lent by Messrs. Collingridge Bros.*
- 3047 **Carved ivory bust** of Lord Nelson. *Lent by Messrs. Collingridge Bros.*
- 3048 **Piece of timber** taken from H.M.S. *Victory* when in dry dock, 1890. *Lent by Messrs. Henry Castle & Sons.*
- 3049 **Iron bolt** from H.M.S. *Royal George*, which sank in August, 1782. *Lent by Messrs. Henry Castle & Sons.*
- 3050 **Mantelpiece**. The figures of "Atlas" are the veritable two stern figures taken from the famous "Brave Old Téméraire," which was broken up in 1838. The inlaid portion is old oak from the ill-fated *Royal George*. The bust figure on the shelf is from H.M.S. *Galatea*. The main part of the mantelpiece is mahogany from H.M.S. *Royal Albert*, one of the last three-deckers built at Woolwich; Her Majesty was present at the launch, 1856. *Lent by Messrs. Henry Castle & Sons.*
- 3051 **Téméraire gong stand** made from timbers of old battle ships. *Lent by Messrs. Henry Castle & Sons.*
- 3052 **Oak Case** with glass front, containing pieces of timber and sail from H.M.S. *Victory*, and a bronze medal with bust of Nelson. *Lent by Alfred Chadwick, Esq.*

- 3053 Silver gorget**, said to have been worn by a Naval officer in the time of George I. *Lent by Alfred Chadwick, Esq.*
- 3054 Piece of "top lining"** of the fore-topsail which took H.M.S. Victory into action off Cape Trafalgar, 21st October, 1805.  
This sail was accidentally discovered stowed away in a long disused sail-room in Chatham Dockyard more than 65 years after the battle, and when opened out was found to be much torn by shot and stained with blood. *Lent by Lieutenant Henry Chamberlain, R.N.*
- 3055 Sideboard**, bearing the following inscription:—"The back of this sideboard and the whole of the carving is made from a portion of the original timber of the San Josef, given to Lady Berry, widow of Rear-Admiral Sir Edward Berry, Bart., K.C.B., by order of the Board of Admiralty, on the breaking up of that ship in 1849. The carving represents the boarding and capture of the Spanish Ships San Nicolas of 80 guns, and San Josef of 112 guns, by the Captain of 74 guns, bearing the pennant of Commodore Horatio Nelson, on the 14th of February, 1797, in the battle off Cape St. Vincent. Captain Edward Berry, then serving as a volunteer on board the Captain, bore a distinguished part in the action, and was the first man who boarded the San Nicolas. For his conduct on that occasion he was raised to the rank of Post Captain." *Lent by Rev. Edward Stanley Carpenter.*
- 3056 Commemoration gold pendant with foul anchor**; engraved on it, "Earl Howe, First of June." *Lent by Mrs. Dalton.*
- 3057 Fan** presented to Lady Collingwood; with a portrait of Lord Nelson in centre, and views of ships. *Lent by C. Collingwood Denny, Esq.*
- 3058 The green silk scarf** which was presented to Sir Francis Drake by Queen Elizabeth. On it are embroidered the words:—"The Almighty be your Guide and Protector to the end." *Lent by the Lady Elliott-Drake.*
- 3059 Model book** made from timbers of H.M.S. Royal George, which sank at Spithead, August, 1782. *Lent by Mrs. & Miss A. Cradock.*
- 3060 Model of a 40-gun frigate**, under full sail. The hull, &c., are of wood, the rigging finely executed in glass. *Lent by W. A. Lovell, Esq.*
- 3061 Ivory model of a French frigate** made by French prisoners in Dartmoor Prison, 1814. *Lent by Fleet-Paymaster John S. Moore, R.N.*
- 3062 Model of a brig**, latter half of 18th century, made by Commander Amherst Morris (died, 1802). *Lent by Rev. F. O. Morris.*
- 3063 Pistol** used by Captain John Cooke at Trafalgar. The hammer of it was broken by a musket ball. *Lent by Major R. D. Gibney.*

*Lent by the Royal United Service Institution.*

- 3064 Pistol** taken out of the French ship Intrépide which struck at Trafalgar, 1805.
- 3065 One of the guns** of H.M.S. Bounty, the crew of which mutinied in 1789.

- 3066 Shot which lodged in a basket at the battle of Navarino.
- 3067 Piece of brocade.
- 3068 Telescope which belonged to Mr. Fryer, master of H.M.S. *Bounty* at the time of the mutiny, 1789.
- 3069 Implements used by "Jack the Painter," to set fire to Portsmouth Dockyard, 1776.
- 3070 Box made out of the timbers of H.M.S. *Shannon*, after she was broken up at Chatham in 1859.
- 3071 Portable soup prepared for Captain Cook's voyage.
- 3072 Lord Nelson's cocked hat.
- 3073 The laurel ornaments from Lord Nelson's state coffin.
- 3074 Some of the spirit in which Lord Nelson's body was brought to England.
- 3075 Gold lace from the coat worn by Lord Nelson when he lost his arm at Tenerife.
- 3076 Two lava buttons worn by Lord Nelson.
- 3077 Part of the Union Jack of H.M.S. *Victory*, which was carried in the procession at Lord Nelson's funeral, and which it was intended should be lowered into the grave, but which was torn up and distributed by the sailors.
- 3078 Model of Nelson's coffin. The model is of wood, partly from the *Royal George*, and partly from the *Victory*.
- 3079 The first uniform appointed to be worn in H.M. Navy, 1748. Post Captain's of three years' standing.
- 3080 The first uniform appointed to be worn in H.M. Navy, 1748. Post Captain's of under three years' standing.
- 3081 The first uniform appointed to worn in H.M. Navy, 1748. Lieutenant.
- 3082 A Barometer.
- 3083 The main truck of the French ship *Orient*, which blew up at the battle of the Nile, August 1st, 1798.
- 3084 Piece of the mizenmast of H.M.S. *Blenheim* as shot through by a 32-pr. shot at the battle off Cape St. Vincent, February 14th, 1797. The *Blenheim*, the second ship in the line, was on this occasion commanded by Captain T. L. Frederick, and lost 12 killed and 49 wounded.
- 3085 The bell of the private chapel of the *Ville de Paris*, taken in Lord Rodney's action, April 12th, 1782. The *Ville de Paris*, 106, was flagship of the Comte de Grasse.
- 3086 Tiller of a gunboat belonging to the flotilla intended by Napoleon I. for the invasion of England.
- 3087 Clock-face, taken from the break of the poop of the French ship *Ville-de-Paris*, in Lord Rodney's action, 1782. The hand was turned by the sentinel at the expiration of each hour.
- 3088 Flag used by the crew of H.M.S. *Niger* when they opposed the mutineers at Sheerness, in 1797, and presented by them to Captain Foote.

- 3089** **Musket and bayonet** taken by Edward Bartholomew (Boatswain of H.M.S. Magnet), from the body of a French soldier on the left attack on Sevastopol, 9th September, 1855.
- 3090** **Sir Francis Drake's walking stick.**
- 3091** **Small cross** made of wood from a ship of the Spanish Armada.
- 3092** **Pincushion**, embroidered by Lady Nelson. It was commenced while Lady Nelson was attending the sick couch of her husband during his sufferings occasioned by the amputation of his arm, and was finished while the Admiral was absent at the Battle of the Nile.
- 3093** **The desk** used by Nelson when a midshipman.
- 
- 3094** **Hook** which fastened the cloak that was put round Lord Nelson when he fell mortally wounded on board the Victory, at Trafalgar.  
*Lent by T. Augustus Forbes-Leith, Esq.*
- 3095** **Captain Cook's walking stick.** A cane with brass claw-hammer shaped head, faced with steel. The inscription on it is "M. Corr to Kendrick," it was given to the owner's father many years ago by a lady named Kendrick, a descendant of Captain Cook's family.  
*Lent by W. Grange, Esq.*
- 3096** **Gold anchor** for the watch chain, such as was worn by every officer who had been on board the flag-ship at the battle of the Nile. It bears "Nelson," and the date. This one belonged to Admiral Sir Francis Collier, who was a midshipman in the Vanguard in the battle.  
*Lent by Mrs. Carr Glyn.*
- 3097** **A small gold anchor brooch pin**, given to Captain A. W. Richards, R.N., by King William IV., soon after he ascended the throne.  
*Lent by Miss Lucy Mercer.*
- 3098** **The Nelson Cenotaph**, made of the 84 guineas which were found in Lord Nelson's purse at the time he was mortally wounded at Trafalgar, 21st October, 1805.  
These guineas, together with his other effects, were sent to Mr Alexander Davison, Nelson's intimate friend and agent, who had them worked into the design as now seen. The handles of the sarcophagus are modelled from the stern and prow of the barge that conveyed Nelson's body from Greenwich to Whitehall previous to the funeral. This barge is now preserved on board the Victory in Portsmouth Harbour.  
*Lent by James Griffin, Esq.*
- 3099** **Brass yoke** taken by the Earl of Northesk from one of the Spanish line-of-battle ships at the battle of Trafalgar, 21st October, 1805.  
*Lent by Commander R. N. Gresley.*
- 3100** **Quadrant** by "Thomas Ripley & Co., No. 364, near Hermitage Bridge below the Tower, London" (probably made about 1790).  
*Lent by Messrs. Gieve.*
- 3101** **Brass quadrant** engraved on both sides and with movable wheel. Made by "Nathanaell Heighemore, A.D. 1633."  
*Lent by Harry Hems, Esq.*
- 3102** **Poker** made from iron bolt recovered from the wreck of the Royal George.  
*Lent by Mrs Shirley Love.*

3103 Spectacles worn by Lord St. Vincent.

*Lent by Colonel E. H. B. Lysons.*

3105 Small gold anchor, as given to captains commanding ships in the victory of 1st June, 1794. This one formerly belonged to Admiral Sir George C. Berkeley.

*Lent by Lady Helen MacGregor, of MacGregor.*

3106 Piece of boat of H.M.S. Danaë and skull of fish which shattered the gunwale and remained fixed there.

This curious accident occurred off the West Coast of Africa, during the time the Danaë was commanded by the late Captain Sir Malcolm MacGregor, Bart.

*Lent by Lady Helen MacGregor, of MacGregor.*

3107 Silver pencil used by Sir Thomas M. Hardy to write down signals during the battle of Trafalgar; with marks of his teeth, made in moments of excitement.

*Lent by Lady Helen MacGregor, of MacGregor.*

3108 Gold shoe and knee buckles worn by Sir Thomas M. Hardy at Trafalgar.

*Lent by Lady Helen MacGregor, of MacGregor.*

3109 Telescope which belonged to Vice-Admiral Sir Thomas Dundas, C.B.

*Lent by Mrs. E. M. Beecher.*

3110 Lord Nelson's spy glass.

*Lent by Lady Helen MacGregor of MacGregor.*

3111 Telescope left by Nelson to his godson, Horatio Nelson Atkinson. Unfortunately re-covered by Dolland.

*Lent by Earl Nelson.*

3112 Telescope which belonged to Rear-Admiral Kempenfelt, who presented it to Captain James Saumarez when the latter commanded a ship under the former's flag, in 1781.

*Lent by Lord de Saumarez.*

3113 Nelson's telescope, given to Captain Otway after Copenhagen.

*Lent by the Right Hon. Sir A. J. Otway, Bart.*

3114 Small telescope, used by Lord Nelson at the battle of Trafalgar.

This telescope was the property of one of the Lieutenants of the Victory, and was lent by him to Lord Nelson as being handy for use by a one-armed man. The owner gave it, as a memento of Lord Nelson, to Commissary General Sweetland at Gibraltar, when the Fleet went there immediately after the battle, and was by him given to his son, the present owner.

*Lent by Edward M. Sweetland, Esq.*

3115 Spy glass which belonged to, and was used by, Lord Collingwood.

*Lent by Lady Wilson.*

3116 Small piece of the original Atlantic cable mounted in brass.

*Lent by Isaac B. Moorman, Esq., Fleet-Paymaster, R.N.*

3117 Speaking trumpet turned from wood of Lord Nelson's funeral car.

*Lent by Rev. S. M. Mayhew.*

3118 Boatswain's pipe used on board H.M.S. Victory at the battle of Trafalgar.

*Lent by J. D. McCullum Muir, Esq.*

3119 Model of the Nelson column in Trafalgar Square, being the pattern used in making the silver model for the Officers of the Royal Naval College, Greenwich.

*Lent by Messrs. Mappin & Webb.*

- 3120 **Piece of wood of the Mary Rose**, which sank at Spithead in 1545. It belonged to the late Captain H. Murray E. Allen, R.N.  
*Lent by Mrs. Nevile Mackay.*
- 3121 **Epaulettes** worn by Lieut. Richard Langdon, circ. 1812.  
*Lent by W. E. Langdon, Esq.*
- 3122 **Small piece of oak** from the hull of the Centurion, Anson's ship during his voyage round the world.  
*Lent by Rev. F. O. Morris.*
- 3123 **Model of a mast of the Victory**, made out of a piece of one of the masts, and showing the splicing of the wounds and injuries received at Trafalgar.  
*Lent by Earl Nelson.*
- 3124 **The bullet**, set in copper, with which Captain Bligh weighed out the allowance of bread when cast adrift by the mutineers of the Bounty.  
*Lent by Mrs. Nutting.*
- 3125 **The cocoa-nut** out of which Captain Bligh ate his allowance of bread and water.  
*Lent by Mrs. Nutting.*
- 3126 **Gold compass** which belonged to Lord Nelson.  
*Lent by the Earl of Northesk.*
- 3127 **Silver N. and coronet** as worn by members of the band of the Britannia, flag-ship of Rear-Admiral William, 7th Earl of Northesk, at the battle of Trafalgar.  
*Lent by the Earl of Northesk.*
- 3128 **A piece of the deck of H.M.S. Victory**, cut from the spot where Nelson's head lay when he fell mortally wounded.  
*Lent by the Earl of Northesk.*
- 3129 **Midshipman's coat**—Late 18th century.  
*Lent by Messrs. L. & H. Nathan.*
- 3130 **Seaman's jacket.** Period, ca. 1805.  
*Lent by Messrs. L. & H. Nathan.*
- 3131 **Boatswain's jacket.** Period, ca. 1805.  
*Lent by Messrs. L. & H. Nathan.*
- 3132 **Copy of old Naval coat ; with original buttons.**  
*Lent by Messrs. L. & H. Nathan.*
- 3133 **Admiral's coat ; period, ca. 1805.** *Lent by Messrs. L. & H. Nathan.*
- 3134 **Ditto.** *Lent by Messrs. L. & H. Nathan.*
- 3135 **Design of Admiral's uniform ; period, ca. 1805.**  
*Lent by Messrs. L. & H. Nathan.*
- 3136 **Design of Lieutenant's uniform ; period, ca. 1805.**  
*Lent by Messrs. L. & H. Nathan.*
- 3137 **Design of Midshipman's uniform ; period, ca. 1805.**  
*Lent by Messrs. L. & H. Nathan.*
- 3138 **Design of Captain's uniform, early 19th Century.**  
*Lent by Messrs. L. & H. Nathan.*
- 3139 **A cockade**, cut by Mr. John Wells, midshipman of the Britannia, from a French hat on board one of the prizes at Trafalgar.  
*Lent by Mrs. Older.*
- 3140 **Model of frigate**, circ. 1790 ; on  $\frac{1}{4}$  in. scale.  
*Lent by W. H. Overend, Esq.*
- 3141 **Naval officer's coat**, about 1810. The gold lace is restored, the original had been torn off.  
*Lent by W. H. Overend, Esq.*

- 3142 Coat of a private of Royal Marines; about 1840.  
*Lent by W. H. Overend, Esq.*
- 3143 Naval officer's coat. High roll collar, plain anchor buttons, about 1790.  
*Lent by W. H. Overend, Esq.*
- 3144 Midshipman's coat, about 1790; has white patel on collar.  
*Lent by W. H. Overend, Esq.*
- 3145 Naval officer's coat. Captain's undress; long skirts, anchor buttons.  
*Lent by W. H. Overend, Esq.*
- 3146 Naval officer's coat. Modern button. Date, 1849.  
*Lent by W. H. Overend, Esq.*
- 3147 Naval officer's cocked hat, no gold lace; about 1790. Civilian branch.  
*Lent by W. H. Overend, Esq.*
- 3148 Naval officer's cocked hat, with gold lace; about 1812.  
*Lent by W. H. Overend, Esq.*
- 3149 Speaking Trumpet made of wood from the Étoile.  
*Lent by Lieut.-Col. Edmond Palmer.*
- 3150 Rosewood cabinet, inlaid with ivory; formerly the property of Captain James Cook, the celebrated navigator.  
*Lent by Rev. E. J. Reeve.*
- 3151 Folding bedstead, used by Lord Nelson on board the Victory.  
*Lent by Arthur Rigg, Esq.*
- 3152 Two large table-napkins of damask, with Nelson's crest and motto, "Palmarum qui meruit ferat."  
*Lent by Arthur Rigg, Esq.*
- 3153 Old sextant, by George Stubbins.  
*Lent by F. L. Smith, Esq.*
- 3154 Star from the Chesapeake's quarter (1813).  
*Lent by Lady de Saumarez.*
- 3155 Figurehead of H.M.S. Shannon.  
"The British frigate's name,  
Which for the purpose came  
Of cooling Yankee courage, neat and handy, oh!  
Was the Shannon, Captain Broke;  
All her crew were Hearts of Oak,  
And at fighting they're allowed to be the dandy, oh!"  
*Lent by Lady de Saumarez.*
- 3156 Robes of a Knight of the Bath, worn by Admiral Sir Thomas Graves, K.B., at his installation ball, given at Ranelagh, 1803.  
*Lent by Sir C. B. Graves Sawle, Bart.*
- 3157 Portion of the cable of H.M.S. Royal George, 27 in. Recovered by the diver, George Dean, in 1836.  
*Lent by W. H. Saunders, Esq.*
- 3158 Iron Bolt with a guinea attached to it. Recovered from the wreck of the Royal George, by the diver, George Hall, 1840.  
*Lent by W. H. Saunders, Esq.*
- 3159 Anchor and buoy made of materials from the wreck of the Royal George.  
*Lent by W. H. Saunders, Esq.*
- 3160 Tobacco stopper. Mummified finger of "Jack the Painter," who was hanged at the Dock gates, March 10th, 1777, for having set fire to the rope house in Portsmouth Dockyard. The body was afterwards gibbeted on Blockhouse Beach.  
*Lent by W. H. Saunders, Esq.*

- 3161 Desk** made from the wood of a ship of the Spanish Fleet, which was burnt during the siege of Gibraltar, 1782. The wood shows marks of the red-hot shot. The fittings made out of dollars which were captured on the occasion. *Lent by Colonel Domville Manie Taylor.*
- 3162 Paper-weight** from the wreck of H.M.S. Captain, which foundered 7th September, 1870. *Lent by Captain J. Buchan Telfer, R.N.*
- 3163 Fragments** from H.M.S. Tiger, which was wrecked and crew captured near Odessa, 12th May, 1854. *Lent by Captain J. Buchan Telfer, R.N.*
- 3164 Post-mortem mask** of Lord Nelson; taken, after his death on board the Victory, for his sister Mrs. Matcham.  
On the death of Mrs. Matcham, it became the property of her daughter, the wife of Captain Blanckley; from whom it passed to Captain Blanckley's second wife and widow, and from her to her sister, Miss Naylor, who gave it to the present owner's father. *Lent by J. G. Tasker, Esq.*
- 3165 Plaster cast** of the face of Richard Parker, the ringleader of the mutiny at the Nore. Taken after death. *Lent by C. Davis Sherborn, Esq.*
- 3166 Necklace** composed of forty-seven intaglios: formerly a watch chain belonging to Lord Nelson. *Lent by Miss Grace Waterfield.*
- 3167 A chest** made from the bowsprit of the French Admiral's ship Orient, which blew up at the battle of the Nile. *Lent by the Misses Webley-Parry.*
- 3168 Small blue silk netted purse** with mouth at one end, opening with two metal pins, finished with ball ends of pearl (one ball missing). The other end of the purse is ornamented with a single ball of pearl of larger size. A sliding ring of ivory would keep the contents of the purse in their place. This purse belonged to Vice-Admiral Lord Nelson and was constantly used by him. It was removed from his dead body by Captain (afterwards Sir T. M.) Hardy in the cock-pit of the Victory immediately after Nelson's death, on October 21st, 1805, and was retained by Captain Hardy as a memento. The purse at that time contained a gold guinea, which has since been lost. The purse continued in the Hardy family until some years ago, when it was purchased by its present owner. *Lent by George Charles Williamson, Esq.*
- 3169 Convex glass mirror** in gilt wood frame. It formed part of the ward-room furniture of H.M.S. Victory in 1805. It was purchased by Mr. G. W. Jones, Paymaster, R.N., at a Government stores' sale at Portsmouth in 1869, and was by him sold to the present owner in 1871. *Lent by Mr. John Alfred Welch, late Quartermaster, R.N.*
- 3170 Ivory-handled pocket knife** dropped overboard from the Norfolk, East Indiaman, on a passage from Bengal to England, and recovered 26 hours later from the stomach of a dolphin. Attached is a sheet of foolscap with particulars and signatures of verification, etc. *Lent by Fred. G. Redman, Esq.*
- 3171 Set of wine glasses** given to Captain Richard Grindall by H.R.H. the Duke of Clarence, afterwards William IV. The glasses bear an anchor and oak leaves with the motto "Success to the Thalia. God save the King." *Lent by Miss A. J. Grindall.*

- 3172 **Pair of gold earrings** as given to the wives of the Commanders after Lord Howe's victory, 1st June, 1794. *Lent by Miss A. J. Grindall.*
- 3173 **Red morocco house-wife** given to Mrs. Richard Grindall by Lord Nelson. *Lent by Miss. A. J. Grindall.*
- 3174 **A piece of the main-mast of L'Orient** (from other portions of which Nelson's coffin was made), set as brooch with pearls. *Lent by Miss A. J. Grindall.*
- 3175 **Large brass chandelier** for 16 candles, presented by J. Vinning, 1704, for the use of H.M. Dockyard Church, Portsmouth. *Lent by the Admiral Superintendent, Portsmouth.*
- 3176 **A large drinking glass**, once the property of Captain Bligh, of the *Bounty*.  
After the mutiny the glass was appropriated by Fletcher Christian, the leading mutineer; it subsequently passed into the possession of John Adams, also one of the mutineers, and afterwards the organizer of the Pitcairn Island community. It was presented by the Pitcairn Islanders to the late Sir William Denison, K.C.B., when, as Governor of New South Wales, he superintended their removal to Norfolk Island and visited them on their arrival there. *Lent by Lady Denison.*
- 3177 **A blue enamel locket**, on which is a diamond anchor. The diamond anchor belonged to Admiral Benbow and was worn by him as a scarf brooch.  
The diamond anchor was left by the Admiral to his son Richard Benbow, of Shrewsbury, who left it to his grand-daughter Eliza Benbow, who married Edward Hughes, banker of Shrewsbury. They left it to their daughter, who married William Lutener, High Sheriff of the County of Montgomery, the grandfather of the present owner.  
The diamond anchor was mounted on the locket about 20 years ago. *Lent by Mrs. F. E. Tompson.*
- 3178 **Nelson's funeral glass.**  
Of these glasses, made in commemoration of Lord Nelson's funeral, very few are, it is believed, now in existence. *Lent by Miss Fortnum.*
- 3179 **Inkstand** made of wood from the U. S. frigate *Chesapeake*, with a grapeshot of the *Shannon* embedded in it; with descriptive brass plate. *Lent by Lady Lambton-Lorraine.*
- 3180 **Tangent sight** of the Russian gun in the Wasp battery, Sebastopol. By shot from this gun H.M.S. *Agamemnon*, the flag-ship of Rear-Admiral Sir Edmund Lyons, K.C.B., was repeatedly struck during the attack of the 17th October, 1854. *Lent by Captain Charles Fairholme, R.N.*
- 3181 **Fetish**, from Coomassie. *Lent by Lieutenant Gerald R. Maltby, R.N.*
- 3182 **Waistcoat** of Captain James Cook, R.N., worn by him about 1780. "It came into the possession of my wife's father, Captain Carter, about the year 1820. He, being a nephew of Captain Cook, used to visit Mrs. Cook at Clapham, and among other things she gave him this waistcoat." *Lent by William Slaughter, Esq.*
- 3183 **Pipe**, said to have been used by Lord Nelson. *Lent by W. F. Richmond, Esq.*
- 3184 **Sir Francis Drake's purse.** *Lent by F. Drake Pearse, Esq.*

- 3185 **Impression of an old seal with arms and crest**, said to have been Sir Francis Drake's. *Lent by F. Drake Pearse, Esq.*
- 3186 **Ashantee gold necklace and earrings**, taken from the King's Palace at Coomassie, 1873. *Lent by Lady Glover.*
- 3187 **Relics of the Glorious First of June (1794).** *Lent by Earl Howe.*
- 3188 **Lieutenant's epaulette**, circa 1805. *Lent by Messrs. Herbert & Co.*
- 3189 **Brass plates** said to have been originally prepared for Lord Nelson's coffin. *Lent by Will. Travers, Esq.*
- 3190 **Table from H.M.S. Victory.** *Lent by Mortimer Justin, Esq.*
- 3191 **Nelson's writing desk.** (Purchased at Lady Hamilton's sale at Roehampton, by the late George Daniel Martin, Esq., of Richmond, Surrey.) *Lent by H. J. Martin, Esq.*
- 3192 **Bullet** with which Lieutenant Sutton was wounded in 1813. *Lent by C. T. Sutton, Esq.*
- 3193 **Cat-o'-nine-tails**, which was used on board a man of war less than a quarter of a century ago (now obsolete). *Lent by Commander Chas. N. Robinson, R.N.*
- 3194 **Pocket sun-dial**, once belonging to Admiral Sir Thomas M. Hardy. *Lent by William Manfield, Esq.*
- 3195 **Silver Shield** designed by John Watkins, pupil of the School of Art, South Kensington, to illustrate the description of a shield in Virgil's *Æneid*, Book VIII. *Lent by Messrs. Elkington & Co.*
- 3196 **Nautilus shell in silver gilt.** *Lent by Messrs. Elkington & Co.*
- 3197 **Barometer**, formerly the property of Captain Cook. It was presented to Samuel Chivers, an officer in the East India Company, by the famous circumnavigator, and was by him left to the present owner. *Lent by Samuel F. Chivers, Esq.*
- 3198 **Ink-Stand** which Lord Collingwood always used when writing his despatches. *Lent by Lady Wilson.*
- 3199 **The barometer** that hung in Lord Collingwood's cabin. *Lent by Lady Wilson.*
- 3200 **A splinter from H.M.S. Victory**, together with a letter from Mr. W. Kimpton, an officer of that ship. *Lent by James Moore, Esq.*
- 3201 **A small piece from the bottom of H. M. frigate Terrible**, taken off her when she lay in dock at Malta, after having been ashore near Sebastopol while chasing the enemy. *Lent by James Moore, Esq.*
- 3202 **Dial and glass** of the pocket compass with which Captain Bligh, R.N., navigated for upwards of 3,000 miles in the Pacific Ocean, after having been cast adrift by the mutineers of the *Bounty*, 1789. *Lent by the Hon. and Rev. E. V. Bligh.*
- 3203 **Mahogany washstand** which belonged to Lord Nelson, and was given by him to James Brown, Purser R.N., sometime his private secretary. *Lent by John Augustine Brown, Esq.*
- 3204 **Five pieces of embroidery**, said to have formed part of the hangings of Lord Nelson's cot. *Lent by the Lords Commissioners of the Admiralty.*

- 3205 Coat worn by Nelson at the Nile.**  
*Lent by the Lords Commissioners of the Admiralty.*
- 3206 Coat and Waistcoat worn by Nelson at Trafalgar** when he received his mortal wound.  
*Lent by the Lords Commissioners of the Admiralty.*
- 3207 Lord Nelson's pigtail :** cut off after death.  
*Lent by the Lords Commissioners of the Admiralty.*
- 3208 Velvet stock** worn by Lord Nelson at Trafalgar when he was wounded.  
*Lent by the Lords Commissioners of the Admiralty.*
- 3209 Astrolabe** constructed for Sir Francis Drake.  
*Lent by the Lords Commissioners of the Admiralty.*
- 3210 Ornamental shield,** composed of 125 unclaimed war medals and clasps of deceased in-pensioners of Greenwich Hospital.  
*Lent by the Lords Commissioners of the Admiralty.*
- 3211 A white tablecloth,** woven with emblematic designs and inscriptions, in commemoration of the death of Nelson and the Battle of Trafalgar.  
*Lent by Mrs. Frances Wisken.*
- 3212 Two pistols.**  
*Lent by Robert Whisken, Esq.*
- 3213 Pair of carved and silver-mounted pistols,** formerly the property of Lord Nelson.  
*Lent by Francis Smith, Esq.*
- 3214 Turkish flint-lock pistol,** from the battle of Navarino.  
*Lent by Rev. F. O. Morris.*
- 3215 Two silver mounted pistols,** presented to Andrew Mott, first Lieutenant of the Bellerophon, by Napoleon Bonaparte, at the time of the latter's surrender in 1815.  
*Lent by A. L. Mott, Esq.*
- 3216 Two pistols** personally presented to Mr. Edward Joseph Key, Purser of H.M.S. Bellerophon, by the Emperor Napoleon, while a prisoner on board.  
*Lent by Percy Edward Key, Esq.*
- 3217 Telescope** used by Lieutenant J. Pasco on the poop of the Victory at the battle of Trafalgar.  
*Lent by Admiral H.R.H. the Duke of Edinburgh.*
- 3218 Carved model** of the figure-head of H.M.S. Queen Charlotte, 110, flag-ship of Lord Howe on the 1st June, 1794.  
*Lent by Sir Graham Eden Hamond-Græme, Bart.*
- 3219 Figure-head** of Captain Cook's ship. A dragon.  
This must have been the figure-head of the Resolution, in which Cook made his second and third voyages.  
*Lent by Viscount Galway*
- 3220 A hinge** made from the copper of the Bounty.  
*Lent by J. Brendon Curgenven, Esq.*
- 3221 Ivory or dentine mallet** made from a whale's tooth ; used by the Pitcairn Islanders to beat the tappa cloth.  
*Lent by J. Brendon Curgenven, Esq.*
- 3222 Plate** taken from the Staff-Commander's cabin in H.M.S. Alexandra. It was pierced by a 10-in. spherical shell, fired from the batteries at Alexandria during the bombardment of the forts on 11th July, 1882.  
*Lent by executors of the late Staff-Captain Henry Hosken, R.N.*

- 3223** Cast in plaster of Paris of an impression made by a shell from the Alexandria Batteries. The shell split up on a 12 in. armour-plate of H.M.S. Alexandria, 11th July, 1882.  
*Lent by the Executors of the late Staff Captain Henry Hosken, R.N.*
- 3224** A pinchbeck watch, which is said to have been worn by the late Lord Nelson on more than one occasion, but which was not his own.  
*Lent by Maurice Nelson Girdlestone, Esq.*
- 3225** Silver inkstand which belonged to Lord Nelson.  
*Lent by William Fuller, Esq.*
- 3226** Epaulette and sash formerly in the possession of, and worn by, Vice-Admiral Lord Nelson. These relics were purchased by the late Seth William Stevens, F.S.A. of Norwich, in 1823, from Tom Allen of Burnham Thorpe, Norfolk, who for some years served as a seaman under Lord Nelson, and latterly as his butler and confidential servant.  
*Lent by W. Cowley Stevenson, Esq.*
- 3227** Bâton, presented by William IV. to Admiral Lord Gambier.  
*Lent by Mrs. Gambier.*
- 3228** Uniform coat and waistcoat, old and well worn. It once belonged to Lord Nelson.  
*Lent by W. Eyre Matcham, Esq.*
- 3229** Diamond headed cane presented to Lord Nelson by the inhabitants of the Island of Yauba. This cane was given by Lord Nelson to his brother-in-law, Mr. Matcham.  
*Lent by W. Eyre Matcham, Esq.*
- 3230** Lord Nelson's washing stand, taken out of the Victory. The glass decanters, tumblers, and wine glasses bear the mark "N."  
*Lent by W. Eyre Matcham, Esq.*
- 3231** Bottle holder which contained the bottle of brandy that was used for Lord Nelson when he was wounded at the battle of Trafalgar. It was given to Mr. Cane, late of the Victoria Hotel, Dover, by a relative of Lord Nelson, and was presented to the Corporation in 1877 for the Dover Museum.  
*Lent by the Mayor and Corporation of Dover.*
- 3232** Boatswain's pipe, which belonged to Henry Burrows, Boatswain of H.M.S. Culloden, at the Battle of the Nile.  
*Lent by the Mayor and Corporation of Dover.*
- 3233** Copper bugle which belonged to Captain Alan Gardner, R.N., the Missionary to the Terra-del-Fuegians. It was found in his cave near his body. He and his companions, 16 in number, were driven from the Island where they had established their depôt, and could never regain the place owing to the strong westerly set of the current, and the westerly winds, added to their exhausted condition from the want of proper food. They lived on wild celery and any sea fowl they could kill. Scurvy was the cause of their death. They died (scattered up and down the beach) in August, 1851, and were found (their bodies being perfectly preserved owing to the intense cold) by the exploring party from H.M.S. Dido, 18, Capt. W. H. A. Morehead, C.B. The Bugle was found by the present owner, then a Lieutenant, R.M.  
*Lent by Major C. L. Atterbury Farmer, late R.M.L.I.*
- 3234** A carved oak over-mantel with gilt caryatid, and with the arms of Sir Thomas Howard, K.G., Earl of Surrey, and afterwards Duke of Norfolk, who, on May 4th, 1514, succeeded his brother, Sir Edward Howard, as Lord High Admiral. This over-mantel was formerly in the Admiralty Office at Deptford.  
*Lent by the Duke of Norfolk, K.G.*

- 3235 White ensign.** The flag which flew (half mast) over Lord Nelson's Funeral Car.  
*Lent by Horatio Elphinstone Rivers, Esq.*
- 3236 Lantern** taken by Lord Rodney, in 1782, from the stern of the French ship of the line, *Ville de Paris*, flagship of the Comte de Grasse.  
The ship had been presented by the city of Paris to Louis XV. in 1780, and was considered the finest ship then afloat. She unfortunately foundered on her passage to England, together with the *Glorieux*, a ship taken at the same time. *Lent by Horatio Elphinstone Rivers, Esq.*
- 3237 Medicine chest** with the following inscription on a plate "Lord Howe's Medicine Chest." This chest was with Lord Howe in the battle of the "Glorious First of June," 1794, and was purchased at the sale of his effects by the late T. P. Cooke, Esq.  
*Lent by Hugh M. Cumming, Esq.*
- 3238 A damask linen table cloth**, which once belonged to the late Lord Nelson, and which bears the initials H. N., 1800.  
*Lent by Maurice Nelson Girdlestone, Esq.*
- 3239 A nautilus shell** engraved as a trophy of Lord Nelson's victories.  
*Lent by Maurice Nelson Girdlestone, Esq.*
- 3240 A large shot** found in the Russian Naval Batteries, between the Malakoff and the Arsenal Forts. *Lent by the Earl of Portarlington.*
- 3241 Russian officer's pipe** found in the Russian trenches at Sevastopol. (The stem is modern.) *Lent by the Earl of Portarlington.*
- 3242 Piece of the granite walls of Sevastopol**, after explosion by the British Engineers. *Lent by the Earl of Portarlington.*
- 3243 Russian butcher's knife** found in the Russian trenches at Sevastopol. *Lent by the Earl of Portarlington.*
- 3244 Small incense burner**, taken from a ruined chapel at Sevastopol. *Lent by the Earl of Portarlington.*
- 3245 Uniform coat** once the property of Admiral the Hon. Sir W. Cornwallis. *Lent by Cornwallis Wykeham Martin, Esq.*
- 3246 Two epaulettes**, once the property of Admiral the Hon. Sir W. Cornwallis. *Lent by Cornwallis Wykeham Martin, Esq.*
- 3247 Ornament made of hippopotamus tusk** from Tanganyika.  
*Lent by Commander Verney Lovett Cameron, R.N., C.B., D.C.L.*
- 3248 Arab Buckler.**
- 3249 Chronometer Watch** presented by the Officers of the Royal Navy to Commander Cameron, R.N.
- 3250 Silver Inkstand** presented by the people of Shoreham, Kent, to Commander Cameron, R.N.
- 3251 Union Jack**—Syria and Mesopotamia, 1878-79; Africa, 1880-85.
- 3252 White ensign**—Syria and Mesopotamia, 1878-1879; Africa, 1880-85.
- 3253 Photograph across Africa.** Colours and Memorial tablet in Shoreham Church.
- 3254 Two Idols** from Kibanji, 1875.
- 3255 Pillow** (wooden head-rest) from Urua, 1875.

- 3256 **Double-barrelled rifle** taken by Commander Cameron across Africa, 1876.
- 3257 **Double-barrelled fowling piece** taken by Commander Cameron across Africa, 1876.
- 3258 **Revolver** taken by Commander Cameron across Africa, 1876.
- 3259 **Hunting Knife** taken by Commander Cameron across Africa, 1876.
- 3260 **Two boom boards** from H.M.S. *Star*, 1866-70.  
*Lent by Commander Verney Lovett Cameron, R.N., C.B., D.C.L.*
- 3261 **Chair and bed combined**, in which Vice-Admiral Lord Nelson sometimes slept when at sea.  
*Lent by W. Eyre Matcham, Esq.*
- 3262 **Small brass cannon**, made from a gun taken at the Siege of Gibraltar, 1782, and presented by Lord Heathfield to the owner's grandfather, who held an important civil appointment there.  
*Lent by Lieut.-Colonel Cockcraft.*
- 3264 **Piece of a shell** fired from H.M.S. *Condor* (Capt. Lord Charles Beresford), at Alexandria. It is mounted to serve as an inkstand.  
*Lent by B. W. Warhurst, Esq.*
- 3265 **Wheel lock spanner**, from the Spanish Armada. (From the Meyrick collection.)  
*Lent by Robert Ludgate Leigh, Esq.*
- 3266 **Small gold locket** of old-fashioned make, containing a lock of Lord Nelson's hair, cut off after death by the Rev. Dr. Scott (Chaplain of the Victory).  
*Lent by Vice-Admiral the Hon. W. C. Carpenter.*
- 3267 **Gold watch** which belonged to Major.-Gen. Farmar, 2nd Commandant R.M., Plymouth, in 1810. This watch was in the possession of General Farmar (then a Captain, R.M.) when a prisoner at Toulon, during the war with France.  
*Lent by Major C. L. Atterbury Farmar, late R.M.L.I.*
- 3268 **Silk flag** presented to Captain J. Cooke, of H.M.S. *Amethyst*, on the occasion of his taking H.R.H. the Duke of York to Holland, 1799.  
*Lent by Mrs. Rolles.*
- 3269 **The watch** of Captain the Hon. James Colville, R.N., commanding H.M.S. *Sunderland*, which foundered during a hurricane in Pondicherry Roads, 1761. The body of Captain Colville was washed ashore after six days, and the watch was then recovered.  
*Lent by Lord Colville of Culross.*
- 3270 **Pair of pistols** which were presented to Lord Nelson by Captain Thomas Masterman Hardy, June 18th, 1801.  
*Lent by Mrs. Blaikie.*
- 3271 **Pistol** from the Spanish Armada. (From the Meyrick collection.)  
*Lent by Robert Ludgate Leigh, Esq.*
- 3272 **Pistol** from H.M.S. *Mars*.  
*Lent by Robert Ludgate Leigh, Esq.*
- 3273 **Pistol** from the Victory when Lord Nelson was in command.  
*Lent by Robert Ludgate Leigh, Esq.*
- 3274 **Mourning ring of Lord Nelson**.  
*Lent by Montagu Guest, Esq.*

- 3275 Small flat circular box of oak.** Written on the lid inside, in ink, is "Bought at Plymouth, 1836, being made of the ship Bellerophon, which took Buonaparte to St. Helena."  
*Lent by Captain John H. Howard, R.N.*
- 3276 Small flat circular box of oak,** the lid inlaid with pine wood. Inside of the lid, a silver plate bears the inscription—"Hull of the Vanguard, mast of L'Orient."  
*Lent by Captain John H. Howard, R.N.*
- 3277 Work-box** made by George, son of Edward Young, one of the mutineers of the Bounty.  
*Lent by J. Brendon Cargenven, Esq.*
- 3278 Memorial ring,** one of a number given after the death of Lord Nelson to his relatives, and to his Captains and other officers.  
*Lent by Maurice Nelson Girdlestone, Esq.*
- 3279 Chronometer** presented to Captain Robert Campbell by the Captains of the first China Fleet, 1807.  
*Lent by Mrs. Pemberton.*
- 3280 Watch** presented to Captain Robert Campbell, R.N.  
*Lent by Mrs. M. J. Russell.*
- 3281 Enamelled watch** given by Lord Nelson to his sister, Mrs. Matcham, (the owner's grandmother), on her marriage.  
*Lent by Major-General Montgomery-Moore.*
- 3282 Watch** which belonged to Admiral the Hon. Sir William Cornwallis.  
*Lent by T. Wykeham Martin, Esq.*
- 3283 Watch** worn by Sir Edward Codrington at the battle of Navarino. It was crushed in his pocket by a splinter.  
*Lent by Major A. E. Codrington.*
- 3284 Nelson's gold seal,** engraved with his coat of arms.  
*Lent by Horatio Girdlestone, Esq.*
- 3285 Seal from the Spanish ship San Miguel,** captured at Gibraltar, 1782. The seal belonged to Admiral Sir Charles Henry Knowles, Bart., G.C.B.  
*Lent by the Misses Knowles.*
- 3286 Seal of Captain Cook,** with vignette portrait and date engraved  
*Lent by Alfred Hackman, Esq.*
- 3287 Knife** which belonged to Lord Nelson, with name, "Horatio Nelson, 1789." By pressing a spring the steel blade comes out. With the silver case it is a fruit knife.  
*Lent by Major-General Montgomery-Moore.*
- 3288 Chair** which belonged to Commodore Anson on board the Centurion. From this chair, it is said, he used to take his sights on the quarter-deck.  
*Lent by Admiral Anson.*
- 3289 Cloak** in which Lord Nelson is said to have been wrapped when wounded on the 21st October, 1805.  
*Lent by Captain John Durnford, R.N., D.S.O.*
- 3290 Oak tooth-pick case.** Belonged to Lord Nelson. Engraved, "Honor est a Nilo" (Horatio Nelson).  
*Lent by Captain Josceline Baget.*
- 3291 Fragment of flag** of H.M.S. Victory at Trafalgar, which served as the pall of Lord Nelson, at the funeral at St. Paul's, and which was torn in pieces, and handed to those standing around the vault.  
*Lent by Charles Taylor Philips, Esq.*

- 3292 **Admiral Blake's original sea chest.**

*Lent by the Rev. W. H. C. Ruddock.*

- 3293 **Telescope** which belonged to Captain (afterwards Admiral Lord) Collingwood at the Battle off Cape St. Vincent, 14th February, 1797.

Captain Collingwood commanded the *Excellent*; and the telescope was shattered by a ball which passed under his arm. He handed it to John Davis, the boatswain, saying: "A miss is as good as a mile: take this, and do something with it."

From Davis's family it passed, in 1854, to Miss Turner, of Sunbury, who gave it to the present owner in 1872.

*Lent by Lieutenant-Colonel Lean.*

- 3294 **Two linen table cloths and one Dinner Napkin**; presented to Admiral Vernon in commemoration of the taking of Portobello.

They are interwoven with ships and coats of arms of various towns; all different.

*Lent by Thomas Somers-Cocks, Esq.*

- 3295 **Mahogany arm chair**, one of a set of cabin chairs which belonged to Commodore Anson, and was part of the furniture of his cabin in the *Centurion* in her voyage round the world. Has been in the owner's family ever since.

*Lent by Deputy Surgeon General Hornsby Wright.*

- 3296 **Granite shot** as fired from the Turkish batteries in the Dardanelles in 1807.

*Lent by Admiral Sir George Duckworth-King, Bart., K.C.B.*

- 3297 **Velvet cap** worn by Admiral Blake.

*Lent by W. H. C. Ruddock, Esq.*

- 3298 **Another velvet cap** worn by Admiral Blake.

*Lent by W. H. C. Ruddock, Esq.*

- 3299 **Dress waistcoat** worn by Admiral Blake.

*Lent by W. H. C. Ruddock, Esq.*

- 3300 **Christening cap** worn by Admiral Blake.

*Lent by W. H. C. Ruddock, Esq.*

- 3301 **Christening robe** worn by Admiral Blake.

*Lent by W. H. C. Ruddock, Esq.*

- 3302 **Cap of Liberty** from the mast-head of the French frigate *Cléopâtre*, captured by the British frigate *Nymphé*, Captain Edward Pellew, afterwards Viscount Exmouth, on the 19th June, 1793.

*Lent by Viscount Exmouth.*

- 3303 **Spy glass** used by Admiral Lord Exmouth at the Battle of Algiers.

*Lent by Viscount Exmouth.*

- 3305 **Hat and coat** worn by Admiral Lord Exmouth at the Battle of Algiers.

*Lent by Viscount Exmouth.*

- 3306 **Piece of wood of the Chesapeake.**

*Lent by T. Wykeham-Martin, Esq.*

- 3307 **Gold chain and locket containing Lord Nelson's hair.**

These articles came into possession of the owner's family through George Ravenshaw, who was first lieutenant of the Spencer at the Battle of St. Domingo in 1806, and died at Jamaica in 1812.

*Lent by T. R. Ravenshaw, Esq.*

- 3308 **"Jack's Pitcher."** A curious tankard of earthenware, with the song "Hearts of Oak" on one side, and a picture on the reverse. A Lion in fighting attitude is on the top. (Old.)  
*Lent by Captain J. Eardley-Wilmot, R.N.*
- 3309 **Double-barrelled gun**, presented to the Sultan of Witu by the German Emperor. Found by Vice-Admiral the Hon. Sir E. R., Fremantle, K.C.B., at the taking of the Sultan's Palace at Witu (1890), and presented to him by the German Emperor (January, 1891).  
*Lent by Lord Cottesloe.*
- 3310 **Telescope** formerly belonging to Lord Nelson, inscribed—"This belonged to Lord Viscount Nelson, 21st October, 1805. Captain Fremantle, R.N., 21st October, 1805."  
*Lent by Lord Cottesloe.*
- 3311 **Apparatus** used by Her Majesty the Queen in launching H.M.S. Royal Arthur at Portsmouth, 26th February, 1891.
- 3312 **Do.**, as used for the floating out of dock of H.M.S. Royal Sovereign.  
*Lent by Chief Constructor, Portsmouth Dockyard.*
- 3313 **A lock of Lord Nelson's hair**, attached to a letter from Vice-Admiral Sir T. M. Hardy (Nelson's Flag Captain) to Sir Charles Bullen attesting its genuineness; the whole enclosed in a frame made from a portion of the hull of the Victory.  
At a fancy fair, held some 35 years ago in Willis's Rooms, in aid of the funds of the Royal Naval Female School, this relic was offered for sale at the stall of the Duchess of Northumberland, at the price of £25. As no purchaser offered, it was raffled for, and won by the Duchess, who presented it to the owner's father.  
*Lent by Mrs. A. P. Pleadwell.*
- 3314 **Lord Nelson's writing desk.**  
*Lent by W. Draxton, Esq.*
- 3315 **Garnet bracelet**, with miniature portrait of Admiral Lord Howe, K.G.  
*Lent by Miss Holtby.*
- 3316 **Medallion box**, with bust of Nelson: gun metal.  
*Lent by H. W. Clarke, Esq.*
- 3317 **Solid oak cabinet**, with five inlaid drawers. On the inside of the door is an inlaid representation of a man of war, believed to be the Centurion.  
This relic was the handiwork of Edward Collingwood, midshipman of the Centurion, during the celebrated voyage of circumnavigation made by Commodore Anson, 1740 to 1744.  
*Lent by Miss H. B. Collingwood.*
- Lent by Her Majesty the Queen.*
- 3318 **The Keys of Vigo.**
- 3319 **The Bullet that caused the Death of Admiral Lord Nelson.**
- 3320 **Portion of the mast of the Victory.**
- 3321 **Bar Shot fired at the Battle of Trafalgar.**
- 3322 **Model of a boat** presented by the inhabitants of the Pitcairn Islands, on the occasion of Her Majesty's Jubilee, 1887.

- 3323** One of the family mourning rings of Captain Cook, with a device worked in hair, believed to be the hair of Captain Cook.  
*Lent by Wm. Adams, Esq., F.R.C.S.*
- 3324** Box made of timber from H.M.S. Erebus, commanded by Captain Sir John Franklin.  
*Lent by Rev. J. G. Bird.*
- 3326** Piece of H.M.S. Fury, wrecked in Prince Regent's inlet in September, 1825.  
*Lent by Rev. J. G. Bird.*
- 3327** Brass tobacco box taken from one of the Dutch ships captured after the battle off Portland, 18th February, 1653. This box has been handed down to the seamen of the Furmidge family for six generations.  
*Lent by Mr. Frank Jackman (late Chief Gunners's Mate, R.N.)*
- 3328** Piece of petrified timber of H.M.S. Vanguard.  
*Lent by W. W. Ashley, Esq.*
- 3329** Chair made of wood from the Venerable, Admiral Duncan's flagship in the battle of Camperdown.  
*Lent by the Countess of Chichester.*
- 3330** Diamond memorial ring, with Nelson's hair, and inscription at back.  
*Lent by Messrs. Lambert & Co.*
- 3331** Tooth-pick case made from splinters of H.M.S. Victory; formerly the property of Sir Thomas M. Hardy.  
*Lent by Messrs. Lambert & Co.*
- 3332** Pair of spectacles worn by "Neptune" when H.M. Ship Inconstant crossed the line.  
*Lent by Messrs. Lambert & Co.*
- 3333** Old hour glass. The frame only is antique.  
*Lent by Messrs. Lambert & Co.*
- 3334** Brocaded silk house-wife, illustrating the victory of Camperdown.  
*Lent by Messrs. Lambert & Co.*
- 3335** Piece of the dress worn by Queen Elizabeth when she went to St. Paul's to return thanks for the defeat of the Spanish Armada.  
*Lent by Messrs. Lambert & Co.*
- 3336** Ten-inch shell from the bombardment of Alexandria, 11th July, 1882.  
This shell came through the port side of H.M.S. Alexandra above the armour, passing through the Torpedo Lieutenants' cabin, struck the combings of the engine room, and rolled along the main deck. Mr. Harding, the gunner, put it into a tub of water, for which action he received the Victoria Cross.  
*Lent by H.R.H. The Princess of Wales.*
- 3337** Ten-inch shell from the Bombardment of Alexandria, 11th July, 1882.  
This shell entered Captain Hotham's sleeping cabin on the port side, passed through a bed and chest of drawers, struck the combings of the Admiral's sky-light, and fell on to a table in the Admiral's dining-room, near the picture of H.R.H. The Princess of Wales.  
*Lent by H.R.H. The Princess of Wales.*
- 3338** Splinter broken from the stern gallery of H.M.S. Asia, in the Battle of Navarino.  
*Lent by Major A. E. Codrington.*

- 3339 **Flag** carried at the foretop-gallant-mast-head of H.M.S. Asia at the Battle of Navarino, 20th October, 1827.  
*Lent by Major A. E. Codrington.*
- 3340 **Shot** taken out of the side of H.M. Ship Victory after the Battle of Trafalgar. *Lent by the Admiral Superintendent, Chatham Dockyard.*
- 3341 **Pistol**, found in a ship which was discovered in St. Mary's Creek, Chatham; and which is supposed to be the St. Matthias, sunk during the descent made by Dutch on Chatham.  
*Lent by the Admiral Superintendent, Chatham Dockyard.*
- 3342 **Letter weight** used by Lord Nelson to steady his paper as he wrote the last codicil to his will, before the battle of Trafalgar; given to Mr. George Westphal, midshipman, when he left the Victory.  
*Lent by Mrs. A. Loftus-Tottenham.*
- 3343 **Missing bullion** from Lord Nelson's coat, which was placed under the head of Mr. (afterwards Sir George) Westphal, as he lay wounded in the cockpit of the Victory. The bullion was entangled in his hair, and had stuck to the wound from which it was cut away.  
*Lent by Mrs. A. Loftus-Tottenham.*
- 3344 **The breeches and under stockings** which Lord Nelson had on at the time when he was mortally wounded. When cut from his person, stained with blood, they were saved by Lieut. Lewis Rokeby, R.M., as a sad memorial of the day.  
*Lent by Miss Jane Douglas Rotely.*
- 3345 **Bill**, printed on satin, "Soirées Fantastiques, Melville Island, Friday, January 14th, 1853, Captain H. Kellett and Commander McClintock."  
*Lent by the Mayor and Corporation of Brighton.*
- 3346 **Playbill**, printed on satin, "Royal Arctic Theatre, Wednesday, Nov. 30th, 1853, H.M.S. Resolute, Captain H. Kellett, C.B."  
*Lent by the Mayor and Corporation of Brighton.*
- 3347 **Lord Nelson's telescope**, given to Lord Frederick Fitzroy by the latter's uncle, Admiral Sir T. M. Hardy, Nelson's Flag Captain at Trafalgar.  
*Lent by Lord Frederick Fitzroy.*
- 3348 **Cane**, always used by Admiral Viscount Exmouth.  
*Lent by Viscount Exmouth.*
- 3349 **Cocked Hat** worn by Lord Nelson at Copenhagen.  
*Lent by Messrs. Widdowson & Veale.*
- 3350 **Types of the British Navy** (Print), drawn from life. By F. DADD, R.A.  
*Lent by the Proprietors of the Graphic.*
- 3351 **Two models of birds** covered with gold. Picked up at Coomassie, 1873.  
*Lent by Lieut. G. R. Maltby, R.N.*
- 3352 **Watch** which belonged to Admiral Edgar. *Lent by J. C. Blackett, Esq.*
- 3354 **Seal** which belonged to Admiral Edgar. *Lent by J. C. Blackett, Esq.*
- 3355 **Pierced iron-plated part of side of H.M.S. Alexandra** where a shell entered during the bombardment of Alexandria.  
*Lent by Admiral Hotham, C.B.*
- 3356 **Part of an Egyptian shell** which fell on the lower deck of H.M.S. Alexandra, July 11th, 1882.  
*Lent by Admiral Hotham, C.B.*

- 3357 **Portion of the Royal George**, with ring and bolt.  
*Lent by Miss C. F. Troubridge.*
- 3358 **Lock of Nelson's hair** set in crystal and silver, and presented by Lord Nelson to Admiral Sir C. Tyler. Engraved and dated.  
*Lent by Lieut. G. W. Tyler, R.N.*
- 3359 **State chair** of Fumo Bakari, Sultan of Witu, found in the Sultan's Palace, and removed on the capture and destruction of that town, on 27th Oct., 1890, by an expedition composed of officers and men of the Royal Navy and Royal Marines from the following ships belonging to the East India squadron, Boadicea, Turquoise, Conquest, Cossack, Brisk, Kingfisher, Redbreast, Pigeon, Humber, and of 150 Police of the Imperial British East African Company.  
*Lent by Vice-Admiral Sir E. Fremantle, K.C.B., C.M.G.*
- 3360 **Handkerchief** tied round the head of Commissioner J. N. Inglefield at the wreck of the Centaur. This is shown in the picture of the wreck. (See No. .)  
*Lent by Admiral Sir Edward Inglefield, K.C.B., F.R.S.*
- 3361 **Watch** worn by Commissioner J. N. Inglefield when wrecked in H.M.S. Centaur.  
*Lent by Admiral Sir Edward Inglefield, K.C.B., F.R.S.*
- 3362 **Small drum** of the San Fiorenzo. *Lent by R. H. Crozier, Esq.*
- 3363 **Large drum** of the San Fiorenzo. *Lent by R. H. Crozier, Esq.*
- 3364 **Gold ring** taken from Lord Nelson's hand after death, and sent to Horatia Nelson.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3365 **Gold seal** given by Lord Nelson to Horatia Nelson.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3366 **Watch** given by Lord Nelson to Horatia Nelson.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3367 **The gold necklet with dog** mentioned in the history of Nelson's life.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3368 **Setting of the Order of the Bath.**  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3369 **The spectacles** worn by Admiral Lord Exmouth.  
*Lent by Viscount Exmouth.*
- 3370 **Memorial ring** of Lord Nelson.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3371 **Lord Nelson's official seal with crest.**  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3372 **Pair of pocket pistols**, used by Lord Nelson.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3373 **Letter weight**, used by Lord Nelson in his cabin.  
*Lent by Mrs. H. Nelson Nelson-Ward.*
- 3374 **Leather despatch box** which belonged to Admiral the Earl of St. Vincent.  
*Lent by the Earl of Northesk.*
- 3375 **D'Oily** marked with Nelson's coronet and monogram, and formerly belonging to him.  
*Lent by Arthur Rigg, Esq.*

- 3376 **Relic of the loss of H.M.S. Captain.** Ensign or Pendant Staff which was used as a tiller to steer the launch in which the survivors escaped when that ill-fated ship foundered off Cape Finisterre, in September, 1870. *Lent by C. W. Curtis, Esq.*
- 3377 **Three left-handed gloves** which belonged to Lord Nelson. *Lent by General Viscount Bridport, K.C.B.*
- 3378 **Captain Cook's speaking trumpet.** Used by him in his voyages round the world. *Lent by the Inspector General, Haslar Hospital.*
- 3379 **Dress shoe buckles of Lord Nelson.** *Lent by General Viscount Bridport, K.C.B.*
- 3380 **Mirror** used by Lord Nelson on board the Victory. *Lent by Mrs. H. Nelson Nelson-Ward.*
- 3381 **Piece of Oak** cut from the deck of the Victory where Lord Nelson fell, and sent to Horatia Nelson. *Lent by Mrs. H. Nelson Nelson-Ward.*
- 3382 **Jewel** given to Sir John Hawkins by Queen Elizabeth. *Lent by the Earl of Rosebery, K.T.*
- 3383 **Hat** worn by Admiral Robert Gawen when in command of a boat of H.M.S. Tonnant, in the attack on the American flotilla before New Orleans. He was badly wounded in the head.
- 3383A **Ensign or Pendant Staff**, which was used as a tiller to steer the Launch of the ill-fated ship Captain, when the survivors escaped from that ship on her foundering off Cape Finisterre, in September, 1870. *Lent by C. W. Curtis, Esq.*
- 3383B **Naval Epaulettes of 1813.** *Lent by Captain Sutton, R.N.*
- 3383C **Metal Cup and Case**, taken by Captain Cook in his voyages round the world. *Lent by Viscount Galway.*
- 3383D **A Piece of the Hangings of Horatia's Cot.** Given to her by Admiral Lord Nelson. *Lent by Mrs. H. Nelson Nelson-Ward.*
- 3383E **Dress Shoe Buckles** of Admiral Lord Nelson. *Lent by General Viscount Bridport, K.C.B.*
- 3383F **Box** containing in its lid splinters of the various ships captured on the Glorious 1st of June. *Lent by Earl Howe.*
- 3383G **Locket** containing the hair of Admiral Lord Nelson. *Lent by Mrs. H. Nelson Nelson-Ward.*
- 3383H **Trophy Medallion.** *Lent by Mrs. H. Nelson Nelson-Ward.*
- 3383I **Fetish Idol**, prayed to by King Kosoko; taken out of the King's Palace the day of the capture of Lagos, Bights of Benin, West Coast of Africa. Two stokers' heads were laying near on a table, killed the day previous. Dec. 1851. *Lent by Capt. W. S. de Kantzow, R.N.*

- 3383J **Box** used as his sea-chest by Admiral Richard Parker at the time of the mutiny of the *Nore*.  
*Lent by Professor Malcolm.*
- 3383K **Gold Box** presented by Admiral Barrington to Earl St. Vincent.  
*Lent by Lady Forester.*

Staff of **DIVERS**, with Apparatus, always ready for carrying out operations. 

On leaving the **ARTS SECTION** the visitor finds himself in the

## **HOWE GALLERY,**

containing a collection of exhibits which, as they could not well be classified in either of the Main Sections of the Exhibition, have all been collated here in the

## **MISCELLANEOUS SECTION.**

One of the principal exhibits in this section is that relating to the Victualling and Clothing of the Royal Navy, and in connection therewith the following remarks will be of interest.

### **VICTUALLING AND CLOTHING.**

The victualling of the Navy was formerly entrusted to Contractors under the direction of the Navy Board, a body of Commissioners distinct from, and subordinate to, the Board of Admiralty; they met originally at an office on Tower Hill, whence they removed, in the time of the Commonwealth, to the Navy Office in Crutched Friars.

In 1683, in consequence of the great abuses that arose, and the large profits made by the Contractors, the Navy Board took the victualling of the Fleet into their own hands, and deputed four of their number to carry it out. An office was allotted to them in the immediate vicinity of the Government store-houses on Tower Hill; but in 1742, the store-house accommodation being found to be quite inadequate, the whole of the manufactories, etc., were removed to Deptford, the Victualling Office itself being transferred to Somerset House. In 1832 the Victualling Board was abolished and a Comptroller of Victualling appointed, a title changed, in 1869, to Superintendent, and, in 1878, to Director, of Victualling. In 1869-70 the Victualling Office was removed from Somerset House to the Admiralty, Whitehall.

The three principal home Victualling Establishments are the Royal Victoria Yard at Deptford, the Royal Clarence at Gosport, and the Royal William at Plymouth; in addition to these there is one on a smaller scale at Haulbowline (Queenstown) which, within the last few years, has received the name of the Royal Alexandra Yard; there is also a Victualling Yard at Malta, and Victualling Depôts at Gibraltar, Halifax, Bermuda, Jamaica, Cape of Good Hope, Trincomalee, Hong Kong, Esquimalt, and Sydney.

At each of the three large Home Yards, manufactories of Biscuit, Flour, Oatmeal, Casks, etc., are carried on, and at Deptford, in addition, are manufactured the whole of the Chocolate, Mustard, and Pepper used in the Royal Navy; at Deptford also is received a large proportion of the articles

obtained by contract, such as Seamen's Clothing, Rum, Tobacco, Lime juice, Salt and Preserved Meat, Medical comforts, and the various items which find a place in the Victualling and Clothing Scale of the seamen of the Fleet. These articles, after they have been examined, are packed at Deptford, and distributed to the other Home Yards and the various Depôts abroad, the situation of Deptford, in the immediate vicinity of the Docks, rendering it peculiarly suitable for such a purpose.

*List of Exhibits of Seamen's Clothing, Food, etc. (NOTE.—The Food exhibits are limited to Articles actually manufactured at the Home Victualling Yards.)*

**From the Royal Victoria Yard, Deptford.**

Platinotype Photographs of Officers of the Royal Navy.
- 4032 **Symonds & Co.**, 39, *High Street, Portsmouth*.  
Photographs of Ships of the British Navy, and Yachting Scenes.

#### 4033 THE PHOTOGRAPHIC EXHIBIT.

Naval amateurs have so many advantages over the professional photographer in this class of work, that it was thought that if the carrying out of this exhibit was left in the hands of Naval men an interesting show of pictures could be placed before the public.

The whole of the Photographic work shown is, in some way or other, connected with the Navy, and is the work of amateur photographers in the Royal Navy. Many interesting pictures are presented of drills, explosions, manœuvres, life on board ship, ships of the Navy at sea and in harbour, yachts well known at Portsmouth and Plymouth, torpedo boats, &c.

Large-size works, in which the Naval Officers have, in some instances, been assisted by professionals, are shown, as also views of the interior of the Exhibition, and of the different details before the public

4033—*continued.*

within the grounds. Duplicates of any of these pictures may be ordered at the Stall, and books of 12 pictures typical of the life of a Blue-jacket, and other naval subjects, may also be purchased.

The whole of the proceeds of this exhibit will go towards the Funds of the Exhibition.

4034 **Anderson, Anderson & Anderson, 37, Queen Victoria Street, London, E.C.**

- (i.) The Navy Regulation Waterproofs.
- (ii.) Superior Gold Medal Oilskin Clothing (Coats, Jackets, Trousers, Leggings, Sou-Westerns, &c.).

4040 **Silicated Carbon Filter Co., Church Road, Battersea, S.W.**

Silicated Carbon Main Supply Filters for Ship's Tanks. Constant Supply Filters for Steward's Pantries. Wickered Filters for Ship's Cabins. Silicated Carbon Emigrants' and Travellers' Pocket Filters.

4041 **The Morris Tube, Ammunition, and Safety Range Company, Limited, 11, Haymarket, London, S.W.**

Morris Patent Circulating Filters, in Iron and Earthenware.

Morris Self-filling arrangement for Tank Filters.

4042. **T. Bowater Vernon, Wallington, Surrey.**  
The "Ceres" Automatic Letter and Card Files and their appliances. A new and simple method of keeping Letters, Cards, and documents of every description.
- 4043 **Holt Brothers, Eve Hill Works, Dudley, Staffordshire.**  
Turn up or Folding Ship's Berth. For first class passenger steamers, Yachts, &c., &c.
- 4044 **Salmon, Ody & Co., 292, Strand, London, W.C.**  
Surgical Instruments and Appliances.
- 4045 **Bishop Corfe's Mission to Corea, Rev. J. B. Harbord, Chairman ; (C. E. Baxter, Esq., Hon. Secretary), 150, Burnt Ash Hill, Lee, S.E.**  
Photographs, magazines, and articles illustrating the country and people of Corea, and the work of the Mission.
- 4046 **Royal Naval Scripture Readers' Society, 4, Trafalgar Square, W.C.**  
Papers and Pamphlets illustrative of the work of the Society.
- 4047 **The Shannon File Co., Limited, 2 & 3, Ropemaker Street, London, E.C.**  
The Shannon Filing System of Filing Documents and other labor-saving devices as applied to clerical work.
- 4048 **Adolf A. Stempel, 75, Albany Street, Regent's Park, N.W.**  
Gymnastic Apparatus (Stempel's portable and adjustable system).
- 4049 **Frank Bryan, 38, Charterhouse Square, London, E.C.**  
Fencing Jackets, Pads, Helmets, Foils, Cutlasses, Boxing Gloves, and other Gymnastic Apparatus.
- 4050 **George Spencer, 52, Goswell Road, and 2, Old Street, London.**  
Gymnastic Appliances, as supplied to the Admiralty, &c.
- 4051 **Merryweather & Sons, Greenwich Road, S.E., and 63, Long Acre, London, W.C.**  
(i.) One powerful Admiralty pattern Double Cylinder Portable "Greenwich" Steam Fire Engine.  
(ii.) One powerful Admiralty pattern Double Cylinder Stationary "Greenwich" Steam Fire Pump.  
(iii.) Portable "Valiant" Steam Pumping Engine.  
(iv.) One Fixed "Valiant" or "Natal" Pump on pedestal.  
(v.) Three Electric Lamps.  
(vi.) Numerous "Fire Stations," each consisting of a "London Brigade" Hand Pump, with set of Fire Buckets and fittings complete.  
(vii.) Fire Hose for Hydrants, with branch-pipes and necessary adjuncts.

NOTE.—Messrs. Merryweather & Sons have arranged with the Executive Committee that the whole of their Fire Engines and fire extinguishing apparatus shall be available for the extinction of fire, in the event of an outbreak occurring in the Exhibition buildings ; and the Firm has also been entrusted by the Committee with the sole instruction and drill of the Exhibition Fire Picquet.

On ascending the stairs at the end of the **HOWE GALLERY**, the **COOK GALLERY** is reached, and here the Exhibits of the **NAVIGATION SECTION** are chiefly quartered.

### NAVIGATION EXHIBITS.

THE name of **Cook** is associated with this gallery in memory of the greatest of English Navigators, Captain James Cook, F.R.S.

The exhibits in this Section are arranged in the following Sub-Divisions :—

- |                                |                             |
|--------------------------------|-----------------------------|
| (a) Arctic,                    | (e) Hydrography,            |
| (b) Signals,                   | (f) Compasses,              |
| (c) Lights, Buoys and Beacons, | (g) Navigating instruments, |
| (d) Marine Meteorology,        |                             |

these Sub-Divisions being named in the order in which they occur to a visitor passing from the main entrance to the left.

(a) **The Arctic Sub-Division** (in the Franklin Gallery) displays the appliances which have been employed in Arctic Navigation, many of them having been actually in use in those regions.

Many interesting relics illustrative of the history of Arctic research are shown in this Sub-Division, and especial attention should be given to the touching and unique remains of the Franklin Expedition. Conspicuous here also are many portraits of renowned Arctic Explorers, as well as the most authoritative paintings and drawings illustrative of the polar regions.

(b) **The Signals Sub-Division** is not large, as the apparatus employed in carrying on the Art is generally simple and not subject to great change. On the left is shown a series of lights and fog-signal apparatus, which illustrates the progress which has been made in what may be called Anti-Collision Signalling, for nearly the whole of this group is indicative of the growth of forty years' invention in this direction.

From the earliest times until about 1848, the practice was, when two ships were approaching each other at night, and one apprehended danger, that she should show two white lights in lanterns one over the other on her port (or left) side, or a single white light on her starboard (or right) side, according to the direction in which the dangerous ship was seen. When steamers began to increase, they carried a white light at the masthead to distinguish them from sailing vessels; and about 1848 they began to carry permanently the white light at the masthead, with a red light on the left side and a green light on the right side. Later, special instruments, such as steam whistles and fog horns, came into use for denoting the presence of ships to one another during fogs. The whole of this group exhibits the developments of the original idea, and the beauty and elaboration of the latest arrangements for large ships is very noteworthy.

In signalling proper, that is, the communication of intelligence from ship to ship at sea, progress is best illustrated by the group of Signal Books from the time of Charles II. onwards.

From the first, signals were made in the day-time by means of colored flags ; at night (a few signals only) by groups of white lights in different forms, and in fogs, not at all. Signalling by colored flags really reached its highest development at the hands of Sir Home Popham in 1816.

The Semaphore, which is now largely used in day-time instead of flags, was in existence for perhaps half a century before being adopted in the Service afloat. Mr. Redl, an Austrian gentleman, was the first to conceive, forty years ago, the idea of a signal system which might be nearly uniform in day-light, by night, and in fog. This is represented by our present flashing system.

(c) **The Lights, Buys and Beacons Sub-Division** is headed by the great light-house in the grounds, which is nearly 170 ft. high, and in conjunction with which is used Messrs. Chance's beautiful lenticular apparatus, developing the light produced by an electric current of 500 ampères and 60 volts, and sending out a light equal to 5,000,000 candles, the most powerful light in the world. In comparison with this marvellous development is shown the original Crescett light, which in the early days of navigation warned the navigator of his approach to St. Agnes in the Scilly Islands. The great gas and bell buoy, which is also exhibited in the grounds, is another development, enabling the navigator to thread his way through intricate channels at night and in fog.

Models of all the existing appliances for lighting and buoying channels, marking dangers, &c., are shown, as also a large chart illustrating the system of buoying channels. In this particular, also, the Exhibition is indebted to the kindness and exertions of the Elder Brethren of the Trinity House, assisted by the Commissioners of Northern Lights, for the interesting display, in this Section, of models of lighthouses, &c., from that of the first Eddystone down to the present day.

(d) **In the Marine Meteorology Sub-Division** the main points of the Science are fully illustrated, chiefly by Charts exhibiting the movements of air and water in different parts of the world. There are also Charts displaying the varying atmospheric pressure and the temperatures at the sea surface. The actual monthly current Charts are entirely novel, none such having been before attempted. The air movements affecting as they do the water currents are beautifully exemplified in Mr. Clayden's moving models. There is also an exhibit of a certain number of the instruments which are used in determining the data.

(e) **The Hydrographical Sub-Division** embraces a series of Charts from the earliest extant to one of the present day in process of preparation by the engraver. Here also are shown specimens illustrating the gradual development of the Chronometer to its present level of remarkable perfection (by these instruments the exact longitudinal position of points on the earth's surface is

fixed), and a complete collection of the various instruments used in surveying ; while it is interesting to note that the series of Sailing Directions exhibited represent the result of generations of study in the Science of Hydrography.

(f) The History of **Compasses** is in like manner made visible in the Sub-Division devoted thereto, by specimens of the oldest obtainable, down to the latest improvements of the day.

(g) Similarly in this Sub-Division the history of observation for the purposes of Navigation is made plain in the long series of **Instruments used in Navigation**, and in the series of books which are here exhibited, in which the mysteries of the art are traced down to the very latest treatise published this year.

### (b) SUB-DIVISION—SIGNALS.

Including Flags and Signals generally, Lights and Signals for preventing Collisions.

**4060 Messrs. W. Nunn & Co., London Street, London, E.C.**

Bow, Masthead, and Anchor Lanterns, and Mouth Foghorn, as used in the Royal Navy in 1860.

Bow, Masthead, and Anchor Lanterns, and Bellows Foghorn, as used in the Royal Navy in 1870.

Flashing Night Signal Apparatus, as first used officially in the Royal Navy in 1863 ; and "Drum" and "Shutter" Signals for use in the daytime.

**4061 Bow, Masthead, and Anchor Lanterns for Ships**, of the patterns in use at present in the Royal Navy.

**4062 Bow, Masthead, and Anchor Lanterns for Torpedo Boats**, as used in the Royal Navy.

**4063 Not under control Lantern**, as used in the Royal Navy.

**4064 Combined Lantern, Red and Green**, used in boats in the Royal Navy.

**4065 Signal Lanterns for Flashing Signals** at present used in the Royal Navy.

**4066 Signal Lantern, with Coloured Shades**, for use in Torpedo Boats.

**4967 Signal Flags and Pendants.**

*Lent by the Lords Commissioners of the Admiralty.*

**4068 Messrs. W. Nunn & Co., London Street, London, E.C.**

Bow, Masthead, Anchor, and Not under Control Lanterns, and Foghorns, as supplied to the Mercantile Marine :—

A Set (4) of Bow, Masthead, and Anchor Lanterns.

A Set (3) of Not under Control Lanterns.

A Tricolour Flash Stern Lantern.

A Set (3) of Not under Control Balls for use by day.

Four Foghorns — Small Corrugated, Large Pump, Aurora, and Norwegian.

**4069 Messrs. W. Harvie & Co., Broomielaw, Glasgow.**

Bow, Masthead, and Anchor Lanterns, as supplied to the Mercantile Marine :—

A Set (4) of Bow, Masthead, and Anchor Lanterns, No. 1 size.

A Set (4) of Bow, Masthead, and Anchor Lanterns, No. 2 size.

A Set (2) of Bow Lanterns of largest size for Ship's Tower, hung on Gimbals.

- 4070 Messrs. Ridsdale & Co., Minorities, London.**  
Bow, Masthead, Anchor, and Not under Control Lanterns, as supplied to the Mercantile Marine :—  
A Set (4) of Bow, Masthead, and Anchor Lanterns, No. 1 size.  
A Set (4) of Bow, Masthead, and Anchor Lanterns, No. 2 size.
- 4071 Messrs. Chance Bros. & Co., Lighthouse Works, Birmingham.**  
Bow, Masthead, Anchor, and Stern (or Overtaken) Lanterns, as supplied to the Mercantile Marine :—  
A Set (4) of Bow, Masthead, and Anchor Lanterns, in Lantern Mountings.  
A Set (2) of Turrets, displaying side lights of high power.  
A Stern (or Overtaken) Lantern.
- 4072 Messrs. Wolff & Co., Southampton.**  
Flags of the Royal Yacht Clubs.  
*NOTE.—Messrs. Wolff have also kindly furnished the Flags of Foreign Countries with the names of the great Navigators emblazoned thereon, which adorn this Gallery.*
- 4073 Clips for Signal Flags.**  
*Lent by Lieutenant E. F. Ingfield, R.N., H.M.S. "Melita."*  
SIGNAL BOOKS.
- 4074 Signal Book of James, Duke of York. About 1665.**  
This is a copy of the Signal Book by means of which most of our sea fights with the Dutch were conducted.  
*Lent by the Royal United Service Institution.*
- 4075 Signal Book, early in the 18th century.**
- 4076 MS. Signal Book of William and Mary, with descriptions of Anglo-Dutch Battles annotated by same Authority.**  
*Lent by the Lords Commissioners of the Admiralty.*
- 4077 Extracts from the Official Signal Book. By Jonathan Greenwood. 1714.**  
*Lent by William Lee, Esq.*
- 4078 Kempenfeldt's Signal Book.**  
Said to be the first improved Code of Signals in the British Navy, compiled by Rear-Admiral Kempenfeldt about 1781.  
*Lent by the Royal United Service Institution.*
- 4079 Withdrawn.**
- 4080 Signal Book No. 3. End of 18th century.**  
*Lent by the Lords Commissioners of the Admiralty.*
- 4081 Day Signal Book of 1799.**  
This is a copy of the Signal Book by means of which the battle of Trafalgar was fought.
- 4082 Night Signal Book of 1799.**
- 4083 Captain Sir Home Popham's "Telegraphic Signals and Marine Vocabulary," 1803.**  
This is the earliest arrangement by means of which ordinary messages could be sent from ship to ship in the day time. It was from an edition of this book that Nelson's celebrated signal was made. Henceforth, until 1887, there were in the Navy three signal books—(a) The General Signal Book for daylight, (b) The Telegraphic or Vocabulary

4083—*continued.*

Signal Book, also for daylight; and (c) The Night and Fog Signal Book.

4084 **Sir Home Popham's General and Telegraphic Signal Books, 1816.**

These books remained practically unaltered till 1868, being merely revised from time to time. *Lent by the Royal United Service Institution.*

4085 **Signal Book of 1827.**

*Lent by the Lords Commissioners of the Admiralty.*

4086 }  
to } *Withdrawn.*  
4088 }

4089 **Captain Marryatt's (The Novelist) Code of Signals in the Mercantile Marine, 1832.**

This Code lasted till 1866, when it was gradually suspended by the "Commercial," now the International "Code of Signals."

*Lent by the Royal United Service Institution.*

4090 **The Commercial Code of Signals, 1866.**

*Lent by Rear-Admiral Colomb.*

4096 **S. W. Wolff & Co., 75 & 76, High Street, Southampton.**

Naval, National, and Yacht Flags. Patent Pocket Signal Bag, containing International Code of Signals. Signal Book, coloured representations of Signals and Instructions for Signalling at Sea.

4097 **Benjamin Edgington, Limited, 2, Duke Street, London Bridge, London, S. E.**

Flags of the Royal Navy and Merchant Service.

International Code of Signals (Flags).

Foreign National Ensigns.

Colonial Flags and Badges.

Yacht Flags.

4098 **Holmes' Marine Life Protection Association, 8, Great Winchester Street, London, E. C.**

Holmes' Lights, Inextinguishable in Water. Life Buoy Rescue Lights. Deck Distress Flares, and Torpedo Indicating Lights (dummies).

Foghorns: Mechanical Blast Compound Reed, "Aurora," "Vicar of Bray," and "Little Squeaker."

Manwell's "Ready Life Saver," for Punching and Discharging a Holmes' Light with Life Buoy attached.

Sea Anchors and Oil Distributors: Lacey's Patent combined and separate; and Lacey's "Johnnie Dory" Oil Bag.

Life Line. Schermuly's Non-fouling Life Reel.

4099 **James Pain & Sons, 9, St. Mary Axe, London, E. C. Works, Mitcham, Surrey, and New York, U.S.A.**

Marine Night Signals (Pyrotechnic), Rocket, Life Saving Apparatus, Fog Signal Rockets, Sound Signals, Search Light Rockets, Pilot Signals, Special Code Signals, Trawlers' Red Flares (Pain's Patent), Meteor Rockets for Fishing Fleets, Life Buoy Lights, Deck Flares, Marine Roman Candles, Copper Friction Tubes, Pain's Patent Distress Signals, and Friction Blue Lights.

**4100 T. Andreasen, 27a, George Street, Docks, Cardiff.**  
Two Ships' Side Lights mounted in round cases and supported on Gimbals and attached to the light screen. One Masthead Lamp. One Anchor Lamp.

**4101 Wm. Harvie & Co., 222, Broomielaw, Glasgow.**  
Lamps and Lanterns for Navy and Mercantile Marine respectively. Engine Dynamo and Electric Fittings for Mercantile Marine.

**4102 Holmes' Lights Company, Limited, 18, Adam Street, Adelphi, Strand, London.**

Specimens of Holmes' Lights, showing those first introduced in 1869, and the Company's Improved Flag Brand Life Buoy Rescue Light, which burns about Two Hours.

Torpedo Finders as used by the Government, and invented by Mr. Joseph R. Holmes in 1876.

The "Beresford Detacher," an apparatus that when fixed on the stern quarter or bridge is under immediate control of the officer on duty, so that in the event of a man falling over-board, the officer simply pulls a handle which automatically perforates a Flag Brand Inextinguishable Light and disengages a life buoy at the same time.

The "Victory" Life Boat Equipment. A complete combination of all necessary gear under new Board of Trade Regulations.

**4103 Joseph Wells, Riverdale Works, Earlsfield, London, S.W., and 9, St. George's Road, Southwark, London, S.E.**

Dummy Samples of Signal Rockets, Distress Signals, Ships' Lights, Flares, Trawlers' Lights, and General Pyrotechnics.

**4104 Captain A. J. Loftus, S.R.N., F.R.G.S., Siamese Legation, S.W.**  
Patent Glycerine Side Lamps for Ships.

#### (c) SUB-DIVISION.—BUOYS AND BEACONS.

*Lent by the Corporation of Trinity House, London.*

**4106 Model of the First Eddystone Lighthouse.** First proposed to the Trinity House by Mr. Walter Whitfield in 1691, and built at his expense in 1694, in consideration of certain dues granted under patent from the Crown. Mr. Henry Winstanley, of Littlebury in Essex, designed and carried out the work, from which a light was first exhibited in October, 1698. In the following year he strengthened the tower and raised it 40 feet, or to a total height of 120 feet. The finished structure is shown in the model, and was continued "with great reputation" until the great storm of 26th November, 1703, during which it was destroyed, and the brave and devoted constructor, who happened to be there at the time, with workmen and keepers, perished.

"Many fair tombs in the glorious glooms

At Westminster they show;

The brave and the great lie there in state—

Winstanley lieth low."

(*Jean Ingelow.*)

**4107 The Second Eddystone Lighthouse.** The Winstanley Lighthouse having been destroyed by a great storm in 1703, the structure shown in the model was designed and completed by Mr. John Rudyerd, a silk mercer of Ludgate Hill, aided by two experienced shipwrights, Messrs. Smith and Norcott, from Woolwich dockyard. The tower was of wood, built around a core of solid moorstone (granite) in the base. Its greatest diameter was about 24 feet, and the whole height from the

*Lent by the Corporation of Trinity House—continued.*

lowest side of the top of the ball was 92 feet. The light consisted of 24 candles, of which five weighed 2 lbs., and was first kindled 28th July, 1708. The Lighthouse was accidentally destroyed by fire in 1755, when the keepers were rescued by boats from the shore, narrowly escaping with their lives.

**4108 The Third Eddystone Lighthouse.** After the burning of Rudyerd's wooden tower in 1755, on the recommendation of the Royal Society, the lessees placed the work of reconstruction in the hands of Mr. John Smeaton, a member of that Society, distinguished by his inventions in mechanical improvements. He determined to build the tower entirely of stone, each block dovetailed into its neighbours, so as to make the tower practically solid. Work was commenced at the rock on 5th August, 1756; the first stone laid June 12th, 1757, the last on 24th August, 1759, and the light exhibited by candles as before on 16th October, 1759. Candles were superseded by oil lamps and reflectors in 1810, and a lenticular apparatus adopted, 1845.

**4109 The Fourth Eddystone Lighthouse.** The portion of the gneiss rock on which Smeaton's tower rested having been seriously shaken by the sea, the Trinity House found it necessary to build another tower on a portion of the rock eastward of the existing light. The new tower was built, from the design and under the superintendence of Sir James Douglass, F.R.S., by Mr. Thomas Edmond and Mr. W. T. Douglass, resident engineers. First stone laid on August 19th, 1879, and the last on 1st June, 1881, both by His Royal Highness the Duke of Edinburgh. The base is 44 feet in diameter; the light, which is lenticular in bi-form, is 331 feet above high-water spring tides.

**4110 Ancient Pharos.** The tower here represented is now standing within the Castle Yard at Dover, and is mentioned by many early writers, Somner, Leland, Camden, &c.; as the remains of a Roman Pharos. It fell into ruin in the early part of the 18th century, but was recently restored by the Royal Engineers. The model was presented to the Trinity House by General Collinson, R.E.

**4111 Smalls Rock Lighthouses. First and Second.** The old light was exhibited from a wooden structure built in 1778 by Mr. Henry White-side, which was removed in 1861 when the new light was built of granite, from the design and under the superintendence of James Walker, Esq., F.R.S., by Mr. (now Sir) James N. Douglass, F.R.S.

THE Australian Irrigation Colonies (Chaffey Brothers) offer a pleasant occupation, a healthy life, a cheerful home, a soil of unequalled fertility—producing by irrigation results unparalleled in the annals of Horticulture—comfort, civilization, and material prosperity combined. They consist of half-a-million acres, in the sunny and salubrious climate of Victoria, and South Australia, on the great River Murray, which affords an abundant supply of fertilizing water for the Irrigation of Vineyards and Fruit Farms, and for the production, in assured quantity and excellence, of Grapes, Oranges, Lemons, Olives, Apricots, Figs, and other Fruits (already so successfully grown in Australia), by Cultivators with large and small Capital, holding from Ten to Eighty Acres and upwards. The Wines and Fruits of Australia are now in extensive demand in British and Colonial Markets, and there is a practically unlimited field for such production under most profitable conditions to the Settlers. Pamphlet Free. Address the Chief Commissioner, Mr. J. E. Matthew Vincent, 35, Queen Victoria Street, E.C., from whom all information, &c., may be obtained, also an illustrated folio descriptive work, price 2s. 6d.—*Advf.*

*Lent by the Corporation of Trinity House—continued.*

- 4112 Trinity House Douglass Burners.** A set of progressive sizes, from two to ten wicks for vegetable or mineral oil, and one of ten rings for gas.
- 4113 Nore and Dudgeon Light Ships, 1731, 1736.** This model represents the first Light Ships moored on the English coast for the guidance of Mariners; two were fitted out by Mr. Robert Hamblin and Mr. David Avery, one placed to mark the Nore Sand, River Thames, and one off the Dudgeon Shoal, Norfolk.
- 4114 Goodwin Light Ship, 1795.**
- 4115 Parabolic Reflector for Lighthouses or Light Vessels.** The Reflector is made of copper, of 21 inches aperture, upon the principle first applied by Captain Sir Joseph Huddart, F.R.S., an Elder Brother of the Trinity House; it is silvered on the inside, and burnished. For a shore light it is fixed on a framework, but in light vessels it is hung upon gimbals.
- 4116 Maplin Pile Lighthouse.** Built in 1838, on iron screw piles on the north side of the Thames Estuary, under the direction of James Walker, Esq., F.R.S., then Engineer-in-Chief to the Trinity House.  
The Light is 36 feet above high water. The piles are all screwed 14 feet into the sand by Mitchell's patent screw, four feet diameter. The separate model represents the lower portion of the pile.
- 4117 Plano-Convex Lens.** Used in Portland Lighthouses, Dorsetshire, in the year 1789.
- 4118 Facet Reflector.** Specimen of a Reflector of 21 inches aperture, and Lamp, used first at Liverpool under the direction of Mr. Thomas Hutchinson, in 1763, and afterwards at Lowestoft and other lighthouses.
- 4119 Model of Bishop Rock Lighthouse, 1858—1881.** Built in place of an uncompleted iron structure from designs by James Walker, Esq., F.R.S., by Mr. Nicholas Douglass, assisted by Mr. (now Sir) J. N. Douglass, F.R.S., completed in 1858. The light was 110 feet above high water.
- 4120 Bishop Rock Present Lighthouse.** In consequence of injuries sustained through excessive strains, the Trinity House found it necessary to encase the tower then existing with granite masonry, and increase the height of the light by 20 ft., which was successfully carried out by Mr. W. T. Douglass, under the supervision of Sir James N. Douglass, F.R.S., and finished in 1889.
- 4121 Model of St. Catherine's Lighthouse.** Originally established in 1780, reduced in height as a precaution against landslip in 1840, and furnished with an electric light in 1888. It is believed to be the most powerful electric light in the world.
- 4121A Model of the Needles Lighthouse.** The Light which had been exhibited since 1780 from a Tower on the Isle of Wight was frequently obscured by Fog. It was therefore transferred in 1858 to the present structure built on the rock itself. This Tower was designed by Mr. James Walker, F.R.S., and was carried out under the superintendence of Mr. Thomas Ormiston, M.Inst.C.E. The works were frequently inspected during progress by H.R.H. The Prince Consort, then Master of the Corporation of Trinity House.

*Lent by the Corporation of Trinity House—continued.*

- 4121B Model of the Hanois Lighthouse.** Built in 1862 on a rock lying off the West End of Guernsey. A granite structure designed by Mr. James Walker, F.R.S., and erected under the superintendence of Mr. William Douglass, M.I.C.E. The optical apparatus is dioptric of the First Order, revolving, having a six wick Douglass Lamp in focus. The Tower from base to vane is 117 feet in height.
- 4121C Model of the Little Basses Lighthouse.** Built on the Little Basses Rock, S. E. coast of Ceylon, in 1876. The work was entrusted to the Corporation of Trinity House upon the completion of that on the Great Basses. It was designed by Sir James N. Douglass, their Engineer-in-Chief, and carried out under the superintendence of Mr. W. Douglass, M.I.C.E.
- 4122 Siren Fog Signal.** The Siren, used in conjunction with a trumpet, was introduced as a Fog Signal in the United States, and adopted in England about the year 1874. In its present improved form the rotary action is automatic.
- 4124 Small Lens for Gas Buoys.**
- 4125 Douglass Fluted Craterless Carbons for Electric Lights.** Specimen of those used at St. Catherine's Lighthouse, Isle of Wight. Devised by Sir James N. Douglass, F.R.S., for preventing the formation of a crater, and holding the arc centrally at the points of the carbons.  
Smaller carbons of various sizes from their earliest introduction.
- 4125A Electric Light Carbons.** Specimen of Carbons—the small size used at Dungeness in 1862, and the large at St. Catherine's, 1889.
- 4125B Gas Burner, Douglass Six Ring.** Designed by Sir James N. Douglass, F.R.S., with the object of obtaining the maximum of intensity within the smallest practicable focal area. The intensity of the flame is 825 candle units, its consumption of gas 101'2 feet per hour.
- 4126 Smeaton's Eddystone Candle.** The light, as first arranged was given by 24 candles ("whereof five weighed two pounds"), arranged on a chandelier in two rows or rings, one above another.
- 4127 Panel of a First Order Lenticular Apparatus.** Made by Messrs. Cookson, of Newcastle, and placed in the Start Lighthouse in 1836.
- 4127A Refracting Lenticular Panel.** One of the Panels used in the experiments on Lighthouse Illuminants and called in the report the "Eddy stone Lens." Subtending a larger vertical angle than had before been attempted, in order to avoid the loss occasioned by the suppression of upper and lower prisms. The focal length is 920 mm. and subtends an angle of 60° horizontally, so that six panels would complete the circle. Its superficial dimensions are 75½ inches by 40½ inches.
- 4128 Dungeness Lens Electric Light.** When the Electric Light was first exhibited permanently at Dungeness in 1862, after experimental exhibition at South Foreland in 1858, this Electric Lamp and special lens were used in duplicate, one set above the other, under the direction of Professor Holmes and Professor Faraday, F.R.S.

*Lent by the Corporation of Trinity House—continued.*

- 4129 Smeaton's Clock.** "This Timepiece, by a simple contrivance, being made to strike a single blow every half hour, would thereby warn the keepers to snuff the candles."—(Smeaton's Eddystone.)
- 4130 Models of Light Vessels.** The latest type of Light Ship used in the Trinity House service. The length of the vessel is 103 feet, breadth 23 ft. 6 ins., and depth 12 ft. 10 ins., displacement about 250 tons.
- 4130A** Another model of a Light Ship in use until lately in the Trinity service, similar to the above, but of an older type, and stationed at the "Goodwin."
- 4130B Model of a Light Ship.** Built in 1883. Tonnage, 183·35. Length, 103 feet; depth, 10·3; and breadth, 21·3. Moored in 39 fathoms on the Seven Stones, a reef of rocks to the northward of the Scilly Islands. The light is group flashing, three flashes in quick succession at intervals of one minute. The Fog Signal is a Siren giving three blasts in quick succession, low—high—low, every two minutes.
- 4130C "Warden" Steam Tender.** Built in 1884. Gross Tonnage, 245·95. Length between perpendiculars, 135 feet; breadth, 22 feet; depth moulded, 11·6 feet. Bi-compound Engines. Twin screws. Indicated H.P., 376·3. Speed, 10·1 knots. Stationed at Ramsgate for attendance on 6 Light Vessels, 27 Buoys, and 5 Lighthouses situate between the North Foreland and Beachy Head.
- 4130D "Satellite" Steam Tender.** Built in 1886. Gross Tonnage, 242·39. Length between perpendiculars, 141·2 feet; breadth, 22·1 feet; depth moulded, 11·45 feet. Tri-compound Engines. Twin screws. Indicated H.P., 478·36. Speed, 10·928 knots. Stationed at Harwich for attendance on 8 Light Vessels, 47 Buoys, and 7 Lighthouses situate chiefly between Aldborough and the Gunfleet Light.
- 4131 Models of Buoys.** Types of Buoys now in use in the Trinity House service. The different forms and mountings accord with the decisions of the Buoyage Conference, held at the Trinity House, in 1882-3, under the Presidency of His Royal Highness the Duke of Edinburgh.
- 4132 Lighthouse and Buoyage Diagrams.** River Thames, approaches, showing buoyage. River Mersey, approaches, showing buoyage. Smeaton's Eddystone, section and plans. Douglass' Eddystone, section and plans. Bishop Rock Lighthouse, section and plans. New Bishop Rock Lighthouse, section and plans. Wolf Rock Lighthouse, elevation and section. Little Basses Lighthouse, section. Little Basses, plan of land and arrangements. St. Catherine's Electric Light, section. St. Catherine's Electric Light, plan. Dimensions of Lamp Flames, 2 wick to 10 wick.

*Lent by the Commissioners of Northern Lighthouses.*

- 4133 Bell Rock Lighthouse.** Situated on a reef of rocks in the North Sea, 12 miles from Arbroath, the nearest land, and covered by 16 feet of water at high water of spring tides. Designed and executed by Robert Stevenson, F.R.S.E., F.G.S., M. Inst. C.E., and Engineer to the Commissioners of Northern Lighthouses. Height of masonry 100 feet, diameter at base 42 feet. Commenced 1807, finished 1811. Now the oldest Rock Lighthouse Tower in Great Britain.

*Lent by the Commissioners of Northern Lighthouses—continued.*

- 4134 Skerryvore Lighthouse.** Situated on a reef of rocks on the west of Scotland, exposed to the force of the Atlantic Ocean, and 10 miles from Tyree, the nearest inhabited island. Designed and executed by Alan Stevenson, L.L.B., F.R.S.E., M.Inst.C.E., and Engineer to the Commissioners of Northern Lighthouses. Height of masonry 141 feet, diameter at base 42 feet. Commenced 1838, finished 1844.
- 4135 North Unst Lighthouse.** Situated on the Rock Muckle Flugga (the most northern point of Her Majesty's Dominions), Shetland. It is built on an outlying rock of a conical form called a "Stack," rising to the height of 200 feet above high water, to which height the sea has been known to rise with such force as to knock down the boundary walls and break the doors open. Its northern face is nearly perpendicular, and exposed to the full fetch of the Northern Ocean; the southern face is a steep rocky slope, which, previous to the cutting of steps in its surface, could only be scaled with difficulty. The top of the rock affords little more area than is sufficient for the site of the lighthouse. A temporary light was erected in 1854 for the guidance of the Baltic Fleet, and the permanent station was completed in 1858. Designed and executed by David Stevenson, F.R.S.E., M.Inst.C.E., Engineer to the Commissioners of Northern Lighthouses.
- 4136 Facet Parabolic Reflector.** As used in the earliest Scottish Lighthouses in 1787 by Thomas Smith, Engineer to the Commissioners of Northern Lighthouses.
- 4137 Silver Plated Parabolic Reflector.** With sliding lamp to secure accurate focussing. Designed by Robert Stevenson, Engineer to the Northern Lighthouse Board, 1811.
- 4138 Skerryvore Catadioptric Revolving Apparatus.** With Fresnel's lenses, but extended to 56° in altitude. The light is received and collected into eight horizontal beams by the principal lenses; the light which would escape above them is collected into eight inclined beams by small lenses, and reflected to the horizon by inclined mirrors. The lower part of the light is sent equally to all parts of the horizon by Alan Stevenson's prismatic rings of glass, which act as mirrors. The rings at Skerryvore are the first that were made of the largest or first Order size.  
Designed by Alan Stevenson, L.L.B., F.R.S.E., M.Inst.C.E., Engineer to the Northern Lighthouse Board.  $\frac{1}{3}$ th of full size.
- 4139 First Order Holophotal Revolving Apparatus.** The central part of this apparatus consists of eight lenses. The light which passes above and below these lenses is collected into eight horizontal beams by annular shaped reflecting prisms. These reflecting prisms were substituted for the inclined lenses and mirrors of Fresnel's first Order revolving apparatus by Thomas Stevenson, and were first used at Singapore in 1849, on a small scale, and on a large scale at North Ronaldsay, in Orkney, in 1851, both designed by Messrs. Stevenson.  $\frac{1}{3}$ th of full size.
- 4140 Fixed Azimuthal Condensing Light.** Designed by Thomas Stevenson for Sounds or narrow Seas of varying width, where the light requires to be seen farther off in some directions than in others, and where the whole horizon does not need to be illuminated. The light which would otherwise be wasted on the land, instead of being

*Lent by the Commissioners of Northern Lighthouses—continued.*

merely returned through the centre of the apparatus in the usual way, is gathered by refraction and prismatic reflection, and allocated in the exact proportions required for strengthening the arcs of largest range. It is used at nine Lighthouses in the Western Highlands of Scotland, where small apparatus has been made to produce in those particular azimuths (where alone great power is required) effects equal to much larger apparatus, consuming proportionately large quantities of oil.

**4141 Azimuthal Condensing Ships' Light**, designed to distribute the whole light equally over ten points of compass, in accordance with the Board of Trade requirements. Applied first in 1866 to the Pharos, Northern Lighthouse Steamer. Designed by D. and T. Stevenson, Engineers to the Commissioners of Northern Lighthouses.

**4142 Hyper-Radiant Lens of 1330<sup>mm</sup>**, in place of 920<sup>mm</sup> radius, suggested by Messrs. Stevenson in 1869, with the view of utilizing to the full the flame from the larger diameter of burners recently introduced, this, the first lens of its size, was made to Messrs. Stevenson's design in 1885, and tried at the South Foreland experiments the same year, when it was found to be optically the most efficient lighting apparatus yet made, and has since been introduced into numerous lighthouses at home and abroad.

**4143 Dioptric Holophote.** This apparatus was designed by Thomas Stevenson for Lighthouse Illumination. It collects all the light of the lamp into one beam of parallel rays solely by means of glass.

The apparatus constituting the front half of the instrument bends the light that falls upon it into a beam of parallel rays, while the prisms which constitute the back half are so formed as to prevent any light from passing through, and to cause every ray to return back to the flame, and to be finally transmitted through the front half, so as to increase the intensity of the emergent beam.

A red ball is fixed on a wire so as to be in focus to illustrate the action of the instrument. To an observer the front half of the apparatus will appear full of red light, but in the back half no red is to be seen, though the wire which carries the ball, not being in focus, is distinctly visible.

**4144 Dhu Heartach Lighthouse.** Situated on a rock on the West Coast of Scotland, exposed to the force of the Atlantic Ocean, and fourteen miles from Iona, the nearest land. Designed and executed by D. and T. Stevenson, Engineers to the Commissioners of Northern Lighthouses. Height of masonry 107 feet 9 inches, diameter at base 36 feet. Commenced 1867, finished 1872.

**4145 Model of First Order fixed Dioptric Light.** This apparatus consists of a central lenticular belt, and an upper and lower set of reflecting prisms. The cylindrical belt with diagonal joints and the upper and lower reflecting prisms were substituted by Alan Stevenson in 1836 for the segmental belt and upper and lower silvered mirrors of Fresnel's first order apparatus.  $\frac{1}{2}$  of full size.

**4146 Smalls Lighthouse.** A wooden model of the Smalls Lighthouse, off the Pembrokeshire Coast, Bristol Channel, erected in 1778, replaced in 1861 by the present granite lighthouse.

The model is an exact representation of the Smalls Lighthouse in the

Bristol Channel, projected by John Phillips, Esq., of Liverpool, built by Henry Whiteside, a self-taught mechanic of Liverpool, in 1778. It stood on a bare rock rising little more than 10 feet above high water. The lighthouse was built on wooden pillars, 40 feet from the ground, the entire building being 58 feet high, and standing 70 feet above high water. In 1861 this was replaced by a granite lighthouse.

*Lent by Miss Payne, 2, Westerhall Villas, Weymouth.*

- 4147 **Smeaton Eddystone Lighthouse.** Original model of the Eddystone Lighthouse, constructed by John Smeaton, Esq., F.R.S., and which was made by himself, and has been in the possession of the family of his grandson, John Croft Brooke, since the death of Mr. Smeaton.

*Lent by Miss Mary Croft Brooke, Hildenborough Vicarage, Tunbridge, Kent.*

- 4148 **A "Nun Buoy"** belonging to the yacht of His Majesty George IV. This exhibit is an "Anchor Buoy," same pattern as that now known in the Service as a "Nun Buoy." This buoy was used by the "Royal George" Yacht, of King George the Fourth. A statement to this effect is painted on the buoy.

*Lent by Admiral-Superintendent W. E. Gordon, H.M. Dockyard, Portsmouth.*

#### (d) SUB-DIVISION—MARINE METEOROLOGY.

- 4151 **Case of Instruments.**

Specimens of instruments used in the Royal Navy, viz.:—Coast Barometer: this has a tube with large bore mounted in a solid oak frame, with porcelain scales, the vernier reading to 0.1 inch. Wind Gauge, pattern devised by Sir W. Snow Harris: an Improved form of Lind's Anemometer. Hand Anemometer, devised by F. Galton, F.R.S. Self-Recording Aneroid, fitted for use at sea. Mercurial Barometer. Aneroid. Two Thermometers in Screen, fitted as a Hygrometer. Hydrometer. Thermometer for Sea Temperature. Instruments occasionally used. Maximum Thermometer. Minimum Thermometer. Sling Thermometer. Rain Gauge. Instructions for taking the observations. Log and Rough Book. Marine Barometer, pattern used prior to 1854.

*Lent by the Meteorological Office.*

### OUR NAVIES.

#### THE "WARSPITE" TRAINING SHIP.

PATRON.—HER MAJESTY THE QUEEN.

President.—The Right Honourable the EARL OF ROMNEY.

Treasurer.—J. F. W. DEACON, Esq.

Over 61,000 boys have been sent to sea. Over 27,000 have been drafted to the Royal Navy. **No Voting.** The benefits of this Society are not reserved for those whose influential friends can obtain votes to secure their admission, but reach at once the orphan and friendless.

All taught swimming.

**Donations and Subscriptions urgently needed.**

Bankers:—Williams, Deacon & Co., 20, Birchin Lane, E.C.; Coutts, No. 57, Strand; and Goslings & Sharpe, 19, Fleet Street, E.C., who will receive subscriptions.

Marine Society's temporary Offices, 14, St. Mary Axe, E.C.

See Exhibit in Howe Gallery, 168a.

H. W. ANDREWS, R.N., Secretary.

**4152 Clayden's "Ocean Current Models."**

1. Working model showing the Gulf Stream, and other great currents in the Atlantic.

2. Working model showing the currents of the Indian Ocean, and the change they undergo with the change of the monsoons.

In both models the movement of the water is shown by floating particles of *Lycopodium* powder. The motion is entirely produced by jets of air impinging on the water, and arranged so as to imitate roughly the average direction of the wind.

*Lent by A. W. Clayden, F.R.Met.Soc.*

**4153 Barometer by Daniel Quare.** The patent for this form of instrument is dated August 2, 1695. It is not almarine barometer, but is constructed so as to be transportable without loss of mercury.

*Lent by Evan Roberts, Esq., Manchester.*

**4153A Marine Barometer, pattern used prior to 1854.**

*Lent by L. P. Casella, F.R.Met.Soc.*

**4154 Model of a Storm Signal Station, exhibiting Cone:**

*Lent by the Meteorological Council.*

**4158 A. Légé & Co., 31 and 32, Kirby Street, Hatton Garden, E.C.**

Roberts's Tide-Predicting Machine.

A. Légé & Co.'s Combined Tide Gauge, Wind Gauge and Barograph for automatically recording the variations of the tide, the direction and velocity of the wind, and the fluctuations of the barometer.

Légé's Patent Mobile Torpedo.

The "Helix" Automatic Deep-Sea Sounder.

**CHARTS ON SCREENS.—SCREEN A.**

*Lent by the Meteorological Office, 63, Victoria Street, S.W.*

**4159 Charts showing the Mean Barometrical Pressure over the Atlantic, Indian, and Pacific Oceans for the month of February, for the four quarterly months, and for the year. (Five Charts.)**

The larger figures on these Charts are the barometrical means for areas of 5° of Lat. by 5° of Long., the smaller those for areas of 2° of Lat. by 2° of Long., obtained from daily averages. The range, to the nearest tenth of an inch for each 5° area, is placed over the mean for that area, and the number of days' observations under it. At coast stations and islands the mean pressure is also given, and under it the number of years for which observations were available. The means are expressed in decimals of an inch, the unit figure of the inches being prefixed where necessary. Observations obtained from the publications of Foreign Institutions, or from the published records of foreign voyages of discovery, are marked by the insertion of distinguishing letters, viz., A. The United States, Au. Austria, D. The Netherlands, F. France, N. Norway, R. Russia. Lines of equal barometric pressure (Isobars) are drawn from the means of the 5° areas, and their values are indicated in inches and decimals. The observations have been corrected for altitude above the sea, and reduced to 32° Fah.; but not for gravity, as affected by latitude. Tables for introducing this latter correction are given on the Charts.

**4160 Charts showing the Surface Temperature of the Atlantic, Indian, and Pacific Oceans for the month of February. (Four Charts, one for each Ocean, and one for the four quarterly months.)**

The Sea Surface Temperatures on these Charts represent the average of all the observations taken in rectangular areas contained by 2° of Lat. and 2° of Long., except where the disposition of the observations is irregular or in regions where the range is great and the means have been calculated for smaller areas. Where single observations are used, they are placed in Geographical position. The small

*Lent by the Meteorological Office—continued.*

figures below the mean temperatures indicate the range of temperature. Exceptional range areas are shaded blue and are bounded by a single line when the range is between  $10^{\circ}$  and  $20^{\circ}$ , and by a double line when it exceeds those limits. The lines of equal temperature (Isotherms) are drawn for every fifth degree Fahrenheit, and in the lower latitudes lines representing one or more degrees of different temperature have occasionally been introduced.

## SCREEN B.

**4161 Charts of Cyclone Tracks** in the South Indian Ocean. (9 charts.)

These Charts embrace the period from 1848 to 1885 inclusive, extending over 38 years; but for the years 1849, 1850, and 1853 no reports of Cyclones were received. The information for June and July is given on one sheet. No cyclones are recorded in August or September. An explanation of the symbols employed is given on each Chart.

**4162 Charts** showing the Sea Surface Temperature, Wind, Current, Sea Disturbance, and Mist off Cape Guardafui and Ras Hafun. (13 sheets.) A Chart for each month of the year, and an Abstract Chart on a smaller scale.

## SCREEN C.

**4163 Barometer and Wind Diagrams.** (2 on one sheet.)

These Diagrams illustrate the oscillations of the Barometer as recorded by a steamer during a passage from England to New York, and also from New York to England. In the former case, a vessel crossing the Atlantic will meet the advancing storm systems which commonly travel from West to East, while in the latter case she is keeping company with them. They are types of the differences experienced, which are so great that it is often possible to tell whether a vessel was steering to the eastward or westward by a comparison of the barometrical curves alone.

**4164 Daily Synchronous Weather Charts** of the North Atlantic and the adjacent Continents for the month of February, 1883. (10 sheets, as specimens.)

There are two Charts for each day, one showing the Barometric Pressure, the Wind, and the Weather; the other showing the Temperature of the Air and Sea, and the Weather. An explanation of the symbols employed is given on each Chart.

## ON THE WALL.

**4165 Current Charts of the Atlantic and Indian Oceans.**

There are two Charts, viz., one for each Ocean. They are specimens of the actual working Charts now in process of construction at the Meteorological Office. The Arrows shown on the Charts are the Currents experienced in 24 hours. The scale of the Arrows is one inch to one hundred miles of current. A small circle indicates "no current."

**4166 Map** showing the Stations from which Telegraphic Intelligence of Weather is received at the Meteorological Office, and also the Stations at which Storm Warnings are displayed.**4167 Map** showing the Stations at which public Barometers are maintained by the Meteorological Office for the use of Fishermen.

## (c) SUB-DIVISION—HYDROGRAPHY.

## CHARTS.

*Exhibited by the Hydrographic Department of the Admiralty.*

## I.—CHARTS ON SCREENS IN CENTRE OF COOK'S GALLERY.

- 4171 (*a to o*) **A Series of Charts** (15 in number) of the River Thames entrances from 1580 to 1890, to illustrate the changes that have occurred from time to time in the configuration and depths of the numerous shoals at its mouth, and also the practical improvement of surveys and chart engraving. *The earliest chart of this series is lent by the Marquis of Salisbury.*
- 4172 (*a to g*) **Admiralty Wind and Current Charts** (7 in number), showing the prevailing winds at various seasons over the Oceans, and also the direction and velocity of the several oceanic drift and stream currents. It will be noticed that among these are special Charts for the Atlantic.
- 4173 (*a to i*) **Nine published Plans of the Principal Ports of Australasia**, viz. :—Moreton Bay (Brisbane), Port Jackson (Sydney), King George Sound and Princess Royal Harbour (Albany), Auckland Harbour, Port Nicholson (Wellington), Port Darwin, Port Phillip (Melbourne), Port Adelaide, Port Hobart.
- 4174 (*a to e*) **Four Original Surveys** and one printed Chart of Cardigan Bay at different periods from 1681 to 1890, showing how surveys have gradually improved.
- 4175 **Three Selected Original Surveys**, with published Charts, viz. :—South Approaches to Yang-tse-Kiang (China), North Coast of Donegal Bay (Ireland), and Jebel Zukur and Hanish Islands (Red Sea); also plan of Gibraltar.
- 4176 (*a and b*) **North Atlantic Ocean** (two Charts)—one of the year 1803, the other 1890—to illustrate particularly our present knowledge of that Ocean as compared with what was known in the beginning of this century.
- 4177 (*a and b*) **Old Surveys with Modern Charts**, as under :—The original plan of Sting-ray Bay, by R. Pickersgill; H.M.S. "Endeavour," Capt. Cook, 1770. (This is the first survey that was executed in New South Wales, and Cook, after consideration of the valuable collection made there, re-named it Botany Bay.) Published plan of Botany Bay.
- 4178 **The Original Chart of New Zealand**, by R. Pickersgill; H.M.S. "Endeavour," Captain Cook, 1770. (This is the first complete Chart of New Zealand.)
- 4179 **Original Chart**, showing the discoveries of H.M. Ships "Resolution" and "Discovery" on the coast of Asia and America in search of a communication between the Pacific and Western Oceans, under the command of Captain James Cook, by W. Bligh, Master of the "Resolution" in 1778-79.

- 4180 (*a* and *b*) **Chart of South Coast of England**, from Plymouth to Lizard; from the survey by Lieutenant M. Mackenzie in 1773, with modern Chart of the approaches to Plymouth.
- 4181 (*a* and *b*) **Two Charts of the English Channel**—one 1693 and the other 1890; the latter containing the recent soundings obtained at the entrance by H.M. Surveying vessel "Research," 1889-90.

SECTIONS SHOWING SUBMARINE SLOPES OF CORAL REEFS AND ISLANDS,  
WITH PUBLISHED CHARTS, AS UNDER:—

- 4182 **Bougainville Reef.** A reef in the Coral Sea, almost entirely covered at high water, in  $15^{\circ} 30' \text{ S.}$ ,  $147^{\circ} 05' \text{ E.}$ ; originally discovered in 1768. but not properly delineated till 1887. It is the steepest reef wall yet known.
- 4183 **Macclesfield Bank.** A submerged Coral bank of large extent in the China Sea, between latitude  $15^{\circ} 26' \text{ and } 16^{\circ} 10' \text{ N.}$ , and longitude  $113^{\circ} 43' \text{ and } 114^{\circ} 57' \text{ E.}$
- 4184 (*a* to *c*) **Louisiade Archipelago.** One sheet, containing three sections of reefs near Pana-pompom Island, in  $10^{\circ} 47' \text{ S.}$ ,  $152^{\circ} 24' \text{ E.}$  One sheet, containing two sections, obtained respectively off Pana Rai Rai islet, in  $11^{\circ} 15' \text{ S.}$ ,  $152^{\circ} 10' \text{ E.}$ ; also two sections off Rara Island in  $11^{\circ} 2' \text{ S.}$ ,  $152^{\circ} 23' \text{ E.}$  Published Chart illustrating the positions of these sections.
- 4185 (*a* and *b*) **Two Charts of the World**, showing tracks recommended for vessels with sail and auxiliary steam power, and also for full-powered steam vessels.
- 4186 (*a* and *b*) **Two Specimens of Tidal Diagrams of Complicated Tides.**
- 4187 (*a* to *e*) **Five Selected Specimens of Published Charts and Plans**, viz. :—(*a*) Eastern groups of Fiji Islands. (A British Crown Colony since 1874.) To illustrate coral reef formation.—(*b*) Owers to Christchurch, with Spithead and the Isle of Wight.—(*c*) Mombasa. (This place is now the head-quarters of the British East Africa Company, and is rising in importance.)—(*d*) South Polar Ice Chart. To illustrate our present knowledge of that region.—(*e*) Reefs in the China Sea. To illustrate coral reef formation.
- 4188 (*a* and *b*) **Two Charts of the Pacific Ocean**, one as known on Cook's leaving England, July, 1768, and one as known after the termination of Cook's third voyage in 1780.
- 4189 **Chart of the World**, showing our present knowledge of Oceanic depths. The positions where depths over 4,000 fathoms have been obtained are specially marked. The greatest depth known in the Northern hemisphere is 4,655 fathoms (over 5 miles), and in the Southern hemisphere 4,530 fathoms. Both are situated in the Western part of the Pacific Ocean.
- 4190 **Hope Islands to Turtle Group**, East Coast of Australia. This is the latest chart engraved from an Admiralty survey which was completed by the surveyors early in 1890.

- 4191 (*a and b*) **Original Triangulation Sheet of the China Coast**, from Yang-tse-Kiang to River Min, executed by the surveying officers of H.M.S. "Rambler," 1886. This triangulation was subsequently extended southward to Hong Kong, and the published chart alongside this sheet shows the extent of coast that was triangulated.
- 4192 (*a and b*) **Original Survey of Hong Kong Harbour**, executed in 1887, with published chart.

## II.—ORIGINAL SURVEYS, PUBLISHED CHARTS, &c.

- 4193 **Maldivh Islands, Indian Ocean.** Published Charts.
- 4194 (*a and b*) **Original Survey of Tavoy River**, with published plan. (The original survey is a specimen of the Marine Surveys that have been carried on in Indian waters by Naval and Indian Marine Officers for many years, under the direction of the Indian Government.)
- 4195 (*a and b*) **Original Survey of Gallipoli**, approach from Sea of Marmara, with published chart of the western part of Sea of Marmara, which embraces the survey.
- 4196 (*a and b*) **Copy of Halley's Magnetic Chart of the World, 1700**, and also the *Chart of curves of equal magnetic variation* that is now in general use.
- 4197 **Haro and Rosario Strait** (British Colombia). Published chart.
- 4198 **St. Lucia** (West Indies). Published chart.
- 4199 **Original Survey of Mahe, Seychelles Islands.** (This is the latest Admiralty Survey received.)
- 4200 **Chale Point to Ras Kimbiji**, including Zanzibar and Pemba. Published chart.
- 4201 (*a to c*) **Sections Illustrating Oceanic Temperatures obtained by H.M.S. "Challenger," 1873—5.**  
 One sheet of three sections, showing the Isothermal lines at different depths in the North Atlantic, viz. : (1) New York to Bermuda ; (2) Halifax to Bermuda ; (3) Bermuda to St. Thomas.  
 A Diagram showing the Isothermal lines at different depths in the seas enclosed by the Indian and Malay Archipelago.  
 A Section showing the Isothermal lines from the surface to depth of 200 fathoms in the central part of the Pacific Ocean ; between Oahu, Sandwich Islands, and Tahiti, Society Islands.
- 4202 (*a and b*) **Original Plan of Loch Linnhe**, northern part, and Lochs Leven, Aber, and Eil, with published chart.

## III.—CHARTS ON SOUTH WALL, COMPRISING ORIGINAL SURVEYS AND PUBLISHED CHARTS.

- 4203 **Original Survey** by Cook, in 1765, of the South Coast of Newfoundland between Cape Anguilla and Great Jervis Harbour. (This may be considered as the first real survey ever made by British officers.) Also Three Modern Original Surveys of portions of the South Coast of Newfoundland embraced in Cook's Survey, executed by Naval Surveying Officers.

- 4204 (*a* and *b*) **Original Plan** of Famagousta Harbour, Cyprus, with published plan.
- 4205 (*a* and *b*) **Original Plan** of Galway Bay, Ireland, with published plan.
- 4206 **An Exact Printed Copy** engraved on the scale of the original survey of the Island of Barbados, West Indies. This Survey was entirely executed by Naval Surveying Officers, and is exhibited as a good specimen of a complete marine survey, both as regards the land and water.
- 4207 **Chart of New York Harbour**, indicating the operations of His Majesty's Fleet and Army under the command of Vice-Admiral the Right Hon. Lord Viscount Howe and General Sir Wm. Howe, K.B., in 1776.

---

4208 **A Complete Set of Sailing Directions**, and other books published by the Hydrographic Department of the Admiralty.

4209 **Specimens of Copper Plates from which Admiralty Charts are printed.**

*[The process of engraving charts on copper-plates will be demonstrated by an engraver at work. In the case of corrections, the work to be corrected is scraped away, the copper-plate is hammered up from behind to a fresh surface, and the new work engraved on the new surface.]*

#### ATLASES, CHARTS, MAPS, &c., FROM VARIOUS SOURCES. IN CASES.

*Atlases Lent from the Admiralty Library, unless otherwise stated.*

- 4210 **A Collection of Portolani** (charts), date about 1530. Exhibiting the World as then known on Ptolemy's projection, showing Magellan's Track, 1519—22.
- 4211 **First Printed Edition** of Ptolemy's Geography, 1533. Exhibiting Ptolemy's Projection of the Globe.
- 4212 **A Portolano Map of the World**, date 1555.  
*Lent by Lieutenant F. T. Hamilton, R.N.*
- 4213 **"The Mariner's Mirrour."** By Anthony Ashley. London, 1588 (year of Spanish Armada). Exhibiting a chart of the coast from Plymouth to Land's End.
- 4214 **"A new Sea Atlas or Water World."** By Pieter van Alphen, Rotterdam, 1661. Exhibiting its title-page only.
- 4215 **"L'Atlas de la Mer, ou Monde Aquatique."** By Pieter Goos, Amsterdam, 1667. Exhibiting plan of the approach to New York Harbour (then called New Amsterdam).
- 4216 **"Adlante Marino o Mundo Maritimo."** Por J. A. Colom, Amsterdam, 1669. Exhibiting a chart of the British Isles, dated 1662.
- 4217 **"The Lightning Colonne, or Sea Mirrour."** By Jacob and Casparus Loots-man, Amsterdam, 1670. Exhibiting instructions for observing with Cross-staff and Astrolabe.

- 4218 **"Nova totius terrarum, orbis Geographica ac Hydrographica Tabula."** Joannes van Keulen, Amsterdam. Exhibiting a chart of Yarmouth Sands, dated 1694.
- 4219 **A Survey of the Ports** of the S.W. coasts of England, from Dover to Land's End. 1698, mss. Exhibiting a plan of Southampton Water and the Solent.
- 4220 **"A Maritime Survey of Ireland and the West of Great Britain."** By Murdoch Mackenzie, Senr., London, 1776. Exhibiting a chart of Cork Harbour and Approaches. *Lent by Captain Boxer, R.N.*
- 4220A **Journal of Captain Cook**, during his first voyage.
- 
- 4221 **Zee Atlas.** One volume of Dutch Charts (coloured), called De Nieuwe Groote Ligtende Zee Vakkeh, published by Van Keulen at the sign De Gekroonde Lootsman, Amsterdam, 1722.
- 4221A **One Quarto Volume of Charts, Flags, and Shipping** (coloured). Le Neptune Francois, par M. Sanson, 1710; published at Amsterdam.
- 4222 **Two M.S. Charts** drawn on vellum.  
*Lent by Messrs. D. W. and W. R. Kettle, 53, Fleet Street, London.*
- 4223 **Atlas Maritime, or the Sea Atlas.** By John Seller, Hydrographer to the King, 1675.  
*Lent by Captain Ashton, Birchington-on-Sea.*
- 4224 **A Chart** showing the track of 23 ships, under Sir Francis Drake, from England to the West Indies and back, September, 1585, to July, 1586.  
*Lent by His Grace the Duke of Leeds.*
- 4225 **Mediterranean Pilot**, date 1736.
- 4226 **Antiqua Geographe, Sacra and Profana**, printed at Amsterdam.  
*Lent by George Lavender, Esq., 5, Castle Street, Cambridge.*
- 4227 **Johnston's Royal Atlas of Modern Geography.**  
*Lent by Messrs. W. & A. K. Johnston, 5, White Hart St., E.C.*

HYDROGRAPHICAL INSTRUMENTS LENT BY THE HYDROGRAPHIC DEPARTMENT OF THE ADMIRALTY, BEING PART OF THE EQUIPMENT OF H.M. SURVEYING SHIPS.

- 4228 **Naval Surveying Theodolite**, 5-inch, with extra large telescope, for use in marine surveys where transport is difficult.
- 4229 **Sextant, Observing**, 8-inch, fitted on Stand, for accurate observations of the heavenly bodies on shore with the artificial horizon.
- 4230 **Sextant, Sounding**, 6-inch, specially fitted with two telescopes of different power, for the purpose of irregular triangulation of a marine survey. This instrument is mainly used for measuring angles between terrestrial objects to determine the position of a ship or boat when sounding.
- 4231 **Sextant, Double.** With this instrument two angles can be taken simultaneously, and has been found useful when large scale surveys are in progress.

- 4232 Sextant, Pocket or Box.** A convenient instrument for carrying when space and weight have to be considered.
- 4233 Artificial Horizon Roof,** with Mercury Trough, on a Stand fitted with three levelling screws.
- 4234 Artificial Horizon Roof,** with an Amalgamated Trough on a similar Stand.  
(This trough has a decided advantage over the older form in being less subject to vibration, and is now under trial.)
- 4235 Compass, Prismatic,  $2\frac{1}{2}$ -inch.** Portable, in leather case, for carrying.
- 4236 Compass, Prismatic, 5-inch.** This instrument is mainly used for obtaining the variation of the compass on shore, and is fitted to fix on a tripod.
- 4237 Raper's Instrument.** } These two instruments are not now in  
**4238 Reflecting Circle.** } general use.
- 4239 Measuring Chain,** 100 ft. in length.
- 4240 Station Pointer, 5-in.** (latest Admiralty pattern). Used for placing an observer's position on the chart from angles taken between three objects, the relative positions of which are known.
- 4241 Cust's Station Pointer of Xylonite** (one side rough for marking in pencil the angles observed). Mainly used in boats when sounding, and the objects selected for finding position fall within the circle of the 5-in. Station Pointer.
- 4242 Protractor, semi-circular,** of brass, 18-in.; **Protractor, rectangular,** 12-in., boxwood. For protracting angles of a survey at short distances.
- 4243 Field Case,** complete with dividers, 8-in. Ebonite protractor, 10-ft. pole scale, pencils, &c., as used by a Naval Surveying Officer.
- 4244 Galton's Sun Signal,** fitted for tripod. Used for reflecting the sun's rays to indicate the position of the station from great distances. This instrument is of great assistance in the triangulation of extended coasts.
- 4245 Heliostat, 5-in.** Made portable and fitted in a leather case with sling.
- 4246 Parallel Rulers,** rolling, 18-in. For laying off compass bearings.
- 4247 German-silver Scale, 48-in.** For measuring accurate distances with the aid of a beam compass.
- 4247A Steel straight edge, 30-in.,** nickel-plated, with ends graduated to  $5'$  arc.
- 4248 Beam Compass, 36-in.** For the accurate measurements of the long sides in projecting the main triangulation.
- 4249 Drawing Instruments, magazine set.**
- 4250 Six's Thermometer** (Miller-Casella pattern), as used for ascertaining oceanic temperatures. These thermometers are now made for the Hydrographic Department to withstand a pressure of 4 tons on the square inch.
- 4251 Copper case for ditto,** having small clamps for securing it to the sounding wire.

- 4252 **Six's Thermometer** (Miller-Casella pattern). Used in "Challenger" at a depth of 4,475 fathoms, and was found in this state on reaching the surface.
- 4253 **Miller-Casella Thermometer** on Buchanan's principle. (Mr. Buchanan was one of the Scientific Staff of the Challenger.)
- 4254 **Negretti & Zambra's deep-sea thermometer**, in Magnachi's improved frame.
- 4255 **Negretti & Zambra's shot capsizing thermometer**.
- 4256 **Negretti & Zambra's reversible thermometer** in brass frame. (This was supplied to the Arctic Expedition of 1875, but is now obsolete.) *Placed with the sounding gear lent by the Hydrographic Department.*

*Early Deep Sea Thermometers lent by the Royal Meteorological Society.*

- 4257 **Johnson's Registering Metallic Deep-Sea Thermometer**, the records of which are obtained by the varying expansion of brass and steel bars acting upon indices, used in H.M.S. "Serpent" 1865-69.
- 4258 **Deep Sea Thermometer**, Six's pattern, by Potter, used in H.M.S. "Lightning" 1865-68.
- 4259 **Deep Sea Thermometer**, Six's pattern, with protected bulb, used in H.M.S. "Cyclops" 1857.
- 4260 **Deep Sea Thermometer**, used in Sir J. C. Ross' Antarctic Expedition, 1839-43. Pastorelli, No. 1.

---

CHRONOLOGICAL EXHIBIT OF TIMEKEEPERS.

---

*From the Royal Observatory, Greenwich.*

---

In the year 1713, Sir Isaac Newton, in a paper read to the House of Commons, mentioned various schemes proposed for finding the longitude at sea.

He stated that the simplest method would be to use a watch or clock which would keep correct time, in spite of the ship's motion, the variation of temperature, the change of gravity, etc., but that such a watch had not yet been made.

A Bill drawn up by General Stanhope was passed to the effect—

- (1.) That a reward should be granted to any person inventing a means to discover the Longitude at sea.
- (2.) That a Committee (the Board of Longitude) should be appointed to judge such inventions.
- (3.) That a reward of £10,000 should be granted to any person determining the Longitude to within one degree of a great circle, or 60 geographical miles.
- (4.) That a reward of £15,000 should be granted for a determination of the Longitude to within 40 geographical miles.

- (5.) That a reward of £20,000 should be granted for a determination of the Longitude to within 30 geographical miles.
- (6.) That the machine should be tested by a voyage to some port in the West Indies.

Mr. John Harrison applied himself with great industry to the improvement of timekeepers, and in 1726 succeeded in making a pendulum clock which kept excellent time. By 1736 he had made various modifications, and introduced them in a machine which performed very well on a voyage to Lisbon. A second and improved machine was made in 1739, and in 1758 he had completed a third and smaller machine. Neither of these went on a voyage, for in 1759 he had completed a fourth of comparatively small size, and of entirely different construction. This watch or time-keeper (now exhibited) after two successful voyages to the West Indies, finally procured for him the prize of £20,000. It is not a chronometer as we understand the term at the present day. The modern chronometer is the result of several improvements, made in rapid succession, of which a general idea may be obtained from the specimens exhibited.

**4261 Harrison's Machines for measuring time** (Nos. 1 and 2).

No. 1 is Harrison's second attempt. He had made in the previous year a machine on the same principle which performed very well on a voyage to Lisbon. In these machines, two straight rod balances vibrate in opposite directions, so that the effect of the ship's motion on one would be counteracted by its effect on the other. Date, 1737.

**4262 No. 2 is Harrison's next attempt.** It is smaller in size, and the straight rod balances are replaced by plain wheel balances. Date, 1758. Neither of these machines went on a voyage.

**4263 Harrison's Timekeeper.** This watch or time-keeper, which gained for its inventor the reward of £20,000, was finished in 1761, and on Nov. 18, 1761, sailed in the "Deptford" for Jamaica, where the ship arrived Jan. 19, 1762. The Longitude of Port Royal as shewn by the watch, only differed five seconds (about one nautical mile) from the truth; and on its return to Portsmouth the watch was only in error 1 min. 54.5 sec., equivalent to 18 nautical miles. In 1764 another voyage was made to Barbadoes, where it was found to be only 43 seconds in error, equivalent to about 11 nautical miles. On its return it was found to have gained only 54 seconds in the whole voyage of 156 days. It has a plain balance, the effect of temperature on the balance and spring being corrected by a compensation curb (brass and steel lamina) acting on the spring.

John Harrison was born at Faulby, Yorkshire, 1693. He lived for some time at Barrow, in Lincolnshire, as a carpenter. He devoted his whole life to horology, and in 1735 came to London, where he made the two machines exhibited. Besides gaining the prize of £20,000 for his watch, he made many improvements in horology, and is credited with the invention of the gridiron pendulum in 1726, and of the going fusee. He died in 1776.

**4264 Chronometer** by Larcum Kendall, an apprentice to Harrison. This was made on the pattern of Harrison's, as evidence that another maker could construct a chronometer satisfactorily from Harrison's designs, in accordance with the conditions of the award of £20,000. Date, 1769.

**4265 Chronometer** by Larcum Kendall. Date, 1774. It is much less complicated and has a spiral compensation curb.

- 4266 (*a and b*) **Two Chronometers** by Thomas Mudge, made in 1795-6. These instruments are of fine workmanship. Mudge was born in 1715, died, 1794. He invented the lever escapement.
- 4267 **Chronometer**, by John Arnold, fitted with a helical balance spring, and a new form of escapement, both devised by Arnold himself. The escapement is now superseded by that of Earnshaw. Arnold was born, 1744, died, 1799.
- 4268 **Chronometer** by Earnshaw, who invented the spring detent escapement and compensation balance, both substantially as now used. Earnshaw was born 1749, died 1814.
- 4269 **Chronometer** by E. J. Dent, shewing the balance invented by him. Mr. E. J. Dent constructed the Westminster Clock. He was born 1790, died 1853.
- 4270 **Chronometer** by Eiffe, shewing the balance invented by him. Eiffe was born 1800, died 1880.
- 4271 **Chronometer** by John Poole, fitted with an auxiliary compensation to the balance devised by him. Born 1818, died 1867.
- 4272 **Chronometer** by Loseby is fitted with a balance invented by the maker. The effects of variation in temperature are counteracted by the expansion and contraction of mercury in a pair of curved glass tubes fixed at each end to a laminated rim.
- 4273 **A Modern Chronometer** by Kullberg, and fitted with his flat rim balance. Mr. V. Kullberg, one of the most successful of modern chronometer makers, was born in 1824, and died in 1890.
- 4274 **Pocket Chronometer** by Arnold.
- 4275 **A Deck Watch** by Ashley. The chief difference between this and the pocket chronometer exhibited is that it is fitted with a lever escapement.
- 4276 **A Model** of chronometer mechanism, shewing the action of the escapement.
- 4277 **A Case** containing a specimen of the chronometer balance in four stages of its manufacture.

*Lent by Mr. J. U. Poole, 33, Spencer Street, Clerkenwell.*

# **SAMPSON & CO.,**

**268, 270, OXFORD STREET, W.**

SOLE MAKERS OF THE

## **SURPLICE SHIRT.**

**Priced Catalogues & Self-Measurement  
Cards sent on application.**

- 4287 A Marine Chronometer**, with a glass balance spring and special balance.

This is the invention and handiwork of the late Frederick Dent, of the Strand and Royal Exchange, and the only specimen in existence. The spring requires far less compensation for any given change of temperature than a steel spring would, and the balance, which is composed of a glass disc, is compensated by two small compensation laminae mounted upon it.

- 4288 A Chronometer** by Pennington, Pendleton, and others, made for the son of the inventor. No. 22, date 1796.

- 4289 A Collection of Marine Chronometer Balances** of various types.  
*Lent by Messrs. E. Dent & Co., 61, Strand.*

- 4290 Chronometer** of Captain Cook, used in his second and third voyages.  
*Lent by the United Service Institution.*

#### VARIOUS SOUNDING MACHINES AND GEAR CONNECTED WITH DEEP-SEA SOUNDING.

- 4291 Automatic Sounding Machines**, Lucas' Patent, 2 in number, viz. :—  
One for deep-sea soundings up to 5,000 fathoms with wire. One hand machine for depths up to 400 fathoms, with wire, lead sinkers, and snappers complete.

NOTE.—The above two sounding machines are now in general use on board H.M. Surveying Vessels.

*Lent by the Telegraph Construction and Maintenance Company, Limited,  
38, Old Broad Street, London.*

- 4292 Rod, Sounding, Baillie**, with hemp line sounding No. 1 and 3 sinkers, each  $\frac{1}{2}$  cwt., as used on board H.M.S. "Challenger" (now obsolete).

- 4293 Blocks, Gin, Metal, Sounding**, 5 in.

- 4294 Bottles, Stop Cock** } as used in "Challenger."  
**4295 Bottles, Water Slip** }

- 4296 Leads, Cup, 112 lbs.** } Formerly used with hemp sounding line No.  
**4297 Leads, Valve, 112 lbs.** } 1 for depths under 1,000 fathoms.

- 4298 Rod, Sounding, Baillie, for wire.** This rod is now used with gauge, 20 galvanized wire, and Lucas Sounding Machines. Sinkers of 25 lbs. weight have been specially cast to use with this rod.

- 4299 Aldrich's Tube Sounding "Driver."** This pattern tube has been recently in use on board H.M. Surveying Vessel "Egeria," which has been employed for two years in sounding operations in the Pacific Ocean. It brings up exceptionally large specimens of the bottom.

- 4300 Stoppers for Wire.** For holding the wire when making a splice or putting on deep-sea thermometers.

- |       |                |            |                 |
|-------|----------------|------------|-----------------|

COMPASSES.

4317 Magnetic Ore. *Lent by the Lords Commissioners of the Admiralty.*

4318 Loadstone, 18th century.  
*Lent by the Committee of the Liverpool Public Library.*

4319 Chinese Compasses.  
*Lent by the Council of the Royal United Service Institution.*

The Compass was used by the Chinese in times of remote antiquity. In a simple form it was used by Mediterranean seamen in about the beginning of the 13th century, and the Fly or Card was attached to the needle about a century later.

4320 Japanese and Chinese Compasses.  
*Lent by the Committee of the Hartley Institute, Southampton.*

4321 Chinese Compasses.

4322 Chinese Compass and Sun Dial.

4323 Viatorium or Pocket Compass in ivory, by Leonard Miller, 1635.

4324 Table Compasses by Bugondas, and by Willebrand, Augsburg, 17th century.

4325 Compasses, 18th century.

4326 Compass and Sun Dial, cruciform, 18th century.

4327 Pocket Compass, Sun Dial, Lens, and Mirror, 18th century.

4328 Compass and Sun Dial by Stockert, Bavaria.

4329 Compass by Thomas Cave, Dublin.  
*Lent by the Committee of the Liverpool Public Library.*

4330 Gowland's Vertical Compass.

4331 6-inch Steering Compass.

4332 7½-inch Steering Compass.

4333 9½-inch Steering Compass.

4334 9½-inch Steering Compass. Transparent card, and showing old mode of lighting from below.

4335 Steering Compass, by Walker.

4336 Steering Compass, by Sir Wm. Snow Harris, having a stout copper ring to check the vibrations of the card.

4337 Steering Compass, Dent's Axis. The card moving on an axis instead of on a pivot, always keeps parallel to the glass cover of the bowl.

4338 Azimuth Compass, old Naval pattern.

4339 Standard Compass, Admiralty Compass Committee.

- 4340 **Liquid Compass, Crow's, 1813.** Card floated, expansion of fluid by heat provided for by flexible leather bottom to compass bowl.
- 4341 **Liquid Compass, Preston's.** Expansion of fluid provided for by two raised vessels.
- 4342 **Liquid Compass, Dent's.** Expansion of fluid provided for by air chamber round upper part of bowl.
- 4343 **Liquid Compass, Gray's,** the liquid being between inner and outer bowls.
- 4344 **Liquid Compass, West's.** Bowl hermetically closed, expansion of fluid provided for by flexible metal bottom to compass bowl.
- 4345 **Liquid Azimuth Compass,** latest Admiralty pattern.
- 4346 **Liquid Azimuth Compass** for Torpedo Boats.
- 4347 **Walker's Boat's Compass.**
- 4348 **Dent's Life Boat's Compass.**
- 4349 **Dent's Boat's Compass,** old pattern Binnacle.
- 4350 **Dent's Boat's Compass,** in low Binnacle.
- 4351 **Dent's Boat's Compass,** in low Binnacle, showing mode of lighting by candles.
- 4351A **Torpedo Boat's Steering Compass.**
- 4352 **Arctic Sledge Compass.** Used in the Arctic Expedition, 1875.
- 4353 **Arctic Small Azimuth Compass.** Used in the Arctic Expedition, 1875.
- 4354 **Arctic Large Azimuth Compass.** Used in the Arctic Expedition, 1875.
- 4355 **Earl of Caithness' Compass,** showing a mode of fitting compass so as to dispense with gimbaling.
- 4356 **Barlow's Correcting Plate, 1823.** The first attempt to counteract the effect of the iron of the ship on the compass.
- 4357 **Correcting Spheres of Iron.** Used to correct the quadrantal deviation of H. M. Ship "Trident," 1856.
- 4358 **Fox's Dip Circle and Table.** For measuring magnetic force and dip of the needle on board ship. Used on board H.M. Ship "Challenger," 1872—76.
- 4359 **Small Instruments** for measuring magnetic force on board ship for the purpose of compass adjustment.  
*Lent by the Lords Commissioners of the Admiralty.*
- 4359A **Diagrams on Wall** illustrating the magnetism of Iron Ships.  
*Lent by Captain Mayes, R.N.*
- 4359B **Beall's Compass Deviascope.**  
*Lent by H. Hughes & Son, 59, Fenchurch Street.*

#### ASTROLABES AND KINDRED INSTRUMENTS.

- 4360 **Persian Astrolabe.**  
*Lent by the Council of the Royal United Service Institution.*
- The Astrolabe came into use for measuring the sun's altitude at sea towards the close of the 15th century. For this purpose it was suspended by the ring at its circumference.
- 4361 **Astrolabe, Planisphere, 14th century.**  
*Lent by Mrs. E. C. Rimmington, Penrith, Cumberland.*

- 4362 **Astrolabe** constructed for Sir Francis Drake. Presented to Greenwich Hospital by King William IV.  
*Lent by the Lords Commissioners of the Admiralty.*
- 4363 **Astrolabium**, Hamburg, 1667.  
*Lent by Major P. H. Hewitt, 25, Argyle Road, Kensington, W.*
- 4364 **A Ring Dial or Astrolabe.**  
*Lent by the Committee of the Hartley Institute, Southampton.*
- 4365 **Horological Circle.**  
*Lent by Guy F. Fairfax, Esq., Billborough Hall, Billborough.*
- 4366 **Old Bearing Plate.**
- 4367 **Bearing Plate** for use in Torpedo Boats.
- 4368 **Azimuth Instrument or Palinurus.**  
*Lent by the Lords Commissioners of the Admiralty.*

(g) SUB-DIVISION.—BOOKS ON NAVIGATION, SOUNDING MACHINES, LOGS AND INSTRUMENTS COMMONLY USED IN NAVIGATION.

BOOKS ON NAVIGATION.

- 4369 **The Regiment of the Sea.** By William Bourne, 1577. The first English Book on Navigation.  
*Lent by the Council of the Royal Geographical Society.*
- 4370 **The Light of Navigation.** By William Johnson, 1620.  
*Lent by the Council of the Royal United Service Institution.*
- 4371 **Practical Navigation**, or an Introduction to the whole Art. Sixth Edition. By John Sellar, Hydrographer to the King. London, 1689.  
*Lent by John Bowing, Esq., West Tilbury, Essex.*
- 4372 **The Whole Art of Navigation.** Fifth Edition. By Captain Daniel Newhouse, 1727.  
*Lent by Captain Hull, R.N., Mamre, Marmora Road, Honor Oak, S.E.*
- 4373 **The Mariner's New Kalendar.** By Nathaniel Colson, Student in the Mathematics, 1746.  
*Lent by Vincent Fox, Esq., R.N.R., Mertonville, The London Road, Devizes, Wilts.*
- 4374 **Margett's Longitude Tables.** Published 1794. Nelson's Autograph on Title Page.  
*Lent by W. H. Cullen, Esq., Aberdeen House, York Grove, Peckham.*
- 4375 **The New Practical Navigation.** Being an Epitome of Navigation, &c. Fifteenth Edition. By John Hamilton Moore, 1801.  
*Lent by A. T. Spriggs, Esq., 65, Gleneldon Road, Streatham, S.W.*
- 4376 **Raper's Navigation.** First Edition, 1840. Nineteenth Edition, 1891.  
*Lent by Messrs. J. D. Potter, 31, Poultry, E.C.*

SOUNDING MACHINES.

- 4377 **Common Deep Sea Lead and Line.** The most simple, most reliable, and probably the most ancient instrument of Navigation.

- 4378 Sounding Machine, Burt's, 1814.** The sounding line runs through a spring nipper attached to a bag filled with air, and so floating. When the tension is off the line, by the lead striking the bottom, the spring nips, and the line may be hauled in, the nipper remaining attached to the point in the line indicating the depth of water.
- 4379 Sounding Machine, Massey's, 1820.** Depth of water registered by revolution of geared wheels caused by fan-like blades passing through the water.
- 4380 Sounding Machine, Walker's.** Same principle as Massey's.  
*Lent by the Lords Commissioners of the Admiralty.*
- 4380A James Syndicate, Limited, 18, Bilitier Street, London, E.C.**  
James' Patent "Sentry" Sounding Machine and Automatic Shoal Indicator, with Appliances, Model and Diagrams illustrating mode of use.

## LOGS.

- 4381 Common Log and Line.** This log consists of a piece of wood, generally the sector of a circle, so weighted as to float deeply and vertically, and so slung as to keep at right angles to the ship's course, and consequently in nearly the same place, as the ship goes on. A small line being attached to the log, the speed of the ship is known from the amount of line run out in a given time. This form of log is in common use, and has been so for more than three centuries.
- 4382 Log, Wood, Fish-shaped.** Very old.
- 4383 Log, Brass, Tubular. 1828.** Speed shown by the tension on the line measured by a spring balance.
- 4384 Massey's Log. 1808.** Invented by Mr. Edward Massey, of Staffordshire. The speed is registered by geared wheels turned by fan blades on a floating vessel. It is the first of logs and sounding machines showing the speed or depths of water by these means.
- 4385 Walker's Harpoon Log.** Same principle as Massey's.
- 4386 Walker's Taffrail Log.** Same principle as Massey's, but the speed is shown on a dial, so that it may be seen without hauling the log in. A gong is sounded at regular intervals of distance.

*Lent by the Lords Commissioners of the Admiralty.*

## QUADRANTS AND SIMILAR INSTRUMENTS.

- 4387 Brass Plummet Quadrant.** For measuring altitudes.  
*Lent by the Council of the Royal United Service Institution.*
- 4387A Cross Staff.** Came into use for measuring the sun's altitude at sea in the beginning of the 16th century. It was superseded by Davis' Quadrant, or Back Staff.  
*Made by Hughes, Optician, Fenchurch Street, and lent by Captain Wm. Mayes, R.N., 43, Tressillian Rd., St. John's, S.E.*
- 4388 Davis' Quadrant, about 1732.** Invented by John Davis, the discoverer of Davis Strait. Came into use for measuring the sun's altitude at sea at the close of the 16th century. It continued in general use till superseded by Hadley's Quadrant.

*Lent by the Rev. A. Horsburg, 11, Granville Terrace, Edinburgh.*

**4389 Davis' Quadrant.**

**4390 Hadley's Quadrant.** From wreck of "Royal George." Invented by Lieut. Hadley, R.N., 1731, and came immediately into general use, superseding Davis' Quadrant.

**4391 Reflecting Quadrant.** 1741. This form of instrument is inferior to Hadley's, and was but little if at all used.

*Lent by the Council of the Royal United Service Institution.*

**4392 Hadley's Quadrant,** by Culmer, London, 1786.

*Lent by the Committee of the Liverpool Public Library.*

**4393 Quadrant** in use in early part of present century.

*Lent by H. D. Curtis, Esq., 57, Eaton Square.*

**4394 Sextant.** Used by Captain Fitzroy, R.N., H. M. Ship "Beagle" in carrying a chain of meridian distances round the world for the determination of the Longitude, 1831-36.

*Lent by the Lords Commissioners of the Admiralty.*

#### OTHER NAUTICAL INSTRUMENTS.

**4395 Sand Glass or Hour Clock.**

*Lent by the Committee of the Hartley Institute, Southampton.*

**4396 Sand Glass,** 14 sec. and 28 sec. For showing intervals of time when heaving the log.

**4397 Sand Glass,** 14 sec. For showing intervals of time when heaving the log.

*Lent by the Lords Commissioners of the Admiralty.*

**4398 Parallatic Rotunda** for finding Longitude at Sea.

*Lent by the Committee of the Liverpool Public Library.*

**4399 Sinical Quadrant.** Used for similar purpose as Gunter's scale.

*Lent by the Council of the Royal United Service Institution.*

**4411 A. Clarkson,** 28, *Bartlett's Buildings.*

Telescopes—Achromatic Object Glasses for Telescopes. The Dumpy Telescope.

**4412 Henry Hughes & Son,** 59, *Fenchurch Street, London.*

Improved Paget Standard Compass for Iron Ships.

The Azimeter or Bridge Azimuth Dial.

Improved Torpedo Boat Compass with Azimuth Indicator.

The Deviatometer.

The Pelorus.

Ship, Yacht, and Boat Binnacles and Compasses.

Cooper & Wiggell's Patent Deep-Sea Sounding Apparatus.

Patent Logs.

Lunar and other Sextants and Stands.

New Angle Sextant.

Improved Double Sextant.

New Sextant Binocular for Star Observations.

## 4412—continued.

Artificial Horizons.  
 Station Pointers and Position Finders.  
 The Radiograph.  
 Improved Parallel Rulers and Dividers.  
 Improved Marine Aneroid Barometer.  
 Improved Observation, Chart Room and Cabin Lamps.  
 Marine Binoculars and Telescopes.  
 Various New Nautical Books and Forms relating to Navigation.  
 Evelyn's Patent Ship Clinometer.  
 Magnetic Force Instrument, by Captain Mayes, R.N.

## 4413 Henry Porter, pro Cary &amp; Co., 181, Strand, W.C.

Sextants (various). Theodolites for Marine Surveying. Artificial Horizons. Station Pointers. Drawing Instruments. Thermometers for Deep Sea. Aneroid Barometers. Magnetic Compasses. Dip Circle. Telescopes. Binoculars.

## 4414 E. Dent &amp; Co., 61, Strand, &amp; 4, Royal Exchange.

8 in. Standard Fluid Azimuth Compass and Column Binnacle, with correctors, lamp, and tripod for night bearings as used in H.M. Cruisers.

6½ in. Ditto as used in H.M. Gun Boats.

6½ in. Ditto, without circle, as used in H.M. Torpedo Boats.

4¾ in. Fluid Compass in Trunk Binnacle, with Correctors, for use in Conning Towers, Steerages, &c.

4¾ in. Fluid Torpedo Steering Compass, in Japanned Copper Binnacle, as used in Torpedo Boats.

4¾ in. Boat Compass in Patent Binnacle illuminated by candles. (This Compass has been specially designed to meet the new Admiralty requirements for Boats' Compasses.)

Fluid Compass in Small Copper Binnacle, as used in the Royal Navy and by the Royal National Life Boat Institution.

## 4415 James Henry Steward, 406 &amp; 457, Strand, London, W.C.

Nautical Instruments, consisting of Naval Telescopes, Binocular Marine Glasses, Improved Night Glasses, Douglas Hamilton's Patent Marine Binocular, Steward's Improved Yachtsman Binocular, Pilot and Boat Glasses, Telescopes, Yacht Compasses, Boat and Pocket Spirit and other Compasses, Canoe Lamp, Signalling Lamps, Model Signalling Instructors for Flag and Lamp Reading, Model Signalling Telegraph, Aneroid and Mercurial Barometers for Ships' use, and Sextants.

## 4416 Aitchison &amp; Co., 47, Fleet Street, and 42, Bishopsgate Street Within, London.

Aitchison's Patent Collapsing Binocular Glass.

Lenses for Optical Instruments.

## 4417 D. McGregor &amp; Co., Nautical Instrument Makers, London.

Standard Azimuth Compasses, with recent improvements. Conning Compass. Spirit Compasses. Torpedo-boat Compasses. Ships' Life-boat Compasses. Ships' Recording Logs. Barometers. Position Finders. Sounding Instruments, &c.

- 4418 **Elliott, Brothers**, 101 & 102, *St. Martin's Lane, London, W.C.*  
Willis's Electrical Engine Room, Steering, and Revolution Telegraphs.  
Spratt's Speed and Direction Indicator. Granville's Electrical Log.  
Fiske's Electrical Range Finder. Electrical and other Instruments.
- 4419 **Heath & Co., Limited**, 115, *Cannon Street, London, E.C.*  
Nautical Instruments. Smith & Heath's Patent "Reliable" Compass and Binnacle. Heath's Patent "London Polaris" (for accurately determining the position of a ship's course without tables). Heath's Patent "Binnacle Tripod Course Corrector." Heath's Patent Liquid Compasses. Heath's Patent Sextants. Heath's Patent "Argus" Binocular Glasses.
- 4420 **Thomas Walker & Son**, 58, *Oxford Street, Birmingham.*  
Ship Logs. Sounding Machines. Log Lines. Magnetic Bars (for adjusting Ships' Compasses). Magnetic Needles (for Ships' Compasses).
- 4421 **James White**, 16, 18 and 20, *Cambridge Street, Glasgow.*  
Sir Wm. Thomson's Standard Compasses, Admiralty, Merchant Service, and Yacht's Pattern.  
Ditto. Torpedo Boat Compass.  
Ditto. Navigational Sounding Machines, two patterns.  
Marine Voltmeter.  
Marine Ammeter.

# Sails, Flags, Shipchandlery.

## LANE & NEEVE,

97, LEADENHALL STREET, LONDON, E.C.

AWARDED FOR

**SAILS, FLAGS, AND BUNTING,**

Gold Medal, International Exhibition, London, 1885.

First Order of Merit and Bronze Medal, International Exhibition, Adelaide, 1887.

First Class Award, Centennial Exhibition, Melbourne, 1888.

Telephone No. 4445.

Telegraphic Address—"LANE, NEEVE, LONDON."

## SAIL AND FLAG MAKERS AND SHIPCHANDLERS,

**SAIL CLOTH, BUNTING, &c.**

*Contractors to the Trinity Corporation, P. and O., Royal Mail, and other S.S. Companies.*

SAIL LOFT - - **NORWAY PLACE, COMMERCIAL ROAD EAST, E.**  
FACTORY - - **BLACKHORSE YARD, ALDGATE, E.**

## MODELS SECTION.

### SUB-DIVISION—BOAT LOWERING AND LIFE SAVING APPARATUS.

- 4422 **James Beynon**, 86, *Fanson Road, Stratford.*  
Working Model of improved method of, and appliances for, Housing and Launching Ships' Boats. (The Model, together with patterns for castings, were made by the Inventor.)
- 4423 **Dr. T. S. Hosford**, 33, *King Street, Guildhall, London, E. C.*  
Boat Lowering Apparatus, with automatic or hand detachment for use when the boat is water-borne.
- 4424 **John Goodridge, I.N.A.**, *Portsmouth, Southampton, Hants.*  
"The Goodridge Collision Stop-Gap."
- 4425 **Alfred C. Stockwell**, 1, *Retreat Villas, Catford, S. E.*  
Model of Collapsible and Reversible Life Raft. Model of Collapsible and Reversible Life Boat Raft.
- 4426 **Henry Farquhar Holt** (*Chairman of Committee, Shipmasters' Society*), 60, *Fenchurch Street, London.*  
Half Block Model of H.M.S. "Dictator," 64 guns, built 1778.  
Half Block Model of Ship "Hindustan," 1832.  
Model of Boat, with lowering and disengaging gear.  
Model of Ship's Boat fitted with necessities.  
Models of Standard Formulæ of Spherical Trigonometry.
- 4427 **John Bond & Son**, *Bond's Wharf, Orchard House, Blackwall, E.*  
Clifford's Patent Boat Lowering and Releasing Apparatus.
- 4428 **Mr. F. Brewster** (trading as **The Unsinkable Boat Company**), 3, *College View, Wharf Road, Cubitt Town, E.*  
(i.) Outside Buoyancy for Ship's Boats (special design for boats of H.M. Navy).  
(ii.) Life-jackets (special designs for ordinary use and for Torpedo Service in H.M. Navy).  
(iii.) "Cork Concrete" as substitute for metal and other air tanks in boats, &c.  
(iv.) "Stowaway" and other Life Buoys, made of "Cork Concrete."  
(v.) Buoyant Deck Seats and Lockers.  
(vi.) Patent Life-belts and Cushions made of "Elastic Cork."  
(vii.) Patent Sea-anchor and Oil Distributor.  
(viii.) Patent Boat Detaching Gear (full-sized example).  
(ix.) Rescue Ropes and Life-saving Garments (various).  
(x.) Deck Bridge and Saloon forming Life-raft (model).
- 4429 **Frederic Albert Adey**, "*Glenelg, Weston-super-Mare.*  
Combined Ship's Buoy. Intended for the purpose of locating sunken wrecks; for saving life by means of the life-lines fixed round the upper part of the Buoy; for intimating, by a system of automatic firing of time rockets and blue lights, the fact of a catastrophe having occurred, and also the name, date and time the vessel was lost.

- 4430 Charles Elms & Co., 36, Mount Stuart Square, Bute Docks, Cardiff.**  
Model Life Boat, lying in chocks, with davits and tackles. Tackles fitted with Duinker's Patent Boat Lowering gear.
- 4431 D. H. Willey, Tynemouth Villa, Lodge Road, Southampton.**  
Engaging and Disengaging Gear fitted to two boats hung in davits ; by means of which boats may be quickly engaged to the davit tackles, and disengaged simultaneously at both ends, either before or after reaching the water.  
One boat is in chocks, and in connection with the holding down chains is an improved slip fitting for rapidly letting go.
- 4432 Simpson, Mackirdy & Co., 29, South Castle Street, Liverpool.**  
Models of Simpson's Patent Ship's Boat Disengaging Gear ; Simpson's Patent Ship's Boat Chocks (collapsible) ; Morgan's Patent Davits (simultaneous lowering) ; Absaloms' Patent Davits (automatic boat launching).
- 4433 Orturo de Rossi-Gallico, C.E. (as Representative of the Hon. Bank of Genoa, and of Cap. C. Ingaramo). "The Jerusalem," Cornhill, London, E.C.**  
Patent Italian Instantaneous Self-Inflating Lifebelt.
- 4434 M. H. Cameron, Rydal Mount, Chester Road, Stretford.**  
Model of Patent Automatic Disengaging Gear for Ship's boats. Scale 1 inch to 1 foot.
- 4436 James Gillings, 71, King's Road, Chelsea, S.W.**  
Oil Bags for the application of oil for breaking the force of the sea (two sizes).
- 4437 Robinson & Co., West End Terrace, Chiswick, London.**  
Robinson's Patent Boat-Disengaging Gear.
- 4438 Edward J. Hill, Westminster Chambers, 11, Victoria Street, London, S.W.**  
Hill & Clark's Patent Automatic Boat Disengaging Gear—A shape.  
Ditto ditto ditto B shape.  
Edward J. Hill's Patent Boat Disengaging Hooks—C shape.  
(Working Automatically by the Coxswain in charge of the boat, or by the Officer on board the ship.)  
Edward J. Hill's Patent Boat Lowering Apparatus.  
Ditto. Patent Folding Life Raft.
- 4439 The Berthon Boat Company, Limited, 50, Holborn Viaduct, London.**  
Collapsible Boats. Sea Anchors for Boats. Sea Anchors for Ships. Means of avoiding Collisions at Sea. Boat Disengaging Gear.
- 4441 W. F. Rees (R.N.), Royal Naval College, Greenwich.**  
Rees' Patent Ship's Davits and Releasing Boat Chocks. Rees' Patent Ship's Boat Disengaging Hooks. Reid's Steam Reducing Valve. Reid's Vulcan Lubricator. Reid's Weldless Steel Chains. Reid's Pitchometer.
- 4442 William Maddison Ward, Blyth, Northumberland.**  
Ward's Patent Improved Automatic Detaching Gear for Ship's Boats. Ward & Gray's Patent Instantaneous Engaging and Disengaging Hook for Ship's Boats.

- 4443 **James Sample**, *Industrial Terrace, Wallsend-on-Tyne.*  
Detaching and Picking-up Gear for Ship's Boats.
- 4444 **Joseph Robinson Pim**, *Ardview, Tramore, Waterford.*  
Wooden Model representing part of ship with raft, for launching boat on same.
- 4445 **William Mills**, *Bridge Crescent, Sunderland.*  
Model Boats, fitted with Mills' Patent Engaging and Disengaging Gear, complete on model of ship's deck, with davits, &c.  
Full-sized Gear fitted in skeleton boat, showing the complete working of the arrangement.
- 4446 **Colonel H. B. Hanna**, 55, *Parliament Street, London, S.W.*  
(1) Model of a Floating Battery fitted with Patent Rudders.  
(2) Model of Apparatus for lowering Large Boats. (3) Model of Apparatus for Lowering Small Boats.
- 4449 **Arnold & Sons**, 35 to 37, *West Smithfield, E.C.*  
Patent Folding Ambulance Chair. Surgical Dressing Waggon. Oxy-hydrogen Lamp for surgical examinations. Operating Chair and Couch combined. Table for surgical operations. Stretchers. Ambulance Baskets, and other surgical instruments.
- 4451 **The Line-Throwing Gun Company, Limited**, *Dundee.*  
Patent Signal Gun, constructed to project a strong line a quarter of a mile. Shoulder-Gun to project a strong line 150 yards.
- 4452 **F. D. and A. K. Brown**, *Westminster Chambers, 1, Victoria Street, S.W.*  
Day and Night Life Buoys, with Detaching Gear ("Whitby's" Patent).
- 4453 **Lewis Septimus Bickley**, 184 & 186, *Broadway, Cardiff.*  
Patent Life-Saving Apparatus.
- 4454 **Henry E. Bowing**, *Mole Bank House, East Molesey, Kingston-on-Thames.*  
Model with Boat Lowering Apparatus.
- 4455 **Israel Simons**, 40, *Hampstead Road, London, N.W.*  
Life Saving Dress.
- 4456 **Messrs. Watkins & Co.**, *Orchard Yard, Blackwall.*  
Full size model of P. & O. life boat fitted with the "Angove patent disengaging gear."  
Life Boat, built for H.M. the King of Portugal.  
Screw Steam Yacht "May Queen."  
Half Models of Racing Cutters, "Bonina," "Fancy," and "Vinilia."  
Half Models of Cruising Cutters, "Magnolia," "Winifred," and "Fee."  
Half model of Cruising Yawl "Ilona."  
Torpedo Boat built for the Greek Government.  
Steam Yachts "Lily" and "Royal."
- 4459 **Royal National Life Boat Institution**, 14, *John Street, Adelphi, London, W.C.*  
Model of a Self-righting Life Boat fitted with Water Ballast.  
Ditto. ditto. fitted with Sliding Keels and Water Ballast.

4459—*continued.*

Model of the Sailing Life Boat as adopted by the Institution on the Coasts of Norfolk and Suffolk.

Model of the Hydraulic Steam Life Boat of the Institution.

Model of the Safety Fishing Boat introduced by the Institution.

Model of the Life Boat Transporting Carriage, with the main wheels fitted with Tipping's endless Plateways.

Cork Life Belt used by Life Boat men. Life Buoy supplied to Life Boats. Model of Anchor used in Life Boats. Liquid Boat Compass supplied to Life Boats. Self-acting Relief Valve fitted in the Decks of Life Boats. Telescope furnished to Life Boat Stations. Loaded Cane and Line used by Life Boat men. Very's Signal Pistol and Cartridges. Lantern supplied to Life Boat Stations. Model of Canvas Drogue for Life Boats. Aneroid Barometer supplied to Fishermen and Coasters.

4460 **T. G. Tagg & Son**, *Island Launch Works, Hampton Court.*

Model of a Patent Life Boat and Deck Seat combined. Tagg & Scott Patent.

4461 **Vero & Besley**, 94 & 105, *Union Street, Borough, London, S.E.*

Patent Air Chamber Life-saving Appliances, viz., Lifeboatmans' Belts, Buoys, Floats, Jackets, Cork Helmets, and Caps.

4462 **R. J. Turk**, *Thames Side, Kingston-on-Thames.*

Model of a 12 ft. by 4 ft. 2 in. Centreboard Dinghy. Length, 6 ft. by 2 ft. 1 in., fitted with self-reefing gear sails, which can be diminished or increased without leaving the seat or touching the sail.

4462A **George Saxby Penfold**, 4, 5 & 6, *Hop Exchange, London, S.E.*

An Improved Fender for use by steam ships going at speed during fogs or snow storms in crowded waters.

4463 **The Life Boat Company, Limited**, 2, *Oswald Street, Glasgow.*

Models of Chambers & Liddell's Patent Unsinkable Semi-Collapsible Life Boats.

4464 **Commander John D'Arcy-Irvine, R.N.**, *Harbour House, Howth, Co. Dublin.*

Pneumatic Line-Throwing Gun. The Powder Line-Throwing Shoulder Gun. This Invention has for its object the effecting of a Line Communication for the purpose of Saving Life at Sea, &c.

4465 **W. E. Hutchinson**, 6, *Royal Exchange, Middlesbrough-on-Tees.*

Improved Life-saving Dumb-bell or Life Buoy.

4466 **Lieut. Frank A. S. Farewell, R.N.**, 5, *Medway Villas, New Brompton, Chatham.*

Patent Automatic Valve or Plug for Boats.

4467 **Armstrong & Stevens**, 15, *Whittall Street, Birmingham.*

Line-Throwing Gun (Stevens' Patent).

4468 **J. & A. W. Birt**, *Tower Works, Wapping, London, E.*

Life Belts and Life Buoys, according to the new Board of Trade Regulations. Life Belts of the Royal National Life Boat Institution. Life Belts of Her Majesty's Royal Navy. Life Belts, specially adapted for Fishermen. Cork Mattresses for the Royal Navy. Collection of Life Saving Appliances which gained the Gold Medal of the Royal Society of Arts. Working Model of the Rocket Life Saving Apparatus.

- 4469 Thomas Stoward, 12, *Grays Inn Road, London, W.C.*  
Patent "Combinare" Buoyant Apparatus and Cushions.
- 4470 The Mermaid Wave Subduer Company, Limited, 19, *Castle Street Liverpool.*  
The Mermaid Buoyant Sea Anchor. The Mermaid Wave Subduer or Oil Distributor (various Patterns). The Mermaid Wave Subduer, fitted to Sea-Anchor. The Mermaid Oil Bag (various Patterns). The Mermaid Storm Oil. The Mermaid Floating Case (various Patterns). The Larsen Wave Subduer or Oil Distributor.

END OF THE COOK GALLERY.

---

A BRANCH PRINTING OFFICE of MESSRS. W. P. GRIFFITH AND SONS, LIMITED, Old Bailey, Official Printers and Advertisers to the Exhibition, is situated in this Gallery, and Messrs. Griffiths' representative is instructed to show visitors the work in progress on presentation of Card.

---

## PATENT "BITUMASTIC" PAINTS.

"BITUMASTIC" SOLUTIONS—Black, Red, or Grey, for protecting Ships Interiors and Decks.

*The Original MARINE CEMENT for Ships' bilges.*

**WAILES, DOVE, & CO., Newcastle.**

Clyde Office: 6, OSWALD STREET, GLASGOW.

The above Prices are free on rail at Romsey Station, L. & S.W. Ry., and do not include Mast and Sails, Oars Breakers, and other sundries, which are extras.

**The BERTHON BOATS**, which open automatically and instantaneously, are admirably calculated to provide every vessel with boat accommodation for every soul on board, without hampering decks or quarters, being stowed in-board or out-board in a great variety of ways.

For further particulars, testimonials, tenders, and all other information, apply to the  
Sole Patentees and Builders,

**THE BERTHON BOAT COMPANY, LIMITED,**  
ROMSEY HAMPSHIRE, ENGLAND. London Office: 50, Holborn Viaduct, E.C.

## MODELS SECTION.

---

### SUB-DIVISION—MARINE ENGINES.

---

Turning to his right at the end of the **COOK GALLERY**, the Visitor will at once find himself in the

### SEPPINGS GALLERY,

so named after Sir Robert Seppings, an eminent Naval Architect, who filled the office of Surveyor of the Navy in the reign of George IV. The contents of this gallery are of peculiar interest, consisting principally of Models of Marine Engines, and of Ships' Boats, Rafts, &c. In the case of the former the collection is necessarily not very large, but is compensated for by the importance and representative character of the exhibits. In the case of the Ship Models, however, there can be no question that so valuable and complete a collection has never before been got together.

### MARINE ENGINES.

THE first attempt at applying steam-power to propel a vessel has been attributed to Blasco de Garay, who in 1543 is said to have propelled a boat of 200 tons displacement at a speed of one league per hour.

In 1690 a proposal to propel a boat by steam was made by Denis Papin and the engine actually constructed, but it was destroyed by boatmen of the Weser before being put into use.

About 1787 an engine was constructed by William Symington and fitted to a double boat belonging to Patrick Miller, of Dalswinton, which was driven by means of a paddle-wheel placed between the two parts of the boat. The trial was made in 1788 and was successful. In 1801 Symington constructed for Lord Dundas the "Charlotte Dundas" which was worked for some time on the Forth and Clyde Canal. This boat was fitted with a single paddle-wheel placed near the stem, driven by a horizontal direct acting engine with connecting rod and crank.

In 1807 Robert Fulton, in America, produced the "Clermont" which was propelled by paddle-wheels driven by an engine of 20 H.P.

The first passenger steamer in Europe, the "Comet," ran on the Clyde between Glasgow and Greenock. She was constructed in 1812 by Henry Bell. The engines were of a design somewhat similar to the side lever engines of a later day.

Steam vessels were introduced into the Royal Navy about 1827. On December the 4th of that year three small paddlesteamers, called respectively the "Echo," "Lightning," and "Meteor," were commissioned. The engines of these boats were of 100 nominal horse-power, and are well represented by Model (1) in Messrs. Maudslay's collection.

Between this date and 1840, seventy other steam vessels were added to the Navy, the majority being fitted with flue boilers and side lever engines, working with a steam pressure of 4 lbs. per square inch above the atmosphere.

A simple type of engine for driving paddle-wheels is that known as the Oscillating Engine, which was first adopted for marine purposes by Messrs. Maudslay, and subsequently perfected by Mr. John Penn. In this type of engine the connecting rod is dispensed with, the piston rod being connected directly with the crank, thus economising space as far as possible. This is the type now largely adopted for paddle-wheel vessels, and is illustrated by models No. 1 of Messrs. Penn's collection and No. 9 of Messrs. Maudslay's, the latter being a model of the engine fitted to H.M. Yacht "Osborne."

Another type of engine used for driving paddle-wheels was Messrs. Maudslay's Double Cylinder Engine, in which the crosshead passed down between the cylinders, having a journal at its lower end to which the connecting rod was attached. This type is illustrated by model 2 in Messrs. Maudslay's collection, and was fitted by them to nine ships of the Royal Navy between 1840 and 1846.

A modification of this type is represented by models 3 and 4 in Messrs. Maudslay's collection, in which the crosshead works in a cylinder co-axial with the steam cylinder. No. 3 is suitable for paddle-wheels, and No. 4 for screw propulsion.

Between 1840 and 1850, tubular boilers were introduced. These were made much lighter and more compact than the flue boiler, and the working pressure of steam raised to from 10 to 15 lbs. per square inch above the atmosphere. During the same period the substitution of the screw propeller for the paddle-wheel began to grow general, and its adoption necessitated a higher speed of propeller shaft than in the paddle-wheel vessels. This was first obtained by gearing the engine, as it was not then possible to drive the piston at the high speed necessary for connecting the engine direct to the propeller shaft. Improvements were, however, soon made, so that the speed of piston could be sufficiently increased to allow the crank and propeller shaft to be directly connected. In this case the close proximity of the cylinders to the centre line of the ship when the engines were horizontal made it difficult to get a connecting

rod of suitable length to work between the cylinder and the crank. To overcome this difficulty two types of engines were introduced. One was the trunk engine invented by the late Mr. John Penn, in which a large hollow trunk fixed on the piston was substituted for the piston rod and the connecting rod attached directly to a journal in the centre of the piston itself. The other was the Return Connecting Rod Engine in which there were two or four rods to each piston passing symmetrically above and below the crank shaft to the opposite side of the ship. The further ends of these rods were fixed to a cross-head having a journal at its centre from which the connecting rod worked back to the crank. The first of these two types is shown by Model No. (2) of Messrs. Penn's collection which represents the engines of H.M.S.'s. "Minotaur" and "Northumberland," made in 1865. The second is illustrated by Models (5), (6), (7) and (8), of Messrs. Maudslay's collection. Between 1851 and 1860, Messrs. Maudslay fitted 42 ships of the Royal Navy with engines similar to No. (5); 13 similar to No. (6) between 1854 and 1861; four similar to No. (7) in 1861 and 1862; and 6 similar to No. (8) between 1860 and 1865.

It may be remarked that several ships were still successfully fitted by Messrs. Humphrys, Tenant & Co., with the direct acting type of engine. This firm has also in recent years made very many engines for ships of the Royal Navy. Model (11) represents a horizontal engine, direct acting, as fitted in the Danish frigate "Thor" in 1850.

The majority of steam-ships built during the years 1850 and 1860 were with horizontal screw propeller engines having jet condensers and working with a steam pressure of 20 to 25 lbs. About 1860 the adoption of surface condensation became general, and this by considerably reducing the element of danger due to the deposition of solid matter on the heating surfaces rendered the use of high pressure steam possible and led to the introduction of compound engines and cylindrical boilers. The increase in the pressures of the steam made compound engines, in which the expansion is carried out in two cylinders, a necessity, and the first ship of the Royal Navy fitted with them was the "Constance" whose engines were constructed in 1863, by Messrs. Elder & Co., of Glasgow. Model No. (3) in Messrs. Penn's collection represents a three cylinder simple expansion engine, which can by an adjustment of the stop valves be converted into a compound engine, made by Messrs. Penn in 1876, for the Royal Italian Vessel "Christoforo Colombo." No. (12) of Messrs. Maudslays Models represents a set of Vertical Compound Engines, fitted by them in White Star Company's vessels "Britannic" and four others in 1870 and 1871, and also in several ships of the French Transatlantic Company. As the pressures of steam increased above 100 lbs. per square inch the variation of temperature in each cylinder of the compound engine became so great as to prevent the full economy due to the high pressure and consequent great expansion being attained, on account of the loss from lique-

faction. To meet this difficulty, Mr. A. C. Kirk, of the firm of Messrs. Napier & Sons, Glasgow, introduced the triple expansion engine in which the expansion is carried out in three stages in separate cylinders, thus reducing the range of temperature in each cylinder. A set of these engines was fitted in 1874, to the S.S. "Propontis" working with a steam pressure of 150 lbs. per square inch, and gave good results, but very little further was done in this direction until in 1881, when Mr. Kirk fitted a set of triple expansion engines on board the S.S. "Aberdeen," the results in this instance were so satisfactory that other engines of this type soon followed and are now generally adopted. All the recent ships built for the Royal Navy are fitted with triple expansion engines. The photograph in Messrs. Penn's collection represents the engines of this type now being fitted in H.M.S.'s. "Sappho" and "Scylla," they are twin screw of 900 I.H.P., with a working pressure of 155 lbs. per square inch. The Model exhibited by Messrs. Hawthorn, Leslie & Co., is a good specimen of this type of engine. H.M.S. "Blenheim" (9000 tons displacement) now being built at the Thames Iron Works is fitted with twin screws, each screw being driven by two sets of engines of this type which are guaranteed to develop a total power of 20,000 horses.

### MARINE ENGINES, ACTUAL AND MODEL.

- 4478 Case of Paddle Wheel Models (various inventors).  
 4479 Case of Models of Screw Propellers, Lifting and Feathering (various inventors).

*Lent by the Lords Commissioners of the Admiralty.*

- 4480 Messrs. Bullivant & Co., 72, Mark Lane, E. C.

- (1) Model of Engines of H.M.S. "Gorgon," 520 H.P., made in 1838, size 1 ft. 9 in.  $\times$  1 ft. 2 in.
- (2) Ditto. Seaward's Folding Propeller, 1848, size 1 ft.  $\times$  2 ft. 2 in.
- (3) Ditto. Propeller by Ericsson, 1836, size 7 in.  $\times$  7 in.
- (4) Ditto. Seaward's Atmospheric Engine, 1839, size 1 ft. 7 in.  $\times$  1 ft.
- (5) Ditto. Seaward's Feathering Paddle Wheel, 1835, size 1 ft. 8 in.  $\times$  1 ft. 2 in.

- 4481 Maudslay, Sons, & Field, Limited, Lambeth, London.

Working Models of Marine Engines, being types fitted in ships of the Royal Navy, &c., from 1823 to 1874.

Various Drawings and Models illustrating the progress of marine engineering from 1823 to the present time.

Screw Cutting Lathe, invented and made by Henry Maudslay at the end of the last century, and fitted with his original slide-rest. This is the first lathe of the kind made, and is the machine from which all universal threads in screws originated.

Air Compressing Machine for working torpedo gear, part of the machinery for H.M.S. "Royal Arthur," made for a working pressure of 1,700 lbs. on the square inch and tested to 2,550 lbs. on the square inch.

- 4482 **R. & W. Hawthorn, Leslie & Co., Limited, St. Peter's Works, Newcastle-on-Tyne.**

Model of Triple Expansion Engines for the Royal Italian Twin Screw Armour Clad "Sardegna," now being constructed by the Societa Hawthorn-Guppy, Naples, from the designs of the Exhibitors. Scale of model,  $1\frac{1}{2}$  in. to the foot. The engines of the "Sardegna" are capable of developing an aggregate power of 25,000 horses, the largest power hitherto put into any vessel. The model (made by Mr. J. G. Allison, of Sunderland) represents the machinery in the starboard engine-room.

- 4483 **The General Engine and Boiler Co., Hatcham Iron Works, New Cross, London, S.E.**

Triple Air Compressing Engine for Torpedo service. Single Air Compressing Engine, with Reservoir, for Torpedo service. Vertical Compound Engine for driving Dynamos. Horizontal "Express" Engine.

- 4484 **Fleming & Ferguson, Phoenix Works, Paisley.**

Working Model of Improved Patent Balanced Quadruple Engines.

Model of Steel, Screw Yacht, built for J. W. Allan, Esq., of the Allan Line of Steamships.

Ditto. Steel Screw Yacht "Imogen," built for J. R. Wood, Esq., Newcastle, N.S.W.

Ditto. Hopper Dredger "David Davies," built for Barry Docks and Railway Company; dredging capacity, 700 tons per hour from 35 feet depth; carrying capacity, 90 tons of dredgings.

Photos of Hopper and Stationary Dredgers, Steam Yachts, &c.

- 4485 **W. H. Allen & Co., York Street Works, Lambeth, S.E.**

18-inch Pumping Engine, capable of lifting 60,000 lbs. of water per minute from a depth of 25 feet, constructed specially for H.M.S. "Royal Oak."

- 4486 **John Penn & Sons, Limited, Greenwich, S.E.**

Working Model of an Oscillating Engine of 500 nominal H.P., made for H.M. Ship "Sphinx" in 1846. Cylinders,  $80\frac{1}{2}$  in. diameter  $\times$  6 ft. stroke; pressure of steam, 6 lbs. per square inch.

Working Model of a Single Screw Horizontal Trunk Engine of 6,700 I.H.P., made for H.M. Ships "Minotaur" and "Northumberland" in 1865. Cylinders, 104 in. effective diameter  $\times$  4 ft. 4 in. stroke; pressure of steam, 25 lbs. per square inch.

Working Model of a Single Screw Vertical Engine of 4,000 I.H.P., made for the Royal Italian vessel "Christoforo Colombo" in 1876. These Engines are of John Penn & Sons' Patent 3-cylinder Expansion type, and can be converted into Compound Engines of 2,000 I.H.P. by adjustment of the steam stop valves. The Cylinders are 62 in. diameter  $\times$  3 ft. 3 in. stroke. A Surface Condenser and Centrifugal Pump are fitted for condensing the steam. The pressure of steam is 60 lbs.

Set of Photographs of the Engines now being fitted in H.M. Ships "Sappho" and "Scylla." The Engines are Twin Screw of the Modern Triple Expansion type of 9,000 I.H.P., with Vertical Cylinders of  $33\frac{1}{2}$  in., 49 in., 74 in. diameter respectively, and 3 ft. 3 in. stroke. The Surface Condensers are built entirely of brass, and are worked in connection with Centrifugal Pumps driven by independent engines. The steam pressure is 155 lbs. per square inch.

## SHIP MODELS.

THE Models exhibited may be regarded as forming two groups, one consisting of ships built for war purposes, and belonging almost exclusively to the British Navy; and the other, of ships exhibited by the various Shipbuilding Firms in the British Empire.

The models in the second group include many types of war vessels, and the finest ships in the Mercantile Marine. These models are for the most part prepared in the best style of modellers' work.

Many of the models in the first group have been prepared for the use of the designers, and not for exhibition.

They illustrate the gradual increase in offensive and defensive power, and the changes which have been caused by the introduction of steam power for propulsion, and armour for defence.

Ships often undergo many changes in rig, armament, and appearance, during their existence; and Officers and Men who have served in the ships must be prepared to find in the models occasional variations from the conditions with which they were familiar in the ships.

### INDICES FOR GUIDANCE IN SEEING THE MODELS OF SHIPS.

There is an Alphabetical Index of Ships' Names on page 441 and following pages, which includes every Ship represented. This index gives the Catalogue Number of the Exhibit.

Some of these are in the Historical Series, formed mainly of loans from the Lords Commissioners of the Admiralty, but including also a few good models lent by private persons. Many others are included in Trade Groups. So far as these last are concerned a description of each ship represented is included in that of the General Exhibit of the Shipowner or Shipbuilder.

### HISTORICAL SERIES.

All the ships included in this series are described in the following pages.

In this series there is a good collection of models of Ships of War of the eighteenth century, some of British design, and some captured ships.

Of seventeenth century ships there are three models, viz., the "Royal Sovereign," the "Royal William," and the "Ruby."

Of sixteenth century ships there are only the very doubtful models of the "Great Harry."

### THE SCALE OF MODELS.

The models are made upon very different scales, and although the scale is usually stated upon the model, visitors may find a difficulty in appreciating the various sizes of the ships.

To meet this difficulty a number of miniature models of existing British Ships

have been made upon an uniform scale; and it will be easy by studying this group (No. 4725) to realise the differences in size of the various ships shown on larger scales in the Exhibition.

## SHIPS, BOATS, AND RAFTS, MODELS AND DRAWINGS.

### 4487 G. Edward Turner, 35, *High Street, Marylebone, London.*

Combination of Hollow End-Compartments, with Girder Keel, for increasing the safety of ships by additional power of flotation and greater strength.

### 4488 Edwards & Symes, Engineers and Shipbuilders, *Millwall, E.*

#### MODELS OF LIGHT DRAUGHT STEAMERS.

SS. "Hermione," Teak Built Screw Steam Pleasure Yacht.

T.S. Steamer "Sergei Witte," 180 ft.  $\times$  27 ft. 6 in.  $\times$  7 ft. 6 in., built of Steel, to carry 520 tons on 5 ft. 6 in. draught of water.

Light Draught Paddlewheel Steamer, 107 ft.  $\times$  18 ft.  $\times$  5 ft. 6 in., for surveying on the Nile, for the Egyptian Government.

P. W. Steamer "Silva Americano," 140 ft.  $\times$  18 ft.  $\times$  6 ft., for service on the River Quanza, West Coast of Africa.

P. W. Steamer "Cardinal Wolsey," specially designed with the extraordinary light draught of 18 inches for the service of the Victoria Steam Boat Association's Traffic from London Bridge to Hampton Court.

Sternwheel Steamer, 140 ft.  $\times$  28 ft.  $\times$  4 ft., fitted with Saloons and Sleeping Cabins for service in hot climates.

P. W. Steamer "Corconera," 80 ft.  $\times$  11 ft.  $\times$  5 ft. 6 in., for service at Santander, North Coast of Spain, to carry 150 to 200 passengers on 2 feet draught of water.

S. S. "Escort," a photograph of a powerful Screw Steam Tug and Water Boat, 112 ft.  $\times$  23 ft.  $\times$  11 ft., for service at Bombay for the British India Steam Navigation Company.

### 4489 Forrestt & Son, *Norway Yard, Limehouse, London, E., and The Shipyard, Wyvenhoe, Essex.*

Half Models of the—

"Creole," Composite 40 rater Yacht.

"Southern Cross," Composite Auxiliary Steam Yacht, for the Melanesian Mission.

"Archie," Composite 5 rater Yacht.

"Lady Hermione," Composite Yawl, built for His Excellency the Marquis of Dufferin and Ava, K.T.

"Bonanza," Iron Steam Yacht.

"Midge," Screw Launch for the Crown Agents for the Colonies.

"Wyvern," Composite Screw Tug.

Twin Screw Launch for the Congo.

Sidewheel Launch for the Congo.

56 feet Vedette Steam Pinnace for the Admiralty.

Sternwheel Steamer.

Barge.

Whole Models—

Twin Screw Steamer, 140 ft. long, for Lake Windermere, for the Furness Railway Company.

4489—*continued.*

Sternwheel Steamer for the Brazilian Government.  
Steel Whale Boat for the Emin Bey Relief Expedition.  
Patent Life Rafts.

4490 **John I. Thornycroft & Co., Chiswick, London, W.**

Models of—

H. M. Torpedo Vessel "Lightning," the first Torpedo Boat built for the British Navy.

First Class Torpedo Boat of "Coureur" (French) type.

First Class Torpedo Boat of British Royal Navy type.

Second Class Torpedo Boat of British Royal Navy type.

Guard Boat for Mine Fields.

Patrol Steamer.

Thornycroft Water-Tube Boilers.

Shallow Draught Steam Launch.

Working Model of Steamer, made by the late Mr. Thomas Thornycroft in 1856, with fan for forcing the draught.

Photographs of—

Shallow Draught Patrol Steamer.

Spanish Torpedo Boat "Ariete," taken while running at a speed of 26 knots per hour.

Water-Tube Boiler.

Latest examples of Thornycroft First and Second Class Torpedo Boats.

4491 **Ismay, Imrie & Co. (White Star Line), 10, Water Street, Liverpool; and at London, Paris, New York, &c.**

Model of H. M. Armed Cruisers "Teutonic" and "Majestic," Royal Mail Steamers White Star Line.

Oil Painting of R. M. S. "Teutonic" leaving the Mersey, by W. L. Wyllie, A. R. A.

4492 **Union Steam Ship Company, Limited, 94 & 96, Bishopsgate Street Within, London, E. C.**

Full-rigged Model of the New Twin-Screw Royal Mail Steamer "Scot," 7,000 tons; 12,000 Horse-power; Length over all, 500 feet; Breadth, 54 feet 6 inches; Depth, 37 feet 6 inches; Speed, 18½ knots.

Whole Model of the Royal Mail Steamer "Mexican," 4,549 tons; 4,600 Horse-power; Length, 378 feet; Breadth, 47 feet; Depth, 29 feet 3 inches.

4493 **R. & H. Green, Blackwall Yard, London, E.**

(i.) Model of H. M. S. "Victory," 101 guns, 2164 tons, built at Chatham in 1765.

(ii.) Model of the Hon. East India Company's ship "Falmouth," built in 1752.

(iii.) Model of H. M. S. "Leander," 50 guns, built at Blackwall Yard in 1813.

(iv.) Section of ship made on board H. M. S. "Victory," planned by Admiral Lord Nelson, off Toulon, for fitting a prize, taken off that port, as a bomb-vessel.

(v.) Model of old Cutter, supposed to be a Trinity Yacht.

4493—*continued.*

- (vi.) Model of Paddle Steamer, built in 1890, for the Chirket Hairie Co., of Constantinople, for service in the Bosphorus, 165 ft.  $\times$  21 ft.  $\times$  10 ft., draft 5 ft. Engines 580 I.H.P.
- (vii.) Model of Woolwich free Ferry Boats, constructed for the London County Council, 1889, 164 ft.  $\times$  59 ft. 4 in.  $\times$  7 ft., draft 4 ft. Machinery of 600 I.H.P.
- (viii.) Model of auxiliary Steam Yacht, "Princesse Alice," building for H.S.H. the Prince of Monaco, 167 ft.  $\times$  27 ft.  $\times$  16 ft. 3 in., draft 12 ft. 9 in. Machinery of 350 I.H.P. (This yacht is being specially constructed with a view to carrying out scientific research in connection with deep sea sounding and dredging, the action of currents, etc.)
- (ix.) Model of Steam Hydraulic Lifeboat, "Duke of Northumberland," 50 ft.  $\times$  14 ft. 3 in.  $\times$  5 ft. 5½ in., draft 3 ft. 3 in., built for the Royal National Lifeboat Institution. (This Lifeboat has been stationed since October, 1890, at Harwich, and since that time has been very successful in rescuing a number of crews from wrecked vessels during the exceptionally heavy winter of 1890 and 91.)

## PICTURES.

Finished Sail Plan, showing elevation, bow and stern, of the "Fal-mouth;" launched at Blackwall, 1752. Length of keel 108 ft. 9 in., breadth 34 ft.

Profile of ditto.

Constructive Plan of ditto.

Photograph of similar drawing of the "Earl of Wycombe," built at Blackwall, 1795.

Three Pencil Pictures of the "Royal William," built in 1726.

Plans of Woolwich, Deptford, Chatham, Sheerness, and Portsmouth Dockyards.

4497 **Robert Stephenson & Co., Limited, Newcastle-on-Tyne.**

Full-rigged Model of H.M.S. "Sybille," Second Class Cruiser.

4498 **Wm. Simons & Co., London Works, Renfrew, near Glasgow.**

Complete model of the Patent Stern Well Hopper Dredger, "St. Andrew," built for Her Majesty's Government and engaged deepening the dockyard at Portsmouth. This vessel has capacity in its hoppers for 500 tons of dredgings, and the buckets are capable of raising a similar quantity of free soil per hour. It can dredge to a depth of 40 feet below water level.

Complete working model of a Patent Elevating Steamer for Ferry Traffic, embarking and landing passengers, vehicles, &c., on the same level as the quay, irrespective of the height of the tide. The original is at work in Glasgow Harbour.

4499 **Donald Currie & Co., Managers of the Castle Mail Packets Company, Limited, 3 and 4, Fenchurch Street, London, E.C.**

Full Model of the Royal Mail Steamer "Dunottar Castle" (5,465 tons), of the Castle Line.

Photographs of South African Scenery, &c.

500 **R. W. Beaumont, Deputy Inspector-General R.N., Highcross, Maidstone.**

Models of Two Frigates, made from Beef Bones by French Prisoners, while confined in the Hulks at Sheerness or the Nore, during the French War in the early part of this century.

- 4501 **Captain Arthur Morrell, R.N., T. S.** "*Cornwall*," *Purfleet, Essex.*  
Model (in glass case) of H.M.S. "*Galatea*."
- 4502 **J. P. Wright, 38, St. Peter's Road, Croydon.**  
Models of Collapsible Dingey for Torpedo Boats or Yachts, and of Light Folding Boat for Explorers and Sportsmen.
- 4503 **Earl of St. German's, 13, Grosvenor Gardens, S.W.**  
Model of Boat, with figures of Soldiers and Sailors, showing method of Landing Troops. Date, probably early in the 18th Century.
- 4504 **J. W. Peake, Esq., 44, Kensington Park Gardens, W.**  
Model of H.M.S. "*Victory*," made in Portsmouth Dockyard in 1760, at the time the original ship was laid down, by Mr. Henry Peake (afterwards Sir Henry Peake, Surveyor of the Navy). It is made of the same wood as the original, and is put together with pins.
- 4505 **Palmer's Shipbuilding and Iron Co., Limited, Jarrow.**
- (i.) Model of H.M.S. "*Resolution*." Twin Screw First Class Barbette Battle Ship, length 380 ft., breadth 75 ft., draught 27 ft. 6 in., displacement 14,150 tons. I.H.P., 13,000, average speed at sea 17½ knots. Thickness of armour belt 18 in. Principal armament, four 67 ton guns in barbettes, and 10 6-in. guns at sides.
  - (ii.) Model of H.M.S. "*Orlando*." Twin Screw Belted Cruiser, length 300 ft., breadth 56 ft., draught 21 ft., displacement 5,000 tons, average speed at sea 19 knots. I.H.P., 8,621. Thickness of armour belt 10 in. Principal armament two 9·2-in. guns at ends and ten 6-in. guns at sides.
  - (iii.) Model of H.M.S. "*Surprise*." Despatch Vessel, length 250 ft., breadth 32 ft. 6 in., draught 13 ft., displacement 1,400 tons, average speed at sea 18·62 knots. I.H.P., 3173.
  - (iv.) Model of Armed Despatch Vessel, length 275 ft., breadth 33 ft., draught 12 ft. 6 in., displacement 1,580 tons, average speed at sea 21½ knots. I.H.P., 10,000. Armament 10 Q.F. guns and three torpedo tubes.
  - (v.) Model of Twin Screw Steam Yacht "*Irene*," length 220 ft., beam 27 ft., depth 14 ft. 1 in., displacement 905 tons, average speed at sea 18·3 knots. I.H.P., 2,800.
  - (vi.) Model of S.S. "*Atalanta*." Screw Steamer for Fruit Trade, length 235 ft., breadth 22 ft., depth 22 ft., displacement 1,915 tons, average speed at sea 16·25 knots. I.H.P., 3,000.
  - (vii.) Working Model of a set of Commercial Triple Expansion Engines, as fitted in Trading Steam Vessels; Cylinders 22, 35, 58 inches diameter, by 42 in. stroke, propeller 15 ft. 4 in. diameter, 17 ft. pitch, 54·8 square feet surface. I.H.P. on voyage, 1,000. Scale of Model, 3 inches equal to one foot.
  - (viii.) Samples of the various sections rolled in Iron and Steel.  
Test pieces illustrative of the toughness and ductility of Steel Plates and Bars.  
Samples of Hæmatite and Cleveland Pig Iron.  
Comparative quantities of materials used in making Pig Iron.  
Model of Jarrow Blast Furnace.
  - (ix.) Collection of Half Models, Photographs of Ships, etc.

**4506 Messrs. Samuda Bros., Limited, Poplar, London, E.**

- (i.) Model of H.M.S. "Thunderbolt." Iron Armour Plated Floating Battery, built in 1856. Displacement, 1,800 tons. Engines (by Ravenhill), 200 H.P. (nominal). Iron armour plates 4 inches thick. Armament, 30 68-pr. guns.
- (ii.) Model of the "Arminius." Iron Armour Plated Turret Vessel, built in 1864 for the Royal Prussian Navy. Displacement, 1,600 tons. Iron armour  $4\frac{1}{2}$  inches thick. Engines (by John Penn & Sons) of 1350 H.P. Armament, 4  $8\frac{1}{4}$ -inch bronze guns in turrets.
- (iii.) Model of the "Kaiser" and "Deutschland." Iron Armour-Plated Central Battery Frigates, built in 1874 for the Imperial German Navy. Displacement, 8,000 tons. Iron armour 10 inches thick. Engines (by John Penn & Sons) of 8,000 I.H.P. Armament, eight 26-c/m and one 21-c/m Krupp guns.
- (iv.) Model of the "Almirante Brown." The first war vessel built of steel and with steel faced armour. Steel Central Battery Corvette, built in 1880 for the Argentine Republic. Displacement, 4,333 tons. Steel faced armour 9 inches thick. Engines (by Maudslay, Sons & Field), 5,400 I.H.P. Armament, eight 8-inch B.L. guns and machine armament.
- (v.) Model of the "Riachuelo," Steel Armour Plated Turret Ship, built in 1883 for the Imperial Brazilian Navy. Displacement, 6,000 tons. Steel faced armour 11 inches thick. Engines (by Humphreys, Tennant & Co.) of 7,500 H.P. Four 9·2-inches 22-ton guns in turrets, and six 6-inch guns and machine armament.
- (vi.) Model of the "Mary Beatrice." Steel Paddle Wheel Passenger Steamer for the South Eastern Railway Company, for Channel Service, built in 1882. Displacement, 850 tons. Speed, 19 knots. Engines (by John Penn & Sons) of 2,900 H.P.
- (vii.) Model of "The Shah," "Duke of Cambridge," "H.M. Stanley," "Kaiser," "Bismarck," "Empress Frederick" (one model), Steel Paddle Wheel Passenger Steamers for River Service on the Thames, built in 1889 and 1891 for the Victoria Steamboat Association.
- (viii.) Model of two Unsinkable Steel Paddle Wheel Passenger Steamers for Ferry and Excursion traffic, building for the South Eastern Railway Company.
- (ix.) Picture of H.M.S. "Belleisle" and "Orion."  
       ,, H.M.S. "Thunderbolt," H.I.M. Frigates "Kaiser"  
               and "Deutschland."

Photograph of "Riachuelo," Brazilian Armour Clad.

**4507 Corporation of the City of Winchester.**

Model of H.M.S. "Constance," Sailing Frigate of 50 Guns.

**508 Telegraph Construction and Maintenance Company, Limited,  
 38, Old Broad Street, London.**

Model of the SS. "Great Eastern," fitted as a Telegraph Ship.  
*Lent by Captain R. C. Halpin, R.N.R., late Commander of SS. "Great Eastern."*

Model of the SS. "Britannia," Twin Screw Telegraph Ship.

Model of the "Sunk" Lightship, showing the system by which  
 Telegraphic communication with the shore has been established.

Four Cases containing specimens of Cables laid since 1884.

Two Cases containing specimens of Cables recovered after several  
 years' submersion, with marine growths attached, &c.

4508—*continued.*

Deep Sea Automatic Sounding Machine (Lucas's Patent), with Sinkers and Snappers for obtaining specimens of the bottom—suitable for depths to 5,000 fathoms.

Automatic Sounding Machine (Lucas's Patent), for use in depths not exceeding 400 fathoms—suitable for ships or boats.

Telegraph Cable Buoy, fitted with Flagstaff, Beacon, Lamps, &c.

The Grapnel which was lowered from the "Great Eastern," and successfully recovered, in 1866, the lost end of the 1865 Atlantic Cable, from a depth of 2,150 fathoms.

Centipede Grapnel, for use on rough or rocky bottom.

Grapnel with removable prongs. Broken prongs can be replaced.

Lucas's Patent Cutting and Holding Grapnel. In repairing Submarine Telegraph Cables in deep water this Grapnel is used to lift the bight of the Cable, cut off the part not required, and hold on to and bring into the Ship the end which is wanted for splicing.

Buoy Rope, Grapnel Rope, Torpedo Cable, Tools used in splicing Cables, Anchors and other objects recovered from the bottom during Cable operations.

4509 **Scott & Co., Shipbuilders and Engineers, Greenock.**

Model of Sloop of War "Prince of Wales," constructed by Messrs. John Scott & Sons, Greenock, for the British Government, in 1803.

Model of Frigate "Melampus." Model made in 1808, at Barnstaple in Devonshire, by French prisoners confined there. The rigging is made throughout of human hair. All the blocks have sheaves, and the details of planking, guns, and fittings are complete to scale. Constructed by exhibitors at Greenock, 1889.

Model of H.M. Gun Vessel "Thrush," 80½ tons; 1,200 H.P.; Six guns; commanded by H.R.H., Prince George of Wales, K.G.

4511 **W. B. Bromley, M.Inst.C.E., Crofton House, Lampton Road, Hounslow, W.**

Model of a New Ship, propelled by means of two screws fitted forward, one on each side of the Vessel. (Patented.)

4512 **Arthur L. Radford, 58, Leadenhall Street, London.**

Apparatus for Coaling Ships at Sea, either in Motion or at Anchor.

4513 **J. W. Owlett (late R.N.), 36, Hampden Road, Grays, Essex.**

Model of H.M. Schooner "Renard" (scale ½ inch to foot), 1 Gun, 33 Officers, and Men. Made by J. W. Owlett, late Quartermaster of the "Renard," during the years 1875—77.

4514 **Cunard Steam Ship Company, Limited, 8, Water Street, Liverpool.**

Model of Cunard Royal Mail Steam Ships "Umbria" and "Etruria." Scale ¼ inch to 1 foot. 8,000 tons gross; 12,000 I.H.P. Built and engined in 1884 by John Elder & Co., Glasgow.

4515 **Laird Brothers, Birkenhead Iron Works.**

Models of Vessels built by Messrs. Laird Bros., illustrating the progress in Ship Building since 1834 :—

## EARLY IRON STEAMERS.—PADDLE WHEEL.

- (i.) "John Randolph" (1834). Length, 110 feet; breadth, 22 feet; depth, 7 feet 6 inches; 249 tons; 60 H.P.

The first iron steamer ever seen on American waters, built at Birkenhead, taken to pieces, shipped at Liverpool, rivetted together on the Savannah river, where for many years she did service as a tug boat.

4515—*continued.*

- (ii.) The H.E.I.C. "Euphrates" and "Tigris" (1834). Length, 105 feet; breadth, 19 feet; depth, 7 feet 6 inches; 179 tons; 50 H.P.

Built for the Hon. East India Company for General Chesney's expedition for the exploration of the River Euphrates. These vessels were built at Birkenhead, taken to pieces and shipped to the coast of Syria, and after having been carried across the desert by camels, were put together and launched on the banks of the Euphrates by artisans sent from Birkenhead for the purpose.

- (iii.) H.E.I.C. "Nemesis" (1839). Length, 169 feet; breadth, 29 feet; depth, 10 feet 3 inches; 660 tons; 120 H.P.

Built for the Hon. East India Company for service on the coast of India, and armed with two 32 pr. pivot guns. This vessel, though only drawing 5 feet of water, made the passage out to India round the Cape, a drop rudder and sliding keel, as shown on model, being fitted for that purpose. Under the command of the late Admiral Sir William Hall, she did distinguished service in the China Wars, her light draught enabling her to perform service which no wooden vessel in the fleet was able to accomplish.

## CHANNEL MAIL STEAMERS.

- (iv.) H.M.S. "Dover" (1840). Length, 113 feet; breadth, 21 feet; depth, 9 feet 10½ inches; 227 tons; 90 H.P.

This was the first iron mail steamer, and was built for the Admiralty. She carried the mails between Dover and Calais for many years, and afterwards did good service on the coast of Africa.

- (v.) The "St. Columba" (1847). Length, 190 feet; breadth, 27 feet; depth, 13 feet 4 inches; 696 tons; 350 H.P.

Built to the order of the Government for the mail service between Holyhead and Dublin. One of the fastest vessels of her day.

- (vi.) The "Ulster," "Munster," and "Connaught" (1860). Length, between perpendiculars, 334 feet, over all, 348 feet; breadth, 35 feet; depth, 19 feet; 2,039 tons; 750 H.P.

Built for the City of Dublin Steam Packet Company, for the mail service between Holyhead and Kingstown. The "Connaught" attained a speed of over 18 knots, or 21 statute miles per hour, on her official trial at Stokes Bay. These three vessels, together with the "Leinster," built by Messrs. Samuda, still perform this service.

- (vii.) The "Ireland" (1885). Length, between perpendiculars, 360 feet, over all, 380 feet; breadth, 38 feet; depth, 19 feet 3 inches; 2,590 tons. Engine; by Laird Brothers, 6,000 I.H.P. with forced draught. Speed, 22 knots.

Built for the City of Dublin S. P. Company for the Holyhead and Kingstown Mail Service.

## EARLY SCREW STEAMERS.

- (viii.) The "Robert F. Stockton" (1838). Length, 63 feet 5 inches; breadth, 10 feet; depth, 7 feet; 33 tons; 30 H.P.

One of the first screw steamers ever built; fitted with Ericsson's screw propeller. The propeller was unshipped for the voyage made under canvas from Liverpool to New York, where she was employed for many years as a tug boat.

- (ix.) The "Forerunner" (1852). Length, 161 feet 6 inches; breadth, 22 feet; depth, 11 feet 4½ inches; 381 tons; 50 H.P.

Built for Macgregor Laird, Esq., the founder of the African Royal Mail Steam Navigation Company, of which she was the pioneer vessel.

- (x.) The "Nubia" (1854). Length, 292 feet; breadth, 39 feet; depth, 27 feet 9 inches; 2,173 tons; 450 H.P.

Type of screw mail and passenger steamer of her date. Built for the P. and O. Company.

## WARSHIPS, &amp;C.

- (xi.) The "Ottoman," 4,843 tons (1890). Length, 405 feet; breadth, 45 feet 6 inches; depth, 36 feet 6 inches; 2,750 I.H.P.

Built for the British and North Atlantic Steamship Co. Specially fitted for cattle.

4515—*continued.*

- (xii.) Picture of the Ferry Steamer "Nun" (1840). Length, 105 feet ; breadth, 20 feet ; depth, 8 feet 9 inches ; 187 tons ; 60 H.P.

The picture shows the "Nun" grounded on the stone pier at Birkenhead, her after end resting on the pier and her bow on the bare rock below, the distance between the points of support being 81 feet ; the whole weight of the machinery, 65 tons, being in the middle of this unsupported space. She floated off the succeeding tide without having received the slightest damage. This incident, which occurred in 1842, went far to confirm the growing confidence in the strength of iron ships.

- (xiii.) Laird's Patent Rudder.

Applicable to two-bowed ferry, tug, or gun boats, steering from each end. Patent dated 1843.

- (xiii.a.) Frigate, proposed to the Admiralty by the late Wm. Laird, Esq., 1836.

- (xiv.) Bevis's Patent Feathering Screw.

To enable steamers to use their sail power with advantage without lifting the propeller.

- (xv.) The "Blackcock," 330 tons (1886). Length, 145 feet ; breadth, 22 feet ; depth, 11 feet.

Screw Tug-boat built for the Liverpool Screw Towing and Lighterage Co. Engines triple expansion, 650 I.H.P.

- (xvi.) The "Stormcock," 465 tons (1877). Length, 155 feet ; breadth, 25 feet ; depth, 12 feet.

Twin Screw Tug-boat built for the Liverpool Screw Towing and Lighterage Co. 1,200 I.H.P.

- (xvii.) Chinese Gunboats "Fu Sheng" and "Chien Sheng," 256 tons (1875). Length, 87 feet ; breadth, 26 feet ; depth, 8 feet 3 inches.

Built for the Chinese Government. Armament, one 400-pr. 18-ton Vavasseur rifled gun.

- (xviii.) H.M.S. "Wyvern," 1,827 tons (1863). Length, 220 feet ; breadth, 42 feet ; depth, 18 feet 3 inches.

H.M. armour-clad double turret ship, fitted with tripod masts. Four 12-ton rifled guns.

- (xix.) H.M.S. "Rattlesnake," 524 tons (1886). Length, 200 feet ; breadth, 23 feet ; depth, 12 feet. Triple expansion engines, 2,700 I.H.P. Speed, 19½ knots.

Steel torpedo gunboat (or catcher). Armament, four torpedoes, one 4-inch B.L. gun, six 3-pr. Q.F. guns.

- (xx.) Chilean Turret Ship "Huasear," 1,101 tons (1865). Length, 190 feet ; breadth, 35 feet ; depth, 17 feet 10 inches. 1,600 I.H.P.

Armour-clad turret ship, built for the Peruvian Government, and captured (after a desperate resistance) by the Chilean Fleet, during the late war between Chili and Peru. Armament, two 12½-ton 300-pr. guns.

- (xxi.) Chilean Torpedo Gunboats "Almirante Condell" and "Almirante Lynch" (1890). Length, 230 feet ; breadth, 27 feet 6 inches ; depth 14 feet 9 inches. Triple expansion engine, 4,500 I.H.P. Speed on three hour trial, 20½ knots. Armament, three 14-pr. and four 3-pr. Q.F. guns, two machine guns, and five torpedo tubes.

- (xxii.) "9 de Julio" and "Independencia" (1891), River Ironclads, now building for the Argentine Government. Length, 240 feet ; breadth, 44 feet ; depth, 22 feet. Armament, two 24-c/m. guns in barbettes, four 4-7 c/m guns, four 3-pr. Q.F. guns, four 1-pr. guns, two torpedo guns.

- (xxiii.) H.M.S. "Royal Oak," First-class Twin Screw Battle Ship (now building). Length, 375 feet ; breadth, 75 feet ; depth, 44 feet. Displacement, 14,300. 13,000 I.H.P. Armament, four 67-ton B.L.R., ten 6-inch and eighteen smaller Q.F., eight machine guns, and seven torpedoes.

4515—*continued.*

(xxiv.) The "Columbia," Atlantic Mail Steamer. Length, 463 feet; breadth, 56 feet; depth in hold, 35 feet 8 inches; gross tonnage, 7,363 tons; engines triple expansion, 13,500 I.H.P. Average speed for four voyages, 18.57 knots. Average speed on best voyage, 19.15 knots.

4516 **Clark & Standfield.** 11, *Victoria Street, S.W., and Grays Engineering Works, Grays, Sussex.*

## IMPROVED SYSTEMS OF FLOATING DOCKS.

The Hydraulic Graving Dock.

The Depositing Dock and Gridiron Stage.

The Off Shore Dock.

The Self Docking Dock.

Mechanical Side Shores, and Self Centering Shores, Spring Booms.

Improved Bilge Blocks and Dock Appliances generally.

## IMPROVEMENTS IN INLAND NAVIGATION.

The Hydraulic Canal Lifts at Les Fontinettes, France, and La Louvière, Belgium.

4521 **A. & J. Inglis,** *Pointhouse Ship Building Yard, Glasgow.*  
Models of—

Screw Steamer of 5,000 tons.

Screw Steamer of 850 tons.

Paddle Steamer of 2,800 tons.

Steam Yacht of 200 tons.

4522 **E. Sydney,** 57, *Bath Row, Birmingham.*  
New Improved Ventilated Portable Refrigerator.

4523 **William Crang** (late R.N.), 8, *Brassey Square, Shaftesbury Park, S.W.*

Working Model of 32 feet Barge, formerly belonging to the Royal Yacht "Victoria and Albert," fitted with the owner's system of disengaging hooks. Scale  $\frac{1}{2}$  inch to the foot. The whole made and fitted by the owner while serving as Chief Yeoman of Signals in H.M.S. "Duke of Wellington," at Portsmouth.

4524 **James S. Mackie,** 46, *Relf Road, Peckham Rye, London, S.E.*  
Model of "Catamaran."

4525 **Acme Ventilating and Heating Company,** 35, *Tarleton Street, Liverpool.*

Acme Patent Exhaust Circular Ventilator, made in strong cast iron, copper, or zinc. Acme Patent Exhaust Louvre Ventilator. Acme Improved Patent Mechanical Rotary Ventilator.

4526 **Alfred J. Hyde,** 46, *Kempshott Road, Streatham, S.W.*

Model of Full-rigged Line of Battle Ship, 130 Guns, made by French Prisoners in Lewes Gaol. (The model is built, and all the rigging, &c., made of human hair.)

4527 **W. Bemrose,** *Elmhurst, Derby.*

Model of the "Princess Mary," the vessel which brought the Prince of Orange to England, in 1689. In 1774 the "Princess Mary" was sold by Government and employed as a West Indianman, when her build, which was considered particularly excellent, was materially altered. She was subsequently employed as a collier, and called the

4527—*continued.*

"Betsy Cains." She was wrecked on a reef of rocks in entering the Tyne, on 18th of July, 1827. The model is entirely "built." Amongst the decorations of the stern are portraits of William and Mary, monogram "W. R.," and the Royal Arms.

4528 **John Hastie & Co., Kilblain Engine Works, Greenock, N.B.**

Safety After Steering Apparatus, consisting of Patent Guide Frame and Patent Rudder Brake.

4529 **Henry Lumley, Assoc. I.N.A., 22, St. James Street, Piccadilly, London.**

The Lumley Rudder.

4530 **A. Chapman & Co., 25, Colville Terrace, Powis Square, W.**

Improved Rudder Fittings, by means of which the Rudder rises and falls automatically in passing over an obstacle. Visitors are invited to see for themselves how the fittings work. To *ship*, insert lower end of rod affixed to rudder in the slide on stern of boat, and let drop. To *unship*, merely draw up rudder until the rod leaves the slide.

4531 **Taylor, Prior, & Shields, 206, Hollydale Road, Nunhead, S.E.**

Working Model of Proposed Propeller and Steerer in Tank. Model of Vessel with Propeller and Steerer attached.

4532 **Admiral de Kantzow.**

Model of a Slave Schooner, captured by H.M.S. "Sharpshooter."

4533 **John Charles Sharpe, 19, Fleet Street, London, E.C.**

No. 1—An exact Model of an old 74 gun Man-of-War. Made by a seaman after leaving the Service at Northfleet Dockyard, taking him many years to complete.

No. 2—A small Model of a Frigate in ivory and tortoiseshell, complete with Rigging and Fittings.

4533A **Lyndon Ball, Grove Road, Pinner Road, Bushey, Herts.**

Model (formerly the property of the late Gordon Cumming, Esq.) of H.M.S. "London," full rigged, carrying 120 guns.

4536 **Andrew Malcolm, 40, Saint Enoch Square, Glasgow.**

Model of a French Ship of War, built of Bone by a French Prisoner of War in Pennycuik Prison, near Edinburgh, in the beginning of the century. (The bone was procured from the meat served as rations to the prisoner.)

4537 **Major-General W. Porter, 28, Cheniston Gardens, Kensington.**

Model of one of H.M. Ships (presumed, from the figure head, to be H.M.S. "Sea Horse"), formerly belonging to Rear-Admiral Kempenfeldt, who was drowned in the wreck of the "Royal George" at Spithead.

4538 **John Arthur Bushell, 42, Mildmay Park, London, N.**

Miniature Model, Full-rigged, of H.M.S. "Alexander," of 110 Guns, made by a French Prisoner of War at Fortune Prison, Portsmouth. The "Alexander" was completed for sea in 1778, she was captured by the French in November, 1794, was re-taken by Lord Bridport, off L'Orient, on the 23rd of June, 1795, and taken to pieces in 1819.

- 4539 **Mission to Deep Sea Fishermen.** *Bridge House, 181, Queen Victoria Street, E. C.*

Stall for the sale of Mission publications.

- 4540 **Orient Line of Royal Mail Steamers, 13, Fenchurch Avenue, London, E. C.**

*Full Models.*

Orient Steam Navigation Company's Royal Mail Twin-Screw Steamship "Ophir." Length between perpendiculars, 465 ft.; breadth, 53 ft. 6 in.; depth moulded, 37 ft.; tonnage, 6,500; H.P., 9,500; speed, 18 knots.

Royal Mail Screw Steamship "Ormuz." Length between perpendiculars, 465 ft.; breadth, 52 ft.; depth moulded, 37 ft.; register tonnage, 6,031; I.H.P., 8,500; speed, 18 knots.

Royal Mail Screw Steamship "Austral." Length between perpendiculars, 455 ft.; breadth, 48 ft. 3 in.; depth moulded, 37 ft.; register tonnage, 5,524; I.H.P., 7,000; speed, 17½ knots.

Royal Mail Screw Steamship "Orient." Length between perpendiculars, 445 ft.; breadth, 46 ft. 3 in.; depth moulded, 36 ft. 10 in.; register tonnage, 5,365; I.H.P., 5,500; speed, 15½ knots.

Pacific Steam Navigation Company's Royal Mail Screw Steamships "Oroya" and "Orizaba." Length between perpendiculars, 460 ft.; breadth, 49 ft.; depth moulded, 38 ft. 3 in.; register tonnage, 6,077; I.H.P., 7,000; speed, 16½ knots.

Royal Mail Screw Steamships "Oruba" and "Orotava." Length between perpendiculars, 430 ft.; breadth, 49 ft.; depth moulded, 37 ft.; register tonnage, 5,552; I.H.P., 6,500; speed, 16½ knots.

Water Colour Painting—"An Orient Liner off the Eddystone," by W. L. Wyllie, A.R.A.

- 4541 **Naval Construction & Armaments Co., Limited, Barrow-in-Furness.**

Models of H.M. Cruisers "Latona," "Melampus," and "Naiad." Length on load water line, 300 ft.; breadth moulded, 43 ft.; depth moulded, 23 ft.; displacement, 3,400 tons; speed, 20.112 knots; I.H.P., 9,602.

Steel Twin Screw Steamships building for the Imperial Steam Navigation Company's Atlantic Service. Length between perpendiculars, 500 ft.; length overall, 520 ft.; breadth moulded, 57 ft.; depth moulded, 37 ft.; displacement, 13,700 tons; speed, 20 knots; I.H.P., 16,500.

Steamships "Empress of India," "Empress of Japan," and "Empress of China," built for the Canadian Pacific Railway Company. Length between perpendiculars, 440 ft.; length overall, 485 ft.; breadth moulded, 51 ft.; depth, 36 ft.; displacement, 10,000 tons; speed, 19 knots; I.H.P., 10,000.

Steamship "Santiago." Length between perpendiculars, 350 ft.; length overall, 361 ft.; breadth moulded, 45 ft.; depth moulded to upper deck, 31 ft. 9 in.; displacement, 6,000 tons; speed, 14½ knots; I.H.P., 3,500.

- 4542 **Yarrow & Co., Poplar.**

Models of the latest type of—

(a.) First Class Torpedo Boat, adopted by the British Admiralty.

4542—*continued.*

Length, 130 feet ; Beam, 13 feet 6 inches ; Speed, with a load of 12 tons, 24.45 knots.

(b.) Second Class Torpedo Boat, adopted by the British Admiralty.

Length, 60 feet ; Beam, 9 feet 3 inches ; Speed, with a load of 2 tons, 18 knots.

Model of Stern Wheel Gunboats "Mosquito" and "Herald," built for the British Admiralty, for service on the Zambesi river. Length over all, 87 feet ; Beam, 18 feet ; Draft, 18 inches ; Speed, 10 miles.

4543 **The London & Glasgow Engineering & Iron Shipbuilding Company, Limited,** 172, *Lancefield Street, Glasgow.*

Model of H.M. Twin-Screw Wood Sheathed Steel Protected Cruisers "Indefatigable," "Intrepid," and "Iphigenia." Principal dimensions : Length between perpendiculars, 300 feet ; Breadth, extreme, 43 feet 8 inches ; Displacement at load draft, 3,600 tons ; Engines, Triple Compound Condensing, of a collective I.H.P. of 9,000 horses, working pressure 150 lbs.

4545 **Alfred Suart & Co.,** 32, *Great St. Helen's, E.C.*

Full Model of—

"Allegheny."

Half Models of—

"Prudentia"

"Tancarville"

"Wildflower"

"Petrolea"

} Oil Tank Steamers.

4546 **C. Bethell & Co.,** 110, *Fenchurch Street, E.C., and Trinder, Anderson & Co.,* 4, *St. Mary Axe, E.C. (Managers of the West Australian Steam Navigation Co.).*

Model of the ss. "Australine," one of the steamers of the line running between the various West Australian Ports and Singapore.

4547 **James Rigg, Engineer,** 11, *Queen Victoria Street, London, E.C.*

Rigg's Patent Machinery for the Discharge and Loading of Coal and other Cargo. (Framed Drawing.)

**R. & W. HAWTHORN, LESLIE & CO., L<sup>D</sup>.**  
Engineers and Shipbuilders,  
**NEWCASTLE-ON-TYNE.**

---

**ENGINES OF ALL KINDS,**  
AS SUPPLIED FOR NAVY AND MERCANTILE MARINE,  
**ST. PETER'S WORKS, NEWCASTLE-ON-TYNE.**

---

**SHIPBUILDING YARD,**  
With FORGE, large GRAVING DOCK, and facilities for  
Repairs,  
**HEBBURN-ON-TYNE.**

---

**LOCOMOTIVES OF EVERY SIZE AND DESCRIPTION.**

---

**CRANE ENGINES,**

*Specially designed for Shipyard use, as supplied to  
British and Foreign Governments, always on stock  
or in progress.*

## WAR SHIPS.

The following is a descriptive list of the Historical Series of War Ships. The collection consists mainly of models lent by the Lords Commissioners of the Admiralty.

On page 441, *et seq.*, is an Alphabetical Index to the ships represented.

Should the visitor desire to find a model of a particular ship, or of one of that class of ship, he should turn to the Alphabetical Index. He will then see if that particular ship is represented, and if so the Name and No. of the model representing it. The Nos. on the walls and in the cases being arranged in numerical order, the required model can be readily discovered.

4497 **Sybilie.** (See APOLLO.)

4507 **Constance.** Lent by the Corporation of Winchester. See ARETHUSA.

4509 **Thrush.** *Composite Gun Boat.* Launched in 1839.

(In Messrs. Scotts' Exhibit).

The THRUSH is now commanded by Prince George of Wales. Has one sister, the SPARROW.

Heaviest gun, 26 cwts. Length, 165 ft.

Carries 75 men. Breadth, 31 ft.

805 tons Displacement.

4517 **Vanguard.** Rigged Model of line of Battle Ship.

4537 **Seahorse.**

Frigate of the first half of the eighteenth century. This model once belonged to Admiral Kempenfelt, who had commanded the ship.

4551 **Snake.** *3rd Class Unprotected Gun-boat.* Launched in 1871. Half Model. Scale,  $\frac{1}{8}$  in. = one foot.

Twin screw gun boat built for coast defence. Has 19 sisters, viz., ANT, ARROW, BADGER, BLAZER, BLOODHOUND, BONETTA, BULLDOG, BUSTARD, COMET, CUCKOO, FIDGET, HYÆNA, KITE, MASIFF, PICKLE, PIKE, SCOURGE, SNAP, WEAZEL.

Heaviest gun, 21 tons. Length, 85 ft.

Carries 31 men. Breadth, 26 ft. 2 ins.

254 tons Displacement.

4552 **Condor.** *2nd Class Unprotected Gun Vessel.* Launched in 1876. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Screw composite gun vessel. Had 6 sisters, viz., ALGERINE, FALCON, FLAMINGO, GRIFFON, RAMBLER, and RANGER.

Heaviest gun, 64 cwts. Length, 157 ft.

Carries 110 men. Breadth, 29 ft. 6 in.

730 tons Displacement.

4553 **Swift.** *2nd Class Unprotected Gun Vessel.* Launched in 1879. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Composite twin screw vessel. Has 1 sister the LINNET.

Heaviest gun, 90 cwts. Length, 165 ft.

Carries 83 men. Breadth, 29 ft.

756 tons Displacement.

4554 **Sphinx.** *Special Service Unprotected Vessel.* Launched in 1882. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Composite paddle vessel.

Heaviest gun, 89 cwts. Length, 200 ft.

Carries 88 men. Breadth, 32 ft.

1,130 tons Displacement.

4555 **Mosquito.** *Single Screw Gun Boat.* Launched in 1871. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Screw composite gun boat of 2 guns, built at Pembroke. Sold 1889. Had 14 sisters, viz., ARIEL, CONTEST, COQUETTE, CYGNET, DECOY, EXPRESS, FOAM, GOSHAWK, MALLARD, MERLIN, MOORHEN, SHELDRAKE, SWINGER, and ZEPHYR.

Length, 125 ft. Breadth, 22 ft. 6 ins.

430 tons Displacement.

- 4556 Cruiser.** *Wood Screw Sloop.* Launched in 1852. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Wood sloop. Had 5 sisters, viz., ALERT, FALCON, FAWN, HARRIER, and HORNET.  
This ALERT went to the Arctic Regions under command of Sir George Nares.  
Heaviest gun was a 32-pr. Length, 165 ft.  
Carried 165 men. Breadth, 31 ft. 10 in.  
752 tons B.O.M.
- 4557 Amazon.** *Wood Screw Sloop.* Launched in 1865. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot. Also whole model, No. 4723.  
Wood screw sloop, sunk in the Channel by collision, 1866. Had 5 sisters, viz.,  
DAPHNE, DRYAD, NIOBE, NYMPHE, and VESTAL.  
Heaviest gun, 6 tons. Length, 187 ft.  
Carried 130 men. Breadth, 36 ft.  
1,081 tons, B.O.M.
- 4558 Dolphin.** *Unprotected Sloop.* Launched in 1882. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Composite sloop. Has 1 sister, viz., WANDERER.  
Heaviest gun, 89 cwt. Length, 157 ft.  
Carries 114 men. Breadth, 32 ft.  
925 tons Displacement.
- 4558 A Pelican.** See CORMORANT, No. 4561.
- 4559 Rattler.** *1st Class Unprotected Gun Boat.* Launched in 1886. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw composite gun boat. Had 1 sister, viz., the WASP, which was lost.  
Heaviest gun, 26 cwt. Length, 165 ft.  
Carries 75 men. Breadth, 29 ft.  
715 tons Displacement.
- 4560 Opal.** *3rd Class Unprotected Cruiser.* Launched in 1875. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Composite single screw cruiser. Has 5 sisters, viz., EMERALD, GARNET, RUBY, TOURMALINE and TURQUOISE. Two similar vessels the DIAMOND and SAPPHIRE were built of wood.  
Heaviest gun, 64 cwt. Length, 220 ft.  
Carries 232 men. Breadth, 40 ft.  
2,120 tons Displacement.
- 4561 Cormorant.** *Unprotected Sloop.* Launched in 1877. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Composite sloop. Has 12 sisters, viz., DRAGON, ESPIEGLE, GANNET, KINGFISHER, MIRANDA, MUTINE, OSPREY, PEGASUS, PELICAN, PENGUIN, PHENIX, and WILD SWAN.  
The DOTEREL, which was blown up in the Straits of Magellan, was also a sister ship.  
Heaviest gun, 89 cwt. Length, 170 ft.  
Carries 138 men. Breadth, 36 ft.  
1,130 tons Displacement.
- 4561 A Miranda.** See CORMORANT, No. 4561.
- 4562 Simoom.** *Troop Ship.* Launched in 1849. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw iron troop ship. Sold out of the service in 1887.  
Heaviest gun was a 32-pr. Length, 246 ft.  
Carried 174 men as a crew. Breadth, 41 ft.  
(Troops in addition). 3,300 tons Displacement.
- 4563 Himalaya.** *Iron single screw Troop Ship.* Launched in 1853. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Iron single screw troop ship. Purchased by the Admiralty from the P. & O. Company in July, 1854, still on active service.  
Heaviest gun is a 20 pr. Length, 340 ft. 5 ins.  
Carries 231 men as a crew. Breadth, 46 ft. 2 ins.  
(Troops in addition). 4,695 tons Displacement.

- 4564 Nymphæ.** *Screw Sloop Unprotected.* Launched in 1888. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Composite sloop. Has 2 sisters, viz., BUZZARD and DAPHNE.  
Heaviest gun, 2 tons. Length, 195 ft.  
Carries 136 men. Breadth, 30 ft.  
1,140 tons Displacement.
- 4564 A Dragon.** See CORMORANT, No. 4561.
- 4565 Resolute.** *Troop Ship.* Launched in 1855. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Iron screw troop ship. Her name was changed to ADVENTURE in 1857. Had 1 sister, viz., the ASSISTANCE.  
Heaviest gun was an 18-pr. Breadth, 36 ft. 5 ins.  
Length, 282 ft. 10 ins. 1,793 tons B.O.M.
- 4566 Juno.** *Single Screw Corvette.* Launched in 1867. Half Model. Scale  $\frac{1}{4}$  in. = one foot.  
Screw Corvette. - Had 1 sister, viz., THALIA.  
Heaviest gun, 6 $\frac{1}{2}$  tons. Length, 200 ft.  
Carried 200 men. Breadth, 40 ft. 5 ins.  
1,462 tons B.O.M.
- 4567 Assistance.** *Single Screw Iron Troop Ship.* Launched in 1874. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw troop ship.  
Heaviest gun is a 24 pr. Length, 250 ft.  
Carries 131 men as a crew. Breadth, 38 ft.  
Troops in addition. 2,500 tons Displacement.
- 4568 Euphrates.** *Indian Troop Ship.* Launched in 1866. Half Model. Scale,  $\frac{1}{4}$  in = one foot.  
Single screw troop ship. One of a class of 5 still employed to form a direct service for the transport of troops between England and India. Her sister ships are named CROCODILE, JUMNA, MALABAR, and SERAPIS.  
Heaviest gun is a 24-pr. Length, 360 ft.  
Carries 264 men for her crew. Breadth, 49 ft. 2 in.  
(Troops in addition). 6,211 tons Displacement.
- 4569 Megaera.** *Troop Ship.* Launched in 1849. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw iron troop ship. Lost on St. Paul's Island, Pacific.  
Heaviest gun was a 32-pr. Length, 207 ft.  
Carried 167 men as a crew. Breadth, 37 ft. 10 ins.  
(Troops in addition). 1,395 tons B.O.M.
- 4570 Orontes.** *Troop Ship.* Launched in 1862. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw iron troop ship. As originally built; she had 1 sister, the TAMAR, but the ORONTES has been lengthened 50 feet, and now differs from the Tamar.  
Heaviest gun is a 40-pr. Length, 350 ft.  
Carries 232 men as a crew. Breadth, 44 ft. 8 ins.  
Troops in addition. 5,920 tons Displacement.
- 4571 Barracouta.** *3rd Class Protected Cruiser.* Launched in 1889. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw vessel. Has 3 sisters, viz., BARROSA, BLANCHE and BLONDE.  
Heaviest gun, 4.7 ins., quick firing. Length, 220 ft.  
Carries 156 men. Breadth, 35 ft.  
1,580 tons Displacement.
- 4572 Research.** *Surveying Vessel.* Launched in 1888. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Composite paddle vessel for surveying purposes.  
Heaviest gun is a 7-pr. Length, 155 ft.  
Carries 60 men. Breadth, 24 ft.  
520 tons Displacement.

- 4573 Bellona.** *3rd Class Protected Cruiser.* Launched in 1890. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Swift twin screw steel protected cruiser. Has one sister, viz., BARHAM.  
Heaviest gun, 4'7 in., quick firing. Length, 280 ft.  
Carries 167 men. Breadth, 35 ft.  
1,830 tons Displacement.
- 4574 Curlew.** *1st Class Unprotected Gun Vessel.* Launched in 1885. Half Model.  
Steel twin screw gun vessel. Has 1 sister, viz., the LANDRAIL.  
Heaviest gun, 5 tons. Length, 195 ft.  
Carries 103 men. Breadth, 28 ft.  
950 tons Displacement.
- 4575 Astrea.** *2nd Class Protected Cruiser.* Launched in . Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Latest type of steel twin screw protected 2nd class cruiser. Has 7 sisters building, viz., BONAVENTURE, CAMBRIAN, CHARYBDIS, FLORA, FORTE, FOX, and HERMIONE. This vessel generally is an enlarged APOLLO.  
Heaviest gun, 5 tons. Length, 320 ft.  
Carries 265 men. Breadth, 49 ft. 6 ins.  
4,360 tons Displacement.
- 4576 Medea.** *2nd Class Protected Cruiser.* Launched in 1888. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Recent type of fast twin screw steel protected cruiser. Sister ships are MAGICIENNE, MARATHON, MEDUSA, and MELIOMENE, the first two and last of these being sheathed with wood and copper.  
Heaviest gun, 5 tons. Length, 265 ft.  
Carries 216 men. Breadth, 41 ft.  
2,800 tons Displacement.
- 4577 Sharpshooter.** *1st Class Torpedo Gun Boat.* Launched in 1888. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw vessel. Has 16 sisters, viz., ALARM, ASSAYE, BOOMERANG, CIRCE, GLEANER, GOSSAMER, HEBE, KARRAKATTA, LEDA, PLASSY, SALAMANDER, SEAGULL, SHELDRAKE, SKIPJACK, SPANKER, and SPEEDWELL.  
Heaviest gun is a 4'7 in. quick-firing. Length, 230 ft.  
Carries 85 men. Breadth, 27 ft.  
735 tons Displacement.
- 4578 Sandfly.** *Torpedo Gun Boat.* Launched in 1887. Half Model. Scale,  $\frac{1}{16}$  in. = one foot.  
Steel twin screw first class torpedo gunboat. Has 3 sisters, viz., GRASSHOPPER, RATTLESNAKE, and SPIDER. The SPIDER is fitted with Mr. J. S. White's "Turn-about" system of rudders.  
Heaviest gun, 26 cwts. Length, 200 ft.  
Carries 63 men. Breadth, 23 ft.  
525 tons Displacement.
- 4579 Edgar.** *1st Class protected Cruiser.* Launched in . Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Latest large twin screw steel cruiser. Has 8 sisters, viz., CRESCENT, ENDYMION, GIBRALTAR, GRAFTON, HAWKE, ROYAL ARTHUR, ST. GEORGE, and THESEUS.  
Heaviest gun, 22 tons. Length, 360 ft.  
Carries 522 men. Breadth, 60 ft.  
7,350 tons Displacement.
- 4580 Archer.** *3rd Class Unprotected Cruiser.* Launched in 1885. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw vessel. This ship is of the same type as the SERPENT recently lost on the coast of Spain. She has also the following sisters, viz., BRISK, COSSACK, MOHAWK, PORPOISE, RACON, and TARTAR. The SCOUT and FEARLESS are also nearly similar.  
Heaviest gun, 5 tons. Length 225 ft.  
Carries 172 men. Breadth, 36 ft.  
1,770 tons Displacement.  
For model of SCOUT see exhibit of Messrs. J. & G. Thomson.

- 4581 Pallas.** *2nd Class Protected Cruiser.* Half Model. Launched in 1890.  
Scale  $\frac{1}{4}$  in. = one foot.  
Steel twin screw vessel. Has 8 sisters, viz., PEARL, PHILOMEL, PHOEBE, built for the Royal Navy, and KATOOMBA, MILDURA, RINGAROOMA, TAURANGA, and WALLAROO, for the defence of the Australian Colonies.  
Heaviest gun, 4.7 in. quick firing. Length, 265 ft.  
Carries 215 men. Breadth, 41 ft.  
2,575 tons Displacement.
- 4582 Apollo.** *2nd Class Protected Cruiser.* Launched in 1891. Half Model.  
Scale  $\frac{1}{4}$  in. = one foot.  
Recent type of twin screw protected 2nd class Cruiser. Has 20 sisters built and building, viz., ÆOLUS, ANDROMACHE, BRILLIANT, INDEFATIGABLE, INTREPID, IPHIGENIA, LATONA, MELAMPUS, NAIAD, PIQUE, RAINBOW, RETRIBUTION, SAPHO, SCYLLA, SIRIUS, SPARTAN, SYBILLE, TERPSICHORE, THETIS, and TRIBUNE.  
Heaviest gun, 5 tons. Length, 300 ft.  
Carries 233 men. Breadth 43 ft.  
3,400 tons Displacement.
- 4583 Blake.** *1st Class Protected Cruiser.* Launched in 1889. Half Model  
Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw steel cruiser, largest class of cruiser in the Royal Navy. Has 1 sister, viz., BLENHEIM.  
Heaviest gun, 22 tons. Length, 375 ft.  
Carries 555 men. Breadth, 65 ft.  
9,000 tons Displacement.
- 4584 Vulcan.** *Protected Torpedo Depot Ship.* Launched in 1889. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw vessel.  
Heaviest gun is a 4.7 in. quick firing. Length, 350 ft.  
Carries 402 men. Breadth, 58 ft.  
6,620 tons Displacement.
- 4585 Mersey.** *2nd Class Protected Cruiser.* Launched in 1885. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw vessel. Has 3 sisters, viz., FORTH, SEVERN, and THAMES.  
Heaviest gun, 15 tons. Length, 300 ft.  
Carries 325 men. Breadth, 46 ft.  
4,050 tons Displacement.
- 4586 Shannon.** *1st Class Armoured Cruiser.* Launched in 1875. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Iron single screw broadside armour belted cruiser with powerful rig, and sheathed with wood and zinc. Has no sister.  
Heaviest gun, 18 tons. Length, 260 ft.  
Carries 446 men. Breadth, 54 ft.  
3,390 tons Displacement.
- 4587 Polyphemus.** *Torpedo Ram.* Launched in 1881. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot. Also Whole Model, No. 4754 A.  
Steel twin screw vessel. This vessel is of very special type, and has neither sister nor any vessel at all closely resembling her. The gun armament is very small, the heaviest gun being a 6-pr.  
Carries 145 men. Length, 240 ft.  
Breadth, 40 ft. 2,640 tons Displacement.
- 4588 Research.** Launched in 1863. Half Model. Scale  $\frac{1}{4}$  in. = one foot.  
Early iron cased ship built of wood. Laid down at Pembroke Yard, 1861, as gun screw sloop but converted whilst still on the stocks to an armour plated ship.  
Heaviest gun, 6½ tons. Length, 195 ft.  
Carried 120 men. Breadth, 38 ft. 6 in.  
1,741 tons Displacement.

- 4589 Waterwitch.** Launched in 1866. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Iron gun boat of two guns built on the Thames. Laid down in November, 1864. This vessel was built as an experiment to test the system of propelling ships by hydraulic or jet propulsion.

Heaviest gun 6 tons. Length, 162 ft.  
Carried 80 men. Breadth, 32 ft. 1 in.  
1,279 tons Displacement.

- 4590 Hector.** *3rd Class Battle Ship.* Launched in 1862. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Early iron broadside armour clad ship of 32 guns, with single screw. She has 1 sister, viz., the VALIANT.

Heaviest gun, 95 cwt. Length 280 ft. 2 ins.  
Carries 500 men. Breadth, 56 ft. 5 in.  
6,710 tons Displacement.

- 4591 Penelope.** *3rd Class Battle Ship.* Launched in 1867. Half Model. Scale,  $\frac{1}{4}$  = one foot.

Iron twin screw armour plated broadside ship, designed for service in shallow waters.

Heaviest gun, 9 tons. Length, 260 ft.  
Carries 350 men. Breadth, 50 ft.  
4,170 tons Displacement.

- 4592 Royal Sovereign.** *Wood Turret Ship.* Launched in 1857. Half Model. Scale  $\frac{1}{4}$  in. = one foot.

Designed and built as a 3 decker line of battle ship of 131 guns, and launched as such. Commenced converting to an iron cased turret ship in April, 1862, at Portsmouth Yard. She was the first turret ship in the Royal Navy, and had four turrets.

Heaviest gun, 12 tons. Breadth, 62 ft. 2 ins.  
Length, 240 ft. 7 ins. 5,080 tons Displacement.

- 4593 Royal Alfred.** *Wood Armour Clad Ship.* Launched in 1864. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Wood armour clad, commenced as a 91 gun line of battle ship but converted to an iron clad in 1861. Had 4 sisters, viz.: CALEDONIA, OCEAN, PRINCE CONSORT, and ROYAL OAK.

Heaviest gun, 12½ tons. Length, 273 ft.  
Carried 600 men. Breadth, 58 ft. 7 in.  
6,707 tons Displacement.

- 4594 Repulse.** *Wood Armour Clad Ship.* Launched in 1868. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Single screw, early iron cased vessel, laid down at Woolwich, 1859. The ship was originally commenced as a screw line of battle ship, of 90 guns, but was converted to an armour clad in 1866.

Heaviest gun, 9 tons. Length, 252 ft.  
Carried 500 men. Breadth, 59 ft. 1 in.  
6,190 tons Displacement.

- 4595 Lord Warden.** Launched in 1865. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Wooden Broadside screw frigate of 24 guns. Laid down at Chatham Yard, 1863. Had 1 sister, viz., the LORD CLYDE.

Heaviest gun, 6 tons. Length, 280 ft.  
Carried 605 men. Breadth, 59 ft.  
4,080 tons B.O.M.

- 4596 Minotaur.** *3rd Class Battle Ship.* Launched in 1863. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

This is one of the 3 longest armour clad ships built for the Royal Navy. Has a broadside armament. Has 2 sisters, viz., AGINCOURT and NORTHUMBERLAND.

Heaviest gun, 12 tons. Length, 400 ft.  
Carries 690 men. Breadth, 59 ft. 5 ins.  
10,627 tons Displacement.

- 4597 Swiftsure.** *2nd Class Battle Ship.* Launched in 1870. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Iron single screw seagoing broadside ironclad sheathed with wood and copper.  
Has 1 sister the TRIUMPH.  
Heaviest gun, 12 tons. Length, 280 ft.  
Carries 478 men. Breadth, 53 ft.  
6,910 tons Displacement.
- 4598 Magdala.** *Colonial Defence Ship.* Launched in 1870. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
The MAGDALA and ABYSSINIA are sister ships.  
Length, 225 ft. Breadth, 45 ft.  
3,340 tons Displacement.
- 4599 Temeraire.** *1st Class Battle Ship.* Launched in 1876. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Iron twin screw central battery armour clad sheathed with wood and zinc. Besides the central battery she has also 2 barbettes.  
Heaviest gun, 25 tons. Length, 285 ft.  
Carries 574 men. Breadth, 62 ft.  
8,540 tons Displacement.
- 4600 Orlando.** *1st Class Armoured Cruiser.* Launched in 1886. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Latest steel twin screw belted cruiser. Has 6 sisters, viz., AURORA, AUSTRALIA, GALATEA, IMMORTALITE, NARCISSUS, and UNDAUNTED.  
Has 2 22-ton guns, and 10 5-ton guns.  
Length, 300 ft. Carries 497 men.  
Breadth, 56 ft. 5,600 tons Displacement.
- 4601 Cerberus.** *Colonial Defence Ship.* Launched in 1868. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw, iron armour plated, turret ship of four 18-ton guns. Built at Jarrow-on-Tyne for the Government of Victoria, Australia, where she now is. There are 2 nearly similar vessels, viz., ABYSSINIA and MAGDALA.  
Carries 172 men. Length, 225 ft.  
3,340 tons Displacement. Breadth, 45 ft.
- 4602 Bellerophon.** *2nd Class Battle Ship.* Launched in 1865 at Chatham. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Iron single screw broadside armourclad.  
Heaviest gun, 14 tons. Length, 300 ft.  
Carries 570 men. Breadth, 56 ft.  
7,550 tons Displacement.
- 4603 Defence.** Launched in 1861. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw iron armour plated broadside ship. Had 1 sister, viz., RESISTANCE.  
Length, 280 ft. Breadth, 54 ft. 2 in.  
6,270 tons Displacement.
- 4604 Monarch.** *2nd Class Battle Ship.* Launched in 1868. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot. Also Whole Model, No. 4711.  
Single screw iron armourclad. She was the first sea-going turret ship built for H. M. Navy. Carried the remains of the American philanthropist Peabody across the Atlantic.  
Heaviest gun 25 tons. Length, 330 ft.  
Carries 575 men. Breadth, 57 ft. 6 ins.  
8,320 tons Displacement.
- 4605 Hercules.** *2nd Class Battle Ship.* Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Early iron single screw armour clad with broadside armament.  
Carries 683 men. Length 325 ft.  
8,680 tons Displacement. Breadth, 59 ft. 1 in.  
The SULTAN is a similar vessel.
- 4606 Imperieuse.** *1st Class Armoured Cruiser.* Completed 1886. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Large twin screw steel wood-sheathed belted cruiser, with 4 barbettes each carrying 1-24 ton gun. Has 1 sister, viz., WARSPITE.  
Carries 537 men. Length, 315 ft.  
8,400 tons Displacement. Breadth, 62 ft.

- 4607 Warrior.** *3rd Class Battle Ship.* Launched in 1860. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw broadside ironclad, the first seagoing iron built armour plated ship in the Royal Navy. Has 1 sister, viz., BLACK PRINCE.  
Heaviest gun 9 tons. Length, 330 ft. 2 in.  
Carries 689 men. Breadth, 58 ft. 4 in.  
9,210 tons Displacement.
- 4608 Alexandra.** *1st Class Battle Ship.* Launched in 1875. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Iron built twin screw ship, with broadside armament. This ship served continuously in the Mediterranean during four commissions.  
Heaviest gun, 22 tons. Length 325 ft.  
Carries 664 men. Breadth 63 ft. 8 in.  
9,490 tons Displacement.
- 4609 Invincible.** *2nd Class Battle Ship.* Launched in 1869. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Iron twin screw broadside. Had 3 sisters, viz., AUDACIOUS, IRON DUKE, and VANGUARD. The VANGUARD was lost off the coast of Ireland in September, 1875.  
Heaviest gun, 12 tons. Length, 280 ft.  
Carries 481 men. Breadth, 54 ft.  
6,010 tons Displacement.
- 4610 Conqueror.** *2nd Class Battle Ship.* Half Model.  
Steel twin screw ship with 1 turret containing two 45-ton guns. Built at Chatham Dockyard. Completed, 1882.  
Carries 377 men. Length, 270 ft.  
6,200 tons Displacement. Breadth, 58 ft.  
The HERO is very nearly a sister vessel.
- 4611 Hood.** *1st Class Battle Ship.* Launched in . Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot. See ROYAL SOVEREIGN, No. 4759. Also whole Model, No. 4758.
- 4612 Collingwood.** *1st Class Battle Ship.* Launched in 1882. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot. See BENBOW.
- 4613 Colossus.** *1st Class Battle Ship.* Launched in 1882. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw ship with 2 turrets, each carrying two 45-ton guns. Has 1 sister, viz., EDINBURGH.  
Carries 467 men. Length, 325 ft.  
9,420 tons Displacement. Breadth, 68 ft.
- 4614 Royal Sovereign.** Half Model. Scale,  $\frac{1}{4}$  in. = one foot. See No. 4759.
- 4615 Trafalgar.** *1st Class Battle Ship.* Launched in 1887. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw ship with two turrets. Has 2-67 ton guns in each turret. Built at Portsmouth. Has 1 sister, the NILE, built at Pembroke.  
Carries 563 men. Length, 345 ft.  
11,940 tons Displacement. Breadth, 73 ft.
- 4616 Victoria.** *1st Class Battle Ship.* Launched in 1887. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Steel twin screw armour clad ship, with one turret carrying 2-111 ton guns. Built at Elswick, Newcastle-on-Tyne. Has 1 sister, the SANS PAREIL.  
Carries 588 men. Length, 340 ft.  
10,470 tons Displacement. Breadth, 70 ft.
- 4617 Raleigh.** *2nd Class Unprotected Cruiser.* Launched in 1873. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Vessel of same general type as SHAN. Sheathed with wood and copper.  
Heaviest gun, 90 cwts. Length, 298 ft.  
Carries 560 men. Breadth, 49 ft.  
5,200 tons Displacement.

- 4618 Bacchante.** *2nd Class Unprotected Cruiser.* Launched in 1876. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

This vessel is smaller than, but of the same general type as, the *SHAH* and *RALEIGH*, possessing considerable speed under either steam or sail. Built of iron, and sheathed with wood and zinc. Had 2 sisters, viz., *EURYALUS* and *BOADICEA*.

Heaviest gun, 90 cwts. Length, 280 ft.  
Carries 417 men. Breadth, 45 ft. 6 ins.  
4,130 tons Displacement.

- 4619 Shah.** *2nd Class Unprotected Cruiser.* Launched in 1873. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

This is the largest example of this type of vessel ever built for the Royal Navy. Possesses great speed under either steam or sail. Built of iron and sheathed with wood and copper.

Heaviest gun, 12 tons. Length, 334 ft. 8 ins.  
Carries 600 men. Breadth, 52 ft.  
6,250 tons Displacement.

- 4620 Comus.** *3rd Class Partially Protected Cruiser.* Launched in 1878. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

This was the first vessel of this type built for the Royal Navy. Has a single screw and a full rig. Has 8 sisters, viz., *CANADA*, *CARYSFORT*, *CHAMPION*, *CLEOPATRA*, *CONQUEST*, *CONSTANCE*, *CORDELIA*, and *CURAÇOA*.

Heaviest gun, 89 cwts. Length, 225 ft.  
Carries 279 men. Breadth, 44 ft. 6 in.  
2,380 tons Displacement.

See also Model in Exhibit of Fairfield Ship Building Co.

- 4621 Calliope.** *3rd Class Partially Protected Cruiser.* Launched in 1883. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Single screw steel vessel, sheathed with wood and copper. Has sister, viz., *CALYPSO*, of same general features as *COMUS*.

Heaviest gun, 5 tons. Length, 235 ft.  
Carries 284 men. Breadth, 44 ft. 6 in.  
2,770 tons Displacement.

- 4622 Amethyst.** *Single Screw Corvette.* Launched in 1873. Half Model. Scale  $\frac{1}{4}$  in. = one foot.

Composite Corvette. Had 2 sisters, viz., *ENCOUNTER* and *MODESTE*.

Heaviest gun, 64 pr. Length, 220 ft.  
Carried 235 men. Breadth, 37 ft.  
1,416 tons B.O.M.

- 4623 Iris.** *2nd Class Unprotected Cruiser.* Launched in 1877. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Steel twin screw vessel with light rig. The 1st steel sea-going vessel built for the Royal Navy. Has 1 sister, viz., the *MERCURY*.

Heaviest gun, 2 tons. Length, 300 ft.  
Carries 280 men. Breadth, 46 ft.  
3,730 tons Displacement.

- 4624 Alacrity.** *Despatch Vessel, Unprotected.* Launched in 1885. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Steel twin screw despatch vessel. Has 1 sister, the *SURPRISE*.

Heaviest gun, 38 cwt. Length, 250 ft.  
Carries 111 men. Breadth, 32 ft. 6 ins.  
1,700 tons Displacement.

- 4625 Heroine.** *3rd Class Partially Protected Cruiser.* Launched in 1881. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.

Single screw composite vessel. Has 6 sisters, viz., *CAROLINE*, *HYACINTH*, *PYLADES*, *RAPID*, *ROYALIST*, and *SATELLITE*.

Heaviest gun, 89 cwt. Length 200 ft.  
Carries 154 men. Breadth 38 ft.  
1,420 tons Displacement.

- 4626** See 4714.

- 4627** See 4715.

- 4628 Black Eagle.** *Paddle Yacht.* Launched in 1831. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Originally called the FIREBRAND. Built at Limehouse and lengthened 13 ft. at Deptford in 1843.  
Had 1 gun, an 18-pr. Length, 168 ft.  
Carried 40 men. Breadth, 26 ft. 5 in.  
540 tons B.O.M.
- 4629** See 4717.
- 4630** See 4716.
- 4631 Elfin.** *Paddle Yacht.* Launched in 1849. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Wood yacht built at Chatham Yard. Now used as a tender to the Royal Yacht VICTORIA AND ALBERT.  
Length, 103 ft. 6 in. Breadth, 14 ft.  
98 tons B.O.M.
- 4632 Helicon.** *Wood Paddle Despatch Vessel.* Launched in 1865. Half Model. Scale  $\frac{1}{4}$  in. = one foot.  
Built at Portsmouth. Ships of a similar type were the ENCHANTRESS, PSYCHE, and SALAMIS. The HELICON is now named the ENCHANTRESS and is employed as a special service yacht.  
Has 1 mortar gun. Length, 220 ft.  
Carries 59 men. Breadth, 28 ft. 2 ins.  
1,000 tons Displacement.
- 4633 Salamis.** *Wood Paddle Despatch Vessel.* Launched in 1863. Half Model.  
Had two sisters, viz., ENCHANTRESS and PSYCHE.  
Had one 40-pr. gun. Length, 220 ft.  
Carried 65 men. Breadth, 28 ft. 2 ins.  
1,000 tons Displacement.
- 4634** See 4715.
- 4635 Racoon.** *Wood Corvette.* Launched in 1857. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Had 2 sisters, viz., CHALLENGER and CLIO.  
Heaviest gun, 95 cwt. Length, 200 ft.  
Carried 280 men. Breadth, 40 ft. 4 in.  
2,306 tons Displacement.
- 4636 Rinaldo.** *Wood Steam Sloop.* Launched in 1860. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Had 7 sisters, viz.: CHAMELEON, CHANTICLEER, PELICAN, PERSEUS, RATTLER, REINDEER, and ZEBRA.  
Heaviest gun, 58 cwt. Length, 185 ft. 1 in.  
Carried 170 men. Breadth, 33 ft. 2 ins.  
1,365 tons Displacement.
- 4637 Highflyer.** *Wood Steam Sloop.* Launched in 1851. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Had 1 sister, viz., the ESK.  
Heaviest gun, 85 cwt. Length, 192 ft.  
Carried 220 men. Breadth, 36 ft. 6 ins.  
1,161 tons B.O.M.
- 4638 Pylades.** *Wood Corvette.* Launched in 1854. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw Corvette. Had no sister.  
Heaviest gun was a 68-pr. Length, 200 ft.  
Carried 240 men. Breadth, 38 ft.  
1,420 tons Displacement.
- 4639 Archer.** *Wood Corvette.* Launched in 1849. Half Model. Scale,  $\frac{1}{4}$  in. = 1 foot.  
Had 1 sister, viz., WASP, nearly similar vessels were the BRISK, ENCOUNTER and NIGER.  
Heaviest gun was a 68 pr. Length, 186 ft. 4 ins.  
Carried 150 men. Breadth, 33 ft. 10 ins.  
973 tons B.O.M.

- 4640 **Wolverene.** *Wood Corvette.* Launched in 1863. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Had 5 sisters, viz., BARROSA, JASON, ORESTES, ORPHEUS, and RATTLESNAKE.  
Heaviest gun was a 110-pr. Length, 225 ft.  
Carried 275 men. Breadth, 40 ft. 9 ins.  
2,431 tons Displacement.
- 4641 **Flirt.** Half Model. Scale,  $\frac{1}{4}$  in. = one foot. Composite gun-vessel. Launched in 1867.
- 4642 **Mistletoe.** *2nd Class Unprotected Gun Boat.* Launched in 1883. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw composite vessel. Has 2 sisters, viz., ALBACORE and WATCHFUL.  
Heaviest gun, 38 cwts. Length, 26 ft.  
Carries 62 men. Breadth, 9 ft. 3 ins.  
560 tons Displacement.
- 4643 **Seahorse.** *Unprotected Special Service Vessel.* Launched in 1881. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw steel vessel.  
Heaviest gun, 13 cwts. Length, 160 ft.  
Carries 50 men. Breadth, 26 ft.  
670 tons Displacement.
- 4644 **Arab.** *Composite Gun Vessel.* Launched in 1874. Single screw gun vessel. Had 1 sister, viz., the LILY.  
Heaviest gun, 90 cwt. Length, 150 ft.  
Carried 100 men. Breadth, 28 ft. 6 in.  
720 tons Displacement.
- 4645 **Medina.** *3rd Class Unprotected Coast Defence Gun Boat.* Launched in 1876. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Iron twin screw gun boat of 3 guns for river or coast defence service. Has 11 sisters, viz., DEE, DON, ESK, MEDWAY, SABRINA, SLANEY, SPEY, TAY, TEES, TRENT and TWEED.  
Heaviest gun, 64-pr. Length, 110 ft.  
Carries 51 men. Breadth, 34 ft.  
363 tons Displacement.
- 4646 **Pioneer.** *Composite Despatch Vessel.* Launched in 1874. Paddle Despatch Vessel.  
Heaviest gun, 20-pr. Length, 160 ft.  
Carries, 120 men. Breadth, 25 ft. 7 in.  
540 tons Displacement.
- 4647 *See 4730.*
- 4648 **Commerce de Marseilles.** *Wood 3-Decker.* Half Model. Scale  $\frac{1}{4}$  in. = one foot.  
Three-deck line of battle ship of 120 guns. Captured from the French at Toulon 1793. Broken up at Devonport Yard, 1802.  
Heaviest gun was a 32-pr.
- 4649 **Salvador del Mundi.** *Wood 3 Decker.* Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Three-deck line of battle ship of 112 guns, captured from the Spaniards in 1797. Broken up at Plymouth, 1815.  
Heaviest gun was a 32-pr.
- 4650 **Victoria.** *Wood 3 decker.* Launched in 1859. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Screw line of battle ship of three decks and 121 guns.  
Heaviest gun was a 68-pr. Length, 260 ft.  
Carried 1,130 men. Breadth, 60 ft. 1 in.  
6,960 tons Displacement.

- 4651 Duke of Wellington.** *Wood 3-Decker.* Launched in 1852. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
3-decker line-of-battle ship of 131 guns, laid down at Pembroke Yard in 1849 as a sailing vessel, but converted to a screw ship while on the stocks. She is still the Flag ship of the Commander-in-Chief at Portsmouth. The model is of the ship as actually built.  
Heaviest gun, 68-pr. Length, 240 ft. 7 in.  
Carried 1,100 men. Breadth, 60 ft. 1 in.  
3,771 tons B.O.M.
- 4652 Marlborough.** *Wood 3 Decker.* Launched in 1855. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Line of battle ship of 3 decks and 131 guns. Laid down as a sailing ship in 1850. Converted to a screw ship whilst building. The model is of the ship as actually built.  
Heaviest gun was a 64-pr. Length, 245 ft. 6 ins.  
Carried 1,100 men. Breadth, 61 ft. 3 ins.  
4,000 tons B.O.M.
- 4653 Bulwark.** *Wood 2-Decker.* Launched in 1807. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Line of battle ship of 2 decks and 74 guns. Laid down at Portsmouth Dockyard, 1804, and broken up in the same yard in 1826.  
Heaviest gun was a 32-pr. Carried 590 men.
- 4654 Gibraltar.** *Wood 2-Decker.* Launched in 1751. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
2-decker line of battle ship of 80 guns. Was the Spanish War Ship PHŒNIX taken by Admiral Rodney 16th January, 1780, off Cape St. Vincent.  
Heaviest gun, 24-pr. Carried 650 men.
- 4655 Le Jemmapes.** *Wood 2 Decker.* Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
French line of battle ship of about the year 1840. Two decker of 106 guns.
- 4656 Albion.** *Wood 2 decker.* Launched in 1842. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Line of battle ship of 2 decks and 90 guns. Built and launched as a sailing vessel. Converted for the screw propeller in 1861. Her sister ships, the ABOUKIR and EXMOUTH, were treated similarly. Nearly similar vessels were the ALGIERS, CAESAR, HANNIBAL and PRINCESS ROYAL.  
Heaviest gun was a 32 pr. Length, 204 ft.  
Carried 820 men. Breadth 60 ft.  
4,150 tons Displacement.
- 4657 Neptune.** *Wood 2 Decker.* Launched in 1832. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
2 decker screw line of battle ship of 90 guns. Laid down at Portsmouth Yard in 1827 as a 3 decker sailing ship, and launched as such. Converted for the screw propeller in 1859. Sister ships also converted, viz., ROYAL WILLIAM, ST. GEORGE, TRAFALGAR, and WATERLOO (now WARSPITE at Woolwich).  
Heaviest gun was a 68-pr. Length, 217 ft. 6 ins.  
Carried 860 men. Breadth, 55 ft. 6 ins.  
2,830 tons B.O.M.
- 4658 Agamemnon.** *Screw Line of Battle Ship.* 2 Decker. Launched in 1852. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
The first screw line of battle ship designed for the Royal Navy. Had 3 sisters, viz., EDGAR, JAMES WATT and VICTOR EMMANUEL.  
Heaviest gun was a 32 pr. Length, 230 ft.  
Carried 820 men. Breadth, 55 ft. 6 ins.  
3,102 tons B.O.M.
- 4659 Chesapeake.** *Wood Sailing Frigate.* Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
American frigate of 48 guns, captured from the Americans in single frigate action by the SHANNON in 1813.  
Heaviest gun was a 32-pr. Length, 160 ft.  
Carried 315 men. Breadth, 48 ft. 8 in.  
1,622 B.O.M.

- 4660 Arethusa.** *Wood Sailing Frigate.* Launched in 1849. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
50 gun frigate, converted to a screw frigate of 51 guns, in 1861, at Chatham, but the model is as she was built for a sailing frigate. Had 2 sister ships, viz., the *CONSTANCE* and *OCTAVIA*, which were also converted to screw ships.  
Heaviest gun was a 32 pr. Length, 252 ft. 3 ins.  
Carried 500 men. Breadth, 52 ft. 9 ins.  
3,142 tons B.O.M.
- 4661** See 4699.
- 4662 Imperieuse.** *Wood Frigate.* Launched in 1852. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
51 gun frigate laid down at Deptford Yard 1850. Had 5 sisters, viz., *AURORA*, *CHESAPEAKE*, *EURYALUS*, *FORTE*, and *NARCISSUS*.  
Heaviest gun was a 68 pr. Length, 212 ft.  
Carried 530 men. Breadth 50 ft.  
2,358 tons B.O.M.
- 4663 Emerald.** *Wood Frigate.* Launched in 1856. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
51 gun frigate, commenced as a sailing ship at Deptford Yard in 1849; converted to a screw ship whilst building. Had 1 sister, viz., *MELPOMENE*.  
Heaviest gun was a 68 pr. Length, 237 ft.  
Carried 560 men. Breadth, 52 ft. 6 in.  
2,913 tons B.O.M.
- 4664 Diadem.** *Wood Screw Frigate.* Launched in 1856. Half Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
32-gun screw frigate. Had 2 sisters, viz., *DORIS* and *ENDYMION*.  
Heaviest gun was a 68-pr. Length, 240 ft.  
Carried 475 men. Breadth, 48 ft.  
3,805 tons Displacement.
- 4665 Orlando.** *Wood Frigate.* Launched in 1858. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
50 gun steam frigate, laid down at Pembroke Yard, 1856. Had 1 sister, the *MERSEY*. This was the largest type of wood frigate built for H. M. Navy.  
Heaviest gun was a 68-pr. Length, 300 ft.  
Carried 560 men. Breadth, 52 ft.  
5,645 tons Displacement.
- 4666 Galatea.** *Wood Frigate.* Launched in 1859. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
26 gun steam frigate. Had 1 sister, viz., *ARIADNE*.  
Heaviest gun was a 68-pr. Length, 280 ft.  
Carried 400 men. Breadth, 50 ft. 2 in.  
3,227 tons B.O.M.
- 4667 Newcastle.** *Wood Frigate.* Launched in 1860. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
51 gun screw frigate, laid down at Deptford Yard 1858. Had sister ships, viz., *BRISTOL*, *GLASGOW*, and *UNDAUNTED*.  
Heaviest gun was a 68-pr. Breadth, 52 ft.  
4,020 tons Displacement. Length, 250 ft.
- 4668 Osprey.** *Wood Brig.* Launched in 1844. Half Model.  
12 gun brig. Laid down at Portsmouth Yard, 1843. Wrecked, 1846.  
Heaviest gun was a 32-pr. Length, 101 ft. 6 ins.  
Carried 130 men. Breadth, 31 ft. 10 ins.  
425 tons Displacement.
- 4669 Flying Fish.** *Wood Brig.* Launched in 1844. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
12 gun brig, laid down at Pembroke Dockyard in 1843; broken up in 1852. Had 5 sisters—*CONTEST*, *DARING*, *ESPIEGLE*, *NERBUDDA*, and *OSPREY*.  
Heaviest gun was a 32-pr. Length, 103 ft. 1 in.  
Carried 130 men. Breadth, 32 ft. 5 in.  
445 tons B.O.M.

- 4670 Mutine.** *Wood Brig.* Launched in 1844. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
12 gun brig. Laid down at Chatham Yard 1843. Lost in 1848.  
Heaviest gun was a 32-pr. Length, 102 ft.  
Carried 130 men. Breadth, 32 ft.  
428 tons B.O.M.
- 4671 Daring.** *Wood Brig.* Launched in 1844. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
12-gun brig, built at Portsmouth Yard.  
Heaviest gun was a 32-pr. Length, 104 ft.  
Carried 130 men. Breadth, 31 ft. 4 in.  
426 tons B.O.M.
- 4672 Espiegle.** *Wood Brig.* Launched in 1844. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Sailing brig of 12 guns built at Chatham Yard.  
Heaviest gun was a 32-pr. Length, 104 ft. 8 in.  
Carried 130 men. Breadth, 31 ft. 10 in.  
443 tons B.O.M.
- 4672 A Brisk.** *Wood Screw Sloop.* Launched in 1851. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Steam sloop.  
Heaviest gun was a 68-pr. Length, 190 ft. 7 ins.  
Carried 170 men. Breadth, 35 ft. 3 inches.  
1,087 tons B.O.M.
- 4673 Arab.** *Wood Brig.* Launched in 1838. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
18 gun brig. Had 11 sister ships—ACORN, ALBATROSS, BITTERN, DESPATCH, ELK, FANTOME, GRECIAN, HERON, KANGAROO, PERSIAN, and PILOT.  
Length, 105 ft. 1 in. Breadth, 33 ft. 6 in.  
484 tons B.O.M.
- 4674 Britomart.** Launched in 1860. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Screw Wood gun boat of 2 guns. Had sisters, viz., CHERUB, COCKATRICE, CROMER, DOTHEREL, HERON, LINNET, MINSTREL, NETLEY, ORWELL, PIGEON, SPEEDY, TRINCULO, TYRIAN and WIZARD.  
Heaviest gun was a 68-pr. Length, 120 ft.  
Carried 40 men. Breadth, 22 ft.  
270 tons B.O.M.
- 4675 Plover.** *Wood Vessel.* Launched in 1867. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw gun boat. Had 11 sisters, viz., BITTERN, BULLFINCH, CURLEW, LAPPING, MAGPIE, PHILOMEL, RINGDOVE, SEAGULL, SWALLOW, VULTURE, and WOOD-LARK.  
Heaviest gun was a 100-pr. Length, 170 ft.  
Carried 80 men. Breadth, 29 ft.  
774 tons Displacement.
- 4676 Plucky.** *Iron Gun Boat.* Launched in 1867. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw gun boat, built at Portsmouth Yard. Of same class as STAUNCH.  
Heaviest gun, 12 tons. Length, 80 ft.  
Carries 31 men. Breadth, 25 ft. 2 in.  
196 tons Displacement.
- 4677 Angler.** *Wood Gun Boat.* Launched in 1856. Half model.  
Steam gun boat of 2 guns, built at Devonport Dockyard. Had sister ships, viz., ANT and CHEERFUL, and many others.  
Heaviest gun was a 32 pr. Length, 90 ft.  
Carried 30 men. Breadth 21 ft. 10 ins.  
212 tons B.O.M.
- 4678 Albacore.** *Wood Gun-boat.* Launched in 1856. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Screw gun boat of 2 guns. Had sister ships, AMELIA and BANTERER, and many others.  
Heaviest gun was a 68 pr. Length, 108 ft.  
Carried 36 men. Breadth, 22 ft. 3 ins.  
235 tons B.O.M.

- 4679 Bermuda Dock.** Small model of the Floating Dock at Bermuda.
- 4680 Sheer Hulk.**  
Model shewing method of hoisting in masts by means of the old "Sheer Hulk."
- 4681 Ruby.**  
42 gun frigate, in commission in the latter half of the Seventeenth Century.
- 4683 Launches of Vessels.** Models shewing vessels ready for launching.
- 4684 Rodney.** 2 *Decked Wood Line of Battle Ship.* Launched in 1833.  
Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Two decked ship of 92 guns. Laid down at Pembroke Yard as a sailing ship in 1827, launched as such in 1833, converted for the screw propeller in 1860. Had 2 sisters, viz., LONDON and NILE, both of which were converted to screw ships. NILE is now called CONWAY.  
Heaviest gun was 68 pr. Length, 203 ft. 6 ins.  
Carried 840 men. Breadth, 54 ft. 6 in.  
4,096 tons Displacement.
- 4685 Vanguard.** *Wood 2 decked line of Battle Ship.* Launched in 1835.  
Whole model. Scale,  $\frac{1}{4}$  in. = one foot.  
Wood line of battle ship of 80 guns. Built at Pembroke Dockyard. Had 10 sisters, viz., CENTURION, COLLINGWOOD, COLOSSUS, GOLIATH, IRRESISTIBLE, LION, MAJESTIC, MARS, MEANEE, and SUPERB.  
Heaviest gun was a 32-pr. Length, 190 ft.  
Carried 750 men. Breadth, 57 ft.  
3,542 tons Displacement.
- 4686 Cumberland.** *Wood 2-Decked Line of Battle Ship.* Launched in 1842.  
Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Two-decked ship of 70 guns, built at Chatham Yard. Had 1 sister, viz., BOSCAWEN.  
Heaviest gun was a 32-pr. Length, 180 ft.  
Carried 600 men. Breadth, 54 ft. 3 in.  
3017 tons Displacement.
- 4687** See 4713.
- 4688 Howe.** *Wood three decked Ship.* Launched in 1860. Whole Model  
Scale  $\frac{1}{4}$  in. = one foot.  
Three decked line of battle ship of 121 guns. Had 1 sister, viz., VICTORIA, now called IMPREGNABLE, which is at Devonport.  
Heaviest gun, 68 pr. Length, 260 ft.  
Carried 1,130 men. Breadth, 61 ft. 1 in.  
4,245 tons B.O.M.
- 4689 Royal Albert.** *Wood 3 Decker.* Launched in 1854. Whole Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Three decked line of battle ship of 120 guns. Was intended to be a sailing ship but was converted to a screw. The model represents her as designed for a sailing ship.  
Heaviest gun was a 32-pr. Length, 232 ft. 9 in.  
Carried 1000 men. Breadth, 61 ft.  
5,637 tons Displacement.
- 4690 Royal William.** *Wood 3 Decker.* Whole Model. Scale,  $\frac{1}{3}$  in. = one foot.
- 4691**  
Three decker line of battle ship of 100 guns. Built at Chatham Yard, 1670. She was re-built at Chatham in 1692 on the same lines as originally designed by Phineas Pett, but in 1719 was again rebuilt at Portsmouth with alterations. She was finally broken up in August, 1813.
- 4692 Barfleu.** *Wood 90 Gun Ship.* Launched in 1768. Whole Model.  
Second rate ship of 90 guns, laid down at Chatham Dockyard in 1762, and broken up in 1819.  
Heaviest gun was a 32 pr. Carried 750 men.
- 4693 Duke of Kent.** *Wood 4-Decked Ship.*  
This is a Model of a proposed 4 decked ship. The vessel was not built. The mode is included as having a special interest.

**4694 Recruit.** Launched in 1846.

First Iron vessel built for the Royal Navy.

Heaviest gun was a 32-pr. Length, 113 ft.  
Carried 130 men. Breadth, 30 ft. 9 in.

449 tons B.O.M.

**4695 Royal George.** *Wood 3 Decker.* Launched in 1756. Whole Model.Scale  $\frac{1}{4}$  in. = one foot.

Three decker line of battle ship of 100 guns. Laid down at Woolwich Yard, 1746. This ship, the flag ship of Admiral Kempenfelt, capsized at Spithead on the 29th August, 1782, whilst being heeled over to admit of slight repairs. The Admiral and a large portion of the crew were drowned. Many of her guns and stores were recovered in 1839; her hull was then blown to pieces. Heaviest gun was a 42-pr.

**4695 A Royal George.** *Wood 3 Decker.* Launched in 1788. Whole Model.Scale,  $\frac{1}{4}$  in. = one foot.

Three decker line of battle ship. Built at Chatham and broken up at Devonport in 1822. Had 1 sister the QUEEN CHARLOTTE. Heaviest gun was a 42-pr.

**4695 B Royal Sovereign.** *3 Deck Line of Battle Ship.*

Three decker line of battle ship of 100 guns. Built at Woolwich Yard in 1637. Designed by Captain Phineas Pett. She was cut down to a two decker in 1684, and was accidentally destroyed by fire at Chatham in 1696. This vessel was originally named SOVERAIGNE OF THE SEAS, then SOVEREIGN, and subsequently ROYAL SOVEREIGN. After the GREAT HARRY or HARRY GRACE A DIEU she was the next British ship of any note, and larger than any that had preceded her.

Her length of gun-deck is said to have been 173 ft., and her extreme breadth 50 ft. There is a remarkable similarity between the general dimensions and form of the bottom of this ship and the dimensions and form of line of battle ships built at the close of the Eighteenth century, the HOGUE for example.

**4695 C Great Harry.** *Wood Line of Battle Ship.* Two Whole Models—one**4695 D** about  $\frac{1}{16}$  in. to a foot, the other about  $\frac{1}{4}$  in. to a foot.

These Models were prepared apparently as Models of the "Great Harry," of the reign of Henry VIII.; but they differ considerably from the careful drawing of the great ships of 1520 shown in Holbein's picture of the Embarkation of Henry VIII. at Dover in that year.

They probably represent large ships of the 16th century.

**4695 E Queen Charlotte.** *3 Decker.* Launched in 1790. Whole Model.Scale,  $\frac{1}{2}$  in. = one foot.

Three decker line of battle ship of 100 guns. Laid down at Chatham Yard, 1785. Burnt off Leghorn, 1800. Had 1 sister, viz., the ROYAL GEORGE, launched in 1788. The ROYAL GEORGE that capsized at Spithead was launched in 1756.

**4695 F** See 4690.**4696 Tiger.** *Wood Paddle Frigate.* Launched in 1849. Whole Model.Scale,  $\frac{1}{4}$  in. = one foot.

Paddle frigate. Grounded off Odessa in a fog on the 12th May, 1854, when she was surrendered to the Russians, and sunk by them. There were 4 similar vessels built, viz., FURIOUS, MAGICIENNE, RESOLUTE, and VALOROUS.

Length, 205 ft. Breadth, 36 ft.

1,221 tons B.O.M.

**4696 A Winchelsea.** Launched in 1764. Whole Model.

5th rate 32 gun ship. Sold out of the Royal Navy, 1814.

Heaviest gun was a 12-pr. Carried 220 men.

**4697 Pique.** *Wood Sailing Frigate.* Launched in 1834. Whole Model.Scale,  $\frac{1}{4}$  in. = one foot.

Forty gun Wood Frigate. Had 5 sisters, viz., ACTIVE, CAMBRIAN, CHESAPEAKE, FLORA, and SYBILLE.

Heaviest gun was a 32-pr. Length, 160 ft.

Carried 350 men. Breadth, 48 ft. 10 in.

1,811 tons Displacement.

- 4698 Modeste.** *Wood Sailing Frigate.* Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
36 gun wood frigate. Captured from the French in 1793.  
Heaviest gun was an 18-pr. Carried 264 men.
- 4699 Vernon.** *Wood Sailing Frigate.* Launched in 1832. Whole Model.  
Scale,  $\frac{1}{4}$  in. = one foot. Also Half Model, No. 4661.  
50 gun wood sailing frigate. The following vessels of same class were built but were not exact duplicates. ARETHUSA, CONSTANCE, INDEFATIGABLE, LEANDER, LIFFEY, NANKIN, OCTAVIA, PHÆTON, PHŒBE, RALEIGH, SEVERN, SHANNON, and SUTLEY.  
Heaviest gun was a 32 pr. Length, 176 ft.  
Carried 500 men. Breadth, 52 ft. 9 in.  
2,388 tons Displacement.
- 4700 Rupert.** *2nd Class Armoured Battle Ship.* Launched in 1872.  
Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw iron armour plated vessel having a single turret.  
Heaviest gun, 22 tons. Length, 250 ft.  
Carries 267 men. Breadth, 53 ft.  
5,440 tons Displacement.
- 4701 Glatton.** *Armoured Coast Defence Ship.* Launched in 1871. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw armour clad turret ship for Coast defence. This vessel has had one of her turrets fired at for experimental purposes.  
Heaviest gun, 25 tons. Length, 245 ft.  
Carries 191 men. Breadth, 54 ft.;  
4,910 tons Displacement.
- 4702 Scorpion.** *Armoured Coast Defence Vessel.* Launched in 1863.  
Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Coast defence masted iron-cased turret ship. This vessel, with her sister the WIVERN, were constructed at Birkenhead, and originally intended for the Confederates during the American Civil War. They were purchased by the British Government.  
Heaviest gun, 12 tons. Length, 224 ft. 6 ins.  
Carries 148 men. Breadth, 42 ft. 5 ins.  
2,750 tons Displacement.
- 4703 Wivern.** See SCORPION, No. 4702.
- 4704**
- 4705 Bellerophon.** *Mid. Section.* See 4602.
- 4706 Defence.** *Mid. Section.* See 4603.
- 4707 Warrior.** *Mid. Section.* See 4607.
- 4708 Megeara.** Model. *Mid. Section.*
- 4709 Achilles.** *3rd. Class Broadside Battle Ship.* Launched in 1863.  
Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw, iron broadside, armour clad, one of the earliest sea going ironclads, having the same general features as the AGINCOURT, MINOTAUR, NORTHUMBERLAND, BLACK PRINCE, and WARRIOR. She is intermediate in size between the first three and the last two of these vessels.  
Heaviest gun, 12 tons. Length, 380 ft.  
Carries 691 men. Breadth, 58 ft. 4 ins.  
9820 tons Displacement.
- 4710**
- 4711 Monarch.** Whole Model. See 4604.

- 4712 Barfleur.** *2nd Class Armoured Battle Ship.* Launched in 1862. Whole Model. Scale,  $\frac{1}{8}$  in. = one foot.

Latest twin screwed armoured second class battle ship, now building at Chatham Dockyard. Has 1 sister, viz., CENTURION.

Heaviest gun, 29 tons. Length, 360 ft.

Carries 600 men. Breadth, 70 ft.

10,500 tons Displacement.

- 4713 Queen.** *3 Decked Line of Battle Ship.* Launched in 1839. Whole Model. Scale,  $\frac{1}{2}$  in. = one foot.

Line of battle ship of 3 decks and 110 guns. Laid down at Portsmouth Yard, 1833. Her name was originally ROYAL FREDERICK, but it was changed to QUEEN in 1839. She was converted to a screw 2-decked ship in 1859, at Sheerness. The Model shows the ship rigged and in dock, as she was built for a sailing ship.

Heaviest gun was a 32-pr. Carried 900 men.

There is another model on a  $\frac{1}{4}$  in. scale, No. 4637, in a case with HOWE and ROYAL ALBERT.

Length, 204 ft. 3 in. Breadth, 60 ft.

4,476 tons Displacement.

- 4714 Victoria & Albert.** *Wood Paddle Yacht.* Launched in 1855. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot. Also Half Model, No. 4626.

Royal paddle wheel yacht used by Her Majesty, built of wood. For a short time while building this vessel was called the WINDSOR CASTLE.

Heaviest gun is a 6-pr. Length, 300 ft.

Carries a crew of 237 men. Breadth 40 ft. 3 in.

2,470 tons Displacement.

- 4715 Osborne.** *Wood Paddle Yacht.* Launched in 1843. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot. Also Half Models, Nos. 4627 and 4634.

Royal paddle wheel yacht. Laid down at Pembroke Yard, 1842. Prior to December, 1854, this vessel was called the VICTORIA and ALBERT. The present OSBORNE was launched in 1870.

Heaviest gun is a 7-pr. Length, 200 ft.

Carries 145 men. Breadth, 33 ft.

1,034 tons B.O.M.

- 4716 Fairy.** *Single Screw Iron Royal Yacht.* Launched in 1845. Whole Model. Scale,  $\frac{1}{8}$  in. = one foot. Also Half Model No. 4630.

Royal Yacht. Broken up in 1868.

Length, 144 ft. 8 in. Breadth, 21 ft. 2 in.

312 tons B.O.M.

- 4717 Alberta.** *Wood Paddle Wheel Royal Yacht.* Launched in 1863. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot. Also Half Model, 4629.

Serves as a tender to the Royal Yacht, VICTORIA AND ALBERT.

Length, 160 ft. Breadth, 22 ft. 8 in.

390 tons B.O.M.

- 4718 Royal Adelaide.** *Sailing Royal Yacht.* Launched in 1834. Whole Model. Scale,  $\frac{1}{2}$  in. = one foot.

Royal Yacht rigged as a frigate on Virginia water.

- 4719 Mercury.** *Wood Sailing Yacht.* Scale,  $\frac{3}{8}$  in. = one foot. Whole Model. This was the yacht of the Commissioner of Portsmouth Yard about the year 1790.

Heaviest gun was a 9-pr. Carried 200 men.

- 4720 Immortalité.** *Wood Screw Frigate.* Launched in 1859. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.

50 gun frigate laid down at Pembroke Yard 1849 as a sailing ship, but converted to a screw whilst building. The model represents the ship as actually built; 7 ships of a similar type were built between 1856—1860, viz., BACCHANTE, EMERALD, LIFFEY, LIVERPOOL, MELIOMENE, SHANNON, and TOPAZE.

Heaviest gun was a 68 pr. Length, 251 ft.

Carried 515 men. Breadth, 52 ft. 1 in.

3,059 tons B.O.M.

- 4721 Euryalus.** *Wood Screw Frigate.* Launched in 1853. Whole Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Wood frigate of 51 guns, built at Chatham Yard. Had 5 sisters, viz., AURORA,  
CHESAPEAKE, FORTE, IMPERIEUSE, and NARCISSUS  
Heaviest gun was a 68-pr. Length, 212 ft.  
Carried 530 men. Breadth, 50 ft. 2 in.  
2,371 tons B.O.M.
- 4722 Emerson.** *Wood Paddle Vessel.* Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
One of the first steam ships in the Royal Navy.  
Heaviest gun was a 9-pr. Carried 60 men.
- 4723 See 4557.**
- 4724 Acheron.** *Wood Paddle Vessel.* Launched in 1838. Whole Model.  
Scale,  $\frac{1}{4}$  in. = one foot.  
Paddle wheel vessel of 2 guns. Length, 150 ft.  
Heaviest gun was a 9 pr. Breadth, 32 ft. 9 ins.  
Carried 60 men. 720 tons, B.O.M.
- 4725 See Separate List, page 437.**
- 4726 Model of Wood Ship in frame.**
- 4727 Galley.** Maltese Galley of the 18th century.
- 4728 Models shewing construction of Wood Ships.**
- 4729 Ruby.**  
64 gun vessel, built in 1768. Said to have belonged to Lord Nelson.
- 4730 Victory.** *Nelson's Flag Ship in Battle of Trafalgar.* Launched in 1765.  
Whole Model. Scale,  $\frac{1}{10}$  in. = one foot. Also Half Model, No. 4647.  
Scale,  $\frac{1}{4}$  in. = one foot.  
3 decked line of battle ship of 100 guns. It was on the quarter deck of this vessel  
that Nelson received his mortal wound from a ball fired from the mizen top of the  
French Ship REDOUTABLE. The VICTORY is still afloat in Portsmouth Harbour.  
Heaviest gun was a 42-pr. Length 186 ft.  
Carried 850 men. Breadth, 52 ft. 4 in.  
2,164 tons B.O.M.  
The same vessel is shewn on a launch, No. 4683, on a scale of  $\frac{1}{8}$  in.  
to the foot.
- 4731 Winchelsea.** Whole Model. Presented by King William IV. 1830.
- 4732 Narcissus.** See ORLANDO, No. 4600.
- 4733 Endymion.** See EDGAR, No. 4579.
- 4734 Victory.** *3 decked line of Battle Ship.* Whole Model.  
3 decked line of battle ship of 100 guns. Built at Portsmouth Yard 1737, lost in  
the English Channel in the night between 4th and 5th October, 1744, when Admiral  
Balchen and his crew of upwards of 1000 men perished.  
Length, 171 ft. 2 in. Breadth, 49 ft. 8 ins.  
1,638 tons, B.O.M.
- 4734A Lion.** *Wood 2 Decker.* Launched in 1847. Whole Model. Scale,  
 $\frac{1}{4}$  in. = one foot.  
Third rate line of battle ship of 80 guns.  
Heaviest gun was a 32-pr. Length, 190 ft.  
Carried 750 men. Breadth, 57 ft.  
2,595 tons B.O.M.
- 4735 Nelson.** *Wood 2 Decker.* Launched in 1814. Whole Model. Scale,  
 $\frac{1}{4}$  in. = one foot.  
This model shews method of launching. It is arranged to work. The vessel was  
converted to a screw vessel in 1865.  
Heaviest gun was a 68-pr. Length, 203 ft.  
Carried 900 men. Breadth, 54 ft. 7 ins.  
4,672 tons Displacement.
- 4736 Royal William.** First Steam Ship to cross the Atlantic Ocean.  
Built by Messrs. Shepherd & Campbell, of Quebec.  
*Lent by the Literary and Historical Society of Quebec.*

- 4737 **St. George.**  
Built in the reign of Queen Anne.
- 4738 **St. Jean d'Acre.** *Wood 81 gun Ship.* Whole Model. Scale  $\frac{1}{4}$  in. = one foot. Launched in 1855.
- 4739
- 4740 **Australia.** Half Model. Scale,  $\frac{1}{4}$  in. = one foot. See ORLANDO, No. 4600.
- 4741 **Fearless.** Whole Model. Scale,  $\frac{1}{4}$  in. = one foot. See ARCHER, No. 4580.
- 4742 **Prince Consort.** *Wood Armour Clad Ship.* Launched in 1862. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw early broadside iron-cased vessel. Had 4 sisters, viz., CALEDONIA, OCEAN, ROYAL ALFRED, and ROYAL OAK. The ships of this class were originally designed and commenced as steam line of battle ships of 91 guns, but by Admiralty Order of 14th May, 1861, they were converted to armour-plated ships of 31 guns. The Model represents the ship as iron-cased.  
Heaviest gun,  $6\frac{1}{2}$  tons. Length, 273 ft.  
Carried 605 men. Breadth, 58 ft. 6 in.  
6,832 tons Displacement.
- 4743 **Erebus.** *Iron Armour Plated Floating Battery.* Launched in 1856. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw armour plated floating battery. Several similar vessels were built, viz., ÆTNA, GLATTON, METEOR, TERROR, THUNDER, THUNDERBOLT, and TRUSTY. These were the first iron cased ships constructed for H.M. Navy.  
Heaviest gun was a 68-pr. Breadth, 48 ft. 6 in.  
Length, 186 ft. 9 in. 1,954 tons B.O.M.  
For Model of Thunderbolt, see the Exhibit of Messrs. Samuda Bros. & Co.
- 4744 **Pallas.** *Wood Armoured Central Battery Ship.* Launched in 1865. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Single screw, early wood armour clad.  
Heaviest gun,  $6\frac{1}{2}$  tons. Length, 225 ft.  
Carried 225 men. Breadth, 50 ft.  
3,787 tons Displacement.
- 4744A **Prince Albert.** *Iron Turret Ship.* Launched in 1864. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Early iron single screw turret ship, designed under the superintendence of Capt. C. P. Coles. Had 4 turrets.  
Heaviest gun, 12 tons. Length, 240 ft.  
Carries 200 men. Breadth, 48 ft. 1 in.  
3,880 tons Displacement.
- 4745 **Viper.** *Armoured 3rd Class coast defence Gunboat.* Launched in 1865. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw coast defence iron gun boat. Had 1 sister, the VIXEN.  
Heaviest gun,  $6\frac{1}{2}$  tons. Length, 160 ft.  
Carries 80 men. Breadth, 32 ft.  
1,230 tons Displacement.
- 4745A **Achilles.** Small Model of. See 4709.
- 4746 **Devastation.** *Midship Section.* Showing construction of ship. See 4751.
- 4747 **Rupert.** *Midship Section Model* showing construction of ship. See 4700.
- 4747A *Midship Section.* Shewing the arrangement of framing in the above vessel.
- 4748 **Hercules.** *Midship Section.* Shewing construction of. See 4605.
- 4749 **Bellerophon.** Bow and Stern of. See 4602.  
Shewing arrangements of bow and stern.
- 750 **Thunderer.** *Magazine of.*  
Shows magazine of H.M.S. THUNDERER of 1836.

- 4751 Devastation.** *1st Class Battle Ship.* Launched in 1871. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw armour clad, built of iron. Largest example of the Monitor type of vessel in the Royal Navy. First iron ship built in Portsmouth Dockyard. Has 1 sister, viz., the THUNDERER.  
Heaviest gun, 29 tons. Length, 285 ft.  
Carries 388 men. Breadth, 62 ft. 4 in.  
9,330 tons Displacement.
- 4752**
- 4753 Inflexible.** *1st Class Battle Ship.* Launched in 1876. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Iron twin screw armoured battle ship. Was for a long time the largest and most powerful armour clad in the Royal Navy.  
Thickest armour, 24 ins. Length, 320 ft.  
Heaviest gun, 80 tons. Breadth, 75 ft.  
Carries 469 men. 11,880 tons Displacement.
- 4754 Agamemnon.** *1st Class Battle Ship.* Launched in 1879. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Built on the same general principles as the large armour clad turret ship INFLEXIBLE, but is much smaller. Was designed to go through the Suez Canal. Has 1 sister, viz., Ajax. Two vessels, COLOSSUS and EDINBURGH, were built with same general features, but intermediate in size between AGAMEMNON and INFLEXIBLE.  
Heaviest gun, 38 tons. Length, 280 ft.  
Thickest armour, 18 ins. Breadth, 66 ft.  
Carries 412 men. 8,660 tons Displacement.
- 4754A Polyphemus.** Whole Model.
- 4755 Benbow.** Midship Section.  
This model shews the arrangement of framing, &c. See 4756.  
Length, 330 ft. Breadth, 68 ft. 6 ins.  
10,600 tons Displacement.
- 4756 Benbow.** *1st Class Battle Ship.* Launched in 1885. Whole Model. Scale,  $\frac{1}{4}$  in. = one foot.  
This vessel, together with 5 others, viz., ANSON, CAMPERDOWN, COLLINGWOOD, HOWE, and RODNEY, form the "Admiral Class" of twin screw Barbette Armour, clad ships, built of steel. The Benbow has one 111 ton gun (the largest gun in the Royal Navy) in each barbette; the other ships have 2 smaller guns in each barbette.  
Carries 515 men.
- 4757 Sans Pareil.** Whole Model. Scale, = one foot. See VICTORIA.  
*Lent by Thames Iron Works and Shipbuilding Co.*
- 4758 Hood.** Whole Model. See 4759 and 4611.
- 4759 Royal Sovereign.** *1st Class Battle Ship.* Launched in 1891. Whole Model. Scale,  $\frac{1}{8}$  in. = one foot.  
Steel twin screw armour clad ship with two barbettes. Has 6 sisters, viz.: RAMILLIES, RENOWN, REPULSE, RESOLUTION, REVENGE, and ROYAL OAK. Another vessel, the HOOD, Nos. 4758 and 4611, is of the same class but is fitted with turrets instead of barbettes. These are the latest, largest, and most powerful armour clad vessels in the Royal Navy.  
Has four 67 ton guns. Length, 380 ft.  
Carries 634 men. Breadth, 75 ft.  
14,150 tons Displacement.
- 4760 Models of sterns, sections, &c., of wood ships.**
- 4761 Battle Ship, Line of.**  
80 gun vessel.
- 4762 Empress of India, Model of.**

- 4763 **Revenue Cutter.** Model of Revenue Cutter employed at the end of last century. *Lent by G. Corner, Esq.*
- 4764 **Leander.** *Steel Cruiser.* Launched in 1882. Half Model. Scale,  $\frac{1}{4}$  in. = one foot.  
Twin screw partially protected 2nd class Cruiser of 10 guns, built at Glasgow. Has 3 sisters, viz., *AMPHION*, *ARETHUSA*, and *PHAETON*.  
Heaviest gun, 5 tons. Length, 300 ft.  
Carries 300 men. Breadth, 46 ft.  
4,300 tons Displacement.
- 4765 Bows, Sections, &c., of Wood Ships. -
- 4766 **Resolution.** Model of vessel commanded by the celebrated Navigator Captain Cook.
- 4767 **Fame.** Model of Whaling Ship owned and commanded by the celebrated navigator Captain Scoresby.
- 4768 **Bellona.** Whole Model. *See 4573.*  
There is also a whole model on a scale of  $\frac{1}{4}$  inch to the foot.
- 4769 Sterns, Sections, &c., of Wood Ships.

# STAR LIFE ASSURANCE SOCIETY.

**BEST GOODS are PUT UP with BOTTLE SEAL.**

CAN BE HAD FROM ALL

**PROMINENT BOTTLERS and GROCERS.**

Illustrated Catalogue free on application—

**THE BOTTLE SEAL COMPANY, LIMITED,**  
Manufactory—27F, EAGLE WHARF ROAD, LONDON, N.

## 4725 THE ROYAL NAVY IN APRIL, 1891.

Showing all Sea-going Ships in Commission, in Reserve, Built, and Building.

The Ships are represented by models showing plan, and elevation above the water line of each vessel.

*These Models were made by Messrs. JOHN BATEMAN & CO., 204 & 205, High Holborn, London, W.C.*

Explanation.—Ships in Commission are printed in leaded Type, thus—**"VICTORIA."** Ships in Reserve are printed in plain Capitals, thus—"HERCULES." Ships building, or not completed, are printed in Italics, thus—"HOOD." *SEVA* Star thus \* indicates an armoured ship, e.g., "TRA-FALGAR."\*

**"F"** Signifies ADMIRAL OF THE FLEET.

**"F"** Signifies ADMIRAL.

**"F" [v]** Signifies VICE-ADMIRAL.

**"F" [r]** Signifies REAR-ADMIRAL.

**"F" [c]** Signifies COMMODORE or SENIOR OFFICER.

For full particulars of the Ships, see pages 419 to 455.

*PART I.—H.M. the Queen in the Royal Yacht "Victoria and Albert," preceded by the Trinity Yacht, and the Lords of the Admiralty, accompanied by H.R.H. the Prince of Wales, Hon. Admiral of the Fleet, in his Yacht, the "Osborne," and attended by the Diplomatic Body, the Members of the Legislature, &c., reviewing a combined Fleet at Spithead.*

THE QUEEN, preceded and attended as above described, is passing between the lines. The "Nile" flies the Flag of the ADMIRAL of the FLEET; and the Ships of the various Admirals, Vice-Admirals, and Rear-Admirals are distinguished by their respective Flags.

*PART II.—Represents Her Majesty's Ships on their respective Stations in various parts of the world outside Home waters. The Fleets and Squadrons are grouped according to the Stations to which they were assigned in April of the present year.*

List of Ships represented—

- 4776 **H.M.S. "Britannia,"** *Dartmouth, Devon.* Training Ship for Cadets in the Royal Navy.

Exhibit illustrating the life and work of the Naval Cadets on shore and afloat.

- 4777 **Royal Naval Artillery Volunteers, H.M.S. "Frolic,"** *off Somerset House, W.C.*

Tall Two-Handled Silver Cup. Presented to the First (London) Corps of Royal Naval Artillery Volunteers by the Commercial Union Assurance Co., in recognition of services rendered by a boat's crew, under the command of Alfred S. Boom (afterwards Lieut.-Com. Additional), in assisting to extinguish a fire on board ss. "La Plata," at North Woolwich, June 14th, 1873.

Silver Challenge and Battery Cups for Competition in Heavy Gun Drill. Presented to the London Brigade by Sir H. Peek, Bart.

Silver Challenge Bowl for Seamanship. Presented by Lieut.-Com. C. E. Seth-Smith.

Silver Challenge Cup for Brigade Attendance, and Silver Challenge Cup for Heavy Gun Target Practice.

*Lent by Southport Battery, Liverpool Brigade.*

Silver Challenge Bugle, for Heavy Gun Firing at Sea. Presented by the late Earl of Shaftesbury, formerly Lieut.-Com. London Brigade.

Silver Staff, hollow, containing a Silver Oar, inscribed "Admiralty of England," about 7 in. long. Supposed to be the symbol of the water-bailiff's jurisdiction of some seaport town.

*Lent by Sub-Lieut. F. B. Smythies.*

Silver Challenge Cup for swimming, given by the surgeons. Won 3 years by the lender.

*Lent by C. P. O. Lowndes.*

#### PICTURES, RELICS, PHOTOGRAPHS, &c.

**Order for Food**, written by Admiral Lord Nelson after loss of his arm, and **Trafalgar Medal**.

Priestman's Stand, Verandah B, Outside Camperdown Gallery, Royal  
Naval Exhibition.

Having now completed the tour of the Main building, the Visitor will find himself opposite the exit into the grounds, and in order to complete the round of the galleries, should proceed at once to the

## ST. VINCENT GALLERY,

situated on the North side of the grounds, and containing the exhibits of the

## ORDNANCE SECTION.

THE exhibits appertaining to this section are located in the St. Vincent, Armstrong, and a portion of the Camperdown Galleries respectively; they have been selected to illustrate, as far as practicable, the history of Naval War materiel.

Naval Gunnery, as a science, dates from a very recent period, viz., 1832, when a gunnery school, H.M. Ship "Excellent," was established at Portsmouth, under Captain Sir Thomas Hastings; previous to that date, every Captain of a man-of-war had his own system of Drills and fitted his own appliances to the guns. Up to the early part of this century, there were no tangent or despart sights, without which, it is needless to say, no good or certain practice could take place. In the old wars, the Captain of "The Duke," Sir Charles Douglas, and the Captain of the "Shannon," Sir G. Broke, took great interest in developing the gunnery resources of their ships, the former introducing flannel cartridges (*i.e.*, cartridges made up in flannel) and "sights." So also in later years the "Illustrious" was noted for her gunnery proficiency, but there was no central organisation or uniform system of Naval gunnery till very recently.

In the St. Vincent and Armstrong Galleries, specimen guns have been arranged in chronological order from the time of Henry VI., culminating with the very latest weapons and their appliances.

Of the earlier types of guns but little can be said; they were all of "Smooth Bore," projecting round shot, with little accuracy; and it was not till the Crimean War, and about the year 1860, that changes began, to which, up to the present date, there is apparently no finality.

Rifling and Breech-loading were then adopted in guns designed by Sir W. Armstrong; and to withstand the increased stress, these were built, instead of being cast, with coils of wrought iron round a central tube.

The system of Breech-loading at first introduced proved unreliable, and about 1865 muzzle-loading (R.M.L.) was again resorted to. The chief drawback to this system of loading is the necessity, in ship work, for short barrels, and the consequent impossibility of developing power by the burning

of large charges of powder ; the result being that only small charges, relative to the weight of the projectile, could advantageously be used, and the Initial Velocity (*i.e.*, the velocity with which the projectile leaves the bore of the gun), on which so much depends, was correspondingly low—seldom exceeding 1,400 feet per second. Several expedients—the chief one being the enlargement of the chambers—were resorted to, to overcome this defect, but no real success accrued therefrom.

About 1882 it became evident that if we were to have a Naval Artillery of any power, breech-loading (B.L.) should take the place of muzzle-loading, at least in heavy guns ; and from this dates our present system, which is continually being improved.

Its chief feature is the method of closing the breech by a screw plug, the screw being interrupted ; a pad of asbestos, placed between tin discs with steel rings at the end of the plug, is so fitted as to prevent the escape of gas to the rear when the charge is ignited ; and another feature, as concerns the loading of these guns on board ship, is the admissibility of longer barrels, by which means a slow burning powder and larger charges can be used, with a consequent gain in increase of energy. Guns, with calibres of 4 in. to 16½ in., designed on this principle are now used on board ship, but the “life” of the larger guns is rendered very precarious, owing to the wear and tear of the tube by erosion of the gas evolved from the combustion of such necessarily large charges of powder.

#### QUICK FIRING GUNS.

Guns of this type have one barrel, and are to be seen among the exhibits of the Armstrong Company and the Maxim-Nordenfelt Company respectively. They have been designed successfully up to a calibre of 6 ins., projecting a 100 lb. missile at the rate of six per minute, and in the lower calibres as quickly as 30 per minute. This rapidity is effected by the “charge” (both Powder and Projectile) being made up in a metal case, which has moreover many incidental advantages. These guns have been introduced into the Naval service as the best antidote to the attack of torpedo boats.

#### MACHINE GUNS.

These guns are represented in the Naval Service in various types, *e.g.*, Gatling 10 barrel, Nordenfelt four and five barrel, Gardner five and two barrel, and the Maxim-Automatic. In some of these the barrels are disposed round a central axis, in others they are disposed horizontally. They can be fired as slowly or as rapidly—up to 600 rounds per minute—as is required.

The charge, like that of the Quick-Firing gun, is compound, and the rapidity of fire is governed by the system of “feed,” *i.e.*, the supply of cartridges to the barrel. In the automatic gun, or maximum design, the recoil after discharge is utilised to perform the subsequent operations of loading and firing.

The characteristics of Quick-Firing and Machine guns, are lightness and

rapidity of fire and service by a small number of men, which are invaluable qualities in the presence of swarms of torpedo boats, and uncovered men.

#### MOUNTINGS.

Under this heading are comprised the various means by which the fire of the guns is directed and controlled. In early days, up to even a recent period, guns were mounted on wooden carriages which were worked by hand-spikes (wooden levers) for training, and tackles for running them "in and out of the ports," breechings (thick rope) being used to control the energy of the recoil. Later on, the mounting for heavy guns took the form of a carriage and slide, the latter affording greater facility for directing the gun, and also of absorbing its recoil by means of compressors, it being observed that with muzzle loading guns it was necessary to retain the gun inboard after each discharge, to perform the operation of loading.

With the present B.L. guns the reverse is required; the recoil is absorbed by hydraulic pressure and the gun then returns automatically to its loading position. Lateral motion is obtained by means of geared pinions working in a racer on the deck, and vertical motion is given to the gun by geared wheels.

With guns up to 10 ins., hand power actuates both these motions; but with heavier natures, which are mounted generally in pairs, in turrets, or on barbettes, hydraulic power is used, and armour is employed to protect the necessary machinery.

#### EXPLOSIVES.

##### *Powder.*

Gunpowder and gun cotton are the only explosives used in the British Naval Service, the former being used entirely for guns and small arms, the latter for Torpedoes and Submarine work. The charges for every gun in the service, past (as far as practicable) and present, are exhibited, as also the cases in which they are stowed in a ship's magazine, and transported thence to the guns when required. Although in all charges the ingredients of the powder exist in the same proportions, the shape and size of the grains vary considerably, according to the nature of the charge; and in this direction great progress has been made in recent years.

The old powders for the S. B. (smooth bore) guns, from the relatively small size of the grain, burnt very quickly, and in heavy charges from rifled guns gave rise to violent pressures. With the short barrels of the muzzle loading gun it was at first found impracticable to burn a large charge with advantage, a large proportion thereof being driven out of the muzzle without being ignited; but in some measure (about 1876) this was obviated by enlarging the chambers of the gun and igniting the charge in such a manner as to ensure a more uniform combustion. In the old guns the charge was made up in paper and ignited with a match. Towards the close of the last century, however, Sir Charles Douglas introduced a flannel cartridge with locks and quill tubes, but

the flannel left a smouldering residue in the bore after discharge, and rendered it somewhat dangerous in M. L. guns to load again with anything like rapidity ; in the new guns, however, the bag is made of silk cloth (which is found to leave but little residue on burning), and in heavy guns the charge is made up in several parts to facilitate handling. In Quick Firing and Machine guns, in Rifles and Pistols, the charge is made up in a metal case, which holds powder, projectile, and the means of ignition.

#### *Gun Cotton.*

Gun cotton is stowed on board ship both in a "wet" and "dry" condition ; the former, containing 18 per cent. of moisture, is sufficiently damp to resist ordinary means of ignition, but nevertheless develops its full power when detonated with the "dry" in small quantities. The rapidity and violence of its action renders gun cotton unsuitable for guns and small arms.

#### PROJECTILES.

There have always been several natures of projectiles for the same type of gun, such as shell (common and shrapnel), shot (solid, case, grape, red hot, and chain), carcasses, &c., all of which were designed for special purposes. Considerable progress has been made in the design and manufacture of projectiles since 1876, up to which date they were made chiefly of cast iron ; now they are made of forged or cast steel, and the largest in the Naval Service weighs 1,800 lbs., which, when propelled by 960 lbs. of gunpowder, has an initial velocity of nearly 2,000 "feet-seconds," a sufficient energy to send it through 33 inches of iron.

Increased accuracy is obtained by the recent method of imparting rotation to the projectile, which is now effected (as also erosion mitigated) by driving rings of soft metal (copper) pressed on the base, instead of the older system of studs, which weakened the walls of the projectile.

**Flint Locks** were superseded by percussion caps and hammers for small arms in 1840, and by detonating tubes and hammers for guns in 1842. Sir Charles Douglas introduced the flint lock at the close of last century.

**Smooth Bore Muskets** were in general use in the Navy until 1854, the first year of the Russian War, when Minie Rifles were introduced, each ship being supplied in the first instance with rifles and smooth-bore muskets in the proportion of one-third and two-thirds respectively of her complement, until a sufficient number of the former became available to make their supply general.

**Large Pistols** (Cavalry pattern) were used in the Navy until 1846, when a smaller pattern, having a rib on the side for attaching to the waist-belt, was introduced, and these continued in use until the beginning of the Russian War, when a small supply of Colt's revolvers was made to each ship, the numbers being gradually increased until the supply became general. After Colt's came the "Deane and Adams" revolver, then the "Adams," and in 1887 the present pattern, the "Enfield."

## ORDNANCE.

The articles specified at pages 471 to 487 are mainly Government Exhibits, lent under the authority of the First Lord of the Admiralty and the Secretary of State for War respectively; the few exceptions are duly notified.

## OLD NAVAL GUNS.

- 4781 Wrought Iron Serpent Gun of the period of Henry VI. (A.D., 1422—1461), with two rings for raising it. Length, 8 ft. 6 in. ; calibre, 4.25 in. ; weight, 8 cwt. 70 lbs.
- 4782 A Breech-loading Peterara of forged iron of the time of Edward IV. (A.D., 1461—1483). This gun is made of longitudinal bars of iron, hooped together with iron rings. Length, 3 ft. ; calibre, 2.5 in. ; weight, 1 cwt. 13 lbs.
- 4783 A Brass Saker, of Henry VIII. Length, 6 ft. 11 in. ; calibre, 3.65 in., or that of a 6-pr. nearly.
- 4784 A Brass Culvering, of Henry VIII. This gun was recovered from the "Mary Rose," lost off Portsmouth, A.D. 1545. Length of gun, 10 ft. 11 in. ; calibre, 5.20 in. ; weight, 43 cwt. 25 lbs.
- 4785 A Brass Demi-cannon, of Henry VIII. Recovered from the "Mary Rose," but is very much worn from the action of the water. Length, 11 ft. ; calibre, 6.4 in. ; a 32-pounder.
- 4786 A Brass Culvering Bastard, of Henry VIII. Recovered from the "Mary Rose." This gun is twelve-sided. Length, 8 ft. 6 in. ; calibre, 4.56 in.
- 4787 A Brass Cannon Royal, of the time of Henry VIII. Recovered from the wreck of the "Mary Rose." Length, 8 ft. 6 in. ; calibre, 8.54 in.
- 4788 A Brass Sakeret, of Edward VI. Length, 6 ft. ; weight, 6 cwt. 8 lbs.
- 4789 A Brass Demi-culvering, of the time of Charles I. Length, 9 ft. ; calibre, 4.4 in. ; weight, 20 cwt. 23 lbs.
- 4790 A Brass Falcon, of Charles I. Length, 3 ft. 8.5 in. ; calibre, 3 in. ; weight, 2 cwt. 81 lbs. It bears the date 1638.
- 4791 A Brass Falconet. Assigned to the time of the Commonwealth, A.D. 1650, "from its appearance." It is without date, device, or inscription. Length, 3 ft. 9 in. ; calibre, 2.10 in.
- 4792 A Brass Minion, of the time of Charles II., A.D. 1676. Length, 6 ft. 6 in. ; calibre, 3.44 in. ; weight, 9 cwt. 44 lbs.
- 4793 A Brass Minion, of the time of William and Mary, A.D. 1695. Length, 6 ft. 6 in. ; calibre, 3.25 in.
- 4794 A Brass Minion of Queen Anne's reign, 1706. Length, 7 ft. ; calibre, 3 in. ; weight, 10 cwt. 45 lbs.
- 4795 A Brass 3-pr. Gun, with date 1742. "This gun is said to have been made for experiments in quick firing ; the cascabel being bored through to admit a hot iron to fire the charge." Length, 6 ft. 11 in. ; calibre, 3 in. ; weight, 11 cwt. 103 lbs.

- 4796 English Brass Heavy 6-pr. Gun, A.D. 1774. Length, 8 ft. ; calibre, 3.76 in. ; weight, 19 cwt. 62 lbs.
- 4797 A 5½-inch Brass Howitzer, 4 cwt., dated 1782 ; mounted on a carriage made in the Royal Arsenal in 1782, and presented by George III. to the Emperor of China through Lord Macartney in 1792. It was found in a perfect condition in the Palace of Yuen-min-yuen, near Peking, at its capture in October, 1860, and brought back by the captors.
- 4798 A 5½-inch Brass Howitzer, date 1812. Calibre, 5.66 in. ; length, 2 ft. 2 in. ; weight, 4 cwt. This piece was introduced in 1791, and last cast in 1819.
- 4799 Ancient Long Gun fished up in a net off Dover.
- 4800 Swivel Gun dug up at Amsterdam.
- 4800A A 32-pr. Carronade, was on the quarter-deck of H.M.S. "Edinburgh" at the battle of St. Jean d'Acre, struck by a shell from the enemy, after it was loaded, which prevented its being again fired, and the shot still remains in it. All the gun's crew were either killed or wounded ; the Commander, the Master, a Midshipman, and four men were also wounded by the same shell.
- 4800B Foretopsail of H.M.S. "Victory."

#### NAVAL GUNS OF THE PRESENT CENTURY.

- 4801 S. B. 68-pr. 95-cwt. Period 1840—1860. Used principally as bow and stern revolving guns in paddle-wheel steamers.
- 4802 S. B. 8-inch 65-cwt. Period 1840—1860. Used on lower deck of line of battle ships and main-deck of Frigates.
- 4803 S. B. 32-pr. 55-cwt. Period 1800—1860. Used on lower deck of line of battle ships and upper decks of paddle-wheel steamers. This gun was in the "Victory," at Trafalgar, and afterwards in the "Belleroophon," at the bombardment of St. Jean d'Acre.
- 4804 S. B. 24-pr. 50-cwt. Used on middle and main-decks of line of battle ships and main-decks of Frigates in the early part of this century.
- 4805 S. B. 18-pr. 42-cwt. Used in Frigates and smaller vessels in the early part of this century as revolving guns.
- 4806 S. B. 6-pr. Period 1800—1860. Used principally for firing into an enemy's tops, at close quarters, and also as a field gun.
- 4807 S. B. 24-pr. Howitzer. Period 1800—1860. Used on upper decks of small vessels, and in launches.
- 4808 S. B. 24-pr. Carronade. Used on upper decks of Frigates, Corvettes, and Brigs. 32-pr. Carronades were employed on the upper decks of some line of battle ships up to 1855.
- 4809 R. B. L. 40-pr. Period 1860—1875. Used on upper and main-decks of Frigates and line of battle ships, and on upper decks of smaller vessels.
- 4810 R. B. L. 20-pr. Period 1860—1875. Used on upper decks in all classes of ships.
- 4811 R. M. L. 10-inch, 18 ton. Introduced 1868. Used principally on main decks of large armoured broadside ships.
- 4812 R. M. L. 7-inch, 6½ ton or 90 cwt. Introduced 1865—1872. Used on main-decks of ironclads and wooden Frigates. Also on upper decks of smaller vessels.

- 4813 R. M. L. 64-pr., 64 cwt. Introduced 1865. Used on main-deck of Frigates, and on upper decks of all classes of smaller vessels.
- 4814 R. M. L. 9-pr., 8 cwt. Introduced 1873. Boat and Field Gun.
- 4815 R. M. L. 7-pr., 200 lbs. Introduced 1870. Boat and Field Gun.
- 4816 B. L. 13·5-inch. Introduced 1887. Full size model of turret or barbette guns of certain ships of the "Admiral" class.
- 4817 B. L. 6-inch. Introduced 1882. Used as revolving and broadside guns in all classes of ships.
- 4818 B. L. 5-inch. Introduced 1884. Carried principally in sloops as broadside guns.
- 4819 B. L. 4-inch. Introduced 1882. Carried principally in Gunboats.
- 4820 Q. F. 4·7-inch. Introduced 1888. Designed to take the place of 5-inch and 4-inch B. L. guns in ships now building and fitting out.
- 4821 Q. F. 6-pr. Nordenfelt. Introduced 1885.
- 4822 Q. F. 6-pr. Hotchkiss. Introduced 1885.
- 4823 Q. F. 3-pr. Hotchkiss. Introduced 1885.  
Designed to take the place of 9-pr. and 7-pr. R. M. L. guns as boat guns, and of guns now mounted on upper decks of armoured ships for defence against Torpedo boat's attack.
- 4824 Machine, Gatling, 0·45-inch. Introduced 1873.
- 4825 Machine, Gatling, 0·65-inch. Introduced 1875.
- 4826 Machine, Gardner, 5 barrel. Introduced 1882.
- 4827 Machine, Gardner, 2 barrel. Introduced 1884.
- 4828 Machine, Nordenfelt, 5 barrel. Introduced 1884.
- 4829 Machine, Nordenfelt, 4 barrel. Introduced 1880.
- 4830 Machine, Nordenfelt, 2 barrel. Introduced 1885.  
The above Machine guns are used as boat and field guns, and mounted in ships, as a defence against Torpedo boat's attack.
- 4831 Tools used for examining the bores and vents of guns.
- 4832 Tools used for facing, &c., copper rings of vent pieces and their seatings in the rear of the chamber of rifled breech-loading guns.
- 4833 Tools used for re-coppering breech-loading guns.
- 4834 Model of 38-ton R.M.L. Gun, with wrought-iron mounting complete.  
*Lent by W. H. Bambury, Esq., R.N.*

#### OLD SMALL ARMS.

- 4835 Flint and Steel Lock Musket. Calibre, 0·635 in. ; length of barrel, 39 in. "Raf. vend. F. 1619," on the inner side of the lock-plate. In this very unusual lock the steel strikes the flint or pyrites in a manner imitating the action of the hand in striking a light. The mechanism is extremely good and powerful.
- 4836 Flint-lock Musket of the time of James II., A.D. 1685—1688. Calibre, 0·73 in. ; length of barrel, 31 in.
- 4837 Sea-service Flint-lock Musket. Calibre, 0·753 in. ; length of

barrel, 37 in. ; weight of piece, 10·13 lbs. These arms were supplied for ships' companies in 1825.

- 4838 **Sea-service Short Flint-lock Musket.** Calibre, 0·753 in. ; length of barrel, 24 in. Brass mounts. Weight, 8 lbs. 3·5 ozs. ; charge, 4·5 drachms. These arms were meant for boat service. Length complete, 4 ft. 8 in.
- 4839 **Musket (Brown Bess), altered from Flint and Steel to Percussion Pellet.** Calibre, 0·753 in. ; length of barrel, 36 in. ; weight, 9·40 lbs.
- 4840 **Sea-service Percussion Short Musket.** Calibre, 0·753 in. ; length of barrel, 33 in. ; weight, 9·09 lbs.
- 4841 **Brunswick Naval Rifle, 1840.** Calibre, 0·796 in. ; length of barrel, 33 in. ; weight, 11·34 lbs. ; number of grooves, 2 ; amount of twist, 1 turn in 30 in. Remarkable as the largest calibre in the British service.
- 4842 **Percussion Smooth-bored Musket, Sea-service, 1840.** Calibre, 0·753 in. ; length of barrel, 30 in. ; weight, 8·8 lbs.
- 4843 **Sea-service Percussion Short Musket, 1842 Pattern.**—Calibre, 0·753 in. ; length of barrel, 30 in. ; weight, 8·81 lbs. ; charge, 4·5 drachms.
- 4844 **Percussion Musket, with Bayonet, Pattern 1842.** Subsequently rifled in 3 grooves for Sea-service. Calibre, 0·758 in. ; length of barrel, 30 in. ; weight, 8·75 lbs. ; spiral, 1 turn in 78 in. ; charge, 2·8 drachms.
- 4845 **Black Sea-service Flint-lock Rifled Musket, Second Class Reserve.** Calibre, 0·690 in. ; length of barrel, 40 in. ; weight, 10 lbs. 9 ozs. ; 9 grooves ; twist, 1 turn in 40 in.
- 4846 **Delvigne-Minié Percussion Rifle, Pattern 1851, with Bayonet.** Calibre, 0·702 in. ; length of barrel, 39 in. ; weight, 9·31 lbs. ; number of grooves, 4 ; twist, 1 turn in 78 in. ; charge, 68 grains ; weight of bullet, 670 grains ; diameter, 0·675 in.
- 4847 **Pattern 1856, Naval Percussion Rifled Musket, with T-headed Sword. Fourth Class Reserve.** Calibre, 0·577 in. ; length of barrel, 33 in. ; weight, 8 lbs. 11 ozs. ; 5 grooves ; twist, 1 turn in 48 in.
- 4848 **Short Naval Rifle, 5 Grooves, with Sword Bayonet, having Cutlass Guards, Pattern 1858.** Calibre, 0·577 in. ; length of barrel, 33 in. ; weight, 10 lbs. 7·5 ozs. ; twist, 1 turn in 48 in. ; charge, 2½ drms.
- 4849 **Enfield Small-bore Rifle, Experimental Pattern, 1861, with Bayonet.** Calibre, 0·453 in. ; length of barrel, 36 in. ; weight, 7·893 lbs. ; grooves, 3 ; twist, 1 turn in 20 in. ; charge, 68 grains ; bullet diameter, 0·44 in. ; length, 1·41 in. ; weight, 530 grains.
- 4850 **Snider Breech-loading Naval Rifle, II.** Calibre, 0·577 in. ; length of barrel, 30·5 in. ; number of grooves, 5 ; twist, 1 turn in 48 in. ; total length of arm, 48·5 in. ; weight, 8 lbs. 13 ozs.
- 4851 **Naval Flint-lock Belt Pistol.** Calibre, 0·625 in. ; length of barrel, 6·5 in. ; weight of piece, 1·54 lbs.
- 4852 **Naval Percussion Pistol for Coastguard Service.** Calibre, 0·670 in. ; length of barrel, 6 in. ; weight, 1·90 lbs.

- 4853 Smooth-bored Percussion Pistol, with Swivel Ramrod, for Sea-service, Second Class Reserve. Calibre, 0.570 in.; length of barrel, 6 in.
- 4854 Flint Lock, Breech-loading Magazine Naval Pistol (of the last century), reported to have been made for Lord Nelson by Mortimer, Gunmaker, and used for boarding purposes. A splendid specimen of the Gunmaker's art of the Flint Lock period. It is a Magazine breech-loading weapon, containing eight charges of powder and ball, and is also Repeating, Self-loading, and Self-cocking, all with one simple motion of a powerful lever. This is an interesting relic, showing that our Naval Commanders were in possession of a practical Breech-loading Magazine weapon at a very early period.
- Lent by Mr. Edwin Oliver, 68, Haymarket, W.*
- 4855 Colt's Second Size, or Belt Revolver Pistol. Calibre, 0.37 in.; length of barrel, 7.5 in.; 7 grooves; twist, 1 turn in 30 in.; 6 chambers; weight, 2 lbs. 10 ozs. Patent, 1st June, 1849.
- 4856 Deane & Adam's Revolvers, with Beaumont's Improvement. Calibre, 0.48 in.; length of barrel, 5.5 in.; 3 grooves; twist, 1 turn in 24 in.; 5 chambers; weight, 2 lbs. 8 ozs. Patent, February, 1851.
- 4857 Six Naval Boarding Pikes, 19th Century. Length of blade, 5 in.; total length, 8 ft. 1 in.

#### SMALL ARMS AND ACCOUTREMENTS AT PRESENT USED IN THE NAVY.

- 4858 Martini-Henry Rifle and Sword Bayonet with Accoutrements.
- 4859 Adams' Revolver Pistol and Cutlass with Accoutrements.
- 4860 Intrenching Implement with Case and Sling.
- 4860A Boarding Axe with Cover.
- 4861 Proposed Intrenching Spade, with folding handle.
- Invented and lent by Commander Boyle, R.N.*
- 4862 Messrs. Boosey & Co.—Case of Musical Instruments, suitable for ships' bands.

#### MISCELLANEOUS GUNNERY STORES USED IN THE NAVY.

- 4863 Set of Pioneer's Tools and Equipment.
- Powder Cases for containing Gun-Charges in Ships' Magazines; these Cases are known by letters of the alphabet, and are used for Charges for Guns of the various descriptions, as specified below:—
- |      |            |                                                             |
|------|------------|-------------------------------------------------------------|
| 4864 | S          | For 16½-inch B.L. Guns to contain 4 ½ charges.              |
| 4865 | T          | „ 13½ „ „ „ 2 ¼ „                                           |
| 4866 | U, V, or W | „ 12 „ „ „ 4 ¼ „                                            |
| 4867 | I          | „ 9.2 „ „ „ 4 ¼ „                                           |
| 4868 | H          | „ 8 „ „ „ 4 ¼ „                                             |
| 4869 | D          | „ 6 „ „ „ 8 full „                                          |
| 4870 | L          | „ 6 „ „ „ 24 ¼ „                                            |
| 4871 | A          | „ 5 & 4 „ „ (and for M.L. Guns, 9-inch and smaller calibre. |

|      |                                                                                                                   |                              |                                                           |
|------|-------------------------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------------------------|
| 4872 | B                                                                                                                 | For 10 -inch                 | Rifled M.L. Guns to contain 2 full charges.               |
| 4873 | C                                                                                                                 | „ 12 „ 25-ton                | „ „ 2 „                                                   |
| 4874 | E                                                                                                                 | „ 11 „ „                     | „ „ 2 „                                                   |
| 4875 | F                                                                                                                 | „ 12 „ 35-ton                | „ „ 2 „                                                   |
| 4876 | G                                                                                                                 | „ 12½ „ 38-ton               | „ „ 6 ½ „                                                 |
| 4877 | Pentagon, whole, all R. M. L. Guns 7-inch and below.                                                              |                              |                                                           |
| 4878 | Half Pentagon, to complete stowage in connection with the Pentagon whole cases.                                   |                              |                                                           |
| 4879 | Stack of "A" Powder Cases                                                                                         |                              | } Illustrating the method of stowage in Ships' Magazines. |
| 4880 | „ Pentagon                                                                                                        | „ „                          |                                                           |
| 4881 | Wood, Metal lined                                                                                                 | { Whole<br>Half<br>Quarter } | To contain charges for boat and field Guns.               |
| 4882 | Budge Barrel, for conveyance of any description of explosive material from place to place in a ship.              |                              |                                                           |
| 4883 | Ammunition Box, for quick-firing Guns, 6-pr.                                                                      |                              |                                                           |
| 4884 | Ammunition Box, for quick-firing Guns, 3-pr.                                                                      |                              |                                                           |
| 4885 | Ammunition Box, for Rifle and quick-firing Guns less than 3-pr.                                                   |                              |                                                           |
| 4886 | Box for Fireworks, large.                                                                                         |                              |                                                           |
| 4887 | Box for Fireworks, small.                                                                                         |                              |                                                           |

4942 Specimen of Steel Band for slinging Projectiles.

4943 Cartridge Cases, used for the conveying of Cartridges from Magazines to Gun Decks.

4944. **Box** for containing the **Friction Tubes** by which Gun charges are ignited.
- 4945 **Lanyard** for igniting Friction Tubes.
- 4946 **Pocket** for holding Friction Tubes on field or boat service.
- 4947 **Extractor**, for withdrawing projectiles from loaded Rifled Muzzle-loading Guns.
- 4948 **Vent Bit, Pricker, and Drift**, for clearing vents of Guns.
- 4949 **Specimens of Fuzes** at present used in the Navy.
- 4950 **Crusher Gauges**, by means of which the pressure per square inch (on the explosion of the charge) is ascertained in the bore of the Gun.
- 4951 **Apparatus for Firing War Rockets.**
- 4952 **Apparatus for Firing Signal Rockets.**
- 4953 **Pendulum**, by which the number of degrees of heel or roll of a ship is ascertained.
- 4954 **Pivot Wrench**, for attaching Elevating Arcs to Guns.
- 4955 **Aiming Tube**, by which rifle cartridges can be fired from ship guns, for practice in Aiming, instead of using service charges.
- 4956 **Iron Shot and Part of the Charge taken out of a Brass Gun**, recovered in 1836 from the "Mary Rose," which sunk off Spithead in 1545.
- 4957 **Round Shot** for the 150-pr., 68-pr., 56-pr., 42-pr., 32-pr., 24-pr., and 18-pr. R. L. Case.
- 4958 **Shell for the 13-inch Mortar**, whole and in section, with Boxer mortar fuze. Gauge for the same. Another 13-in. Shell. R. L. Case.
- 4959 **Common Shells**, whole and in section, with fuzes, for the 42-pr. (Boxer common fuze), 32-pr. (Pettman fuze), 24-pr. (Pettman fuze), 18-pr. (Boxer common fuze), and 12-pr. (Boxer common fuze). Gauges for the same. R. L. Case.
- 4960 **Naval Shells**, whole and in section, with fuzes, for the 150-pr. (Pettman fuze), 100-pr. ( $7\frac{1}{2}$ -secs. time fuze), and the 8-in. (Moorsom fuze). Gauges for the same. R. L. Case.
- 4961 **10-inch, 8-inch, 42-pr., and 32-pr. Naval Common Shells**, and 16 others.
- 4962 **Boxer's Diaphragm Shrapnel Shell**, whole and in section, loaded, with fuze, for the 150-pr., 10-inch, 100-pr., 8-inch, 32-pr., 24-pr., 18-pr., 12-pr., 9-pr., and 6-pr., and 10 gauges for the same. R. L. Case.
- 4963 **Martin's 10-inch Shell**, whole and in section. R. L. Case.
- 4964 **Specimens of the Original 8-inch Shells for Molten Iron**, submitted to the Ordnance Select Committee by Mr. Martin in April, 1857. No. 209 was fired in experiments at Shoeburyness against the section of a frigate, in which it was found unbroken with the hole downwards, and a portion of the metal had run over the deck, which it set on fire.

- 4965 Section of Martin's Original 8-inch Shell to contain Molten Iron.
- 4966 Case Shot for the 150-pr., 100-pr., 8-inch or 68-pr., 32-pr., 24-pr., 18-pr., 12-pr., 9-pr., and 6 pr. R. L. Case.
- 4967 Case Shot with Wood Bottoms for 68-pr., 56-pr., 8-inch gun, 42-pr., 32-pr., 32-pr. L. S. Howitzer, 24-pr., 24-pr. L. S. Howitzer, 24-pr., 24-pr. S. S. Howitzer, 18-pr., 12-pr., 12-pr. L. S. Howitzer, 12-pr. S. S. Howitzer, 9-pr., 6-pr., and 3-pr.
- 4968 Caffin's Grape or Tier Shot (5) for various calibres, 8-inch, 32-pr., and 24-pr.
- 4969 Caffin's Grape Shot for the 68-pr., 32-pr., 24-pr., 18-pr., 12-pr., 9-pr., and 6-pr. R. L. Case. 53 Sand Shot, of sizes from 4 lbs. to  $1\frac{1}{2}$  oz. R. L. Case.
- 4970 Lancaster, C. W., 1851, for 68-pr. Gun, Oval-bored Cast-iron Shells. Length, 18-in.; weight, 48 to 84 lbs. No. 519 has been fired.
- 4971 A Series of Objects illustrating the Manufactures of the Royal Laboratory. In one large case. 1862.
- 4972 Service Cartridges made up.
- 4973 Specimens of Wooden Fuzes.
- 4974 Armstrong Fuzes and Sections.
- 4975 Pettman Sea-service Percussion-fuze. Complete, in parts, and in section, before and after firing.
- 4976 Naval Flint-lock for Cannon, fixing to the vent-field by pins passing laterally through it.
- 4977 Naval Gun-lock for Percussion Tubes.
- 4978 Model of Proposed Percussion-hammer for Naval Service.
- 4979 Service Tubes, 1864.
- 4980 Old Pattern Naval Sights.
- 4981 Examples of Metal Tangent Scales in use, 1860, for smooth-bored ordnance, 32-pr., of 58 c. 9.5 ft.
- 4982 Examples of Naval Side Scales in use, 1860, 8-in., of 65 c. Marked B.O. 4\
- 4983 Gunner's Rule in Boxwood, giving the weights and principal dimensions of the guns and projectiles in use towards the end of the 17th century.
- 4984 Brass Model of a Naval 68-pr. Gun and Carriage, by J. Allen. Scale  $\frac{1}{8}$ .
- 4985 Section of a Ship's Side and Port, with a 24-pr. Gun (wood) mounted on its Carriage, the axletrees having friction balls to reduce the labour in traversing.
- 4986 A 24-pr. Gun (wood) mounted on its Carriage, with Ship's Port.
- 4987 Model of a 24-pr. Medium Gun of 7 ft. 6 in., or 15 calibres in length, as proposed by Sir W. Congreve for the arming of

4987—*continued.*

frigates; for which purpose 700 of these guns were cast during the Peninsular war.

4988 Two Carronades in Sections of a Ship's side.

4989 A Sea-service Mortar and Bed (wood); the bed is proposed of cast iron, and to revolve on iron shot. Designed and made by A. Wilson, R.M.A., 1827.

4990 Section of a First-rate Ship of War, with 8 brass guns mounted.

4991 Two Small Open Models of Ship Magazines.

4992 Naval Gunner's Storerooms.

4993 Mode of Fitting a Ship's Launch to receive an 8-inch Mortar for bombardment, by taking out the main thwart and laying a bag or bags well stuffed with hemp rubbish, in the bottom of the boat upon two or three loose planks placed over the flooring, and then lashing a small framed platform tight down upon these bags in the broadest part of the boat.

4994 Model of a Launch, showing the plan adopted by Sir W. Congreve for using the rockets in Basque Roads.

4995 Model of a Rocket Launch with Two Rocket Frames, as fitted under the direction of Sir W. Congreve for the expedition against Boulogne in 1805

4996 A Fire-ship.

4997 Block-ships for obstructing the entrance into harbours.

4998 Model of Carronade of Ship's Carriage, mounted in a Port.

4999 Model of an 8-inch 65 cwt. Gun (Brass), on a Rear-chock Carriage (Naval).

5000 Model of an 8-inch Gun on Slide.

5001 Case of Martini-Henry Ammunition, compact and representative.

5002 Print of Method of Laying and Firing Guns on board ship in last century.

5003 Photograph of a Disabled Gun.

5004 Case, containing 12 whole and 12 sections of Cartridges; 9 whole and 9 sections of Fuzes; 16 whole and 16 sections of Tubes, Electric and Friction; 7 whole Tubes and Detonators; a series of Flint-Locks for Guns; 5 Flint and Percussion Locks.

5005 Double Flint-lock.

5006 Specimens of Gunpowder, 28 in number.

5007 Do. Do. Field and Heavy Ordnance.

5008 Case of Boxer's Fuzes, Tube Lanyard, Tubes, and Detonators.

5009 Model of 10-inch Howitzer.

5010 Model of 13-inch Iron Sea-Service Mortar.

5011 Gun made from "Royal George."

- 5012 Section of Admiral Scott's Central Rifling, 1.  
 5012A Do. Do. 2.  
 5012B Do. Do. 3.
- 5013 Wood Section 64-pr. Shunt Gun and Projectile, 1864.
- 5014 Case, containing "Vavasseur's" 7-in. common shell, 3 grooves rifled, M.L. Gun; 7-in. common shell, B.L., 2 driving bands; 40-pr. common shell, B.L., after being fired; 40-pr. common shell, B.L., section of D; 3·12-pr. common shell, 3 grooves, for Rifled Guns.
- 5015 Section of 9-pr. B.L., 2 Driving Bands.
- 5016 12-pr. B.L., 3 Broad Driving Bands.
- 5017 12-pr. B.L., 3 Narrow Driving Bands.
- 5018 9-pr. Common Shell, after being fired.
- 5019 Section of 9-pr., 2 Driving Bands after being fired.
- 5020 13-inch Mortar Shell.
- 5021 Sections of 13-inch Mortar Shell.
- 5022 13-inch Carcase.
- 5023 Sections of 13-inch Carcase.
- 5024 6-pr. Shot.
- 5025 6-pr. Segment Shell.
- 5026 A 12-pr. Shot, Lead Coated and Ringed.
- 5027 Present Day Charge—1886—for 110-ton Gun.
- 5028 16-lb. Charge, the Largest used during the Russian War, 1854.
- 5029 A 5-pr. Gun on Carriage, and Part of Ship's Side, showing Port, &c.
- 5030 112-pr. Solid Shot.
- 5031 12-pr. Solid Shot.
- 5032 12-pr. Common Shell,  $3\frac{1}{2}$  diameters.
- 5033 12-pr. Common Shot.
- 5034 Section of Shell (Shrapnel), 2·85 diameters long.
- 5035 Section of Shell (common),  $3\frac{1}{2}$  diameters long.
- 5036 Steel Shell, 3 diameters long.
- 5037 Section of Common Shell, 5 diameters long.
- 5038 Common Case Shot, 2·95 diameters long.
- 5039 A Rifled Sphere Weight,  $3\frac{3}{4}$  lbs.
- 5040 Hale's War Rocket, fitted with Time and Percussion-Fuzed Shell.
- 5041 Cannon and Slide-Model (cannonade old pattern).
- 5042 Model of Lower Deck Gun and Gear, as fitted on board H.M.S. "Excellent," 1860.
- 5043 Model of Breech of Gun with Flint Lock.
- 5044 Wood Models of Guns and Mortars.
- 5045 Models of Charges for 9-pr. Armstrong B.L. Gun.

- 5046 Model of Charge for 12-pr. Armstrong B.L. Gun.
- 5047 Model of Palliser's 16-inch Shell, not studded.
- 5048 Model of Shot with Gas Check, 6·3-in. Com. Shell for Howitzer.
- 5049 Model of Shot with Gas Check.
- 5050 Model of 80-ton Gun, in two Sections (Wood).
- 5051 Model of 38-ton Gun, in two Sections (Wood).
- 5052 Model of 35-ton Gun, in two Sections (Wood).
- 5053 Model of 18-ton Gun.
- 5054 Model of 12-ton Gun.
- 5055 Model of 9-ton Gun.
- 5056 Model of 6½-ton Gun.
- 5057 Model of 45-ton Gun, Mark 5, in Sections (2).
- 5058 Model of 110-pr. Gun, Armstrong B.L.
- 5059 Model of Palliser Converted 64-pr.
- 5060 Model of 8-inch Naval Broadside Gun—9 tons.
- 5061 Model of Iron 95-cwt. Gun.
- 5062
- 5063 Section of 38-ton Gun.
- 5064 Section of 35-ton Gun.
- 5065 Section of 22-ton Gun.
- 5066 Wood Section of 7-inch Woolwich Gun and Projectile.
- 5067 Wood Section of Scott's Competition Gun.
- 5068 Wood Section of 9-inch Woolwich Gun.
- 5069 Wood Section of 7-inch French Gun.
- 5070 Wood Section of 9-inch Whitworth Gun.
- 5071 Hale's Rockets, 4-inch ; No. on Stand, 1.
- 5072 Hale's Rocket's, 4-inch ; No. on Stand, 2.
- 5073 Case containing 24-pr. Rocket and Section.
- 5074 Life Saving Rocket (Dummy), Port Fire and Stick.
- 5075 Long Light and Section, Signal Rocket and Section.
- 5076 Three Cases of Metal and Wood Time and Percussion Fuzes, &c., &c.
- 5077 Model Sledge used in Transporting Ship's Guns in 1854.
- 5078 Model of Ship's Gun with New Plan for Elevating and Depressing.
- 5079 Model of Improved Gun Carriage.
- 5080 Model of 24-pr. Gun on a Wooden Carriage.
- 5081 A Tube Box.
- 5082 Model of Gun fitted for Steam Ships of War.
- 5083 Wooden Model of Gun Carriage and Part of Ship's Side.

- 5084 Model of Shot for 12 $\frac{3}{4}$ -inch Gun (wood).
- 5085 Model of 600-pr. Shot (wood). Armstrong.
- 5086 Model of Scott's 10-inch 400 lb. Shell (wood).
- 5087 Model of Wooden Gun mounted on Carriage.
- 5088 Model of Nordenfelt Quick Firing Gun and Projectiles.
- 5089 Case of Ammunition for Hotchkiss 37<sup>m</sup>/m. Revolving Gun.
- 5090 Traversing Carriage and Gun.
- 5091 Specimen in the Rough, showing the Manufacture of Steel Shot for the Nordenfelt Gun.
- 5092 Plan of Apparatus for Saving Life in the event of Shipwreck.
- 5093 Manby's Rocket Apparatus for Saving Life from Shipwreck after Communication has been effected.
- 5094 Double Headed 38-pr. Shot fired from a Battery at Algiers, 1816, and lodged in the booms of H.M.S. "Superb."
- 5095 Iron Shot obtained from a fisherman, who hauled it up in his dredging net from the bottom of the sea in Sole-Bay, now called Southwold Bay. A relic of the great fight which took place there on the 28th May, 1672, when the English and French Fleets were commanded by the Duke of York. Afterwards, January 11th, Marshal De Etrees defeated the Dutch under the celebrated De Kuytzer.
- 5096 A Shot, which lodged in a basket at the Battle of Navarino, nestled itself among the things it contained, and rested there. It entered at one side of the basket, leaving the other side uninjured.
- 5097 Ship's Magazine, showing the method of stowing Cartridges in cases.

*From the Gun Wharf, Portsmouth.*

- 5098 Dutch Pikes.
- 5099 Pistols, Percussion, S. B. S. S.
- 5100 Rifle, Percussion, heavy Naval 1st Class.
- 5101 Rifle, Patt. 42, S. S.
- 5102 Axes, Boarding.
- 5103 Bayonet, Sword, Naval, fitted with scabbard spring.
- 5104 Boarding Pike, old pattern.
- 5105 Shot, Bar.
- 5106 Shot, Chain.
- 5107 Shot, Expanding, Elongated.
- 5108 Shot, Expanding, Star.
- 5109 Shot, Faggot.
- 5110 Shot, Grape.
- 5111 Shot, Canister.
- 5112 Old Shells (or Carcases).

- 5113 **Sword, Naval, and Scabbard** (American).
- 5114 **Torpedo or Mine Flint Clockwork**, O. P.
- 5115 **Swivel Guns**, brass, 1734, from Royal Yacht of that date.
- 5116 **Flintlock**, Muskets, Revenue Cutters.
- 5117 **Flintlock**, Locks for Carronades, English.
- 5118 **Flintlock**, Locks for Carronades, French.
- 5119 **Handlock** for Firing Cannon.
- 5120 **Old Piece** from "Acre."
- 5121 **Specimens of Old Coil Guns**. Long submerged.
- 5122 **Loading Tray** for red hot Shot.
- 5123 **Old Flintlock**, swivel pieces.
- 5124 **Old Flint Pistols**.
- 5125 **Shot** which fell into the boat manned by a crew from H.M.S. "Euryalus," in charge of Lieut. Johnson, at the bombardment of Kagosima, Japan, 15th August, 1863. The next shot fired from the forts killed Capt. Josling and Commander Wilmot, of the "Euryalus."  
*Lent by the widow of the late Admiral Johnson.*
- 5126 **Old Rocket Tube**.
- 5127 **Old Iron French Locks** for firing.
- 5128 **Old Relics from Wreck of Royal George**. A 32-pr. Gun and Carriage, &c.
- 
- 5129 **Robt. Mole & Sons**, *Granville Street, Birmingham*.  
Naval and other Swords. Midshipmen's Dirks. Cutlasses. Boarding Pikes. Sword Bayonets, &c.  
Presentation Sword, silver gilt, with national arms and emblems worked in enamel.
- 5130 **The Wilkinson Sword Company, Limited**, *27, Pall Mall, S.W.*  
Naval Swords, Cutlasses, Revolvers, and Accoutrements.
- 5131 **Charles Lancaster**, *151, New Bond Street, W.*  
Naval and Military Two and Four Barrel Breech-Loading Hammerless Pistols (Patent). Specially adapted for Service ammunition.
- 5132 **C. T. Guthrie**, *9, Ash Grove, Cricklewood, London*.  
Proposed Automatic Mounting for Heavy Guns.
- 5133 **The Haskett Smith Rangefinder Syndicate**, *11, Delahay Street, Westminster, S.W.*  
Rangefinders with short bases, to be used by one observer taking readings from each end of a trigonometrical base simultaneously (similarly to the way in which a sextant is read) and giving the readings in yards or otherwise without calculation. Also rangefinders for fortifications, for artillery, and infantry use.
- 5134 **John Rogerson & Co., Limited**, *Stanners Closes Steel Works, Wolsingham, Darlington*.  
9-pr. Rogerson-Downie Q. F. Guns (9-pr. and 6-pr.), and Ammunition for the same.

Gun Jackets for Q. F. Guns.

Common Shell in Cast and Forged Steel.

Saddle Crossheaded Girder, Cast Steel, for 5-inch Centre Pivot Mounting.

5135 The Maxim-Nordenfelt Gun and Ammunition Co., Limited,  
*Victoria Mansions, 32, Victoria Street, S.W.*

The 45-pr. Q.F. Gun, Mounted on the Naval Recoil Mounting.

Weight of gun, 2·5 tons; weight of mounting, 2 tons; length of gun (over all), 231 in.; calibre, 4·72 in. Velocity at muzzle, using ordinary powder, 2,200 f.s.; at 1,000 yds., 1,786 f.s.; at 2,000 yds., 1,459 f.s.; at 3,000 yds., 1,202 f.s. Perforation of wrought iron at muzzle, 10·4 in.; at 1,000 yds., 8·4 in.; at 2,000 yds., 6·9 in.

The 14-pr. Q.F. Gun, Mounted on Mark B Carriage.

Weight of gun, 18 cwt.; weight of mounting, 21 cwt.; length of gun (over all), 138 in.; calibre, 3 in. Velocity at muzzle, 2,100 f.s.; at 1,000 yds., 1,619 f.s.; at 2,000 yds., 1,255 f.s. Perforation of wrought iron at muzzle, 7 in.; at 1,000 yds., 5·4 in.; at 2,000 yds., 4·2 in.

The 14-pr. Automatic Q.F. Gun, Mounted on Recoil Carriage.

The particulars of this Gun, with respect to ballistics, &c., are identical with those of the 14-pr. Q.F. gun above.

The 6-pr. Q.F. Gun, Mounted on Mark B Recoil Carriage.

Weight of gun, 6 cwt. 3 qr.; weight of mounting, 9 cwt. 2 qr. 14 lb.; length of gun (over all), 110·4 in.; calibre, 2·24 in. Velocity at muzzle, 1,870 f.s.; at 1,000 yds., 1,296 f.s.; at 2,000 yds., 979 f.s. Perforation of wrought iron at muzzle, 4·75 in.; at 500 yds., 3·9 in.; at 1,000 yds., 3·2 in.

The 6-pr. Automatic Q.F. Gun.

The particulars of this Gun, with respect to ballistics, &c., are identical with those of the 6-pr. Q.F. Gun above.

The 3-pr. Gun, Mounted on Mark B Recoil Carriage.

Weight of gun, 4 cwt. 2 qr. 12 lbs.; weight of mounting (complete), 9 cwt. 3 qr.; length of gun (over all), 91·5 in.; calibre, 1·85 in. Velocity at muzzle, 1,920 f.s.; at 1,000 yds., 1,246 f.s.; at 2,000 yds., 922 f.s. Perforation of wrought iron at muzzle, 3·9 in.; at 500 yds., 3·2 in.; at 1,000 yds., 2·5 in.

The 3-pr. Automatic Q.F. Gun, on Recoil Carriage.

The particulars of this Gun, with respect to ballistics, &c., are identical with those of the 3-pr. Q.F. Gun above.

The 2½-pr. Q.F. Gun, Mounted on Mark E Carriage.

Weight of gun, 3 cwt. 0 qr. 10 lbs.; weight of mounting (complete), 4 cwt. 1 qr. 1 lb.; length of gun (over all), 76·2 in.; calibre, 1·65 in. Velocity at muzzle, 2,010 f.s.; at 1,000 yds., 1,263 f.s.; at 2,000 yds., 892 f.s. Perforation of wrought iron at muzzle, 3·8 in.; at 500 yds., 3 in.; at 1,000 yds., 2·4 in.

37-m/m (1½-inch) Maxim Automatic Machine Gun, Mounted on Naval Cone.

Weight of gun, 365 lbs.; weight of carriage (complete), 345 lbs.; weight of projectile, 1·46 lbs.; length of gun (over all), 53 in.

5135—*continued.*

velocity at muzzle, 1,319 f.s. ; at 500 yds., 950 f.s. ; at 1,000 yds., 782 f.s.

The Maxim Rifle Calibre Automatic Machine Gun, Mounted on Naval Cone.

Weight of gun, 50 lb. ; weight of mounting (complete), 1 cwt. 2 qr. 6 lbs. ; length of gun, according to pattern. Velocity, according to ammunition used.

**Note.**—This gun can be seen in action in the kiosk adjoining the Armstrong Gallery.

The Maxim Rifle Calibre Automatic Machine Gun, on Bulwark Mounting.

The carriage on which the Gun is mounted is the same as that used with the Naval Cone, the pivot being secured to a plate on the Bulwark.

The Maxim Rifle Calibre Automatic Machine Gun on Mast top Mounting, and Model of Mast top.

The 3-barrel Rifle Calibre Machine Gun on Naval Cone.

Weight of gun, 93 lbs. ; weight of mounting, 2 qr. 5 lbs.

A Small Disappearing Turret, with 6-pr. Gun mounted therein.

Specimens of Ammunition used by the various descriptions of Quick Firing Guns.

5136 The Life-saving Brigade, *Bridlington.*

Model of Life-Saving Apparatus.

Immediately adjoining the ST. VINCENT GALLERY is the

## ARMSTRONG GALLERY,

containing the EXHIBIT OF WARLIKE MATERIAL manufactured by SIR W. G. ARMSTRONG, MITCHELL, & Co., Limited, Elswick Works, Newcastle-on-Tyne.

This Exhibit is divided in Sections as follows:—

### SECTION I.

In this Section will be seen a **6-inch 5-ton Gun**, mounted on a hydro-pneumatic mounting, which is specially designed, and largely in use for coast defence purposes.

In this principle the gun, with its mounting, and the crew working the same, are concealed in a pit, the top of which is on the level of the surrounding country. The gun is loaded and laid (or aimed) in the pit, the last operation being carried out by means of reflecting mirrors, and when ready is allowed to rise above the pit (which it does automatically by means of the air which has been compressed in the cylinder by the recoil of the gun after the previous round). After firing, the influence of the recoil causes the gun immediately to descend again into the pit, leaving only the puff of smoke to direct the return fire against the gun.

Guns up to 68 tons weight, throwing projectiles of 1,250 lbs., have been mounted with success on this principle, which has been made the subject of most exhaustive experiments with a view to ascertaining what the effect of a ship's fire on such a system would be. In 1885 a model gun was mounted on a disappearing carriage in a pit at the extremity of Portland Bill, and H.M.S. "Hercules" fired over 150 rounds at it, and although the model was made of wood only, it went through the ordeal, coming up as if to deliver fire and then disappearing again, without the slightest injury.

The mounting on exhibit will be worked every day punctually at 3 and 6 p.m. If required to be worked at any other time a charge of 2s. 6d. will be made.

---

### SECTION II.

In this Section is shown a **3-pounder Hotchkiss Gun**, fitted with the Elswick electrically illuminated sights for night use. As these small quick-firing guns are specially designed and manufactured with a view to repelling the attacks of torpedo boats, which attacks would generally be made at night, the necessity of providing the gunner with a means of directing his fire by such "night sights" is apparent.

## SECTION III.

This Section contains an exhibit of **Quick-firing Guns**. It will perhaps be well to explain that in the ordinary system of breech-loading guns it is absolutely necessary to wash or sponge out the powder-chamber after each round, and thus a considerable time is occupied. Further delay in loading is occasioned by extracting and inserting a tube, or primer, each round, to ignite the powder charge; but in quick-firing guns both these causes of delay are got over by the use of a metal cartridge case which contains the priming tube. In 1886 the Armstrong firm designed and submitted to the Admiralty a quick-firing gun to fire a 36 lb. projectile. After trial, however, it was decided to increase the weight of the projectile to 45 lbs., and to adopt the gun as the principal armament of cruisers and small vessels. Since then 420 of these guns have been manufactured at Elswick for the Royal Navy alone. Further experiments, carried out by the Armstrong Firm, resulted in the production of large quick-firing guns of 6 inches in calibre, capable of firing a 120 lb. projectile, and also guns of smaller sizes suitable for the armament of torpedo boats, &c.

Specimens of each of these guns are here shown, and it may be of interest to state that the rate of firing from them may be taken to be as follows:—

|                                                                   |   |   |    |   |    |   |   |
|-------------------------------------------------------------------|---|---|----|---|----|---|---|
| 6-inch quick-firing gun, 100 lb. projectile, 6 rounds per minute. |   |   |    |   |    |   |   |
| 4'7                                                               | " | " | 45 | " | 12 | " | " |
| 3'75                                                              | " | " | 25 | " | 14 | " | " |
| 3                                                                 | " | " | 12 | " | 20 | " | " |

NOTE.—Cards giving the ballistic data of these guns can be obtained from the attendants.

*The guns shown in this Section are fitted with the "Morris Company Aiming Tubes," so that visitors can practice with the guns at a movable target, which is designed to a scale to represent a torpedo boat at 800 yards as she would appear while steaming at full speed at sea.*

## SECTION IV.

This Section represents the **Battery of a modern Ironclad**. It is now the invariable custom to supplement the main armament of large, turret or barbette, guns with a secondary battery of smaller guns, for which the quick-firing guns are particularly suitable. The guns shown in this exhibit are one 6-inch Q.F., three 4'7-inch Q.F., and two 6-pr. Hotchkiss. In the after part of the deck will be found the gun-room and a typical lieutenant's cabin, which have been furnished by the Army and Navy Co-operative Stores. The side lights used in the cabins are the invention of Mr. Mason.

## SECTION V.

Consists of the **Model Rooms**, above the ground floor, which contains a most complete exhibit of very highly-finished models of modern men-of-war. Prominent among them will be seen one of H.M.S. "Victoria," to a scale of one inch equals one foot. This model is probably the largest and most complete that has ever been constructed, and shows in the most minute detail every fitting on board that magnificent ironclad.

The torpedo nets on this model were made for the Exhibition by Bullivant & Co., the well-known makers of wire-rope, &c.

---

## SECTION VI.

The principal object here is a full-sized Section of the "**Victoria's**" **Turret**, in which is mounted a 110-ton gun on hydraulic carriage.

This gun fires a projectile of 1,800 lbs., and a powder charge of 960 lbs., and possesses an energy of 55,253 foot tons. The projectile and model of the charge, which is 9 feet in length, are also exhibited.

The machinery for working these monster guns is on exactly the same design as that for working guns of 68 tons or 43 tons, nor does it require more men to attend to it.

The armour of the "**Victoria**" turret consists of 17 inches steel-faced, and the weight of the entire turret, with its two guns, is about 900 tons.

---

## SECTION VII.

In this Section will be found a **9.2-inch B.-L. Gun** on Elswick (Vavasseur) centre-pivot mounting. These guns are so mounted in the bow and stern of nearly all our larger cruisers. It will be observed that the mounting is designed so that the ammunition can be brought from the magazine up a central tube, and thus the gun can be readily loaded at any angle of training.

On the floor in this Section will also be seen the **rough forgings of steel** from which a 6-inch Q.-F. gun is made; as well as projectiles of all natures, cartridge cases, and other materials of interest.

Outside the building a **Time Gun** is exhibited, which is made to fire automatically by electricity. The hours at which the gun is arranged to fire are 3 and 7 p.m., and the accuracy with which this is done by the combination of clockwork and electricity should be specially observed.

It only remains to be added that the building containing Messrs. **Armstrong's** exhibit is 230 feet in length  $\times$  45 feet in breadth, and was erected by Messrs. North & Son, of London Road.

---

# **PERKINS'** **PATENT** **STEAM OVENS**

For SHIPS, Bakeries, &c., &c.

---

THESE OVENS ARE EXTREMELY ECONOMICAL  
AND THOUSANDS ARE IN USE.

*FOR ESTIMATES & FURTHER PARTICULARS*

APPLY TO

**A. M. PERKINS & SON, LTD.,**

43, REGENT SQUARE, GRAY'S INN ROAD,  
LONDON, W.C.

Leaving the **ARMSTRONG GALLERY** at the end opposite to that at which he entered, the visitor will find himself facing the

## **CAMPERDOWN GALLERY,**

an imposing structure, 450 feet long  $\times$  50 feet wide. This Gallery contains:—

- (a) The Torpedo and Electrical Sub-Division of the Ordnance Section; followed lower down by the Exhibit of
  - (b) Materials used in Ship and Engine Construction and Armour Plates,
  - (c) Ships' Telegraphs (internal),
  - (d) Steam Capstans and Windlasses,
- the three latter being further Sub-Divisions of the Models Section of the Exhibition.

## **TORPEDO EXHIBIT.**

IN the arrangement of this most interesting Sub-Division, endeavour has been made to set clearly before the visitor the methods adopted and materials employed in the Science of what may be termed "Submarine Warfare," both for "Attack" and "Defence."

### **ATTACK.**

Under this heading may be considered the Whitehead Torpedo, the "Out-rigger" or "Spar" Torpedo, the system of Countermines, and the exercises known as "Creeping" and "Sweeping."

In connection with the "Whitehead," Mr. Whitehead's original surface Torpedo is kindly lent by the inventor, and represents the prelude to the locomotive Torpedo warfare adopted by our Service.

Different and distinct patterns of the Whitehead Torpedo, which may be fairly styled representative, are also to be seen, some of which are practically worked, as far as the engines and outside adjustments are concerned.

The stack of Torpedoes (Exhibit No. 5153) also contains the following:—

**The 16-inch Fiume Torpedo**, which was carried by such ships as the "Minotaur" and "Agincourt," and is one of the earliest types of Mr. Whitehead's invention.

**The 14-inch Berlin Torpedo**, the German copy of Mr. Whitehead's Mark I. Torpedo, with the exception that this one is made of Phosphor-bronze, a metal which has the advantage of not corroding in salt water, or oxidizing as is the case with steel or iron. The compound of this metal is kept secret.

**The Mark I. 14-inch Woolwich Torpedo**, the first attempt from our own arsenal, differing from the Fiume in the arrangement of the tail and

rudders. (Mr. Whitehead's secret is retained in all our Torpedoes, though worked out mechanically in a different way.)

**The Mark VIII. 14-inch Woolwich Torpedo,** the Torpedo of the day, as far as the 14-inch Torpedo is concerned. In this weapon is incorporated the improvements resulting from several years' labour and experiments made by the Arsenal Authorities assisted by our Naval Torpedo Schools. The outside is made of steel, as Phosphor-bronze is too soft for the work. The internal mechanism is, however, made of the latter metal, which does not necessitate the continual parting for cleaning purposes, so important in the early patterns.

It may be of interest to note, that although the idea in the construction of a Torpedo, is, no doubt, that it will be used once and once only in war time, yet in our ships so much practice with these weapons is carried out by a certain proportion of the supply, that a Torpedo is frequently "run" for exercise 500 or more times successfully.

**Methods of discharge.**—Various methods are adopted for discharging Torpedoes, above and below water. The propulsion is generated either by the explosion of a small charge of gunpowder, or by a volume of compressed air acting on the whole shell of the Torpedo from the rear of the discharging tube.

Examples of what is termed "Dropping Gear" and a "Torpedo Tube" of recent date are exhibited.

**The Outrigger Boat.**—A model representing this boat fitted for service is shown with the mining exhibits. The success of an attack by an Outrigger boat depends mainly upon :

- (a) The coolness and courage of the officer in command.
- (b) Suitable conditions of weather and non-discovery of the boat until close to the vessel to be attacked.
- (c) The explosion of the Torpedo at the proper moment.

Notwithstanding these difficulties in this particular form of attack, the Iron-clad ram "Albemarle" was destroyed by a Steam Launch fitted in this way. The "Housatonic" was in like manner destroyed, and other American war ships were seriously damaged by similar attacks. The object in attacking with this form of Torpedo is to approach the ship without being observed, and to explode the gun-cotton at the end of the pole in actual contact with the ship's side. The pole is of sufficient length to allow the charge to be exploded under water, and at such a distance from the attacking boat as to avoid the risk of any vital injury to her. During the Russo-Turkish war one vessel was sunk by the Outrigger Torpedo, and four unsuccessful attempts were made on Turkish ships ; and it is worthy of note that only one resulted in the loss of the attacking boat, and in neither of the other attempts were any lives lost. The value of the Outrigger as a weapon of attack should by no means be estimated by the number of ships destroyed, as the somewhat crude arrangements

formerly used have been considerably improved upon, and finally this mode of attack has compelled the adoption of such precautionary measures as seriously impeded the movements of exposed ships. In the Turkish war it was found necessary to completely surround the ships with chains; while in the Franco-German war, the presence of eight Outrigger Boats at the mouth of the Elbe compelled the French blockading squadron to weigh and proceed to sea every night.

The attack exercises of "**Creeping**" and "**Sweeping**" are here illustrated, and are, as a rule, precautionary measures:

**The Countermine Launch.**—Countermining is the completion of the process of attack, and means the explosion of a large number of heavily charged mine cases in the line of route to be taken by the ships of the squadron at the entrance of an enemy's harbour. The effect of these mines, simultaneously exploded, is to render useless the enemies' mines in the neighbourhood.

#### DEFENCE.

**Mining** is understood in our service to include all fixed explosions, whether of Gunpowder, Guncotton, Dynamite, or other explosives. It may be as well to here recall an instance of the power of a submarine explosion. In the case of the demolition of the steamer "Foyle," which ship was perfectly sound and strongly built (she was constructed of half-inch iron plates, rivetted and supported internally by angle irons at intervals of two feet throughout her entire length), an iron case, capable of containing 340 lbs. of powder, was loaded with 230 lbs. of Guncotton, in the form of compressed discs—a charge calculated as nearly equivalent to 1,000 lbs. of powder. It was fired under a head of water of 37 feet. The explosion was very different from that of powder, being much more sudden and violent; the engines weighing 300 tons were shifted bodily out of their place, the boilers were also moved, and the ship's side stove in very nearly to the stern. A Guncotton hose, or a hose packed with dynamite, has been known to crack the side of a ship as a huge axe might cut her. Guncotton and Gunpowder charges are sometimes used alternately, as the former has the effect of shattering without displacement, while the latter possesses great displacing power, with less intense local action.

Sections and full size Naval mines are shown in this sub-division, with the attachment chains and gear appertaining to them.

Mines are used in the service, both for the purpose of explosion at will, or in the event of a ship striking them. In the first case, the mines are often fired in numbers up to twelve, in line, simultaneously, by an observer; in the second case, only the mine that is struck would explode.

All service mines are packed with guncotton when in a "wet," and therefore comparatively safe, condition, the firing arrangement being carried out by a detonator and priming charge of "dry" guncotton.

Several obsolete types of mines are also shown, notably one which was

intended to take effect on a British ship during the Crimean war. Many of this kind of infernal machine were used in the American Civil war, which war was quite the most important, as far as the use and abuse of the Torpedo is concerned, that has hitherto occurred. The large number of vessels destroyed by Torpedo during this war, and the important part played by the mines in the defence of southern ports, turned the attention of all maritime nations to their use; and the Torpedo has been a recognised weapon, used in one form or another in every war between civilised nations that has since taken place. It is remarkable that their moral effect has been so great that comparatively few ships have ventured within the scope of their action. Submarine mines were used by the Danes for the defence of the Sound in 1864; by the Austrians for the defence of the ports of the Adriatic in 1866; by the Paraguayans in the defence of the Paraguay, and the Parana, against the Brazilians; and in the Franco-German and Russo-Turkish wars of 1871—72 and 1877—78 respectively, both submarine mines and torpedoes were used by the victors, and with such good effect that the fleets of their opponents were rendered almost useless.

Tanks, illustrative of the method adopted in the Navy of using mines, are shown, and make a very interesting feature. The models are made to convenient scales, which, although they must not be taken collectively as relative and proportional throughout, are so arranged that the several methods illustrated are represented by model work of the most convenient size.

The countermining tank is arranged for a line of mines such as are laid out practically; and in order to bring the method of laying out before the public, floating models of the boats required, to a smaller scale, are shown on the surface of the water.

The mining tank represents a mine field simply laid with "observation," "electro contact," and "mechanical" mines in their proper positions, and the bow of an ironclad will bring the idea of the passage into harbour clear to the uninitiated in torpedo work.

The "Attack and Defence" tank, as its name implies, is illustrative of the different means and arrangements for attack and defence.

The full rigged out defence model is a well designed piece of work, and the attacking boats are each very carefully made to scale, the whole forming a picture that clearly conveys the idea of torpedo warfare.

---

Many amusing Electrical exhibits are on view in this Sub Division which are either composed of mechanical toys with electricity as the motive power, or are the adoption of electrical apparatus familiar in the Torpedo Schools, set up in such a way as to form a compromise between instruction and amusement.

- 5146 Messrs. Grenfell & Accles, Limited, Perry Barr, Birmingham, and 7, Great St. Helen's, London, E.C.**

Accles' Machine Gun (10 barrels, 4·2 in. calibre), mounted on field carriage.

Accles' Machine Gun (10 barrels, 4·2 in. calibre), mounted on naval landing carriage.

Small Police Gatling Gun, mounted on tricycle.

Accles' Machine Gun (6 barrels), on wheelbarrow mounting.

Case of Assorted Ammunition for quick-firing guns and small arms.

Fuzes, cartridges and projectiles.

Two-and-a-half-ton Yaryan Marine Evaporator. Fifteen-ton Yaryan Marine Evaporator.

Machine for bending piping for marine and hydraulic gun mounting work.

Case of pistols.

Model gun, showing application of Grenfell's Electric night sights and Grenfell's day sights.

Drawing showing application of Grenfell's curved bar sighting system to turret mountings.

- 5147 The Morris Tube, Ammunition, and Safety Range Company, Limited, 11, Haymarket, London, S.W.**

Morris' '230 Aiming Tubes for '303 Magazine and other Service Rifles and Carbines.

Morris' 1-in, '450 and '230 Aiming Apparatus for B. L. Naval Guns. M. L. and Q. F. Guns.

Morris' Electric Firing Apparatus for B. L. and M. L. Guns.

Morris' Apparatus for 1-in. and other Machine Guns.

- 5148 Nobel's Explosives Company, Limited, 149, West George Street, Glasgow.**

*Dummy* models of explosives, such as Ballistite (Nobel's Smokeless Powder), Dynamite (Red and Black), Blasting Gelatine, Gelatine Dynamite, Gelignite; also, Detonators, Electric Detonator Fuzes, and Common Fuzes. Materials used in the manufacture (real or imitation, according to nature); Metal Blocks and Plates showing effect of explosives; Water Cartridges (Settle's Patent), and Coal Block with Water Cartridge in position; Battery for Electric Detonators; Electric Magazine lamp; Magazine appliances; Packing Cases and Packets showing method of packing explosives; Instructions and Cautions; Medals and Photographs; Model of Zalinski Dynamite Gun.

- 5149 The Chilworth Gunpowder Co., Limited, 55, Charing Cross, S.W. Mills—Chilworth, Surrey, and Fernilee, Derbyshire.**

Raw Materials for manufacture of Gunpowder.

Gunpowder in various stages of manufacture.

Samples of Blasting, Sporting, and Military Powder.

Prismatic Powder for Heavy Guns.

Smokeless Powder for Artillery and Military Rifles.

Methods of Packing Powder for transport, &c.

Cartridges for 110-Ton and other Guns, &c., &c.

- 5150 The Projectile Co., Limited, 54, Old Broad Street, E.C.**

Common, Shrapnel, Quick-firing, and Armour-piercing Shell made by the Company, together with forgings and other component parts thereof in various stages of manufacture.

**5151 Belliss & Co., Ledsam Street Works, Birmingham.**

Triple Air Compressor. One of a set of three Air Compressors to be supplied to H.M.S. "Royal Oak." This Compressor has been tested by running three hours against the full load of 1,800 lbs. air pressure, and supplies 10 cubic feet of air at this pressure in 19 minutes. The air from the compressor is passed into 6 tubular reservoirs, each having a capacity of 10 cubic feet, from which it is distributed by pipes to charging columns fixed at positions convenient to the torpedo firing stations.

One of three sets of Dynamo Machinery to be fitted to H.M.S. "Crescent." The engines are of Messrs. Belliss' patent single valve open type, with ball governor, and they drive a direct current self-regulating dynamo supplied by Messrs. Latimer, Clark, Muirhead & Co., capable of sustaining a current of 400 ampères, with an energy of 80 volts at the machine terminals when the engines are run at about 320 revolutions per minute.

One set of Dynamo Machinery of the same power as above, but consisting of a new pattern Dynamo made by Messrs. Siemens Bros. & Co., and driven by an open engine with valve gear worked off the connecting rod, similar to the machinery supplied for the electric lighting of H.M.S. "Royal Oak."

48" Centrifugal Pumps. Two sets of pumps similar to this are fitted to each of the new battle ships. They supply the necessary circulating water for the full power, 13,000 I.H.P., and are also capable of pumping 1,100 tons per hour from the bilge in an emergency.

*NOTE.—In addition to the above Exhibit by Messrs. Belliss & Co., one of their Double Air Compressors will be at work daily in the Armstrong Gallery, between 11.0 and 1.0 o'clock, to supply all the Compressed Air used in the Exhibition.*

**5152 Latimer Clark, Muirhead, & Co., Limited, 23, Regency Street, Westminster.**

"Westminster" Dynamo, Admiralty Pattern. Output 320 Revolutions, 80 volts, 400 ampères.

"Westminster" Dynamo, Commercial Pattern. Output 320 Revolutions, 80 volts, 400 ampères.

Farquharson and Lane's Patent Electrical Speed Indicators, specially designed for use on board ship, for indicating the number of Revolutions per minute at which an Engine is running.

Commander Lloyd's Patent Ship's Telegraphs for use on board ship for communicating from Bridge to Engine Room and Helmsman.

Searchlights.—Beams of light from Searchlight Projectors of the Admiralty Pattern will be thrown over the Grounds at various points after dusk. (*All the above can be seen in motion.*)

**5153 A stack of Torpedoes consisting of:—**

One 16-in. Fiumé Torpedo—speed, 9 knots; charge, 117 lbs. gun cotton.

One 14-in. Berlin Torpedo—speed, 23.5 knots; charge, 31 lbs. gun cotton.

One 14-in. (Mark I.) Woolwich Torpedo—speed, 18 knots; charge, 32 lbs. gun cotton.

One 14-in. (Mark VIII.) Woolwich Torpedo—speed, 26 knots; charge, 65 lbs. gun cotton.

**5153—continued.**

One 18-in. Fiumé Torpedo—speed, 28 knots; charge, 201 lbs. gun cotton.

One 14-in. (Mark IV.) Fiumé Torpedo—speed, 23 knots; charge, 58 lbs. gun cotton.

Complete with Manipulating Gear, Tools, &c.

*Lent by the Lords Commissioners of the Admiralty.*

**5154 Stove's Patent Diving Apparatus & Submarine Engineering Company, Limited.** 5, *Mansion House Chambers, 11, Queen Victoria Street, E.C.*

Stove's Patent Diving Helmets and Dresses.

Improved Air Pumps, Boots, Weights, Tubes, Submarine Electric Lamps, &c., &c.

**5155 Messrs. Siebe, Gorman & Co.,** 187, *Westminster Bridge Road, Lambeth, S.E.*

Diving Apparatus, "Royal Navy" pattern.

Submarine Electric Lamps, Batteries, Charges, and various Appliances used in Submarine operations.

Collection of Submarine Relics (of great value).

Patent Air-Pump for two Divers. Small Portable Diving Apparatus for Boat Service.

Patent Speaking Apparatus, also the Telephone Arrangement, to enable the Diver to converse with his Attendant.

**5156 Campbell & Schultz,** *Botolph House, Eastcheap, London, E.C.*

Spherical and Egg Shaped Patent Steel Buoys, used for Submarine Mining Operations for marking positions for mooring and other purposes.

Spherical Submarine Mine of ordinary pattern.

**5157 W. H. Allen & Co.,** *York Street Works, Lambeth, S.E.*

Dynamo, as used in the Royal Navy, capable of giving off 400 amperés, 80 volts at 320 revolutions a minute with 100 lbs. steam pressure, using only 33·7 lbs. of water per electrical h.p., intended for use in H.M. Ships "Barfleur" and "Centurion."

Fans and Engines, intended for forced draught on board H.M.S. "Gibraltar."

Motor and Fan, intended for forced draught in electrical installation.

Direct-acting Ordinary Engine for Dynamo for search light or for small installation on board ship.

**5158 Outrigger Torpedo.** Charge, 34 lbs. of gun cotton.

This charge is fired in contact with the side of a ship, the boat endeavouring to approach unobserved.

**5159 Launch Rigged for Countermining.**

This boat carries 12 mines, of 500 lbs. gun cotton each, to be laid out rapidly and fired simultaneously.

*Lent by the Lords Commissioners of the Admiralty.*

**5160 Whitehead Surface Torpedo.**

*Lent by Mr. Whitehead.*

**5161 The Results of Torpedo Practice.** Wires destroyed, etc.

To illustrate the destructive power of small charges of Gun Cotton.

**5162 Models in a Tank,** to illustrate the methods of attack and defence.

**5163 A Launch**, rigged for Countermining, on a small scale, with towing boat.

*Models showing a line of countermines when laid out.*

**5164 A Model** in a tank, to show the benefit of a lightning conductor at sea.

**5165 Tank** exhibiting models of Mines as they are laid out. This is intended to include the method of laying Mines with different firing arrangements in relative positions to each other when arranged for the defence of a harbour.

*Lent by the Lords Commissioners of the Admiralty.*

**5166 Siebe, Gorman & Co., 187, Westminster Bridge Road, London, S.E.**

**Diving Tank** with Glass Panels, in which the Divers will work twice daily. Also a Diver working with the Oxygen Dress without the aid of the Air-Pump. The Submarine Electric Light will also be used.

*NOTE.—Visitors will be permitted to descend in the Tank upon payment of a Fee of £2 2s., which will be given to the general Fund of the Exhibition.*

**5167 Several Models and Electrical Toys.**

These Models and Toys are worked by a small battery of accumulator cells, exhibited by Messrs. Drake and Gorham. (See No. 5169.)

*Lent by different makers, and by the Torpedo Schools.*

**5168 Torpedo Discharging Apparatus** (Mark VII. B).

*Lent by the Lords Commissioners of the Admiralty.*

**5169 Messrs. Drake & Gorham, 2, Prince's Mansions, S.W.**

Electric Storage Batteries, improved D.P. pattern, in glass boxes. These cells are made on the Planté principle, the peroxide of spongy lead being produced by electric formation from the lead itself. The formation process is extremely rapid and inexpensive as compared with the reversal process of Planté.

**5170 Mining Apparatus** for Torpedo work. Specimens of the principal mines, tools, and gear appertaining thereto.

*Lent by the Lords Commissioners of the Admiralty.*

**5171 The General Electric Power and Traction Company, Limited, 35, New Broad Street, E.C.**

Compound Engine and Dynamo, with Electric Lamps for use on board ship.

High Speed Propellers for Electric Launches.

“Immesch” Electric Motors for use in Launches.

Launch Switches for running full and half speed, ahead and astern.

**5172 A Whitehead Torpedo** taken to pieces, and every detail shown except the “secret” chamber.

**5173 Tools** for Whitehead manipulation.

*Lent by the Lords Commissioners of the Admiralty.*

- 5174 **Lieut. E. F. A. Gaunt, R.N., H.M.S. "Belleisle."**  
A Mechanical Time Fuze dependent upon the rotary motion of the Projectile.
- 5175 **W. Corrigall, 27, Sterndale Road, West Kensington Park, London, W.**  
Improved Gun Mounting.
- 5176 **The Cotton Powder Company, Limited, 116, Queen Victoria Street, London, E.C.**  
Patent Socket Signals for Signalling and Distress Purposes. Ship's Day and Night Signals. Royal National Life-Boat Signals. Torpedoes, Electric Fuzes, Electric Batteries, and all appliances for Submarine Mining, Blasting, and Destroying Wrecks, &c.
- 5177 **G. Kynoch & Co., Limited, Lion Works, Wilton, Birmingham.**  
Military and Sporting Ammunition and other appliances for use with Rifle and Revolver, Fog Signals, &c.
- 5178 **C. E. Kelway, 71, Shardeloes Road, New Cross, London, S.E.**  
Kelway's Non-penetrative Naval Projectile for explosion below the water line against the unarmoured portion of a ship.  
Kelway's Electric Shell Fuze. Brought into operation by the conductivity of salt water on touching the same.  
Kelway's Electric Log and Naval Range-finder for recording the distance run, &c.  
Kelway's Yelemeter and Position-Finder for the mechanical solution of problems in plane trigonometry.  
Kelway's Range-Finding Watch for measuring the time interval between the flash and report of a gun, and its distance from the observer.  
Kelway's Improved Cannon (Model of).  
Kelway's Storage Battery.  
Kelway's Combined Dynamo and Electro-motor.  
Kelway's Combined Sounder and Fire-Alarm for giving indication of the presence of fire, or of ingress of salt water into a ship's compartments.  
Kelway's Improved Ship (Model of).  
Kelway's System of Applying Power to Ships (shown in the above Model).  
Kelway's Combined Sea Anchor and Oil Distributor or Wave Subduer.  
Kelway's Electric Marine-Engine Governor.  
Mills's Non-explosive Copper Boiler.
- 5179 **Curtis & Harvey, 74, Lombard Street, London, E.C.**  
Naval and Military Gunpowders and their ingredients.
- 5180 **Pigou, Wilks, & Laurence, Limited, London and Dartford.**  
Dummy samples of various Naval, Military, and other Gunpowders.
- 5181 **Planet Electrical Engineering Company, Limited, 4, Victoria Mansions, Westminster.**  
"Planet" Arc Lamp, and "Planet" Marine Automatic Search Lamp (Shepard's Patent), taking 75 to 100 amp., the carbons fed by an electric motor.

**5182 The India-Rubber, Gutta Percha, & Telegraph Works Co., Limited, Silvertown, Essex.**

Case containing samples of Electric Armoured Cables for use with Submarine Mines.

Unarmoured Insulated Cables for Telegraph, Gun, and Torpedo Circuits.

Lead Covered Electric Light Cables as used on board H.M. War Ships.

**5183 Models in Glass Tank** illustrating the principle of laying down a mine field.

**5184 A Model Mine** which is exploded when "bumped" by the model ironclad.

This exhibit is manipulated, and readily assists an observer to form an idea of the method known as "Electro Contact" Mining.

*Lent by the Lords Commissioners of the Admiralty.*

**5185 L. Bristol, 138, Loughborough Park, London, S.W.**

Portable Electric Safety Lamps and Batteries.

**5186 A Launch (Model)** fitted to lay out Electro Mechanical Mines.

These mines are carried differently to the ordinary method, inasmuch as the internal fittings and gearing are different, the idea being that when each individual mine is dropped, it is complete in itself as a "trap" for the luckless ship coming into contact with it.

**5187 Mining Gear** which has been destroyed by attack exercises, shewing the effect of a small charge of gun cotton.

**5188 A Chronograph** in working order and used to indicate "Personal Error."

An amusing electrical toy recording the interval of time which elapses between the receipt by an individual of an intimation by means of the eye, and the actual carrying out of an action, intended to be instantaneous, with the hand, such as in pressing an electrical key or firing a gun, etc.

It is worthy of note that many of the best shots find the hints gleaned from this "toy" of great use to them.

**5189 A Model** showing a boat rigged for laying out Electro Contact Mines

These mines carry about 80 lbs. of gun cotton and are fired on a ship coming into contact with them. They are generally laid out in groups.

*Lent by the Lords Commissioners of the Admiralty.*

**5190 An Electrical Money Box.** A money collecting toy, the proceeds from which are in aid of the Charities in connection with the Exhibition.

*Lent by Torpedo Schools.*

**5191 Sadler & Co., Three Oak Lane, Horsleydown, S.E.**

A Diver fully equipped. A Set of 3-throw Air Pumps (for deep water). A Set of Single-throw Double-action Air Pumps (for shallow water). A Diver's Helmet, shewing the Exhibitors' method of attaching Dress to Helmet; and other Diving Appurtenances.

- 5193** Details in connection with the Electric Light on board ship, *i.e.*, the instruments used and electrical arrangements for Search and Incandescent Lighting, apart from the actual dynamo and projector, which may be seen elsewhere.
- 5194** Naval Service Batteries. These are electrical batteries used in the Service for mining purposes. The action and principles of testing, etc., are shown. *Lent by the Lords Commissioners of the Admiralty.*
- 5195** A small bath, showing the system of Electro-plating. *Lent by the Torpedo Schools.*
- 5196** Mining details. Resistance coils, test coils, and other instruments used in connection with batteries and mines. *Lent by the Lords Commissioners of the Admiralty.*
- 5197** Greenwood & Batley, Limited, *Albion Works, Leeds.*  
14-in. (Mark VII.\*) Woolwich Torpedo—speed, 26 knots; charge, 65 lbs. gun cotton.  
14 in. Bronze Torpedo, Greenwood & Batley Pattern.  
Machine Tools, Samples of Ammunition in various stages of manufacture.
- 5198** Telegraphic and other Naval Service Electrical Instruments. Many instruments other than these, used in our battle-ships, are shown in connection with the other exhibits. *Lent by the Lords Commissioners of the Admiralty.*
- 5199** The Original Whitehead Torpedo. *Lent by Mr. Whitehead.*
- 5200** Clarke Chapman & Co., *Victoria Works, Gateshead-on-Tyne.*  
Slow speed direct driven Dynamo and Engine for 150 16-candle power lamps at 65 volts, running at 250 revolutions per minute.  
Admiralty Projector, complete, on stand.  
Turbo-Electric Generator for 20 16-candle power lamps at 65 volts.  
Switch Boards for one, two, and three circuits respectively.  
Sunbeam Incandescent Cargo Lamp of 300-candle power. Sundry Lamps, Electric Light Fittings, &c.
- 5201** Ronald A. Scott, M. Inst. E.E., M.R.I., &c., *Acton Hill, London, W.*  
Dynamos, Motors, Search Light Projectors, and General Electrical Appliances.  
Search-light on the top of the Grand Stand. This light has an intensity of about 27,000 candle power, and the peculiarity of the bolt of light thrown is its perfect parallelism and pure whiteness of character. The mirror by which this result is obtained is the invention of the Exhibitor. The mirror used with this light is of 24 in. diameter.
- 5202** Hadfield's Steel Foundry Company, Limited, *Hecla Works, Sheffield.*  
Cast Steel Common Shell from 4 in. to 12 in. diameter.  
Armour Piercing Projectiles from 3 in. to 13.5 in. diameter.  
A Group of Armour Piercing Projectiles 6 in. diameter, each of which has been fired at a Compound Armour Plate 9 in. thick, which they have penetrated, also passing through several feet of Oak used as backing behind the Armour Plate.

**5202—continued.**

Compound Armour Plate, 9 in. thick, penetrated by one of the 6 in. Armour Piercing Projectiles exhibited.

Drawings and Photographs of Shot and Shell.

Samples of Steel used in the manufacture of Shot and Shell, and test bars of same, showing results of mechanical tests.

**5203 Major P. T. Godsall, Eton.**

Military Rifle, with "Godsall" Rifle Action.

END OF ORDNANCE SECTION.

# YACHT BUILDING. **FLEMING & FERGUSON,** SHIPBUILDERS AND ENGINEERS, PAISLEY, NEAR GLASGOW.

Builders of every description and size of Steam Yachts.

Yachts fitted with the Builders' Patent **QUADRUPLE EXPANSION ENGINES**, having four cylinders on one level, two cranks directly *opposite* each other, giving perfectly balanced Engine, with action equal to four right angle cranks in line; work noiselessly, and give greatest economy in space, coal, and upkeep.

## MODELS SECTION.

## SUB-DIVISION—MATERIALS USED IN SHIP AND ENGINE CONSTRUCTION AND ARMOUR PLATES.

- 5221 T. & W. Ide**, *Glasshouse Fields, Ratcliff.*  
Lenses, Dioptric and Plain; Anchor, Electric Light, and other Globes; Lamp Chimnies and Glasses; Illuminators and Glass for Cabin and Lighthouse purposes.
- 5222 Davis & Timmins, Limited**, 24, *Charles Street, Hatton Garden, London, E. C.*  
Metal Screws, Terminals, Connections, Electrical Fittings, and turned parts for Torpedo, Electric Light, and Engineers. Cut from straight bright drawn solid metal rods.  
British Association Standard Screw Gauges and Tools.
- 5223 G. J. Thompson**, 23, *Brunswick Street, Poplar, E.*  
Portable G. M. Fire Engines, with Suction and Delivery Hoses, Unions, Branch Pipes, &c.  
Side and Masthead Lights, Cabin and Saloon Lamps, and other articles used in ship and engine construction.
- 5224 Ridley & Co.**, *Swalwell Steel Works, Newcastle-on-Tyne.*  
Castings and Forgings in Steel and Iron for Marine, Engine, Ship, Hydraulic, and Ordnance requirements.  
Results of Tests, &c.
- 5225 The Caledonian Tube Company**, *Coatbridge, near Glasgow.*  
Steel Boiler and Stay Tubes, also Compressor Tubes for the propulsion of Torpedoes, with the tests applied to same during process of manufacture.
- 5226 Thomas Noakes & Sons**, 35 & 37, *Brick Lane, Whitechapel, E.*  
Gun Metal, Phosphor Bronze, and Cast Iron Engine and Boiler Fittings for High Pressure Marine and Locomotive Engines and Boilers.
- 5227 James Walker & Co.**, 4, *America Square, Minories, London, E. C.*  
Patent "Lion" Metallic Packing and Jointing for High Pressure Steam and Marine Engine Glands, &c.
- 5228 J. Stone & Co.**, *Deptford, London. S.E.*  
Patent "Navy" Pumps, Portable Fire Engines and Deck and Lift Pumps.  
Patent Side Scuttles, Deck and Cabin Ventilators, and other fittings.  
McKirdy's Patent Port-hole Lights.  
Patent Cabinet and Metallic Fold-up Lavatories. Patent "Navy" and "Floating Palace" Water Closets, &c.  
Reply and Mechanical Engine-room Telegraphs, Steering Gear, &c.  
Electric Search Light Projectors (Admiralty pattern).  
Stone's Patent Bronze Propellers, and other Castings. "Navy" White Bronze for Lining-up Bearings. Fittings for Torpedo Boats, Life Boats, &c.

- 5229 John Hind, Junr., 8, Ulster Chambers, Belfast.**  
Rowan's Patent Piston-rings and Springs as applied to Solid Block Pistons in Locomotive, Land, and Marine Engines.
- 5230 Baxter Brothers & Co., Dens Works, Dundee.**  
Sailcloth, Duck, Twines, Coal Sackings, Tarpaulins, and Linen and Hemp Goods used in the Royal Navy.
- 5231 T. Westhorp & Co., 67, West India Dock Road, E.**  
Oakum, Machine-Picked and Machine-Spun, manufactured from specially selected Government Rope.
- 5232 John Unite, 291 & 293, Edgware Road, London, W.**  
Canvas, Cordage, Tarpaulins, Life Buoys, and Flags. Wool Tilting Lining as supplied for Arctic Exploration.
- 5233 Francis Webster & Sons, Alma Works, Arbroath.**  
Specimens of Admiralty Sail Cloth, "Standard" Canvas, Ship Tarpaulins, Sailmakers' Twine.
- 5234 Wm. Cooke & Co., Limited, Tinsley Steel, Iron & Wire Works, Sheffield.**  
Steel Wire Hawasers, Cables, and Rope. Standing and Running Rigging. Gun Wire, &c.
- 5235 John Shaw, Yorkshire Wire Rope & Fencing Works, Sheffield.**  
Patent Steel-Wire Hawasers, Cables, and Ropes. Copper Rope and Cords, Lightning Conductors, &c. Hawser Reels, Thimbles, and Patent Slip and Releasing Hooks.
- 5236 Richards & Co., Bradford Works, Aberdeen, N.B.**  
Linen and Jute Yarns; Seaming and Roping Twines; Sail Canvas; Bleached Sail Canvas; Tan Canvas; Seamen's Bag Canvas; Tent Canvas; Staying Canvas; Navy Duck; Osnaburg; Bed Sheeting; Palliasses; Bed Cases; Pillow Cases; Arm Chair Covers; Haversacks (Black and White); Sea Kit-Bags; Ammunition Bags; Flax Sheeting; Hose Pipe for Fire Brigades and Deck Washing; Table Cloths; Dice Tabling; Towels; Towelling; Huckaback; Tarpaulins and Hessen.
- 5237 William L. Boase & Co., Flax, Hemp, and Jute Spinners and Manufacturers, Dundee and London.**  
Specimens of Sail Canvas, Hammock Cloth, Coal Sack Cloth, Tent Duck, Canvas for Awnings, Sheetings, Wagon Cover Canvas, Flax Seaming Twines, Hemp Twines, &c.
- 5238 W. E. Corrigan, 27, Sterndale Road, West Kensington Park, London, W.**  
Corrugated Boiler Tubes.
- 5239 The Whitecross Co., Limited, Warrington.**  
Wire, Iron, and Steel Ropes for Ships' Rigging, Hawasers, and other purposes.

- 5240 Brooks & Hawkes, 75, Hurst Street, Birmingham.**  
Ship and Boat Fittings, in Brass, Electro, and Nickel Plate. Shipping Tackle; Block Bushes; Ships' Bolts, Nails, and Rivets in Metal and Galvanised Iron.
- 5242 The Credenda Seamless Steel Tube Co., Limited, Smethwick, Birmingham.**  
Specimens of the Credenda Patent Seamless Steel Tube, Cold Drawn.
- 5243 Leeds Forge Company, Limited, Leeds.**  
Fox's Corrugated Furnaces, fitted to a flanged steel Marine Boiler front-plate, made by the Leeds Forge Co., Limited, for H.M.S. "Royal Oak," the Furnaces flanged at Combustion Chamber end for separate fireboxes.  
Hydraulic press flanged steel plates, forming Combustion Chamber, front and back, for Marine boilers of H.M.S. "Scout" class, made at one heat.  
New Section Corrugated Furnace, with wide pitched corrugations.  
Weldless Steel Manhole Frames, made from solid steel plate.  
Fox's Corrugated Boiler Furnace, of type supplied for vessels of H.M.S. "Barfleur" and "Centurion" classes.
- 5244 David Colville & Sons, Dalzell Steel & Iron Works, Motherwell, Scotland.**  
Rolled Steel Plates and Bars, with cold bent samples of the same; also raw materials used in its manufacture.  
Photographs of some of the Departments of the Works.
- 5245 Charles Cammell & Co., Limited, Cyclops Steel and Iron Works, Sheffield.**  
Armour Plates, Tested and Untested and Armour Plate Fastenings.  
Marine Forgings, Ordnance Forgings, Shells, Projectiles, &c.
- 5246 The Steel Company of Scotland, Limited, 23, Royal Exchange Square, Glasgow.**  
A Trophy, consisting of specimens of Boiler, Ship and Bridge Plates; Angles, Tees, Beams, and other Sections; Rails for Permanent Way and Tramways; Steel Castings and Forgings; Forged Couplings for shafting; Stamped Links and Pins for large Pitch Chains; Bars; Flanged, Stamped, and Welded Boiler Plates; Welded Steel Tubes; Eye Bar Blanks for Suspension Bridges; Girder Boom Plates, with varying thickness; Raw Material used in Steel Making; Samples, Test Pieces, and collapsed Boiler Flue, showing ductility and strength of Siemens' Steel.  
Special collection of Plates.  
Samples, Test Pieces, &c., of Nickel Steel.  
Wright's Patent Improved Self-Canting Martin's Anchor, &c.
- 5247 Matthew Keenan, Armagh Works, Tredegar Road, Bow, E.**  
Patent Non-conducting Vegetable Pulp for covering Steam Boilers, Pipes, and Marine Engines.
- 5248 The Delta Metal Company, Limited, 110, Cannon Street, London, E.C.**  
A collection of various articles, showing the application of "Delta" Alloys for Marine, Engineering, and other work.  
Légé Torpedo constructed entirely of Delta Metal.

- 5249 W. S. Laycock, Victoria Street Works, Sheffield.**  
 Patent Balance Blind Roller for Ships' Cabins and Saloons.  
 Patent Torpedo Ventilator for ditto.
- 5250 John Brown & Co., Limited, Atlas Steel and Iron Works, Sheffield.**  
 Portion of the Armour of a Battle Ship's Barbette (full size).  
 Section through side of the "Warrior," the earliest Ironclad (full size).  
 Section through side of the "Resolution," now under construction (full size).  
 Marine Crank Shaft.  
 Wood Model of Complete Barbette Armour.  
 Specimen of Armour after Firing Test.  
 Armour Bolts, Cups, and Washers. Purve's Patent Ribbed Boiler Flue. Serve's Patent Ribbed Tubes for Multitubular Boilers. Flanged Boiler Front. Steel Propeller Blade. Model of Van Ollefen's Patent Water-tight Compartment Door.
- 5251 J. O. Day & Co., Church Row, Limehouse, London.**  
 Sample Plates, showing application, &c., of Day's Patent Enamel-Cements as a substitute for Portland and other Cements for the Bilges, &c., of Vessels.  
 Day's Patent Metallic Composition Paints for the prevention of Fouling on Ships' Bottoms, &c. Day's Anti-Corrosive and Enamel Paints, Varnishes, &c.
- 5252 William Alfred Hurst, 123, Boyson Road, Camberwell, S.E.**  
 Metallic Paints for General Decorative Purposes.
- 5253 The Economic Chemical Company, Grimsby.**  
 Anti-Corrosive and Anti-Fouling Compositions. Anti-Rust for Inside Plates, &c. "Scale Cure" Boiler Composition. Economic Disinfectant.  
 An iron plate, coated with anti-fouling composition, which has been submerged for several months.
- 5254 The Patent Lead & Zinc White Co., Chatham Street, Grosvenor Street, Camberwell, S.E.**  
 Large Half-Model of Boat painted with Patent Non-Poisonous White Lead.  
 Model of Part Underside of Deck with Cabin Doors, &c., painted with Patent Condensed Zinc White.
- 5255 Holzapfels Compositions Company, Limited, 57, Fenchurch Street.**  
 Models of Ships coated with Anti-Corrosive and Anti-Fouling Compositions. Samples of Anti-Corrosive Compositions. Specimens of Fouling Matter. Showcards relating to Anti-Fouling Compositions.
- 5256 Light Asphaltic Cement Syndicate, Limited, 158, Leadenhall Street, London, E.C.**  
 Section of Vessel showing Cement in position. Raw materials and finished specimens of cement.
- 5257 Suter Hartmann & Rathjen's Composition Co., Limited, 18, Billiter Street, London, E.C.**  
 Hartmann & Rathjen's Anti-Corrosive and Anti-Fouling Compositions for Ships' Bottoms.

- 5258 Sim's Ships' Compositions Company, Limited, 12A, Pratt Street, Lambeth, S.E.**  
Iron Drums, containing Protective and Anti-Fouling Composition for Ships' Bottoms. Iron Drums, containing Enamel Paints for Interiors and Exteriors. Wood, Iron, and Steel Painted or Coated with above Compositions and Paints.
- 5259 Jesty & Co., Gosport.**  
Patent Anti-Fouling Composition for the Prevention of the Growth of Weeds, &c., on Ships' Bottoms:
- 5260 Steven & Struthers, Glasgow.**  
Model of Bronze Sternposts as supplied for H.M. Ships "Pique," "Rainbow," "Retribution," "Indefatigable," "Intrepid," and "Iphigenia."  
Steam Fog Signalling Apparatus for Lighthouses, &c.; also combinations of Syrens and Organ Pipe Whistles for signalling on Steamers.  
Photographs.
- 5261 Alexander Dick, 110, Cannon Street, London, E.C.**  
Delta Metal Solid and Compound Propeller Blades.
- 5262 G. & J. Weir, Holm Foundry, Cathcart, near Glasgow.**  
Weir's Patent Evaporator. Feed Water Heater. Feed Pumps. Automatic Control Gear for Feed Pumps. Combination Feed Check Valves. Feed Pump Valves. Steam Admission Valve for Evaporator. Safety Valve. Hydrokineter.
- 5263 Engelbert & Co., 44-47, Bishopsgate Without, London, E.C.**  
High-class Anti-Corrosive Lubricating Oils, for Marine Engines and Electric Light Installations.
- 5264 Woodite Company, Limited, Delahay Street, Westminster, S.W.**  
*Woodite Works—Mitcham Common, Surrey.*  
Double Life Boat. Single Life or Scout Boat. Mechanically Propelled Life Boat. (In glass cases.)  
Model of Ship Protected with Woodite. Model of Landing Stage Protected with Woodite.  
Woodite Target and Blocks after 6 rounds from Nordenfelt 6-pounder. Specimens of Woodite Buoyant. Sponge Cable; Anti-Torpedo Cable; Diving Dresses; Collapsible Boat; and various articles made from Woodite and Whaleite.
- 5265 Wm. Beardmore & Co., Parkhead Forge Rolling Mills & Steel Works, Glasgow.**  
Triple-throw Hollow Crank Shaft,  $15\frac{3}{4}$  in. diameter by 30 ft. 1 in., for H.M.S. "Crescent" (Siemens' Steel).  
Connecting Rod, as taken from the "City of Paris" ss. after the breakdown of her engines.  
Flanged Plates, and other articles manufactured in Siemens' Steel.
- 5266 Vickers' Sons & Co., Limited, River Don Works, Sheffield.**  
Models of two Armour Plates. Small Gun. Crank Axle.

## MODELS SECTION.

## SUB-DIVISION—SHIPS' TELEGRAPHS (INTERNAL).

- 5267 Chadburn & Son, 105, Fenchurch Street, London.**  
Chadburn & Son's Patent "Duplex Gong" Telegraphs and Mechanical Telltales.  
Electric Light System of Telegraphs.  
Engine Counters. Electric Bells, Shutter Indicators and Voice Pipes.
- 5268 Louis Casartelli, 20, Duke Street, Liverpool.**  
Engine, Steering, Docking, Look-Out, and Torpedo Boat Telegraphs.
- 5269 Marine and General Automatic Company, Limited, 6, Great St. Helen's, E. C.**  
Electrical Audible Indicator for Ship's Engine Room, Steering, and other Telegraphs.
-

## MODELS SECTION.

## SUB-DIVISION—STEAM CAPSTANS AND WINDLASSES.

- 5270 Brown, Lenox & Co., Millwall, London, E.**  
Full size Model of a 5-ton Inglefield & Lenox Patent Anchor, as used in the Royal Navy.  
Samples of Chain Iron manufactured by exhibitors specially for Admiralty Cables.  
Samples of Admiralty Cable and Chain used for different purposes.  
Lenox's Patent Iron Blocks and Sheaves.  
Mooring Screw, Submarine Telegraph Grapnels, Rope Fittings, &c.  
Case containing Models of Anchors.
- 5271 Messrs. Harfield & Co., Mansion House Buildings, London, E.C.**  
Patent Compensating Steering Gear, fitted with a pendulum weight of  $1\frac{1}{4}$  tons, illustrating, as the tiller is moved over, a gain of power fully equal to the increased strains which come upon a rudder in actual practice.  
Ordinary Right and Left-handed Screw Steering Gear.  
Various Models of Anchor Gear, including Capstans, Windlasses, Riding Bitts and Stoppers, for working chains and ropes, as fitted in the principal ships of the English and Foreign Navies.
- 5272 The Improved Martin's Anchor Company, Limited, 5, Adelphi Terrace, Strand, London, W.C.**  
A 115 cwt. Improved Martin's Patent Anchor, being one of those ordered for H.M. Battleships now in course of construction. Exhibited by permission of the Lords Commissioners of the Admiralty.  
A model of the bows of one of H.M. Ships fitted with Improved Martin's Anchors.
- 5273 Jesse Billingham & Son, 14, St. Mary Axe, E.C.**  
Chain Cables, Anchors, Rigging and Crane Chains and Shipping Tackle.
- 5274 Hunter & English, 202, Bow Road, London, E.**  
Model of 50 ton Crane "Leviathan."
- 5275 Henry Wood & Co., 38 & 40, Queen Street, Liverpool.**  
Mooring Swivel on Sir Thomas Hardy's plan. Swivel Piece to connect Anchor to Cable. Senhouse Slip. Clear Hawse Slip. Blake's Stopper for Riding Bitts. Samples of Cable. Samples of Cable tested to destruction. Samples of Crane and Incline Chains. Samples of Trinity Chain for Light Ships.

Along the front of the CAMPERDOWN GALLERY is the

## CAMPERDOWN VERANDAH,

wherein the following Firms exhibit :—

- 5276 N. Hingley & Sons, Limited, Netherton Iron Works, Dudley, and 76, King William Street, London, E.C.**

Samples of Cable Iron, &c., used in the manufacture of chains.  
Samples of chains, &c.

- 5277 Priestman, Bros., Limited, 73a, Queen Victoria Street, London, E.C.**  
Five H.P. Oil Engine. Working Model of the Priestman Dredger;  
Excavator, and Elevator.

- 5278 Crossley Brothers, Limited, 10, St. Bride Street, Ludgate Circus, E.C.**

Crossley's "Otto" Gas Engine and Air Compressor for working patent pneumatic tool for boiler caulking, &c.

- 5279 J. H. Richards & Co., Westminster Chambers, Corporation Street, Birmingham.**

Samples of Machinery showing application of Richards' Plastic Metal.

- 5280 Kerbey Bowen, Ray Mead Works, Maidenhead-on-Thames.**  
Electric Pinnacle.

- 5281 Sir Elkanah Armitage & Sons, Limited, 48, Mosley Street, Manchester.**

Specimens of Sail Cloth and Duck.

- 5282 Lilleshall Company, Limited, 12, Lime Street, Fenchurch Street, London, E.C.**

Specimens of Chain and Cable Iron, as used in making chains and chain-cables for the Royal Navy and the Mercantile Marine, showing the various tests applied.

Samples of all the raw materials used in making such iron.

- 5283 Zocus Paint Co., 4, Fenchurch Avenue, London, E.C.**

Half Model of Steamship, having bottom painted with "Zocus" Antifouling Paint.

Half Model of Sailing Ship, having bottom painted with "Zocus" Antifouling Paint.

Iron plates coated with the three compositions manufactured by the Company, viz. :—No. 1. "Anti-corrosive." No. 2. "Anti-fouling." B.T. "Boottopping."

- 5284 The Fowler-Waring Cables Co., Limited, North Woolwich, E., and Victoria Mansions, 32, Victoria Street, S.W.**

Insulated Wires and Cables for all classes of Electrical Work.

Lead-covered Underground Cables for Central Station Distribution.

Armoured Cables for Torpedo, Underground and Submarine Applications.

Anti-Induction Telephone and Low Capacity Telegraph and Telephone Cables.

5284—*continued.*

Wires for General Electric Light Installations, and Lead-covered  
Wires for Ship-lighting, Mines, and Special Applications.  
Specimen Joints, Distributing and Terminal Boxes, &c.

5285 "Star" Patent Fuel Co., Limited, *Cardiff.*

Blocks of "Star" Fuel made from the best Welsh Steam Coal on  
Heath's Patent Dry Heat Process.

5286 Crown Preserved Coal Co., Limited, *Bute Docks, Cardiff.*

Crown Patent Fuel.

5287 The Atlantic Patent Fuel Co., Limited, *North Dock, Swansea, South Wales.*

Blocks of Patent Fuel (Briquettes).

5288 The Cortex Calorifuge Co., Limited, *Offices, 3, Talbot Chambers, Fenwick Street, Liverpool.*

Cork Strips for wrapping round curved and straight steam pipes to  
prevent loss of steam by radiation. Cork Slabs for covering steam  
boilers (patented).

5289 Marshall & Thunder, 121, *Fenchurch Street, E.C.*

Marshall & Thunder's Patent Metallic Spring Packings for Piston  
and other Rods requiring packing.

Double Grip Chain Stoppers for Ships' Cables.

Patent Lock Nuts.

Patent Ventilating Fans for Ship and other uses.

5290 Melsom & Griffin, 9, *London Street, Fenchurch Street, E.C.*

Patent high-pressure semi-metallic steam and pump packings and  
indestructible jointing material. In transverse and longitudinal sections,  
showing the disposal of the metal and fibre.

5291 Lacombe & Co., 7, *Carteret Street, Westminster.*

Lighthouse Carbons, as supplied for Lighthouses.

Arc Light Carbons, as used by the Royal Navy.

Search Light Carbons for Projectors.

Disc Carbons for Disc Arc Lamps.

Extra Low Voltage Carbons for burning in two lamps in series on a  
100 volt circuit.

Fluted Carbons, as used for Lighthouses and Search Lights.

Lacombe's Patent Central Zinc Manganese Cell, for ringing call bells,  
working indicators, &c.

Carbon Brushes, for Dynamos and Motors.

5292 Boulton Bros. & Co., 38A, *King William Street, London, E.C.*

"Valvoline," Mineral Lubricating Oils, manufactured by a patented  
process, in various grades suitable for all classes of machinery. (Used  
in the Electric Light Department of this Exhibition.)

Sight-Feed Lubricators, suitable for Cylinders and Bearings of  
Marine and Land Engines.

Eucalyptus Boiler Fluid. A scale destroyer and preventative used in  
counteracting the injurious effects of acids in waters used in Steam  
Boilers.

5292—*continued.*

Dickenson's Patent Main Steam Pipe Water Extractor. An appliance for separating water passing over or condensing in Steam Pipes, and delivering same automatically back into the Boilers. (At work in the Engine Room of the Electric Installation of this Exhibition.)

Asbestos Packing in sizes for Piston, Slide and other rods, and in sheets and putty for Boiler and other joints subjected to high pressure.

**5293 Woodhouse & Rawson United, Limited, 88, Queen Victoria Street, London, E.C.**

Pair Compound Launch Engines. Steering Appliances. An Electric Winch. Model New Projector. New Accumulator. Model Launches. Marine Electric Lighting and Bell Fittings. Signalling Lanterns and Instruments.

**5294 H. Middleton, 3, Wellesley Villas, Wellington Street, Slough.**

Models of Submarine and Submergeable Ships.

**5295 Pulsometer Engineering Co., Limited, 61 & 63, Queen Victoria Street, E.C.**

Holmes' Patent "Siren" Fog-horn, with all latest improvements. This apparatus gives a uniform and distinct note of any required pitch, and the sound can be directed in any direction.

One Vertical Duplex Boiler Feeding Pump, with gun-metal pump end for 160 lbs. pressure.

One Pulsometer Steam Pump capable of pumping 6,000 gallons per hour from ballast tanks, bilges, &c.

**5296 Ridsdale & Co., 54, Minories, London.**

Ships' Lamps.

**5298 Simpson, Strickland & Co., Dartmouth and Teddington.**

Kingdon's Patent Quadruple Expansion Surface Condensing Engine and Patent Vertical Boiler. Nominal H.P., 2; indicated H.P. in constant work, 10; weight, 8 cwts.; natural draught, coal consumption, 15 lbs. per hour.

**5299 Davis & Co., Limited, Garford Street, Poplar, London, E.**

Davis' Patent Rotary Engine, driving Capell's patent forced draught fan.

**5300 A. G. Mumford, Culver Street Iron Works, Colchester, Essex, and 52, Queen Victoria Street, London, E.C.**

Improved Steam Donkey Boiler Feed Pumps.

Patent Vertical Duplex Steam Pump, 6 in. and 4 in.  $\times$  6 in. stroke.

Patent Horizontal Duplex Steam Pump, 6 in. and 4 in.  $\times$  6 in. stroke.

Patent Vertical "Economic" Steam Pump.

Patent Launch Engine and Boiler.

Of the Galleries of the Exhibition, there now only remains to be inspected the one set apart for machinery in motion ; this is situated in the south-west corner of the grounds, and is designated the

## MACHINERY GALLERY.

- 5311 **John Kirkcaldy, Limited, 40, West India Dock Road, London, E.**  
Fresh Water Distillers (Simple). Multiple Fresh Water Distilling Plant. Condenser, distiller, and pumps combined in one machine. Feed Make-up Evaporator for supplying boilers with pure fresh water. Combined Surface Condenser Feed Make-up and Feed Water Heater, as supplied to telegraph steamers "John Pender" and "Sherard Osborne." Constant Pressure Reducing Valve. Feed Water Heaters. Dirt Arrester.  
Drawings, illustrating the whole of the above in detail.
- 5312 **Caird & Rayner, 777, Commercial Road, Limehouse, London, E.**  
Rayner's Patent Automatic Evaporator and Feed Heater, for producing Fresh Auxiliary Feed Water and Heating the Feed for Marine Boilers.  
Patent "Live Steam" Feed Water Heaters, for use with Condensing Engines.  
Patent "Exhaust Steam" Feed Water Heaters, for use with Non-condensing Engines.  
Patent Simple Distillers.  
Patent Multiple Distillers.  
Patent Fresh Water Condensers, for High and Low Pressures of Steam.
- 5313 **Normandy's Patent Marine Aërated Fresh Water Co., Limited, Opposite Custom House Station, Victoria Dock Road, E.**  
Normandy's Patent Double Distillers for Ironclads and other ships.  
" " " " for Torpedo Boats.  
Normandy's Patent Evaporators, complete with Triple Steam Pumps and Single Distiller.  
Drawings of Normandy's Patent Complete Distilling Machinery for Naval Land Stations.

Telegrams—"Megavolt, London.

Telephone 3125.

Central Stations: 370, Holloway Road, N., & Sloane Square, S.W.

EVERY ELECTRICAL NECESSITY FROM DYNAMO TO LAMP  
SUPPLIED AND ERECTED ON THE SHORTEST NOTICE.

**SHARP & KENT,**  
ENGINEERS, ELECTRICIANS, & CONTRACTORS.

## THE ELECTRIC LIGHTING PLANT.

THE long narrow building adjoining the Embankment, in which the Lighting Plant is contained, is divided into two parts, viz., the Engine and Dynamo Room, and the Boiler Room.

The Engine and Dynamo Room measures 68 ft. by 29 ft., including the portions devoted to visitors. The part railed off for machinery, measures 48 ft. by 21 ft., and within this space are placed Engines and Dynamos collectively of over 1,100 h.p.

The Engines, as well as the steam and exhaust pipes, and the large ventilating fan driven by a separate engine, are supplied by Messrs. Willans & Robinson, Limited, of Thames Ditton, and the Dynamos by Messrs. Siemens Brothers & Co., Limited, of London, the combined plant being coupled together and erected in place by Messrs. Willans & Robinson. The Dynamos (except in one case) are carried upon bed-plates, which form an extension of the engine frame.

The cables connecting the Dynamos with the Switch-board, and the Switch-board itself, which is placed on the west side of the Engine-room, are supplied and fixed by Messrs. Siemens Bros. & Co.

The Engines are divided into two groups. The group at the south end occupies a space of 28 ft. by 21 ft., and includes three large Direct-driving Compound Engines, indicating 300 h.p. each. With the exception of a similar engine (also with a Siemens' Dynamo), which has been running for the past year in the Electric Light Station of the Corporation of Bradford, in Yorkshire, these engines are believed to be the largest direct-coupled high-speed engines in existence, and they represent the latest Central-station practice in this country; in fact, these three engines and dynamos (with six of the boilers in the Boiler-house) in themselves represent the plant of a Lighting Station of some magnitude, able, if worked together, to supply current for 8,000 or 9,000 lights of 16 candle-power each.

The Engines are of the kind known as Willans' Patent Central-Valve Engines ("I.I.I. size"): they are single-acting, and run at 350 revolutions per minute. All the brasses and bearings are in "constant thrust" (*i.e.*, there is no alternation of stresses, as in double-acting engines) and the wearing surfaces are either immersed in, or are continually bathed with, oil.

The entire absence of belts is a striking feature of the Engine-room, and its result is a saving of space, as well as in freedom from noise, will attract the notice of the visitor accustomed to the Electric Light Departments of former Exhibitions. The present installation in fact constitutes the first public exhibition of direct-driving plant upon a large scale, although similar (but smaller) engines have been supplied for central Lighting Stations in England to the extent of 20,000 h.p.

The Dynamos are of Messrs. Siemens' "H.B." pattern. At 350 revolutions per minute they each give an ordinary output of 1,500 ampères and 120 volts (180 kilowatts). The "commercial efficiency" is about 94 per cent. at full load. The "combined efficiency" of the Engine and Dynamo, treated as one machine, is about 86 per cent. at full load—*i.e.*, the Electrical h.p. given off at the terminals of the machines is not less than 86 per cent. of the h.p. indicated in the cylinders of the Engine. The consumption of steam per i.h.p. per hour (the Engines at the Exhibition being non-condensing, and working at 120 lbs. pressure) is slightly over 20 lbs., corresponding with a consumption of  $23\frac{1}{4}$  lbs. per Electrical h.p. per hour. Similar engines, condensing, working with steam at 160 lbs. pressure, require 14 lbs. of steam per i.h.p. per hour, or (with the same combined efficiency) a little over  $16\frac{1}{4}$  lbs. per Electrical h.p.

The three Engines and Dynamos forming the other group are of smaller size. That at the corner represents the combination of Willans' Central-Valve Engines with Siemens' "H.B." Dynamos, such as have been supplied in large numbers to Her Majesty's Ships. The output of the largest size used in the Navy (as for instance in the new first-class cruisers "Blake" and "Blenheim") is 400 ampères and 80 volts, at 400 revolutions per minute; but the Dynamo now shown (with the same Engine, "G.G." size) is rather larger, and runs faster, and is able to give 400 ampères and 120 volts, the latter voltage being more useful for the purposes of the Exhibition than that used in the Navy. In other respects this set is practically a duplicate of many used in the Navy; in fact, the 300 h.p. sets described above are merely larger examples of the same pattern.

Another set in this group represents the single-acting "Open Engines" supplied to the Navy under recent specifications, by the same makers. The "Latona," and other new cruisers of the same class, are fitted with engines of this description. The Dynamo is of Messrs. Siemens' usual pattern.

The remaining Engine (of the Central-Valve pattern, "G.G." size) drives one of Messrs. Siemens' Alternating-Current Dynamos, giving 40 kilowatts, for maintaining the arc light on the Lighthouse.

There is also shown a central station engine-room switchboard, with all necessary controlling and regulating switches, cut-outs, meters, and measuring instruments, together with Transformer for 50,000 volts.

**The Boiler-house** measures 60 ft. by 29 ft., and contains ten steel locomotive boilers of the well-known make of Messrs. Davy, Paxman, & Co., of Colchester. They supply steam to the Electric Lighting Engine, as well as to other machinery in motion in the adjoining shed.

These Boilers contain more than 7,000 square feet of heating surface, and are capable of evaporating over 30,000 lbs. of water per hour; they are self-con-

tained, made for a working pressure of 140 lbs. per square inch, and tested to 250 lbs. per square inch. A steel Steam Receiver runs the entire length of the boilers, connected to each by a separate stop valve, so that either or any of the boilers can be immediately shut off, if necessary. The object of the Receiver is to give dry steam to the engines, and to turn back to the boilers any condensed steam.

The Pumps for feeding the Boilers are provided by Mr. A. G. Mumford, of Colchester, and the Injectors are of Messrs. Gresham & Craven's manufacture.

The distribution of the current from the terminals of the machines, including the wiring and actual lighting of the entire Exhibition, is in the hands of Messrs. Siemens Bros. & Co., Limited.

The feeding mains and most of the distributing mains are of Siemens' lead cased and iron sheathed type, laid underground.

The public lighting is effected by means of 140 arc lamps of new type.

In various parts of the Exhibition will be shown motors worked by electrical energy.

## KIOSKS.

In order not to interrupt the systematic tour of the Exhibition Galleries, the attention of the Visitor has not hitherto been drawn to the smaller buildings erected in various positions about the grounds. From this, however, it must not be inferred that the Exhibits contained in these buildings are of less importance than those which are located in the Main Galleries. On the contrary, the Exhibits in question are of the highest importance and interest, and it is on this account, in many instances, added to the fact of there being insufficient space in the Galleries, that these special structures have been erected. Mention should also be made of the fact that in each case the buildings themselves have been erected at the cost of the Exhibitors.

Starting from the Machinery Gallery, the Visitor should now retrace his steps, and visit the various Kiosks as they occur *en route*, viz. :—

### 5320 The Peninsular and Oriental Steam Navigation Company.

This kiosk is designed in a characteristic Oriental style, and is of wood, brick, and plaster. The principal entrance is formed by a large *verandah* leading directly into the body of the pavilion, a spacious apartment containing models to a scale of  $\frac{1}{4}$ -inch to the foot, of four of the principal ships of the “P. and O.” fleet. These models are placed on tables radiating towards the centre of the room, where, on an elevated pedestal is a model of “The William Fawcett,” the first ship possessed by the Company. This model, being to the same scale as that of the larger ships surrounding it, serves to illustrate the gigantic strides made in ship-building since the foundation of the Company, some fifty years since. At a distance of about eight feet from the floor, the room takes the form of an octagon, forming eight panels, four of which illustrate the great epoch of Maritime History :—

*The I. Century*—“Cæsarean Galleys.”

*The X. Century*—(Period of warlike adventures) “The Vikings.”

*The XV. Century*—(Period of discovery) “The Caravels of Columbus.”

*The XVIII. Century*—(England’s Naval supremacy) “‘A Three-Decker,’ and Frigates.”

the other four being illustrative of shipping in various parts of the world, the East being shown by “Eastern Junks, and Canoes.” The North by “Vessels of Discovery in the Arctic Seas.” The South by “Prahus and Canoes of the Southern Archipelago.” And the West by “Vessels of the ‘P. and O.’ fleet off Gibraltar.” On the right is a long room in which is placed a map of the route from London to India, China, and Australia, to a large scale, and on which will be placed tiny models of the vessels *en route*, the exact position of which will, as nearly as possible, be indicated day by day. On the left is a similar room containing a model of the Suez Canal. At the end of these rooms are two cabins fitted exactly as on board ship. The smoking room, which is intended for one of the ships now being built for the Company, is approached from the dome, and its decorations are an entirely new

5320—continued.

departure: the walls and ceilings being designed by Mr. T. G. Colcutt. The mode of colouring and modelling used have not hitherto been attempted. The manufacturers are Messrs. Doulton & Co. The seats, tables, and doors, are in Spanish mahogany, relieved by rich hangings and upholstery. On the walls of the different rooms are hung photographs and pictures of scenes of special interest to those who have made a voyage on an eastward bound vessel.

### CONTENTS OF THE "P. & O." KIOSK.

The Smoking Room and two of the Cabins of the Company's new steamers "Himalaya," and "Australia," 7,000 tons, and 10,000 horse-power, now being built by Messrs. Caird & Co., of Greenock.

A Chart of the Lines of Communication carried on by the steamers of the Company, indicating the position of vessels *en route* day to day.

Models of the following steamers on a scale of  $\frac{1}{4}$ -inch to the foot.

| Name of Steamer.                         |     |     |     | When built. | Tonnage. | Horse-power. |
|------------------------------------------|-----|-----|-----|-------------|----------|--------------|

Pictures:—

No. 1. s.s. "Hindustan," leaving Southampton to open the Indian Mail Service, August, 1842.

No. 2. s.s. "Kipon," leaving Southampton with troops for the Crimea, 1854.

No. 3. s.s. "Carthage," employed as a troop-ship during the Egyptian Campaign, 1885.

No. 4. ss. "Victoria," and s.s. "Rome," at the Naval Review, 1887.

Pictures of several other steamers of the Company's fleet, and of places of interest at ports of call.

Model of the Refrigerating Chamber of one of the Company's steamers, for the preservation of fresh provisions for the voyage.

Engraving of the Side Lever Engines of the paddle steamer "Iberia," built in 1837, and of the Triple Expansion Engines of the s.s. "Victoria," built in 1887; representing fifty years progress in marine engines constructed for the "P. & O." Company.

A Model of the Suez Canal, kindly lent for the occasion by the Suez Canal Company.

5321 The Thames Iron Works and Shipbuilding Company, Limited, Orchard Yard, Blackwall.

### MODELS OF SOME OF THE PRINCIPAL VESSELS AND WORKS CONSTRUCTED BY THE COMPANY.

(i.) Full-rigged Model of H.M.S. "Warrior" (1861). Scale,  $\frac{1}{4}$  in. = one foot.

(ii.) Full-rigged Model of H.M.S. "Blenheim" (now completing). Scale,  $\frac{1}{4}$  in. = one foot.

## 5321—continued.

- (iii.) Full-rigged Model of H.M.S. "Sans Pareil" (1887). Scale,  $\frac{1}{8}$  in. = one foot.
- (iv.) Full-rigged Model of H.M.S. "Benbow" (1885). Scale,  $\frac{1}{8}$  in. = one foot.
- (v.) Full-rigged Model of H.M. Ships "Grafton" and "Theseus" (now building). Scale,  $\frac{1}{8}$  in. = one foot.
- (vi.) Full-rigged Model of Portuguese Armour-clad "Vasco da Gama" (1875). Scale,  $\frac{1}{8}$  in. = one foot.
- (vii.) Full-rigged Model of Greek Gun-boats "Hydra" and "Spetzia" (1881). Scale,  $\frac{1}{4}$  in. = one foot.
- (viii.) Full-rigged Model of Spanish Yacht, designed for His late Majesty Alfonso XII., King of Spain (1875). Scale,  $\frac{1}{8}$  in. = one foot.
- (ix.) Full-rigged Model of Roumanian Cruisers "Oltul," "Siretul," and "Bistrita" (1888). Scale,  $\frac{1}{4}$  in. = one foot.
- (x.) Model of River Tug "Benbow" (1885). Scale,  $\frac{1}{2}$  in. = one foot.
- (xi.) Model of Thames Dredger "Diver" (1885) showing Williams' Patent Ladder-Hoisting Gear. Scale,  $\frac{1}{4}$  in. = one foot.
- (xii.) Model of Mid-ship Section of H.M.S. "Warrior" (1861). Scale,  $\frac{1}{2}$  in. = one foot.
- (xiii.) Model of Mid-ship Section of H.M.S. "Benbow" (1885). Scale,  $\frac{1}{2}$  in. = one foot.
- (xiv.) Greek Armour-clad "King George" (1867). Scale,  $\frac{1}{4}$  in. = one foot.
- (xv.) Turkish Armour-clad "Ævni Illah" (1869). Scale,  $\frac{1}{4}$  in. = one foot.
- (xvi.) Battery of Armour-clad "King George" (1867), Patented. Scale,  $\frac{1}{2}$  in. = one foot.
- (xvii.) Stern of H.M.S. "Blenheim" (1890). Scale,  $\frac{1}{2}$  in. = one foot.
- (xviii.) Bow of H.M.S. "Blenheim" (1890). Scale,  $\frac{1}{2}$  in. = one foot.
- (xix.) Stern of Transport "Vulcan," showing stern frame built up of plates and angles before the introduction of heavy forgings by the Nasmyth Hammer (1849). Scale,  $\frac{1}{2}$  in. = one foot.
- (xx.) Bow of Transport "Vulcan" (1849). Scale,  $\frac{1}{2}$  in. = one foot.
- (xxi.) Model of Royal Yacht "Fairy," built for Her Majesty in 1845. Scale,  $\frac{1}{4}$  in. = one foot.
- (xxii.) Model of Thames Tugs "Ajax" and "Trojan" (1877). Scale,  $\frac{1}{2}$  in. = one foot.
- (xxiii.) Model of London, Chatham, and Dover Boat "Princess Frederick William" (1857). Scale,  $\frac{1}{4}$  in. = one foot.
- (xxiv.) Model of Thames Steamer "Venus" (1854). Scale,  $\frac{1}{4}$  in. = one foot.
- (xxv.) Model of Russian Paddle Sloop "Vladimir" (1848), which played an important part in the Crimean War of 1853—5. Scale,  $\frac{1}{4}$  in. = one foot.

5321—continued.

## HALF MODELS IN SHOW CASES.

*English and Foreign Vessels.*

- (i.) H.M.S. "Blenheim" (1890).
- (ii.) H.M.S. "Benbow" (1885).
- (iii.) H.M.S. "Superb" and Turkish Frigate "Mesoudiye" (1877).
- (iv.) German Frigate "König Wilhelm" (1868).
- (v.) Spanish Frigate "Victoria" (1867).
- (vi.) Russian Battery "Pervenetz" (1863).
- (vii.) Portuguese Cruiser "Affonso-Albuquerque" (1884).
- (viii.) Portuguese Armour Clad "Vasco da Gama" (1875).
- (ix.) Spanish Cruisers "Gravina" and "Velasco" (1881).
- (x.) H.M. Ships "Swift" and "Linnet" (1880).
- (xi.) German Torpedo Cruiser "Zieten" (1879).

## HALF MODELS OF EXPRESS SERVICE VESSELS.

- (i.) Dover Mail Steamer "Invicta" (1882).
- (ii.) Dover Mail Steamers "Queen" and "Empress" (1854).
- (iii.) Opium Trade Vessel "Ly-ee-Moon" (1859).
- (iv.) Dover Mail Vessel "John Penn" (1860).
- (v.) P. & O. Paddle Steamer "Nyanza" (1864).
- (vi.) P. & O. Screw Steamer "Tanjore" (1865).
- (vii.) Turkish Yacht "Izzeddin" (1864).
- (viii.) Argentine Paddle Tug (1888).
- (ix.) Brazilian Troop Vessel "Purus" (1874).
- (x.) Bosphorous Paddle Steamer (1890).
- (xi.) Brampoetra Paddle Steamer (1883).
- (xii.) P. & O. Screw Steamer "Nepaul" (1858).
- (xiii.) P. & O. Screw Steamer "Poonah" (1862).

## FROM THE DRY DOCK AND ENGINE SHOPS.

- (i.) Model Woolwich Ferry and Approaches.
- (ii.) Model Royal Albert Dock Gates.
- (iii.) Model Royal Aquarium Roof.
- (iv.) Model Goldsmith Hall Roof.
- (v.) Model Beckton Retort House Roof.
- (vi.) Model New Blackfriars Railway Bridge.
- (vii.) Model Barry Dock Gates.
- (viii.) Model Rolling Mills, Engine, Boiler, &c.
- (x.) Model Hone's Patent Ship.

**5322 Royal Mail Steam Packet Company, 18, Moorgate Street, London, E.C.**

Ships' Models, Fittings, Appliances, &c.

- (i.) Full-rigged Model of Royal Mail Steam Packet Company's steamer "Orinoco," 4,434 tons, now employed in the conveyance of Her Majesty's Mails to and from the West Indies.
- (ii.) Moving drawings of Engines of Royal Mail Steam Packet Company's steamer "Orinoco," 5,863 horse power.
- (iii.) Full-rigged Model of Royal Mail Steam Packet Company's steamer "Clyde," 5,645 tons, 7,010 horse power, now employed in the conveyance of Her Majesty's Mails to and from Brazil and River Plate.
- (iv.) Half Model on larger scale of Royal Mail Steam Packet Company's steamers "Thames" and "Clyde," 5,645 tons, 7,010 horse power.
- (v.) Full size Model of First Class Cabin of Royal Mail Steam Packet Company's steamers.
- (vi.) Picture of Royal Mail Steam Packet Company's steamer "Tagus" at Royal Naval Review, held on the occasion of Her Majesty's Jubilee.
- (vii.) Instantaneous Photograph of Royal Mail Steam Packet Company's steamer "Clyde," 5,645 tons, 7,010 horse power, at full speed on the Clyde.
- (viii.) Diploma of Honour awarded to Royal Mail Steam Packet Company at Paris Exhibition of 1889.
- (ix.) Photographs of West Indies and Brazils.
- (x.) Models of Disengaging Gear, Life Saving Appliances, &c., used by the Royal Mail Steam Packet Company.

**5323 James and George Thomson, Limited, Clydebank.**

Full Model of H.M.S. "Ramillies." 1st Class Battleship presently building for the British Government. Length, 380 ft.; breadth, 75 ft.; displacement, 14,300 tons; armament, four 67-ton B.L. Guns mounted in redoubts, ten 6-in. and 25 smaller Q.F. Guns. Thickness of belt armour amidships 18 in., of redoubts 17 in., of belt deck 3 in. Speed,  $17\frac{1}{2}$  knots; I.H.P., 13,000.

Full Model of H.M.S. "Scout." Twin Screw 3rd Class Cruiser, built in 1884-'85 for the British Government. Length, 220 ft.; breadth, 34 ft.; displacement, 1,470 tons; armament, four 5-in. B.L. Guns, ten Q.F. and Machine Guns, and seven Torpedo Tubes. Speed, 17 knots; I.H.P., 3,500.

Full Model of H.M. Ships "Terpsichore," "Thetis," and "Tribune." 2nd Class Protected Cruisers presently building for the British Government. Length, 300 ft.; breadth, 43 ft.; displacement, 3,400 tons; armament, two 6-in. B.L. Guns, six 4.71-in. and 13 smaller Q.F. Guns and four Torpedo Tubes. Speed, 20 knots; I.H.P., 9,000.

Full Model of Royal Spanish Torpedo Gunboat "El Destructor." Designed and built in 1886 for the Spanish Government. Length, 193 ft.; breadth, 25 ft.; displacement, 380 tons; armament, one 10-c/m B.L. Gun, six Q.F. and Machine Guns, two Torpedo Tubes. Speed,  $22\frac{1}{2}$  knots; I.H.P., 3,800.

## 5323—continued.

Full Model of Royal Spanish Cruiser "Reina Regente." Designed and built in 1886 for the Spanish Government. Length, 320 ft. ; breadth, 51 ft. ; displacement, 5,600 tons ; armament, four 24-c/m. and six 12-c/m. B.L. Guns, fourteen Q.F. and Machine Guns, four Torpedo Tubes. Speed, 20½ knots ; I.H.P., 12,000.

Full Model of Twin Screw Steamers "City of New York" and "City of Paris." Designed and built in 1887-'88 for the Inman and International Steamship Company, Limited. Length, 560 ft. ; breadth, 63 ft. ; gross tonnage, 10,500. (In August, 1889, the "City of Paris" performed the passage from Queenstown to Sandy Hook in 5 days, 19 hours, 18 mins. ; the best day's run being 509 knots, and the mean speed for the whole voyage 20·04½ kts.)

Full Model of Single Screw Steamer "America." Designed and built in 1883 for the National Steamship Company. Length, 432 ft. ; breadth, 51 ft. ; gross tonnage, 5,600. (In June, 1884, the "America" performed the passage from Sandy Hook to Queenstown in 6 days, 14 hours, 18 mins. ; the mean speed for the whole voyage being 17·8 knots. In 1885, during the Russo-Afghan War preparations, the "America" was chartered by the British Government and equipped as an Armed Cruiser.)

Full Model of Twin Screw Steamers "Frederica," "Lydia," and "Stella." Designed and built in 1890 for the London and South Western Railway Company. Gross tonnage, 1,016. Speed, 19½ knots. (On Admiralty list for war purposes.)

5324 The Fairfield Shipbuilding and Engineering Co., Limited, *Fairfield, Govan, Glasgow.*

## MODELS OF STEAMSHIPS.

- (i.) T.S.S. "Normannia." Owned by the Hamburg American Packet Co., and forms one of that Company's Express Atlantic Service, calling weekly at Southampton. Best passage during 1890 was 6 days 10 hours 55 mins. Built in 1890.
- (ii.) S.S. "Alaska." Owned by the Guion Steamship Co., and sailing under their flag between Liverpool and New York. Built in 1881. Best passage 6 days 18 hours 37 mins. in September, 1882.
- (iii.) H.M.S. "Magicienne." Steel wood-sheathed Torpedo Cruiser, carrying six 6" guns and 12 Q. F. guns. This is also a model of the sister ship "Marathon," launched by Princess Beatrice in August, 1888.
- (iv.) P.S. "Empress." Owned by the L. C. and D. Railway Company, and built for service between Dover and Calais. This is also a model of the sister ships "Victoria" and "Calais-Douvres." These boats have crossed the Channel in less than an hour.
- (v.) P.S. "Queen Victoria." Owned by the Isle of Man Steam Packet Co., and engaged with the "Prince of Wales" (of which this is also a model) in the Company's Liverpool and Douglas Service. They accomplish the journey between these ports, a distance of 70 knots, in 3 hours 15 minutes.

5324—*continued.*

- (vi.) P.S. "Adder." Owned by Messrs. G. and J. Burns, and maintains their summer daily daylight service between Glasgow and Belfast. This is a very fast steamer, and averages a speed of over 19 knots on service.
- (vii.) I.Y. "Livadia." Built for H.I.M. the late Emperor of Russia to the designs of the late Admiral Popoff, as an improvement on the form of his circular armourclads. Draws about 8 feet of water, and is propelled by three screws driven by three independent sets of engines.
- (viii.) S.Y. "Valfreyia." Built as the "Lady Torfrida" for the late Sir William Pearce, M.P., since purchased by Mr. Bayard Brown and re-named.
- (ix.) "Alexandra." The Red Cross Society's Ambulance Stern Wheeler, built for the Ambulance Service with the late Nile Expedition.

Sundry photographs of engines and vessels under steam, also many half models, &c.

**5325 Maxim-Nordenfelt Gun and Ammunition Co., Limited, 32s Victoria Street, S.W.**

In this Kiosk, the Maxim Rifle Calibre Automatic Machine Gun, described on page 489 (Exhibit No. 5135), may be seen in action. The rapidity of fire varies according to the ammunition used, but from 600 to 650 rounds per minute may be considered as the average rapidity.

*Note.*—Visitors will be admitted to see the firing on payment of 6d. each.

**5326 Wilkinson Sword Co., Limited, 27, Pall Mall, S.W.**

Miniature Ammunition. Adapted to Magazine Rifle, for teaching Magazine practice and short range firing.

**5327 The Babcock & Wilcox Company, 114, Newgate Street, London, E.C.**

Water Tube Safety Marine Steam Boiler, suitable for 210 lbs. working pressure. Total Heating Surface, 2,108 square feet. Capacity, 500 I.H.P., with Triple Expansion Engines.

**5328 Siemens Brothers & Co., Limited, 12, Queen Anne's Gate, Westminster.**

Model of telegraph ship "Faraday."  
 Projector, and hand-lamp, as used for Suez Canal illumination.  
 Yard-arm reflector, fitted with eight glow lamps, 16 c.p.  
 Yard-arm reflector, fitted with one glow lamp, 100 c.p.  
 Distributing box for connections in electric light wires on board ship.  
 Collection of electric light fittings for ships.  
 Samples of patent carbon-contact switches (various sizes).  
 Four motors, electric, fitted with ventilating fans (various sizes).  
 Ammeters, Service pattern of Royal Navy, and voltmeters for use on board ship.  
 Marine galvanometer, complete with stand, scale, &c.

5328—*continued.*

|                                                                  |   |   |   |
|------------------------------------------------------------------|---|---|---|
| Quantity dynamo exploder, Service pattern.                       |   |   |   |

| Test table                                                       | „ | „ | „ |

It now only remains to enumerate the several "Outside" Exhibits, and these it will be convenient to classify under the heading—

## GROUNDS.

### 5330 **George Tyzack, South Shields.**

Tyzack's Improved Patent Triple Grip Anchor (about two tons weight).

### 5331 **N. Hingley & Sons, Limited, Netherton Iron Works, Dudley, and 76, King William Street, London, E.C.**

Anchors of various types, including Admiralty, Rodger's Box-stock, and Trotman's Patterns.

Hingley's Patent Self-canting Anchor.

Hall's ditto.

Mooring Swivels, Heavy Cable, &c.

### 5333 **Henry Castle and Sons, Ship Breakers, Baltic Wharf, Millbank, S.W.**

Seats, Chairs, Rotary Chalôts, Gong Stands, &c. Manufactured of Teak and Oak from old Navy Ships which have been broken up.

### 5334 **MODEL OF H.M.S. VICTORY.**

The Model, built by Messrs. Campbell Smith and Co., under the supervision of Mr. J. Farquharson (late of the Admiralty), is as perfect a representation of Nelson's celebrated Flagship as can possibly be made. The outside shows the ship complete from waterline to bulwarks and from figure head to taffrail.

The Public will enter the Ship by the Entry Port and pass in to the Middle Deck, thence down by the ladder to the Lower Deck, one side of which is shown as it was on the morning of Trafalgar, with guns cleared for action, &c. On the other side is shown the Mess Tables and Stools and Hammocks; all the details being as realistic as it is possible to make them.

From the Lower Deck the Public will descend to the Orlop Deck and Cockpit, where Nelson died.

The last scene has been faithfully executed by Mr. John T. Tussaud (Madame Tussaud and Sons); and represents the dying hero surrounded by the following officers and others:—The Rev. Dr. Scott, Mr. Burke (Purser), Mr. Chevaillier (Steward), Dr. Beatty (Surgeon), and Captain Hardy, who has just come from off deck to take leave of his gallant Commander.

The arrangement of this group has been taken from the celebrated picture by Devis, now in Buckingham Palace.

The guns and carriages are exact copies of the originals used at the Battle of Trafalgar.

The masts are represented by stumps only, it having been found impossible to carry out all the details of masts, sails and rigging; but in all other respects the model is an exact duplicate of the glorious old ship which carried Nelson to Victory and Death.

### 5335 **Maudslay Sons & Field, Lambeth and East Greenwich.**

Part of a boiler front in one piece, flanged entirely by hydraulic pressure for H. M. S. "Theseus."

**5336 Navy Boats.**

(i.) 30-ft. Steam Cutter, complete with gun and torpedo fittings, awning, &c.

(ii.) 30-ft. Pulling Cutter, complete with stores and fittings.

(iii.) Admiral's Galley, complete with stores and fittings.

*Lent by the Lords Commissioners of the Admiralty.*

**5337 W. L. Byers, 51, West Sunnyside, Sunderland.**

Patent "Reliance" Stockless Anchor, weighing about two tons.

**5338 Sir William Thomson's Apparatus for giving Distinctive Characteristics to Fixed Lights.**

This proposal for giving distinctive character is shown for ten varieties in the following table :—

| Number of eclipses in each | Description of the eclipse. | Time from beginning to end of each group |
|----------------------------|-----------------------------|------------------------------------------|
|----------------------------|-----------------------------|------------------------------------------|

clock in periods of 30 seconds, being 25 seconds light and 5 seconds dark ; iron column, ladder, and platform. Height from base to focal plane 20 feet. This Light is occasionally shown red.

**5340 Self-righting Water Ballast Lifeboat,** fitted with two sliding keels (full size), 37 ft. long, 8 ft. wide, and rowing 12 oars double banked ; mounted on its transporting carriage.

*Lent by the Royal National Lifeboat Institution, 14, John Street, Adelphi, W.C.*

**5341 MODEL OF THE EDDYSTONE LIGHTHOUSE.**

*Designed by J. J. Webster, M.I.C.E.*

*Built by D. Charteris, Page Street, Westminster, S.W.*

This Model is a full size representation of the new Eddystone Lighthouse, as designed by Sir James N. Douglass, F.R.S. Its external appearance is precisely similar to the original structure, even the courses and size of the stones being accurately copied. The height from the ground to the top of the lantern roof is about 170 feet. The base is 44 feet in diameter, and 19 feet high ; the curved structure above the base is 35 feet 6 inches in diameter at the bottom, and 19 feet in diameter at a point 6 feet below the lantern platform. From this

It now only remains to enumerate the several "Outside" Exhibits, and these it will be convenient to classify under the heading—

## GROUND.

### 5330 George Tyzack, *South Shields.*

Tyzack's Improved Patent Triple Grip Anchor (about two tons weight).

### 5331 N. Hingley & Sons, Limited, *Netherton Iron Works, Dudley, and 76, King William Street, London, E.C.*

Anchors of various types, including Admiralty, Rodger's Box-stock, and Trotman's Patterns.

Hingley's Patent Self-canting Anchor.

Hall's ditto.

In the description of the construction of the Lighthouse, it should have been stated that the outside covering is of cement upon a steel lathing known as Expanded Metal Lathing, recently introduced into England by J. F. Golding, and made by the British Metal Expansion Company of West Hartlepool.

A Caisson for submarine foundations is also shown made of cement upon an expanded metal foundation.

them.

From the Lower Deck the Public will descend to the Orlop Deck and Cockpit, where Nelson died.

The last scene has been faithfully executed by Mr. John T. Tussaud (Madame Tussaud and Sons); and represents the dying hero surrounded by the following officers and others:—The Rev. Dr. Scott, Mr. Burke (Purser), Mr. Chevaillier (Steward), Dr. Beatty (Surgeon), and Captain Hardy, who has just come from off deck to take leave of his gallant Commander.

The arrangement of this group has been taken from the celebrated picture by Devis, now in Buckingham Palace.

The guns and carriages are exact copies of the originals used at the Battle of Trafalgar.

The masts are represented by stumps only, it having been found impossible to carry out all the details of masts, sails and rigging; but in all other respects the model is an exact duplicate of the glorious old ship which carried Nelson to Victory and Death.

### 5335 Maudslay Sons & Field, *Lambeth and East Greenwich.*

Part of a boiler front in one piece, flanged entirely by hydraulic pressure for H.M.S. "Theseus."

**5336 Navy Boats.**

- (i.) 30-ft. Steam Cutter, complete with gun and torpedo fittings, awning, &c.
- (ii.) 30-ft. Pulling Cutter, complete with stores and fittings.
- (iii.) Admiral's Galley, complete with stores and fittings.

*Lent by the Lords Commissioners of the Admiralty.*

**5337 W. L. Byers, 51, West Sunnyside, Sunderland.**

Patent "Reliance" Stockless Anchor, weighing about two tons.

**5338 Sir William Thomson's Apparatus for giving Distinctive Characteristics to Fixed Lights.**

This proposal for giving distinctive character is shown for ten varieties in the following table:—

| Number of eclipses in each group. | Description of the eclipse. | Time from beginning to end of each group of eclipses. |
|-----------------------------------|-----------------------------|-------------------------------------------------------|
| One .....                         | Long.....                   | 3 seconds                                             |
| One .....                         | Short .....                 | $\frac{1}{2}$ second                                  |
| Two .....                         | Short-short .....           | 3 seconds                                             |
| Two .....                         | Short-long .....            | 5 "                                                   |
| Two .....                         | Long-short .....            | 5 "                                                   |
| Three .....                       | Short-short-short .....     | 5 "                                                   |
| Three .....                       | Short-short-long .....      | 7 "                                                   |
| Three .....                       | Short-long-short .....      | 7 "                                                   |
| Three .....                       | Long-short-short .....      | 7 "                                                   |
| Four .....                        | Long-short-long-short ..... | 5 $\frac{1}{2}$ "                                     |

The specimens shown by the apparatus are "long-short-short" by gas, and "short-short-long" by incandescent electric light.

**5339 Chance Bros. & Co., Limited, Birmingham.**

**Harbour Occulting White Light** of the Fifth Order for 360° of the newest Chance type, with occulting shades actuated by a spring clock in periods of 30 seconds, being 25 seconds light and 5 seconds dark; iron column, ladder, and platform. Height from base to focal plane 20 feet. This Light is occasionally shown red.

**5340 Self-righting Water Ballast Lifeboat**, fitted with two sliding keels (full size), 37 ft. long, 8 ft. wide, and rowing 12 oars double banked; mounted on its transporting carriage.

*Lent by the Royal National Lifeboat Institution, 14, John Street, Adelphi, W.C.*

**5341 MODEL OF THE EDDYSTONE LIGHTHOUSE.**

*Designed by J. J. Webster, M.I.C.E.*

*Built by D. Charteris, Page Street, Westminster, S.W.*

This Model is a full size representation of the new Eddystone Lighthouse, as designed by Sir James N. Douglass, F.R.S. Its external appearance is precisely similar to the original structure, even the courses and size of the stones being accurately copied. The height from the ground to the top of the lantern roof is about 170 feet. The base is 44 feet in diameter, and 19 feet high; the curved structure above the base is 35 feet 6 inches in diameter at the bottom, and 19 feet in diameter at a point 6 feet below the lantern platform. From this

534I—*continued.*

point the structure swells out to a diameter of 24 feet at the platform, upon which is erected the lantern to receive the lighting apparatus. The lantern is 14 feet in diameter, and around it is a gallery 5 feet wide ; it is 16 feet 6 inches high, and is surmounted by the wind vane, which is 8 feet long.

Nearly 100 tons of iron and steel have been employed in the erection of the Model, the main supports of which are firmly attached to strong anchor plates embedded in cement concrete 20 feet below the surface of the ground, so that the stability of the structure is placed beyond doubt. A convenient and efficient system of Lifts has been provided, and Visitors will be allowed to ascend to the platform, and to go within the lantern to inspect the lighting apparatus, &c.

The Lighthouse will be illuminated at night by a powerful Electric Light, as described below. The actual light in the original structure is by means of oil.

**Description of the Light exhibited in the Model of the Eddystone Lighthouse by Messrs. Chance Bros. & Co., Limited, of Birmingham.**

5342 Double Group-Flashing Dioptric Light of the Fourth Order, composed of Chance refracting lenses only, subtending a vertical angle of 83 degrees, arranged for an electric arc of the type used at St. Catherine's Lighthouse, Isle of Wight, the fluted carbons being 65 millimètres diameter, as introduced by Sir James Douglass. The Light revolves in periods of 30 seconds, the two flashes being separated by an interval of about 4 seconds, the groups by an interval of about 21 seconds, the whole revolution occupying 180 seconds. The revolving carriage is actuated by a spring clock of the Kenward-Hopkinson type.

5343 The "Heroine," a North Sea Trawler of 40 tons. This smack belongs to the Port of Yarmouth, and has been engaged for several years in the Deep Sea Fisheries in the North Sea. She returned from her last voyage in January, 1891, having lost her mizen mast and a great part of her bulwarks in a gale of wind.

She is rigged as a ketch, and is shown with her rigging and gear complete, and fully equipped for trawling. The trawl is shown as made fast when sailing. The trawl, carrying with it as much sometimes as 100 fathoms of rope, has to be "got," *i.e.*, drawn to the surface, by manual labour. The capstan and "dandy winch," used for "getting the gear," remain undisturbed on the deck. The "Heroine" carried a crew of four men, and each of her voyages would extend over two months. The cabin has not been disturbed, and shows the condition, so far as fittings are concerned, in which the craft went to sea on her last voyage. The smack's boat is on deck. It was smashed by the same sea which carried away the bulwarks. The bulwarks and the mizzen mast and rigging have been restored.

*Lent by the Mission to Deep Sea Fishermen, Bridge House, 181, Queen Victoria Street, E.C.*

5344 Mast, Lantern, and Illuminating Apparatus of a Floating Revolving Light.

Full-sized Working Model of the Lighting Apparatus now in use on board the "Tongue" Light Vessel, moored in one of the Thames Entrances, showing how the Light is fitted around the Mast, and the Lamps are made to revolve.

*Lent by the Corporation of the Trinity House, London.*

- 5345 Old Cressett Burner.** This is the actual "Cressett" or grate for a beacon light which was at St. Agnes Light House, Isles of Scilly, in the year 1680, and in which a coal fire was burned every night from sunset to sunrise. The structure on which it is erected represents the top of St. Agnes Light House at the time the "Cressett" was in use.

*Lent by Mr. Dorrien Smith, of Tresco Abbey, Scilly*

- 5346 Automatic Revolving Beacon Light** for harbours and rivers, burning night and day for three weeks or more without attention. Adopted by the Trinity House, the Commissioners of Northern Lights, &c., &c. Silver Medal, Fisheries Exhibition, 1883.

*Exhibited by John Trotter & Co., 7, Great Winchester Street, E. C.*

- 5347 Messrs. Siemens Brothers & Co., Limited.** Holophote, Admiralty pattern, electrically controlled and worked from a distance, with Automatic lamp.

- 5348 A Full-sized Gas and Bell Buoy** of the Second Class, in use in the Trinity House Service. This buoy is constantly alight when at the station, and will contain enough gas to last about two months.

- 5349 Buoys.** The four Buoys moored in the Lake, one at each corner, are duplicates of buoys actually in use in the Trinity service. They belong to what is called the 2nd class and are 10 feet in diameter.

*Lent by the Corporation of the Trinity House, London.*

### **5350 ST. JOHN AMBULANCE ASSOCIATION.**

First Aid Station for the use of the public.

ROBERT NAIRN, Esq., M.R.C.S., L.R.C.P.

ARTHUR GALE, Esq., M.R.C.S., L.R.C.P.

Mr. A. ELLIS, Superintendent-in-Charge.

One or more members of the St. John Ambulance Brigade will be on duty every day, except Sunday, from 10 a.m. until 10 p.m.

JOHN FURLEY, Esq.,

*Hon. Director.*

### **5352 PANORAMA OF THE BATTLE OF TRAFALGAR.**

*Painted by Chevalier Philipp Fleischer* (who also painted the Battle of Waterloo). The size of the canvas is 310 feet by 32 feet 6 inches, and depicts the Fight at the moment when Lord Nelson received his death wound.

The building has been erected under the direction of Mr. R. E. Tyler, F.R.I.B.A., of 71, Gower Street, W.C.

### **THE ARCTIC REGIONS.**

- 5353 An Illustration of the Voyage of H.M.S. "Investigator,"** under Commander M'Clure, during the discovery of the North-West Passage, 1850—3. The scene reproduced represents the ship "Investigator" nipped in the ice-pack on October 5th, 1850; and the sledge parties, under Lieutenant S. Gurney Cresswell, prepared to leave the ship on their attempt to reach the mainland over the ice floes. The representation of ice and snow, and the effects of luminous colour being an amalgamation of natural tints giving a facsimile of the Aurora Borealis, are produced by an elaborate arrangement of mechanism specially designed by Messrs. J. Lyons & Co., Limited, for the Royal Naval Exhibition. On view each day from 10 a.m. till 10 p.m.

5354

## SHOOTING GALLERY.

The exterior is copied from the entrance to a mosque at Adjoudhya, near the military cantonment of Faixabud in Oudh; and the interior is a representation of Crusoe's Island, across which numerous animals and birds are kept in motion by Machinery. Visitors entering the building walk over the deck of a vessel and fire across the water at the moving objects on the land.

## MODEL WORKING DAIRY.

5351 **London and Provincial Dairy Company, Head London Offices:** *Halkin Street West, Belgrave Square, London, S.W.; Chief London Branches: Avenue Farm, Brixton Hill, S.W., and 9, Queen's Road, Lancaster Gate, W.; Country Dairy Farms: Whistley, near Devizes, Wiltshire.*

(i.) A representative "Working Dairy," fully equipped with modern machinery, appliances, and utensils for practically demonstrating the manufacture of butter, creams, cheese, &c., in which will be found (ii.) Milch cows. (iii.) Milk in its natural state as yielded by healthy and well-fed cows. (iv.) The medically recommended sanitary means adopted by the exhibitors as a security against adulteration and infectious contaminations for preserving, conveying, and distributing milk and cream in sealed glass bottles for the use of infants, invalids, families and others. (v.) Condensed and preserved milk and cream specially prepared for ship, camp, and hospital requirements. (vi.) Creams—raw Devonshire, fruited, iced, and other varieties. (vii.) Butters made without being touched by the hand, fresh and cured. (viii.) Cream and other cheeses. (ix.) Koumiss peptonised milk, goat's milk, &c. (x.) Curds and whey, milk soda, butter milk, and other dairy foods and beverages. (xi.) Poultry and eggs—selected specimens from the domesticated and wild fowl. (xii.) Honey, &c. Processes:—(xiii.) Butter churning, making, working, moulding, and printing in all its branches. (xiv.) Cream raising and making and moulding in variety. (xv.) The separation of cream from milk. (xvi.) Cheese making. (xvii.) The effectual system (Gray's) of cooling and preserving the properties of milk. (xviii.) The preservation of butter and other dairy products by ice refrigeration. (xix.) Machines and instruments for testing the richness and purity of milk, cream, butter, &c. (xx.) The sanitary safeguards adopted by this Company in the production and distribution of milk and dairy products to the public, and the economic system of payment for same by tickets. (xxi.) Hill's Automatic Dry Cold Storage Chamber for preserving all kinds of perishable articles, in which the temperature can be maintained at any degree above or below freezing. (xxii.) Hill's Small Ice-making Apparatus without motive power, suitable for the production of block ice, and for cooling liquids in hot climates.

"The PRODUCE of the COW is the FIRST ALIMENTARY SUBSTANCE of MANKIND."

Pure Fresh MILK, CREAM, BUTTER,  
EGGS, &c., from our own Farms, supplied to  
Families and others in any quantity, twice and thrice  
Daily to all parts of London.

Special attention is invited to the medically recommended system adopted by  
this Dairy of supplying Milk for Infants, Invalids, and the Household in Sealed  
Glass Bottles, without extra charge, and also to the new system of Payment by  
Tickets, thus effecting a saving of 15 per cent to the Consumer.

As a guarantee of the high reputation of this Dairy it may be  
mentioned that upwards of 150 GOLD and SILVER MEDALS and  
other PRIZES have been awarded for the PURITY, RICHNESS,  
and EXCELLENCE of its PRODUCTS at the leading London,  
Paris, and other Exhibitions.

Detailed particulars of the above with Price List and Samples will  
be forwarded on application to the Head Offices: HALKIN STREET  
WEST, BELGRAVE SQUARE, LONDON, S.W., or at the WORKING  
DAIRY as below.

**VISITORS** to the Royal Naval Exhibition are respectfully solicited  
to inspect our "Working Dairy," opposite the Grand Stand,  
wherein Butter Making, &c., is daily demonstrated, and where also  
Milk, Creams, Ices, Fruits, Biscuits, Cakes, and other light Refreshments are  
purveyed at fixed prices.

the  
Saloon  
Tender  
in  
2 hours.

**AVERAGE PASSAGE 7 TO 7½ DAYS.**

The **Norddeutscher Lloyd** Line has admittedly the finest fleet of modern fast Steamers upon the New York Service, and it maintains a well-established reputation for **Safety, Speed, and Comfort**. It carries the largest total number of Saloon Passengers, and a large proportion of the United States Mails for Great Britain, which are assigned only to the fastest vessels available.

Amongst other advantages are an absence of overcrowding, *two passengers only* being berthed in each state-room (even during the busiest season), which is large enough for four persons. An excellent Cuisine. A convenient port of embarkation, Southampton being only two hours from London by special train, and in ready connection with Paris and the Continent generally.

West-end Agency—32, COCKSPUR ST., CHARING CROSS, } LONDON.  
City Agency—5, FENCHURCH ST., E.C., }  
And at MANCHESTER and SOUTHAMPTON.

## THE SOCIETY'S NATIONAL WORK.

NO Shipwreck or Disaster of the Sea can occur without the promptest charitable aid being available for the Shipwrecked Sailor himself, or the urgent necessities of his desolate Widow and Orphans, &c., at the hands of the Society, as the National Maritime Relief Organisation of the Empire, with about 1,000 Local Agencies, administering its ever-ready help upon the broadest basis of Christian Charity.

Through this National Institution the wrecked Survivors are thus instantly cared for *on the spot* and at once forwarded home; and the bereaved Dependents of the Drowned immediately *sought out* and helped in their need.

The Society embraces, in addition to its above more charitable functions, a Thrift-encouraging Self-help Section, in which some 50,000 Fishermen and Mariners are providently enrolled, at nominal payments, as Beneficiary Members.

It is, also, the National Institution granting Rewards for Saving Life, imperilled through Shipwreck, on the High Seas or Coasts of India and the Colonies.

Annually relieved, 10,000 Persons; and Total Number, 430,000 Persons.

CONTRIBUTIONS IN AID OF THE SOCIETY'S NATIONAL OBJECTS, &c., are very earnestly requested, and will be most thankfully received by the Society's Honorary Representatives and Agents; by the Bankers, Messrs. Williams, Deacon & Co., Birchin Lane, London, and other London and Country Bankers; or by the Secretary, W. R. Buck, Esq., at the Society's Central Office.

Central Office—Sailors' Home Chambers, Dock Street, London, E.

With about 1,000 Honorary Agents, stationed at every Port and Fishing Town in the United Kingdom, as well as Inland, at Ports of Call for British Vessels Abroad, and in the Colonies.

# ROYAL ALFRED AGED MERCHANT SEAMEN'S INSTITUTION.

ESTABLISHED IN 1867,

To give a HOME or a PENSION to the Merchant Sailor  
when Old, Destitute, and Friendless.

105 Inmates at the Home, Belvedere, Kent.

230 Pensioners at their Homes in the United Kingdom.

1,000 Sailors, whose only other relief was the Workhouse,  
have been either Inmates or Pensioners.

230 Needy Applicants are now on the books.

*Patron*—ADMIRAL H.R.H. THE DUKE OF EDINBURGH, K.G.

*President*—R. S. DONKIN, ESQ., M.P.

# ROYAL HUMANE SOCIETY.

Instituted 1774. Supported by Voluntary Contributions.

*Patron*—Her Most Gracious Majesty THE QUEEN.

*Vice-Patron*—H.R.H. the DUKE of CAMBRIDGE, K.G., G.C.M.G.

*President*—His Grace the DUKE of ARGYLL, K.G., K.T., F.R.S.

Honorary Rewards are granted for Saving Life from Drowning in all British Possessions.

Pecuniary Rewards are granted within an area of Thirty Miles around the Metropolis.

During the Skating Season, experienced Icemen are provided to prevent loss of life in the various waters about London; and Boats are in daily attendance, morning and evening, to prevent fatal results attending Accidents to the enormous number of Bathers in the Serpentine.

Nearly Three Hundred Places in and around London are furnished with Life-Saving Apparatus to rescue persons from Drowning.

The Society has for the past nine years encouraged Swimming competitions with "reference to Saving Life from Drowning," and Prizes are annually given for proficiency in them at various leading Schools and Training Ships selected by the Committee.

The Society is known throughout all the civilised world, but the pecuniary support it receives is quite inadequate to its usefulness, and it is necessary to remind the inhabitants of London that during a severe winter the Society has to incur a large outlay in finding ice-boats, ladders and ropes, for the protection of those who venture on dangerous ice; also for the wages and equipment of Icemen.

Life Governor.....TEN GUINEAS. Annual Governor.....ONE GUINEA.

Donations or Subscriptions will be thankfully received by Capt. I. W. HOME, Secretary, at the Offices, 4, Trafalgar Square, London, W.C.; or by Messrs. PRESCOTT, DIMSDALE, CAVE, TUGWELL & Co., Bankers, 50, Cornhill.

*Patron*—Her Most Gracious Majesty the Queen.

*President*—His Grace the DUKE OF NORTHUMBERLAND, K.G.

*Chairman*—SIR EDWARD BIRKBECK, Bart., M.P., V.P.

*Secretary*—CHARLES DIBDIN, Esq., F.R.G.S.

## A P P E A L.

**T**HE Committee of the Royal National Life-Boat Institution earnestly appeal to the British Public for Funds to enable them to maintain their

**300 Life-Boats now on the Coast**

in the most perfect state of efficiency. This can only be effected by a large and permanent annual income.

The Expenditure in 1890 was largely in excess of the Receipts.

Since 1824 the Institution has granted rewards for the saving of upwards of **35,500** lives on the Coasts of the United Kingdom.

The average cost of a fully-equipped Life-Boat, with Transporting Carriage, Life-Belts, etc., is **£700**.

---

*Annual Subscriptions and Donations will be thankfully received by the Secretary, Charles Dibdin, Esq., at the Institution, 14, John Street, Adelphi, London, W.C.; Messrs. Coutts & Co., 59, Strand, and by all the other Bankers in the United Kingdom.*

# MISSION TO DEEP-SEA FISHERMEN.

## PATRON.

**Her Majesty the Queen.**

*Treasurer and Chairman of Council :*

THOMAS B. MILLER, Esq.

*Chairman of Finance Committee :*

HENRY A. CAMPBELL, Esq.

*Chairman of Hospital Committee :*

FREDERICK TREVES, Esq., F.R.C.S.

**OBJECTS OF THE MISSION.**—The Physical, Social, Moral, and Spiritual Benefit of Fishermen in the North Sea and other Waters.

Ten Mission and Hospital Vessels are now afloat, and an Eleventh is on the Stocks.

Annual Income required for general purposes £21,000 per annum, or nearly £30 for every working day.

The Press on the Mission (quoted from recent Review Notices of the Offices of the Society, price 1s., or post free, 1s. 3d., or at the Society's Stall in the ASYLUM LADDITION):—

"This excellent Mission."—*Academy*.

"The Mission to Deep-Sea Fishermen has done good and noble work."—*Daily Chronicle*.

"Has been fruitful in the rescue of seamen from lives of sin and misery."—*Aberdeen*.

*Methodist Times*.

"This deserving Institution."—*Glasgow Herald*.

"Its history is a romance of noble effort crowned with success."—*Aberdeen Journal*.

"Has done excellent and important work."—*New York Herald*.

"Doing a great work."—*Birmingham Daily Gazette*.

**Contributions may be sent to the Secretary**

**(ALEXANDER GORDON, Esq.), Bridge House, 181, Queen Victoria Street, London, E.C.**

**"WHAT CHEER O? or, the Story of the Mission,"**  
— general purposes £21,000 per annum, or nearly £30 for every working day.

"A mighty influence for good."—*Bradford Observer*.

"A genuine effort of humanity."—*Leitch*.

"One of the most remarkable philanthropic enterprises of recent times."—*Methodist*.

*Nautical Magazine*.

"One of the most original and successful Missions of modern times."—*Methodist*.

*Recorder*.

"A splendid Christian work."—*Christian*.

"An enterprise so benevolent and useful commends itself to all who are able to help."—*Chiltenham Examiner*.

SEE EXHIBITS, HOWE GALLERY, Allotment No. 147.

# SEAMEN'S HOSPITAL SOCIETY, ("DREADNOUGHT")

**FREE TO THE WHOLE MARITIME WORLD.**

# IMPORTANT TO OWNERS & CAPTAINS OF IRON SHIPS.

All Nautical Men visiting the Royal Naval Exhibition should not fail to call at  
**STAND 189, COOK'S GALLERY,**  
AND SEE

## THE PAGET COMPASS. THE AZIMETER.

## THE COOPER & WIGZELL SEA SOUNDING APPARATUS.

The above are three Standard Instruments which should be included in the Specifications of all new Vessels as they contain patented improvements of great value not possessed by any others, and are indispensable aids to safe navigation and quick passages.

**HENRY HUGHES & SON,**  
**MARINE OPTICIANS,**  
**59, FENCHURCH STREET. LONDON.**  
Telegraphic Address—"AZIMUTH, LONDON."

*After a series of exhaustive tests against the principal Anti-friction Metals of the world made by Government Commissioners and leading engineering experts,*

## MAGNOLIA ANTI-FRICTION METAL

HAS PROVED VASTLY SUPERIOR TO ALL RIVALS,  
and is now being extensively used by LEADING RAIL-  
WAY SYSTEMS AND ENGINEERS, ROLLING MILL,  
ELECTRIC LIGHT, STEAMSHIP COMPANIES, &c.,

**In all Parts of the World.**

*Simplicity, Durability, Economy, and Uniformity  
combined.*

"MAGNOLIA" will keep journals cool where all others fail.

"MAGNOLIA" increases the tractive power.

"MAGNOLIA" is the only metal that protects and does not cut or wear journals. It enamels them.

Address the **MAGNOLIA ANTI-FRICTION METAL CO. of GREAT  
BRITAIN**, 75, Queen Victoria Street, London, E.C., who will on appli-  
cation forward Illustrated pamphlet containing detailed reports.

N.B.—See that the Trade Mark and Name are stamped on each Ingot, and use no other.

 The attention of Visitors to the Exhibition is called to the interesting exhibits of  
"MAGNOLIA" in both the *Seppings* and *Camperdown* Galleries.

Gold Medals and Highest Awards at all great Exhibitions.

# "WOODITE" AND ITS USES.

"WOODITE" is an elastic and flexible material, reported upon and highly approved by Sir E. J. Reed, K.C.B., M.P., which can be made of varying degrees of elasticity and hardness, adapted to the various purposes for which it is required. The material is now being rapidly utilised as a superior substitute for RUBBER, LEATHER, ASBESTOS, and other substances, and it will, from its peculiar and valuable properties, supply a long-felt want in every branch of mechanical industry. Cubes for protecting ships' sides, buffer surfaces, boats, &c. "Woodite" sponge for anti-torpedo cables and buoyancy purposes; also "Woodite" buoyancy filling for watertight compartments, about half the weight of cork, reported on and recommended by Sir Nathaniel Barnaby, K.C.B., and F. K. Barnes, Esq. (see Lord Brassey's "Naval Annual" for 1889).

IT IS CLAIMED FOR "Woodite" that, when in the form of sheeting or special kinds of valves, washers, ram rings, &c., being of a very tough and strong nature, it will not stretch or "give," nor become sticky or soft under heat, steam, or pressure; and that it will also withstand the action of "CRANE'S OIL," hot grease, and all other lubricants; and is not affected by bilge water, acids, ammoniacal liquor from Gas Works, or by refuse from Oil Refineries, Distilleries, or Tanneries; thus rendering it specially serviceable in all cases where these destructive elements come into operation.

Used in all the principal Government Arsenals, Dockyards, Railways, and Engineering Firms in all parts of the world.

PATENTEES AND MANUFACTURERS

T. WESTHORP & CO.,

WEST INDIA DOCK ROAD, LONDON, E.,

AND AT FALCON WORKS.

This OAKUM has been in use since 1852, and the yearly increasing demand for same proves it to be the best Oakum obtainable.

CAUTION.—It should be mentioned that since the demand for machine-picked has so largely increased, many of the vendors of hand-picked have sent out their packages imitating in every way possible the Patent Machine-picked Oakum.

Every Bale bears Name and Trade Mark.

See STAND No. 61, Camperdown Gallery.

# JESTY & CO.'S PATENT ANTI-FOULING COMPOSITION FOR SHIPS' BOTTOMS "STILL HOLDS THE FIELD."

No. 2 A.  
For  
IRON BOTTOMS.

No. 2 B.  
For COPPER or  
WOOD BOTTOMS.

Price, in Gallon or Half-Gallon Tins, 21/- per Gallon; in Quarts, 22/-.  
Protective Varnish, as a Foundation Coat, 8/- per Gallon.

The price is high, but the quality is higher.

By Comparison it is Cheaper than the Cheapest Anti-Fouling Composition in the Market.  
A vessel's bottom will keep cleaner and for a far longer period than when coated with any other Composition.

To prove this one trial only is sufficient.

This Anti-Fouling Composition is in great and increasing demand by Steam and Sailing Ship Companies, Yacht Owners and others, and by most of the Fishing Smack Fleets in the Kingdom.

Contractors to the Admiralty and War Department.

SEND FOR ILLUSTRATED LIST OF

JOHN BLAKE'S Patent Self-Acting HYDRAULIC RAMS

For RAISING WATER for the Supply of Towns, Villages, Irrigation, Railway Stations, Mansions, Fountains, Farms, &c.

No cost for Motive Power, which is obtained from a Stream of Water passing through the Ram.
No Oiling or Packing required. Made in Sizes to raise from 300 to 500,000 gallons per day. Will force to a Height of 1,500 feet.

SPECIAL RAMS for HIGH FALLS to send up One-third of the Water passing through them.

This View represents a ram worked by impure river water, whilst pumping pure water from a well and forcing it to a small reservoir on the hill, at an elevation of 295 ft. and a distance of one mile, from which reservoir the water is gravitated for fire extinguishing and general requirements of mansion, stables, farm, and village.

BLAKE'S HYDRAULIC RAMS

HAVE BEEN SUPPLIED TO THE FOLLOWING AMONGST OTHERS:—

JOHN BLAKE'S PATENT SELF-ACTING HYDRAULIC RAMS.

FIG. 1.

This Ram raises a portion of the same water that works it.

FIG. 2.

This Ram, whilst worked by a stream of impure water, will pump clean water from a well or spring.

Testimonials for John Blake's Patent Self-Acting Hydraulic Rams.

From Wm. DICKINSON, Esq., Agent to the Most Honourable the MARQUESS OF ABERGAVENNY.—"Eridge Estate Office, Hargate Lodge, Tunbridge Wells, July 3, 1885.—Sir,—I am instructed by the Marquess of Abergavenny to say that the Patent Hydraulic Ram, with over two miles of pipe, forcing water to a height of 230 feet, which you erected at Eridge Castle about nine months ago, has given his Lordship entire satisfaction, and he has every confidence in its continuing to do so.—I am, Sir, yours faithfully, WILLIAM DICKINSON."

From C. PAGE WOOD, Esq., Wakes Hall, Wakes Colne, Essex, January 11th, 1889.—"Sir,—In reply to your inquiry, the Hydraulic Ram you put down for me in 1884 has cost me only 6d. in repairs (or a new stud my blacksmith made); the second Ram you put down to supply an off-hand farm has been running three years and has cost not a penny for repairs; the third and largest Ram you put down two months ago, which is for the supply of water to my neighbours, is running satisfactorily. All three Rams throw up more water than you guaranteed. From inquiries I have made from friends who have Rams of other makers, I am convinced of the superiority of yours, and my third order is a proof of my good opinion. My abundant water supply is the greatest possible comfort to me. Yours faithfully, C. PAGE WOOD."

VILLAGE WATER SUPPLY.

From J. B. McCALLUM, Esq., C.E., Borough and Water Engineer, Blackburn, November 1st, 1886. Guide (Borough of Blackburn) Water Supply.—"Dear Sir,—Following is the short report I promised to send as to the work performed by the Hydraulic Rams—supplied by you to the Blackburn Corporation—after they had been in operation sufficient time to take proper observations. The district of Guide—population about 500—in the Borough of Blackburn, is situated above the highest reservoir of the Blackburn Waterworks, and had no regular water supply until last July, when the Water Committee caused two of your Patent Hydraulic Rams to be put down and worked by water from a reservoir having a varying but maximum head of 34 ft. 3 in. on the rams—the waste (clean) water gravitating to a lower adjacent reservoir. You contracted to supply rams which would force 8,000 gallons per day each through 1,295 yards of delivery pipe to a service tank 170 ft. above the rams, and I am bound to state that the result has considerably exceeded my expectations, as the rams are capable of pumping and have pumped much more water than you promised. The percentage of efficiency exceeds all I expected, and is, in my opinion, much more than is usually obtained from hydraulic rams. From a test I made on September 29th, I found that two rams with $\frac{1}{4}$ in. and $\frac{3}{8}$ in. strokes respectively, supplied with 194,030 gallons per day together pumped 26,090 gallons per day to a height of 170 ft., giving 71.43 per cent. of efficiency, and one ram working at $\frac{3}{8}$ in. stroke and with only 16 ft. of working fall supplied with 154,587 gallons per day, pumped 10,587 gallons per day to the same height, showing 72.75 per cent. of efficiency. At a subsequent test on October 11th, one ram at $\frac{3}{8}$ in. stroke and having 31 ft. 9 in. of working fall supplied with 121,083 gallons per day, pumped 17,583 gallons per day to an elevation of 171½ ft., the efficiency in this case being 79.57 per cent. In arriving at these results the greatest care was taken to positively measure the water, besides having a meter check on feed and delivery pipes. The work carried out by you at Blackburn is substantial and satisfactory in every way, and if any engineer wishes to make his own observations he is at liberty to come here and do so."

JOHN BLAKE,
Blake Street Ram Works, Accrington, LANCASHIRE.

SIMPSON'S PATENT SHIP'S BOAT DISENGAGING GEAR.

The **SIMPLEST** and **STRONGEST** APPARATUS for the purpose.

THERE IS NO GEAR WHICH AFFORDS SUCH CERTAINTY OF SIMULTANEOUS RELEASE.

APPROVED by the **BOARD OF TRADE** under their **NEW RULES**.

Prices for Boats up to 22 ft. £4 s.

" " " 24 " 4 0s.

" " " over 24 " 4 15s.

The gear consists of a bar fitted preferably over the thwarts, and bent at each end in the shape of a hook.

It will be seen that the release is instantaneously and simultaneously effected on simply turning the bar by means of the lever; both hooks being pointed upwards, the rings attached to the lower davit blocks fly free.

By this apparatus a boat can be more easily released before she is water-borne than by any other method, while, at the discretion of those in charge, the attachment may remain perfectly secure until after she is afloat.

The apparatus may, however, be arranged to release a boat either before she is water-borne or not, according to the wishes of the purchaser.

When re-attachment is desired, the ring is pushed against the lower jaw, which yields to admit it, and falls back into position again by its own weight. The attachment is then complete.
